Amazingly Easy Way to get into ELECTRICITY

Don't spend your life waiting for $5 raises, in a dull, hopeless job. Now . . . and . . . forever . . . say good bye to 25 and 35 dollars a week. Let me show you how to qualify for jobs leading to salaries of $50, $60 and up, a week, in Electricity—NOT by correspondence, but by an amazing way to teach, that makes you an electrical expert in 90 days! Getting into Electricity is far easier than you imagine!

Learn Without Lessons in 90 DAYS

Lack of experience—age, or advanced education bars no one. I don't care if you don't know an armature from an air brake—I don't expect you to! I don't care if you're 16 years old or 48—it makes no difference! Don't let lack of money stop you. Most of the men at Coyne have no more money than you have.

Railroad Fare Allowed

I will allow your railroad fare to Chicago, and if you should need part-time work I'll assist you to it. Then, in 12 brief weeks in the great roaring shops of Coyne, I train you as you never dreamed you could be trained . . . on the greatest outlay of electrical apparatus ever assembled in any electrical school . . . costing hundreds of thousands of dollars . . . real dynamos, engines, power plants, autos, switchboards, transmitting stations . . . everything from doorbells to farm power and lighting . . . full-sized . . . in full operation every day!

PREPARE FOR JOBS LIKE THESE

Here are a few of hundreds of positions open to Coyne-trained men. Our free employment bureau gives you lifetime employment service.

Armature Expert
up to $100 a Week
Substation Operator
$60 a Week and up
Auto Elec., $110 a Week
Inventor . . Unlimited
Maintenance Engineer
up to $150 a Week
Service Station Owner
up to $200 a Week
Radio Expert up to $100 Wk.

houses, etc., etc. That's a glimpse of how we make you a master practical electrician in 90 days, teaching you far more than the average ordinary electrician ever knows and fitting you to step into jobs leading to big pay immediately after graduation. Here, in this world-famous *Parent school*—and nowhere else in the world—can you get such training!

Jobs, Pay, Future

Don't worry about a job. Coyne training settles the job question for life. Demand for Coyne men often exceeds the supply. Our employment bureau gives you a lifetime service. Two weeks after graduation Clyde F. Hart got a position as electrician for the Great Western Railroad at over $100 a week. That's not unusual. We can point to Coyne men making up to $600 a month. $60 a week is only the beginning of your opportunity. You can go into radio, battery, or automotive electrical business for yourself and make up to $15,000 a year.

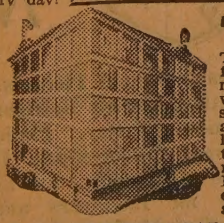
Get the Facts

Coyne is your one great chance to get into electricity. Every obstacle is removed. This school is 30 years old—Coyne training is tested—proven beyond all doubt—endorsed by many large electrical concerns. You can find out everything absolutely free. Simply mail the coupon and let me send you the big, free Coyne book of 150 photographs . . . facts . . . jobs . . . salaries . . . opportunities. Tells you how many earn expenses while training and how we assist our graduates in the field. This does not obligate you. So act at once. Just mail coupon.

Get This FREE Book

NO BOOKS No Printed Lessons

No books, no baffling charts . . . all real actual work . . . right here in the great Coyne school . . . building real batteries . . . winding real armatures, operating real motors, dynamos and generators, wiring



Now In Our New Home

This is our new fireproof, modern home wherein is installed thousands of dollars' worth of the newest and most modern Electrical equipment of all kinds.

You'll want to keep this book beside your dictionary

MASON LONG

Your dictionary tells you what words mean and how to spell them, but it gives you little help on how to arrange them effectively—that is not its purpose. With an adequate grammar beside your dictionary, you can make sure you are correct.

Here, for the first time, is such a grammar. Not a collection of the dry rules of school days, but a grammar that meets the adult needs of your business and social life—a book for today.

You've Always Wanted a Book Like This on

Using nouns for clarity or emphasis—plurals, possessives, compound forms.

Correct use of pronouns.

Use of adjectives and adverbs to get exact shades of meaning; comparing; placing for forcefulness.

Verbs as motive power of the sentence. Regular and irregular forms.

Correct use of *whom, as, like, shall, will,* etc. Avoiding common errors.

How words are combined and arranged to increase their force. Punctuation for clarity.

A College Grammar

By MASON LONG

Associate Professor of English Literature
Pennsylvania State College

WE all want to talk clearly, logically, forcibly. We want to avoid those mistakes which are so easy to make but which give the impression of carelessness or ignorance. In writing, particularly, all of us properly feel embarrassed when our errors in grammar are pointed out to us.

A Grammar Such As You Have Never Before Seen

This practical volume completely answers your questions about correct use of our language according to the latest accepted standards. Much of the material has never before appeared in a book of this nature. You will find authoritative information on the countless new usages that have grown up in recent years.

Examples That Help You Phrase Your Ideas Properly

Every point is illustrated by specific examples, more numerous, more varied, and more helpful by far than in any other book of this kind. They have been selected from the whole range of English literature as well as from current journalistic writing. You will find them of immense help in phrasing your ideas.

We Never Realized

that so many people felt in need of a good grammar. But the way Long's *A College Grammar* has taken hold is a revelation. Here are a few typical comments it has brought:

A grammar for use, consistently written for the user of language."—*Peabody Journal of Education.*

The most complete, concise, and interesting treatise of grammar I have ever seen."—*Charles E. Buck, Literary Counselor, Lever Bros. Co.*

Will be found useful by any person who wishes to have at hand a manual of accepted contemporary usage."—*Columbus Dispatch.*

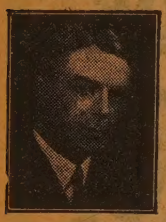
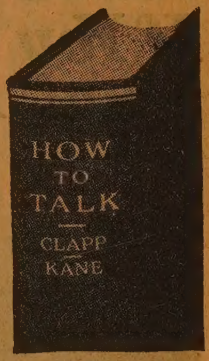
Everything You Need to Know to Improve Your Speech

in social life, business, public speaking, is now explained in this great book—a complete guide to the fullest development of your powers of expression.



HOW TO TALK

A Manual of Effective Speech



By JOHN MANTLE CLAPP and EDWIN A. KANE

A treasury of ideas and methods for IMMEDIATE USE in Business Meetings, Interviews, Selling, Committee Work, Club Meetings, After-Dinner Talks, Public Speeches, and every other situation of personal or business life.

35 Chapters
647 Pages

Thousands of men and women have already sent for this new handbook of speech because, for the first time, it deals with problems of expression in an intensely practical way. It tells clearly just what you want to know; just how to use the priceless information it offers; covers completely every situation, and explains how to master that situation. The following partial contents indicate the wide range of the subjects treated:

OVERCOMING YOUR PERSONAL DIFFICULTIES

Analyzing Your Own Case. Practical methods you can apply at once.
Improving Your Vocabulary. Accuracy in using words.
Enunciation, Pronunciation. Speaking plainly and correctly.
Developing Your Voice.
Self-Training in Language. Adjusting expression to audience and occasion.
Self-Training in Delivery. Nervousness, gestures.

PUBLIC SPEAKING

Getting Ready to Speak. How great speakers prepare.
Facing Your Audience. Main points to keep in mind.
Informal Addresses.
Formal Addresses.
Festive Occasions. Good form. The Toastmaster.
The Plea for a Cause. Getting action.

YOUR BUSINESS SPEECH

Speech In Your Business Life. Avoiding abruptness.
Conversations With Your Employer. Making suggestions.
Conversations With Your Employees. Avoiding misunderstandings. Giving orders.
Business Conferences. Getting results.
Service Conversations. Complaints. Adjustments.
Trading Conversations. Methods of the skilled salesman. Buying.

YOUR ACTIVITIES IN CLUBS AND OTHER ORGANZATIONS

Committee Work. Chairman.
Meetings–Parliamentary Practice. Motions, Managing Discussion.

HOME AND SOCIAL LIFE

Your Family Circle. The art of companionship.
Social Conversation. Talking with strangers.

it is a veritable speech-encyclopedia . . . presented so simply and so directly and with such a wealth of illustrative material that it is self-teaching."—**M. M. Hoover,** *Assistant to the Director, University Extension, Columbia University.*

". . . should be kept for frequent reference and studied by everyone who is forced to meet and consult a number of people or has to address groups . . ."—**William F. Anderson,** *Best & Company.*

". . . it is one of the most stimulating and interesting books I have ever read—a handbook of courtesy and tact . . ."—**B. F. Young,** *Assistant General Auditor, New York Telephone Company.*

NO ADVANCE PAYMENT

Fill in and mail coupon at right. The book will be sent you, delivery charges prepaid. Keep "How to Talk" for five days. Read a few pages here and there. Then decide whether it gives you the help you need. If you don't feel that it will prove one of the best investments you ever made in your life—just send it back and that ends the matter. Otherwise send $5.00 in full payment.

FILL IN, TEAR OUT AND MAIL

Sent for 5 Days' Free Examination

Are Your Opportunities Slipping By?

THE years roll by faster and faster seemingly. More and more frequently come those moments when we regret the opportunities we allowed to slip by. When we realize that we have made little or no progress; that we have acquired no new mental equipment, and no increased capacity for business or social life.

You must *do* something if you expect to accomplish anything worthwhile. But you will need perseverance and study.

Columbia University, as one of the world's leading educational institutions, urges you to use part of your time in study. Not solely for the attainment of greater efficiency in business, but for a fuller social life, and for the real joy of having a more intelligent point of view. Whatever your objectives may be, and wherever you live, splendid studies that lead to these objectives are available through Columbia Home Study Department. The range of subjects is wide.

COLUMBIA UNIVERSITY

Offers Home Study Courses of University Grade in the Following Subjects:

Accounting	Chemistry	European History	Magazine Article Writing
Algebra	Child Psychology	Fire Insurance	Marketing
American Government	Classics	French	Mathematics
American History	Composition	Geometry	Personnel Administration
American Literature	Dramatic	German	Philosophy
Applied Grammar	English	Government	Photoplay Composition
Astronomy	Various Languages	Grammar	Physics
Banking	Lyric Poetry	Greek	Psychology
Biblical Literature	Contemporary Novel	Harmony	Psychology in Business
Biology	Drafting	High School Courses	Public Speaking
Botany	Drama	History	Religion
Boy Scouting	Drawing and Painting	Investments	Secretarial Studies
Business Administration	Economics	Italian	Short Story Writing
Business English	Economic Geography	Juvenile Story Writing	Slide Rule
Business Law	English	Latin	Sociology
Business Mathematics	English Literature	Library Service	Spanish
Business Organization	Essay Writing	Literature	World Literature, etc.

IN this country we are in the midst of an adult education movement. University home study courses are one of the important factors in this progressive movement, for they offer expert guidance under educators qualified to direct.

Our courses have been prepared by our instructors to meet the special requirements of study at home. While all basic material essential to the full understanding of each subject is fully covered, sufficient elasticity is allowed to permit adaptation to the individual needs of the student. Everyone who enrolls for a Columbia course is personally taught by a member of the University teaching staff. Special arrangements can be made for group study.

The University will send on request full information about these home study courses. A coupon is printed below for your convenience. If you care to write a letter briefly outlining your educational interests our instructors may be able to offer helpful suggestions. Mention subjects which are of interest to you, even if they are not listed here, as additions to the courses offered are made from time to time.

HIGH SCHOOL AND COLLEGE PREPARATORY COURSES

COLUMBIA University Home Study Department has prepared courses covering the equivalent of four years of High School study. This complete High School or College Preparatory training is available to those who can not undertake classroom work. We shall be glad to send you our special bulletin upon request.

COLUMBIA UNIVERSITY, University Extension—Home Study Department, New York, N. Y. Please send me full information about Columbia University Home Study Courses. I am interested in the following subject:

Success in 1 month for Lesher!

"Before starting course I did not know a thing about Tenor Banjo, but within one month after I received first lesson, I was playing with a good dance orchestra. Course was so easy that my progress was very rapid."—L. V. Lesher, Braddock, N. Dak.

$85 a Week for McCarty!

"Before taking up course, I was making $18 weekly as a clerk; knew nothabout music, but made first 'paid' performance in less than 8 weeks after starting. Today I owe salary of $85 a week as professional Tenor Banjoist to your excellent training."—Kenneth McCarty, South Haven, Mich.

Over $278 in Spare Time for McGriff!

"Before starting course I had never had my hands on a Banjo. I now have a $278 Banjo bought with extra money made by playing, also play weekly at picture show and for dances at country club, too."—J. P. McGriff, Hawkinsville, Ga.

The Book that started Lesher, McGriff and McCarty is *Now Ready for* YOU!

PROBABLY like thousands of others whom I have helped find themselves, you have always thought of the Tenor Banjo as just a pastime—just a remarkable, melodious instrument for those who have "talent." ... But stop a minute and think of earning $15, $20 or $25 a week EXTRA SPARE-TIME MONEY for two, three or four nights' fun! Look at the men pictured above. None of them had ever touched a string—ever read a single note.

I'll Train You at Home in 1 to 3 Short Months

YOU CAN DO what Lesher, McGriff and McCarty have done! Many of my students get off their first tune within half an hour after they receive the big Tenor Banjo you see pictured here. It isn't hard or tedious; instead it's like learning a game. Not one thing stands between you and popularity, good times, scores of new friends—and big EXTRA PAY.

"The Play-Way to Popularity and Big Pay"—that's the FREE book I want you to have. **It will open YOUR eyes—just as it did for Lesher, McGriff and McCarty.** Whatever you've thought about your opportunities and advantages as a Tenor Banjoist before—you'll think again the minute you lift the cover of this remarkable FREE book. It has been the start for hundreds who today are enjoying more fun, popularity and prosperity than they ever dreamed could be possible.

Don't pass this page until the coupon's ready to mail.

Phonograph Records Included, Too—

With your very first lesson I send you this full professional size Tenor Banjo; Phonograph records demonstrating every selection in the course; Banjo Pick, Tuner, Extra Strings — Gain-Time Chart to help you quickly learn notes. Everything you need to learn—everything you need AFTER you learn. Mail the coupon TODAY.

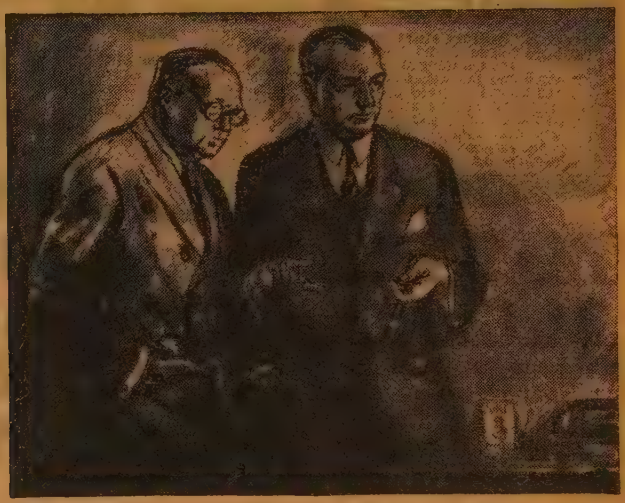
A raise of $50 a month for just *two evenings a week!*

Overpaid at $100 a week



IN looking over our records of the past twenty years we find that a very large proportion of men who enrolled for this Service were receiving from $4,000 to $7,500 at the time they enrolled. A hundred dollars a week is perhaps the most common figure.

Many of these men were overpaid at $100 a week. By that we mean that their employers easily could have substituted younger men for them at smaller salaries. They had reached the hundred dollar figure partly by merit, and partly by little routine increases.

Yet these same men, who were overpaid at $100 a week, are now, in many cases, earning four and five times that much.

These records—which are open for your inspection—suggest two very interesting conclusions:

1. When a man begins to earn from $4,000 to $7,500 he becomes conscious for the first time of his own opportunities and his limitations. He begins to taste the possibility of real money. Yet he realizes, often with a sense of deep discouragement, what a great gap lies between him and the heads of the business. He is making what seemed—when he was twenty—a very satisfactory income. At thirty or

A story that is a warning

IN every big corporation there are men of 35 or 40 who started work there when they were boys. They have 20 years or so of loyal service to their credit; now they are getting $100 a week.

From one standpoint these men have done well. Yet theirs is the most dangerous position in all business.

We know one such man personally. For years he had been getting regular increases. He felt he was getting ahead. Then suddenly the president brought in an efficiency engineer. There was a general house-cleaning; the hundred-a-week man went out. And his place was filled by a youngster just out of college who is now doing the same work for $40 a week.

The old-timer hadn't grown with the company. At 40 he was let out of an overpaid position when he should have been at the threshold of his career.

yet he should be earning $10,000

thirty-five it seems like nothing in comparison with the earnings of the men at the top. He begins to look around eagerly, wondering whether there is any service, any help, that can carry him across the big gap.

2. It is amazingly easy to transform a $100-a-week man into a $10,000 man. So little is required that the wonder is that more men do not avail themselves of the opportunity. The difference between a modest salary and a good salary is not entirely a matter of brains. Not a matter of pull. Not even a matter of long experience.

Often by using the Institute Service in only a very small way, a $100-a-week man has found all that he needed. Many have never completed the Course at all, but merely used the volumes and lectures, and the personal consultation service, as occasional helps when the need arose. In case after case the impressive thing is that very little was required to give a man the extra assets that he required.

To men earning between $4,000 and $7,500 a year

We have learned from experience just what type of men—in age, situation and earning power—can get the most out of our training in the shortest possible time. We should like to hear, either by personal letter or by coupon, from those that feel there is a gap between them and the really big rewards of business. We will answer very frankly. It is to our advantage not to have any man enroll for this service unless it can help him very much and very quickly and at very small comparative cost.

For men vitally interested in bridging the gap between $100 a week and $10,000, we have prepared a little booklet called "Forging Ahead in Business." The coupon will bring it.

Executive Training for Business Men

Be The Man Behind The Camera

Earn $2,000 to $12,000 a Year

ADVENTURE—thrills—more action in a week than the average man sees in a lifetime. When you're a motion picture cameraman the world is YOURS! You can travel, if you wish, or there are thrills galore close to home. As a news-cameraman you can be on the spot when things happen—there's no limit to the things you can see and do. Then, of course, there are the big picture studios where you come in daily contact with all the movie stars and actually *take* the pictures that millions of people see.

Adventure—sure—plenty of it—AND BIG PAY, TOO! Expert cameramen earn from $60 to $250 a week. Thousands of opportunities await the trained cameraman—opportunities offering fascinating work, big pay, and unlimited chances for advancement. Best of all, you need no previous experience to qualify for one of these well-paid positions—to train for the position of your choice.

Billion - Dollar Photographic Field Needs You!

Motion picture photography is just *one* of the many big-paying branches of the billion-dollar photographic industry. All over the country today there's a crying need for expert projectionists — for photo-finishers and trained commercial photographers. No matter which branch of the work you select there are sure to be scores of positions awaiting you—positions paying $2,000 to $12,000 a year and offering unlimited opportunities for advancement.

We Train You at Home in Your Spare Time

Pick the branch of photographic work you like best—we'll train you for it, in your spare time. Previous experience unnecessary. Age or lack of education no obstacle. If you can read and write English we'll teach you, through our simplified Home-Study Method, all there is to know about Motion Picture Photography, Projection, Commercial Photography or Photo-finishing. Our Employment Bureau helps you secure the position of your choice FREE of extra charge!

Send Today for Free Book!

Let us tell you how you can quickly qualify as Motion Picture Cameraman, Projectionist, Commercial Photographer, or Photo-finisher. Our big FREE book gives details about this billion-dollar industry, and explains how you can easily step into a well-paid position. Fill in the coupon—check off the branch of photography you're most interested in and mail it NOW! It means happiness—success for you!

YOUR SUCCESS COUPON

"GET ON Uncle Sam's PAYROLL"

POST OFFICE CLERKS
CITY MAIL CARRIERS
RURAL MAIL CARRIERS
RAILWAY POSTAL CLERKS
BOOKKEEPERS STENOGRAPHERS
INCOME TAX AUDITORS
INSPECTORS OF CUSTOMS
CLERKS IN GOVT. OFFICES
at Washington, D.C. and elsewhere
PROHIBITION AGENTS

$1260 to $3400 a Year

These are steady positions. Strikes, poor business conditions, lockouts or politics will not affect them. U. S. Government employees get their pay for full twelve months every year. There is no such thing as "HARD TIMES" in the U. S. Government Service.

RAILWAY POSTAL CLERKS

Railway Postal Clerks now get $1900 the first year regular, being paid on the first and fifteenth of each month. $79.00 each pay day. Their pay is quickly increased, $100 and $150 a year, the maximum being $2700 a year. $112.50 each pay day. They get extra allowance for hotel expenses when away from home.

PAID VACATIONS

Railway Postal Clerks, like all Government employees, are given a yearly vacation of 15 working days (about 18 days). On runs they usually work three days and have three days off duty, or in the same proportion. During this off duty and vacation, their pay continues just as though they were working. When they grow old they are retired with a pension. As Railway Postal Clerks are continually traveling, they have an excellent chance to see the country.

CITY MAIL CARRIERS
POST OFFICE CLERKS

Clerks and carriers get $1700 the first year regular, and automatically increase $100 a year to $2100 with further increase to $2300. They also have 15 days vacation. City residence is unnecessary.

INSPECTORS OF CUSTOMS

Open to men 23 to 45. Commencement salary $2100 a year. Duties: To examine baggage of travelers from foreign countries and to assess customs duties.

WHAT WILL YOU EARN 5 YEARS FROM NOW?

Compare these conditions with your present or prospective condition, perhaps changing positions frequently, kicking around from post to pillar, no chance in sight for PERMANENT employment; frequently out of a position and the year's average salary very low. DO YOU EARN $1900 EVERY YEAR? HAVE YOU ANY ASSURANCE THAT A FEW YEARS FROM NOW YOU WILL GET $2700 OR MORE A YEAR, EVERY YEAR?

GET FREE LIST OF POSITIONS—Fill out the coupon. Tear it off and mail it today—now, at once. DO IT NOW—This investment of two cents for a postage stamp may result in you getting a U. S. Government Job.

MARTIN J. DUPRAW
World's Champion Shorthand Writer. He writes Gregg Shorthand

Put It Down In GREGG

Secretaries who write their dictation in Gregg Shorthand can always read or transcribe their notes quickly and accurately. Because Gregg Shorthand is so much like longhand, it is quickly and easily learned.

Without question a knowledge of shorthand is your surest guarantee of a good, profitable position. More business contacts are established through shorthand than through any other medium. A knowledge of shorthand will also prove useful to you in many ways every day of your life.

A practical writing skill in Gregg Shorthand may be obtained in a few months in any good business school. More than 2000 business schools in the United States are annually teaching Gregg Shorthand to hundreds of thousands of students and sending them out to profitable employment.

Gregg Shorthand is also taught exclusively in more than 90% of all public high schools, Catholic and private schools in the United States that offer instruction in the subject. Gregg Shorthand is the system used by Martin J. Dupraw, World's Champion Shorthand Writer—three times winner of the National Shorthand Reporters' Association Trophy for speed and accuracy.

It Pays to Read

LAW

THE READING OF LAW has brought swift, sure success to thousands of men who without the benefit of this specialized knowledge would probably never have progressed beyond ordinary achievement. A practical working knowledge of LAW is a short cut to personal power in every walk of life.

LAW is of prime importance in every business. A mass of statutes, decisions, rulings—changes from old precedents—new interpretations of commercial law—all make the legal expert a positive necessity in every large business house. Never before were prospects so bright for men who can answer the puzzling legal questions which come up daily. Important executive positions with large salaries are always seeking legal experts.

LAW training often leads to a big executive position, because it enables a man to dictate policies that are legally sound—to make quick, correct decisions on intricate points. Every large corporation has a well equipped legal department, and smaller concerns have their retained legal advisers. The presidents of many corporations (for example: Pullman Company, American Sugar Refining Company, National Biscuit Company, etc.) are law-trained men.

LAW is a stepping-stone to personal prestige and social standing. The successful lawyer, or law-equipped business man, has open a prosperous career in a dignified, influential profession. No other profession opens up greater opportunities. And never before has it been so easy to acquire a thoro law training of university grade.

Full University Course

LaSalle Extension University's faculty of legal experts will train you thoroly in every phase of law. You will get the same subjects as at leading resident universities. You will have text books, lectures, quizzes, illustrative cases, examinations, etc., prepared by leading law professors. You will be directed at every step. Graduate with a degree of LL.B. All this training at home—in spare time only. No need to leave your present position. Membership also includes consulting privileges with all departments of the university—a service not offered by any other institution.

Decide now to be a law-trained man. Get above the ranks—increase your income by increasing your mental capacity.

Get Free Descriptive Booklets

Just mail the coupon and we will send full information about the LaSalle home study course in Law and about our free consulting service. We will also send you a copy of our famous book, "Ten Years' Promotion in One." Send for your copy now.

Why good dancers are popular

Good dancers are good mixers. They create a favorable impression—have ease of manner, a pleasing assurance that wins. No wonder people find them interesting—seek their company!

By ARTHUR MURRAY

World-Famous Dancing Authority

GOOD dancers are always popular—sure of a good time wherever they go!

And dancing is great fun—wonderful exercise. Keeps you happy and healthy—always on your toes and full of pep. Develops self-confidence—enables you to make friends easily—often opens the door to important business and social contacts.

And it's so easy now to be a brilliant, finished dancer, able to do all the newest, smartest steps! For I have developed a remarkable new method of teaching dancing by mail, which is so simple that *you can learn any of the latest steps in one evening*—right at home, in the privacy of your own room, without music or partner!

Easy as A-B-C

With my amazingly simple lessons you start right at the beginning and go through the entire field of social dancing. You learn to master every step from the simple waltz to the newest, smartest steps and all their variations.

You study the lessons in your own home whenever you find time. No one to watch and embarrass you. No expensive private teacher to pay. Yet, almost before you realize it, you will be able to step on the floor with the best dancers of your set—and with as much ease and assurance as if you had been dancing for years!

REGULAR $5.00 COURSE
NOW ONLY $1.98

I have already taught over 400,000 men and women how to dance through this amazingly simple method. Thousands of folks everywhere who used to stay home and miss all the fun are now having the time of their lives. They make friends easily—they're welcome and popular wherever they go.

And I'm so positive that you, too, can become a good dancer and get your full share of fun and popularity through my new, easy method that I'm willing to send you my *regular* $5.00 *course for only* $1.98!

5 Days, FREE Trial

Just mail the coupon below, and the regular $5.00 course will be sent you immediately. When it arrives, pay the postman only $1.98, plus few cents delivery charges. Then use it for five days—study it—practice the steps.

Jean Arthur, Film Star, and Arthur Murray

See for yourself how easy it is to become a finished dancer—sought after, popular—the Arthur Murray way.

Remember—if you're not absolutely delighted with results, simply return the course within the five days' FREE trial period, and *your money will be promptly refunded.*

That's a fair offer, isn't it? *You can't lose!* Don't wait—you owe it to yourself to clip and mail this coupon NOW. Arthur Murray, Studio 963, 7 East 43rd Street, New York.

ARTHUR MURRAY, Studio 963,
7 East 43rd Street, New York.

To prove that I can learn to dance at home, you may send me your famous $5.00 course for only $1.98, plus few cents postage. I understand that if not delighted I may return the course within 5 days and my money will be refunded.

FREE to Bald Men

Clayt Vreeland as I am today. See my head of hair.

Bald Headed Clayt Vreeland as he used to look. Ugh!

One Full Ampoule of amazing Hairerbs fluid which I discovered myself and which grew hair on my head.

This Ampoule is absolutely free. Don't send any money. There is no C.O.D. No charge whatsoever. All I want is an opportunity to show you the fluid with which I grew hair on my own and on other men's heads. Merely mail the coupon below for Free Ampoule.

Here Is How I Used to Look

I was just as bald as this picture. It is a true photograph without any tampering or retouching. It is exactly as I used to look. Then look at the full head of hair I have in the picture on the left! . . . As I have stated so often, I don't know whether I am the first man who discovered this great secret, but I do know I have it, that I grew my own hair and that I am growing hair on the heads of other men.

These are exact untouched photographs of Miss Augustina Raimondo, 2580 E. 25th St., Cleveland, who was almost entirely bald and who had to wear a net covering in the school room. She was a very unhappy young lady. Physicians, hospitals and clinics told her that she would be bald for life. She saw one of our advertisements, became interested and began taking treatments with Hairerbs. The growth of hair was surprisingly fast. A hairy fuzz began to appear after twelve treatments. More hair came steadily until today Miss Raimondo has a full head of hair which is daily becoming more luxuriant. The case is open to investigation by anyone.

Bald Men

It's No Joke to Be Bald

What I accomplished on my own head and on other heads I believe I can do for you, provided you are under 45 years of age and loss of hair was not brought about by burns or scars or other causes leading to absolutely dead hair roots. Anyhow, I must succeed or your money is refunded in strict accordance with my guarantee. No apparatus. My home treatment is simple, and easily applied.

Mail This FREE Coupon!

Mail the coupon today—Right Now—I will send you, immediately, one full Ampoule of my marvelous Hairerbs fluid which I discovered, of which I hold the secret and which grew my own hair on my own bald head.

Besides the Free Ampoule of fluid, I will send photographs, names, addresses of men and women who successfully used my Hairerbs Fluid for dandruff, falling and loss of hair.

The Free Booklet Is for Adults Only—It Will Not Be Sent to Children.

He Will Give You a Real Command of English

Your use of English proclaims you to the world. What you say tells what you are. Your language largely determines your place among successful men. The greater your vocabulary the greater your power of expression and influence upon your fellow men.

Commence now—let Grenville Kleiser teach you through his Mail Course in Practical English, how to

- Enlarge Your Stock of Words—
- Use the Right Word in the Right Place—
- Write Tactful, Forceful Letters, Advertisements, Stories, Sermons, etc.—
- Earn Promotion and More Pay—
- Become an Engaging Conversationalist—
- Be a Man of Culture, Power and Influence in Your Community.

It will take only some of your spare moments at home; no repellent grammar study; each lesson as clear as daylight, and inspiring to the highest degree. The average man of to-day can add largely to his efficiency, influence, and income if he will give a few minutes each day to Grenville Kleiser's fascinating Mail Course in Practical English. Many thousands have done so.

BOOTH TARKINGTON

Distinguished Novelist and Short-Story Writer, Author of "Monsieur Beaucaire," "Seventeen," "Penrod," etc.

"Your course is almost painfully needed by many professional writers and speakers. A student who intelligently follows your course will know what he is talking about when he talks or when he writes. His audience will certainly know, because he will talk well, no matter what his subject."

IRVIN S. COBB

Famous Writer and Humorist

"Any man who helps English-speaking people to a better knowledge of practical English deserves praise and has mine."

FREE—"How to Become a Master of English."

This booklet is absolutely free. It teems with information on English, and Mr. Kleiser's new, common-sense method of teaching it. You will find it of great interest and value. Send the coupon and get it free. No agent will call upon you.

A Completely New

ENCYCLOPAEDIA BRITANNICA

NEW in plan and purpose—entirely recast from cover to cover—the *new* Fourteenth Edition of the Encyclopaedia Britannica is ready. This is the superb "humanized" Britannica which has captured the attention of the whole civilized world.

Three years of intensive effort—the co-operation of 3,500 of the world's foremost authorities—the expenditure of more than $2,000,000 before a single volume was printed—these are merely a few high lights in the preparation of the *new* Fourteenth Edition.

The Last Word in Encyclopaedia Perfection

This *new* Britannica immediately takes its place as the one pre-eminent American work of reference—the last word in encyclopaedia perfection.

Never has there been assembled together in one enterprise such a wealth of learning as is represented by the 3,500 builders of this great temple of knowledge. *All* the universities, *all* the learned professions, *all* the great industries, *all* the pastimes have contributed to the mighty sum.

Knowledge for All

It is a law library for the lawyer, a medical digest for the doctor, a universal history for the historian, a commercial university for the business man—and a compendium of all the arts and sciences for the average reader.

Here is "the cosmos between covers." The whole whirling universe is brought within your grasp, obedient to your hand.

Nothing is too profound to baffle it, and nothing too familiar to escape its informing touch. And on every subject it speaks with the same finality and authority.

All the World's Treasures of Art and Illustration

Among the many new features that will astonish and delight everyone who turns these

Note These Facts

Cost More Than $2,000,00

Over 1,500 Superb Illustrations

Greatest Knowledge Book Ever Produced

Written by 3,500 of the World's Most Eminent Authorities

Remember—this is a new book. Only a small amount of text—material which could not be improved in any way—has been retained from previous editions.

FILL OUT AND

Published!

This handsome bookcase table, made of genuine Brown Mahogany, is included with every set of the new Britannica.

pages is the wealth and beauty of the illustrations. This feature alone marks a tremendous advance. All the world's treasures of art and photography have been laid under tribute to adorn and illuminate the text.

"The most exciting book of the year," asserts a leading critic, and the whole world is echoing that verdict.

This is a Britannica year! Here is your opportunity to join the thousands who will buy this new edition, now, while it is new—fresh from the presses. You owe it to yourself to learn further details regarding this magnificent series of volumes.

Extremely Low Price

And due to the economies of mass production, the price is extremely low—the lowest in fact at which a completely new edition has been offered for two generations! Easy payments, if desired—a deposit of only $5 brings the complete set with bookcase table to your home.

MAIL COUPON TODAY

These 2 Now FREE!

Be your own master—go in business for yourself—break out of the rut of small pay—escape the slavery of the time-clock—get some of the good things of life: These two FREE books show you how. Dr. Orison Swett Marden blazes the trail toward your independence—then I help you "follow through" to success! Send for these two FREE books today.

"It is yours to choose success or failure," says Dr. Marden.

You can pull yourself out of the Mire of Mediocrity—you can climb the ladder of Leadership—you can make your big dream come true—if you are really in earnest, and will follow the advice given in these two free books.

Whether you are a youthful beginner, who has not yet made his mark in the world, or a dismayed and dissatisfied struggler who has met with rebuffs, discouragements and failures, Dr. Marden's book plants your feet with firmness upon the Path of Progress that leads straight to the Land of Opportunity and Achievement.

Here are a few of the important things you get in this brilliant little book—sure success-helps that spur you on to a better living and a bigger bank account: 1. Are You Just a Cog or a Complete Machine? 2. The Great Man-Developer. 3. Making Every Shot Tell. 4. Don't Be a Leased Man. 5. Your Right to Independence. 6. Planning to Reach the Top. 7. The Compelling Motive to Expand. 8. The Real Spur to Achievement. 9. Pilot Your Own Ship 10. Don't Let Well Enough Alone.

Two million copies of Dr. Marden's books have been sold. They are printed in twenty different languages. They are endorsed by some of the world's most successful men.

So, get this little book by Dr. Marden. Read it—*over and over again.* I promise you that it will be the best success tonic you ever took—that it will give you the *spirit* and the *power* to interpret, understand and profit by your desires, your talents and your opportunities.

With the Marden book, you receive—also free—another book which tells how, with less than $5 capital, I started in my spare time and built up a new kind of a real estate business that netted me more than $100,000 in less than five years. And it tells how I have helped hundreds of men and women pull themselves out of the rut of hard work and small pay— build up independent businesses of their own—make more money than they ever made before.

What Big Men Say

John Wanamaker said: "I would, if it had been necessary, have been willing to have gone without one meal a day to buy one of the Marden Books."

Charles M. Schwab said: "Dr. Marden's writings have had much to do with my success."

J. C. Penney said: "I owe a great deal of my success and the success of the J. C. Penney Co., to Dr. Marden."

Lord Northcliffe said: "I believe your writings will be of immense assistance to all ambitious men."

Judge Ben B. Lindsay said: "Dr. Marden is one of the wonders of our time. I personally feel under a debt of obligation to him."

Chauncey M. Depew said: "Your writings are of great value for the encouragement and instruction of men and women."

R. J. Sanders, 55 years old, made $1,057.05 his first four months in a small Tennessee town of only 1,500 population. *E. G. Baum*, 50 year old bookkeeper, out of a job, got my free book, followed its advice, made $8,000 his first year in my kind of a real estate business. *Mrs. McGinley* of Texas had an invalid husband, got my book, and made a fine profit on her first deal which was a $35,000 sale. *Robert L. Abell*, former Illinois painter, followed my instructions and averaged

Books

monthly earnings of $335 in his spare time only. *P. W. Budinik*, former Michigan barber, made $950 his first six weeks—an average of $158.33 a week. *A. V. Arnold*, a railroad man, started in a strange town and made $1,500 his first two weeks. *Tony Maurell*, former New Jersey barber, made $4,133 in less than three months. And if you want to read about really big earnings, there's *Thomas E. Mone, Jr.*, insurance solicitor, who cleaned up $40,000 in two years. And think of *Gus Roeder* and his wife, who ran a hot-dog stand. I started them in real estate and they say they have made $150,000 in four years. And I have a letter on my desk from *Samuel Seifer*, who hits the highest record of all. He says that his second year in my kind of a real estate business netted him $70,000.

These earnings may sound big to you, but they are all true. You can't ignore *facts*. You can't deny *truth*. And I have hundreds of such letters on file in my offices for inspection at a moment's notice.

There is no room here to tell you any more about the astounding success of men and women, of all ages from 21 to 74, and from all walks of life, who have changed their whole business lives through the reading of my free book.

So, get this book now. It is filled with money-making business facts and stories of business success that will amaze you. You don't have to take my word for this. You don't have to take anyone's word. Just get my free book of facts and proof. Then judge for yourself.

Mail the coupon today. Get these two books, which have done so much for others. Remember they do not cost you anything. But as soon as you read them you will realize that they can do more for your future business success than any other books you ever read.

Don't wait, dont delay. Don't cheat yourself out of the help these two books contain. Get the facts. Learn the truth. Consider the proof. And do it now—before it is too late. Address President, American Business Builders, Inc., Dept. W.A.66, 205 East 42 Street, New York.

HIGH SCHOOL COURSE IN TWO YEARS

YOU ARE BADLY HANDICAPPED if you lack High School training. You cannot attain social or business prominence. You are barred from a successful business career, from the leading professions, from well-paid civil service jobs, from teaching and college entrance. In fact, employers in practically all worthwhile positions demand High School training. That's the way you are handicapped if you lack this vital training. But you can remove this obstacle to your success. The American School Course *meets every requirement.*

FIT YOURSELF FOR A BIG FUTURE

This Course will broaden your mind, and make you keen, alert and capable. It is complete, simplified, and gives you the same training as a resident school will. Lessons are written specially for home study and competent instructors guide and coach you from start to finish. It absolutely gives you the knowledge that now stands as a barrier between you and desirable positions.

USE IDLE HOURS ONLY. Most people *idle* away *fifty* hours a week. Probably you do, too. Use only one-fifth of that time for studying and you can easily remove your present handicap *within two years.* The question of your success hinges on whether or not you will devote a part of your spare time to this home study course of High School training.

TRAINING DECIDES PAY There is only *one known way to increase your earning power*—only one way to get the position you want and the pay you want. *You must train.* The difference between $35.00 and $100.00 a week is measured only by training—knowing HOW. Let us assist you to acquire the knowledge you need. Our training does not interfere with your present work. Check and mail the coupon for full particulars and Free Bulletin.

Says one man who sent for this book:
"I owe my all to the International Accountants Society. My income has increased over 300%."
Hugh J. Davey, Jr., *Auditor*, Robbins Body Corp., Indianapolis, Ind.

How to become an Accountant

THOUSANDS of ambitious men are earning more money today because they know Accounting.

Accounting is the uncrowded profession. It is a highly paid profession. For years the opportunity in Accounting has been extraordinary. The demand for capable Accountants exceeds the supply. Men who are adequately trained in Accounting are so rare that if one concern does not recognize their value and reward it, there are scores of others that will.

Accounting gives you a new viewpoint in business. It gives you a bird's-eye view of business as a whole. It gives you fresh enthusiasm for your work—enthusiasm which comes from your new insight into financial programs.

At 45 he made a fresh start

You will find inspiration in the story of Mr. A. T. Hull of Bristol, Virginia.

In the spring of 1918 he was working at a meagre salary. Suddenly, at the age of 45, he realized that he had wasted many of the best years of his life.

Mr. Hull decided to make up for his years of lost opportunity. He enrolled with the International Accountants Society. It was the beginning of a new life for him. Upon completion of the course, he became Auditor of Emory & Henry College in Emory, Virginia, at the same time building up a private practice in Public Accounting work. He received his certificate as a Certified Public Accountant and *increased his income 100½*.

His sons did not wait until they were 45

His own success assured, Mr. Hull resolved that his two sons should not waste the golden years of opportunity as he had done.

They enrolled, and later Mr. Hull wrote us: "One of my sons has just secured his C. P. A. certificate from the State of Virginia and is now practicing with me. The other is now taking your Course, and I expect him shortly to secure a certificate and attain full membership in the firm."

The same opportunity that brought success to Mr. Hull, and opened the doors of opportunity to his two sons, is yours for the asking.

Fortunately you can learn Accounting while you carry on your regular business. The International Accountants Society has made this possible. In only a few hours a week, and at moderate expense, you can learn this fascinating profession.

The International Accountants Society was organized in 1903. It is conducted by a group of prominent Certified Public Accountants, among whom are Jefferson H. Millsaps, A. B., B. S., LL. B., J. D., C. P. A., member of the American Association of University Instructors in Accounting; Paul W. Pinkerton, Ph. B., C. P. A., formerly President of the American Society of Certified Public Accountants; and William T. Sunley, C. P. A., formerly President, Michigan Association of Certified Public Accountants.

Send for the facts

The interesting 80-page book shown above gives you all the facts.

If you are the sort of man who wants to lift himself forever out of the class of men of which there are too many, into the class of men of which there are too few, you should send for this book immediately. Do not put it off. Do not delay. There is no cost. There is no obligation.

Mail the coupon now.

Get this FREE BOOK if you would like to know

How you can get a better position
How you can become an accountant without interfering with your present work
How you can increase your income
How you can shorten the path to success

ACCOUNTANCY

now taught by Practical home study instruction

and

Personal Coaching

Prepare for C. P. A. Exams.

A Bigger Job in Accounting

Executive Position in Business

There is no dispute as to the value in business of a thorough knowledge of accountancy. Here's a new method of acquiring this knowledge through spare time home study, with the tremendously important added advantage of personal help from a professional accountant in your community.

THE important question to be decided, whether you plan to follow a business or professional career is, "How shall I acquire a thorough knowledge of accounting?" There have been, and still are, many cumbersome, tedious and costly methods of obtaining an Accountancy training. It remained for a group of well-experienced educators and accountants to develop a new method of teaching this subject to the busy man or woman who cannot wade through useless material to get the underlying principles. All unnecessary books and materials are eliminated. You receive instruction of University Grade during your spare time at home with *personal coaching* by a local professional accountant.

This plan enables you to secure a thorough and practical training, without interference with your business or social activities, at a very nominal cost. The opportunity to study Accountancy under the personal guidance of a seasoned accountant residing in your city is a privilege that is offered by no other institution.

Many other important features, such as printed *loose-leaf lectures* (instead of bound books to confuse you) issued one at a time as you progress in your course . . . the right to cancel all further payments, should it become imperative for you to discontinue the course . . . make the Institute Plan of Accountancy training the most practical and the most desirable method available today.

Equipped with adequate educational background, but without previous training, you can prepare for C. P. A. examinations in two years. Shorter courses are offered for those who require simply a working knowledge of Accountancy to qualify for executive positions in business.

AMERICAN INSTITUTE OF BUSINESS ADMINISTRATION

1775 Broadway—General Motors Building **New York, N. Y.**

Mail this coupon today for a copy of booklet, "The Turning Point of a Career," which explains in a very interesting manner the Institute Plan, and the opportunities in Executive and Professional Accountancy. This valuable information is free. No salesman will call upon you.

Does your English Help or Hurt you?

Does your English reveal your lack of education or does it prove that you are a person of culture and refinement? Are you handicapped in your speech and writing or does your command of English rise to meet every occasion and every situation? English is the one tool you must use every day. This tells how you can improve it almost at once.

Sherwin Cody

MANY persons say, "Did you hear from him today?" They should say, "Have you heard from him today?" Some persons spell calendar, "*calender*" or "*calander*." Still others say, "between you and I" instead of "between you and me." It is astonishing how many persons use "who" for "whom" and mispronounce the simplest words. Few know whether to spell certain words with one or two "c's", or "m's" or "r's," or with "ie" or "ei," and when to use commas in order to make their meaning absolutely clear. Most persons use only common words—colorless, flat, ordinary. Their speech and letters are lifeless, monotonous, humdrum. Every time they talk or write they show themselves lacking in the essential points of English.

Every time you talk, every time you write, you show what you are. When you use the wrong word, when you mispronounce a word, when you punctuate incorrectly, when you use flat, ordinary words, you handicap yourself enormously. An unusual command of English enables you to present your ideas clearly, forcefully, convincingly. If your English is incorrect it hurts you more than you will ever know, for people are too polite to tell you about your mistakes.

Wonderful New Invention

For many years Mr. Cody studied the problem of creating instinctive habits of using good English. After countless experiments he finally invented a simple method by which you can acquire a better command of the English language in only 15 minutes a day. Now you can stop making the mistakes in English which have been hurting you. Mr. Cody's students have secured more improvement in five weeks than previously had been obtained by older pupils in two years!

Learn by Habit—Not by Rules

Under old methods, rules are memorized but correct habits are not formed. Finally the rules themselves are forgotten. The new Sherwin Cody method provides for the formation of correct habits by calling to your attention constantly only the mistakes you make.

One of the wonderful things about Mr. Cody's course is the speed with which these habit-forming practice drills can be carried out. You can write the answers to fifty questions in 15 minutes and correct your work in 5 minutes more. The drudgery and work of copying have been ended by Mr. Cody. You concentrate always on your mistakes until it becomes "second nature" to speak and write correctly.

FREE Book on English

A new book explaining Mr. Cody's remarkable method is ready. If you are ever embarrassed by mistakes in grammar, spelling, punctuation, pronunciation, or if you can not instantly command the exact words with which to express your ideas, this new free book, "How You Can Master Good English—in 15 Minutes a Day," will prove a revelation to you. Send the coupon or a letter or postal card for it NOW.

You Can Still Save Money if You Join the Guild NOW!

AT THE present rate of growth, 100,000 men and women will soon enjoy free membership in The Literary Guild. This host of intelligent men and women subscribed for twelve of the year's best books in advance of publication for a single fee, a great deal less than the total retail value of the books they receive.

We cannot tell you the exact amount each member saves in cash. To state the sum in dollars would make you skeptical. Write for the Guild literature today and learn exactly how the economy is effected and how it is passed on to you. It is only by having all of this information before you that you can reconcile the quality of the Guild books with their extremely low price.

You know how the Guild plan works—how Carl Van Doran and the Editorial Board choose one book each month from advance lists *before* publication—and how that book is issued in a special binding and special edition *for Guild members only* on the same date that the regular edition is distributed to the stores. You receive your copy of each book postpaid, before your friends have discovered it and urged you to read it.

Quality is not Sacrificed

The beauty of Guild books has continued to amaze members and non-members alike. No economy is exercised in the production of Guild selections. The best paper and binding materials are always used, specially chosen types and artistically designed covers, and title pages are features of the Guild edition. BLACK MAJESTY was illustrated by Mahlon Blaine; MAGIC ISLAND by Alexander King.

The long awaited novel, THEY STOOPED TO FOLLY, by Ellen Glasgow, was the Guild book for August. Voltaire's CANDIDE was the December selection. CORONET, by Manuel Komroff, was delivered in January. These are all books you *want;* books you will read whether you are a member of the Guild or not. Join the Guild at once and realize a considerable saving on twelve chosen books a year. Get full information *now* and consider the Guild plan at youe leisure.

Mail the coupon at once for your copy of our new booklet absolutely FREE!

The EMPIRE of the LAMP

ALEXANDER dreamed of empire and conquered the Orient. Cæsar pushed his legions to the misty edge of the North, and claimed the world for Rome. The ships of Columbus cruised the coasts of unknown continents and Magellan carried his nation's flag around the globe.

But no empire of conquest or discovery has ever reached as vast an area as the far-flung student organization of the International Correspondence Schools — the Empire of the Lamp.

Not only has this great institution extended its service to more than three and a quarter million students in the United States and Canada; in forty other countries, all over the world, more than half a million men have enrolled for home instruction with the International Correspondence Schools. The study lamps of I. C. S. students are never dimmed. Somewhere they burn always, lighting the way to achievement.

There are over 260,000 I. C. S. students in Great Britain and Ireland, and nearly 150,000 in Latin America. Branch offices of the I. C. S. are maintained in many foreign capitals.

The International Correspondence Schools present an educational service as far-reaching as the mails, and as enduring as Man's desire for knowledge.

INTERNATIONAL CORRESPONDENCE SCHOOLS, Box 4394-D, Scranton, Penna.

Two Million Replies to Want-Ads Every Month

BASED upon a careful check of the Want-Ads received directly at the various offices of THE WORLD, it has been estimated that WORLD WANT-ADS produce 2,000,000 replies a month for advertisers.

It is natural, therefore, that for 47 years THE WORLD has been the outstanding Want-Ad medium of America.

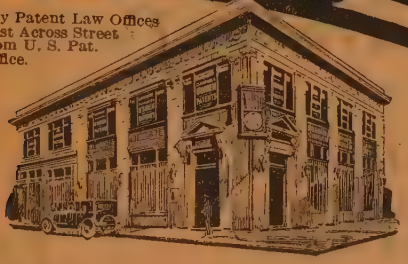
THE WORLD'S Want-Ad Service extends far beyond New York. Employers seeking labor and workers seeking employment all over the country use WORLD Want-Ads for Results.

At the right is a view of my drafting and specification offices where a large staff of experienced experts are in my constant employ.

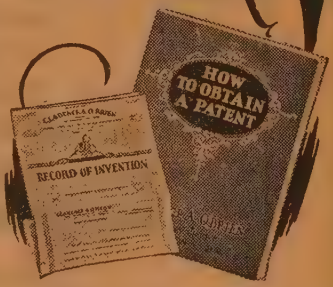
All drawings and specifications are prepared under my personal supervision.

PATENTS

My Patent Law Offices Just Across Street from U. S. Pat. Office.



Inventors *Write for these* Free Books



Protect Your Ideas

If you have a practical, novel idea for a new article or for an improvement on an old one, you should communicate with a competent Registered Patent Attorney AT ONCE. Every year thousands of applications for patents are filed in the U. S. Patent Office. Frequently two or more applications are made for substantially the same idea. In such a case, the burden of proof rests upon the last application filed. Delays of even a few days in filing the application sometimes mean the loss of a patent. So lose no time. Get in touch with me at once by mailing the coupon below.

Prompt, Careful, Efficient Service

This large, experienced organization devotes its entire time and attention to patent and trade-mark cases. Our offices are directly across the street from the U. S. Patent Office. We can proceed in the quickest, safest and best ways in preparing an application for a patent covering your idea. Our success has been built on the strength of satisfactory service to inventors and trade-mark owners located in every state in the Union.

Strict Secrecy Preserved — Write Me in Confidence

All communications, sketches, drawings, etc., are held in strictest confidence in steel, fireproof files. Write me fully and frankly. Your case will have my personal attention. It is probable that I can help you. Highest references. But FIRST—clip the coupon and get my free book.

No Charge for Information On How to Proceed

The booklet shown here contains valuable information that every inventor should have. With it, I will send my "Record of Invention" form, on which you can sketch your idea and establish its date before a witness. Such evidence may later prove valuable. Simply mail the coupon.

Clarence A. O'Brien

Registered Patent Attorney and Attorney-at-Law

Member of Bar of: Supreme Court of the United States; Court of Appeals, District of Columbia; Supreme Court, District of Columbia; United States Court of Claims.

PRACTICE CONFINED EXCLUSIVELY TO PATENTS, TRADE-MARKS AND COPYRIGHTS.

Clarence A. O'Brien,
Registered Patent Attorney,
2422 Security Savings & Commercial Bank Bldg.,
Washington, D. C.

Send me your free book, "How to Obtain a Patent," and your "Record of Invention" form. No cost or obligation.

LAW TRAINING=SUCCESS

This complete 25-volume standard size law library is provided to all students at the time of enrollment.

The Aristocrat of Training Programs

Lesson Guides

Lesson guides are mailed at regular intervals to direct and outline the study of the Course.

Lectures

The Course contains a series of printed lectures written by outstanding national authorities on subjects not ordinarily found in law text books.

Law Bulletins

A Law Bulletin is distributed each month containing the latest Supreme Court decisions on matters of especial business interest—an exclusive Blackstone feature.

WHERE is the man who has not at some time yearned for law training and the success it brings?

The Aristocrat of Studies

Law students are stamped as men of discernment and dignity.

A knowledge of law enhances earning power and advancement. The demand for men trained in the law is growing constantly.

For years the Blackstone Institute, through its home-study law course has been meeting this demand. More than 50,000 substantial men and women have received financial and other benefits from this training. Hundreds of successful attorneys are among our graduates.

The Outstanding Course

Every student immediately receives the nationally known 25-volume Modern American Law Library, cited as "M.A.L." by the courts of last resort. (See illustration above.)

This set of 25 books forms the basis of the Course and also serves as a valuable reference work upon the entire field of law. Many students say this library alone is worth the modest cost of the entire Course.

Elaborate Lesson Material

These lesson units (illustrated in miniature at the left) are sent regularly and they direct the study carefully and call attention to the money-making possibilities of using the principles of law in daily business affairs. Graduates are awarded the LL.B. degree.

The authors of the Course are outstanding authorities, including two justices of the U. S. Supreme Court, deans of eight University law schools, and sixty university law professors and attorneys. These men know law and how it should be taught.

No Exaggerated Claims

No claim is made that the study of the Course will bring a startling increase in income to every student. Yet many students report increases, some as high as 200%.

We do not assert that the Course will enable you to earn from $10,000.00 to $35,000.00 a year, yet many law-trained men earn more.

We do claim that a law training is the best foundation for a successful business or professional career, and that this Course is without a peer in the field of non-resident law instruction.

Get the Facts Today

Complete evidence of the merits and money-making possibilities of Blackstone training is contained in an attractive booklet, "The Law-Trained Man,"—sent free upon request. Ask for your copy today. Use the coupon or address a letter or post-card to the Blackstone Institute, Department 201, 307 N. Michigan Ave., Chicago, Ill.

BLACKSTONE INSTITUTE
Dept. 201, 307 N. Michigan Ave., Chicago

Please send me by mail, and without obligation, a copy of your 128-page book, "The Law-Trained Man," and details of your law course and service.

A Few Interesting Facts About

THE TRAVELERS

The people of the United States began in 1864 insuring themselves in The Travelers against financial loss due to accident.

More than twice as many business and professional men are protected by Travelers Accident Policies than by those of any other company.

Travelers Life Insurance has been since 1865, the choice of those who appreciated guaranteed cost insurance.

Over four and one-half billion dollars for future delivery has been arranged through life insurance now in force in The Travelers.

When you buy your Automobile Liability and Property Damage Insurance in The Travelers, you are in company with the largest group of motorists insured by any company.

The employers of 967,254 people have selected The Travelers to insure their employees for $1,313,246,500 of group life insurance.

Contracts for 67% more liability and compensation insurance are in force with The Travelers than with any other company.

More than 40,000 agents and brokers have chosen The Travelers as the company in which to insure their clients.

The Travelers is deservedly popular among business men who need the protection of Burglary, Boiler and Plate Glass insurance.

A majority of Industrial and automobile accidents, fires, boiler explosions and other casualties can be prevented. To assist policyholders in prevention efforts, The Travelers has an Engineering and Inspection Division with a personnel numbering 690. Since the establishment of this Division the Companies have expended in such service $22,502,724.00.

No policy is any better than the Claim service behind it. To serve policyholders, promptly and efficiently, no matter where they may be, The Travelers has established throughout the United States and Canada, 214 main claim service offices; 1,600 people devote their entire time to this purpose. In addition, thousands of Travelers agents stand ready to render immediate service.

Be a Radio Expert

J.E.Smith
Pres.

I've trained hundreds of fellows at home in their spare time for Big Pay Radio Jobs.

Look at These Earnings

Has Made $10,000 More in Radio

"I can safely say that I have made $10,000 more in Radio than I would have made if I had continued at the old job. When I enrolled with you I didn't know a volt from an ampere. I advise all ambitious young men to get into Radio. There is no greater opportunity."

Victor L. Osgood,
7101 Bay Parkway,
Brooklyn, N. Y.

Making $400 a month

"Before entering Radio I had 15 years as a traveling salesman and made good money, but could see the opportunities in Radio. Believe me, I'm not sorry, for I'm making more money than ever before. I have made more than $400 each month."

J. G. Dahlstead,
1484 So. 15th St.,
Salt Lake City, Utah.

$3,000 a Year

"I cannot give too much credit to the N. R. I. for what I have been able to do in Radio. I have averaged $3,000 a year for the past three years. I am in the Radio business. I consider all the success I have obtained so far due entirely to your training."

Fred A. Nichols,
Hereford, Colo.

Radio's amazing growth is making hundreds of big-pay jobs every year. Trained men are needed in twenty different branches. Here's a field that is growing fast enough to bring success in a year or two. I have doubled, tripled, quadrupled the salaries of men in one year. My book points out the many jobs in Radio. Clip the coupon. Get a copy now. Why be satisfied with anything less than $50 to $250 a week when that's what Radio pays its good men?

So many opportunities many begin making $5 to $20 a week extra almost at once

You don't have to wait one year, two years, not even six months to begin making more money. I'll show you the plans and ideas that are making $5 to $20 a week extra for my students beginning almost the day they enroll. G. W. Page, 1807 21st Ave., S., Nashville, Tenn., made $935 in his spare time while taking the course. No need to worry about money, this is the famous course that pays for itself.

Learn at home in spare time

Don't lose a minute from your job. All I ask is part of your spare time. My practical method of training with six big outfits of Radio parts (almost a complete home experimental laboratory) makes learning at home easy, fascinating, a pleasure. Boys 14, men up to 60 have finished my course successfully. You don't need a high school education. Many of my most successful graduates didn't even finish grades. Furthermore, the day you enroll I'll give you a contract agreeing to refund every penny of your money if you are not satisfied with the lessons and instruction I give you.

Get this valuable 64-page Book AT ONCE

"Rich Rewards in Radio" shows where the big Radio jobs are, what they pay, what others are making, how you can quickly become a Radio Expert. It has started hundreds of fellows on the road to bigger money who thought success was not for them. Get a copy. Not the slightest obligation. Clip, mail the coupon. Do it Now.

Is a High School Education Worth $2.98 to You?

A 60-volume High School Educational Course, complete and up-to-date thoroughly reliable and authentic, for only $2.98, postpaid! Think of it! Read the titles below. Is such a course worth this low price to you? It is excellent for home study—for reviewing forgotten subjects, or for informing yourself in new fields. Seize this opportunity. More than 250,000 sets of these books have been sold. These have gone to ambitious people everywhere in the United States and in many foreign countries. Order your Educational Course today!

TEACH YOURSELF

This High School Educational Course is entirely self-teaching—no instructor is necessary. With determination and application you can secure the essentials of a High School education from these 60 books, as listed at the right. Every book is written so you can understand it easily. You can begin anywhere—read or study any book at your convenience, for each subject is complete in itself. Never has there been a chance like this—a complete High School Course for only $2.98, which is positively all you pay!

HANDY FORM

These 60 books are pocket-sized volumes, measuring 3½ x 5 inches each, and running to 64 pages or 15,000 words of text per book. The type is 8-point—the size used in the average daily newspaper—clear and easy to read. The handy size of these volumes is one of their most desirable features, for you can carry them in your pocket or bag with ease. Make spare moments count! Get this set and make a habit of keeping some of the volumes always nearby!

SEND NO MONEY

Send no money unless you wish to! This High School Educational Course will be sent C. O. D. (at an extra cost to you of only 7c., the post office fee), if you prefer. However, remit $2.98 with the order blank if you like. Canadian and foreign customers must *always* remit in full with order, by draft on U. S. bank or international postal money order.

Columbian Inks

Comment from the Business Manager of a large city daily newspaper using Columbian Ink:

"Am pleased to say that things have been running along so smoothly in our Press Room recently that I had forgotten that we ever had any ink problem on our hands."

The Superintendent of a metropolitan daily says:

"It works clean, prints sharp, has good color, and meets all the requirements of the modern high speed press. A uniform quality has been maintained throughout which eliminates one of the greatest hardships in the Press Room."

COLUMBIAN INKS

COLUMBIAN INKS are manufactured by the only company specializing in inks solely for newspaper printing on high speed rotary or flat bed presses.

The L. Martin Company

Main Office: 45 E. 42nd St., New York

ARTHUR S. THOMPSON, Manager

BREAK THOSE BONDS!

ARE your hands tied by a lack of training? Are you bound down to a routine job because you have never learned to do any one thing well?

Don't be a slave to circumstances all your life. Break loose! Give yourself the chance you've always wanted. There is an easy, fascinating way for you to prepare yourself for a better job and a bigger salary.

No matter where you live, the International Correspondence Schools will come to you. No matter what your handicaps, or how small your means, we have a plan to meet your circumstances.

Don't let another priceless hour of spare time go to waste. Without cost or obligation on your part, let us *prove* that we can help you to win promotion. Mark and mail the coupon for Free Booklet.

How to Order Always order by numbers instead of titles and authors. Write down the numbers of the books you want, as they appear before the titles in this list. Be sure to order at least 20 books at one time ($1 worth); remit at the rate of 5c per book. We pay the postage when remittance accompanies order; postage is added to C.O.D. orders, so remit with order and save postage. Canadian and foreign customers must always remit in advance by international postal money order or draft on any U. S. bank.

Address orders to HALDEMAN-JULIUS PUBLICATIONS, Dept. C-100, Girard, Kansas

Little Blue Books

5¢ EACH Postpaid

Each book measures about 3½ x 5 inches in size. The volumes run from 32 to 128 pages each; most of the books contain 64 pages or 15,000 words of text. Easily readable type. Stiff substantial covers. Uniformly bound in blue stock, titles in black. Books readily fit the pocket, handbag, or satchel. Convenient, durable, high literary standard. Cheap only in price!

Your Pick of 1,500 Different Titles for 5c!

The University in Print

This series, known as the Little Blue Books, which now contains 1,500 *different* titles on all subjects, has also been called The University in Print. These 1,500 books contain more than 20,000,000 words! You can find whatever kind of reading you desire, at a cost of only 5c per book. Dr. Harry Elmer Barnes, eminent sociologist, says of these pocket-sized volumes: "The collection is more than a University in Print, for no university student ever covered as wide a range of material as is included in the 1,500 titles. While the unique service of the Little Blue Books has been to spread real culture among the people, this set of books is cheap only in terms of price. It embraces materials which many a well-read scholar could examine with profit and dignity." Take your pick of this immense list—your choice, 5c per book postpaid!

Byrd Antarctic Expedition Chose Little Blue Books

The Byrd Antarctic Expedition selected this series of Little Blue Books as a desirable complete library to take to theAntarctic Circle, during the exploring expedition which went so far from civilization. These very books have been read by men of the Antarctic Expedition to while away the long hours of the Antarctic night. The compact pocket-size of these books make them especially suitable for any trip—so much can be crammed into such small space. Yet the type is clear and easily readable. The choice of the Byrd Expedition is but another tribute to the general excellence and high literary standard of this world-famous series of Little Blue Books. Make your selection today—any 20 books for $1, and as many more as you like at 5c apiece postpaid!

Complete Set For $45.00!

As a special inducement to readers who wish to secure the complete series of 1,500 different Little Blue Books, we are making a bargain price of $45.00—including all packing and carriage charges—for the full set. For $45 you get 1,500 different books: at this rate they cost you only three cents each! THIS PRICE APPLIES ONLY WHEN A COMPLETE SET OF 1,500 BOOKS IS ORDERED AT ONE TIME, one of each title listed on these pages. Sets cannot be broken at this price. Anything less than a complete set, or any assortment other than one of each of the 1,500 titles, must be paid for at the regular price of 5c per book. For $45, however, you will get a colossal library, with books on scores of subjects, by hundreds of eminent writers. It is a splendid investment. Each complete set includes a genuine black levant leather slip cover at no extra cost. And $45 is all you pay—we pay all packing and carriage charges, no matter where you live.

What a Little Blue Book Is

Understand clearly what a "Little Blue Book" is. A Little Blue Book is one of a series of pocket-sized books, now containing 1,500 different titles, costing only 5c each postpaid to any address in the world. The books are all uniformly bound in stiff blue covers. The size of each book is about 3½ x 5 inches. The books run from 32 to 128 pages; most of the books contain 64 pages. They are printed in eight-point type (about the size used in your daily newspaper). A 64-page Little Blue Book contains 15,000 words of text—a fat nickel's worth! Every book is well-printed and substantially bound. The handy size makes these volumes useful for carrying in the pocket, in the side-pockets of your car, in your suitcase or bag, or for keeping in your desk at the office. Get the Little Blue Book habit! Order these books 20 at a time for $1—we pay the postage!

How to Order Always order by numbers instead of titles and authors. Write down the numbers of the books you want, as they appear before the titles in this list. Be sure to order at least 20 books at one time ($1 worth); remit at the rate of 5c per book. We pay the postage when remittance accompanies order; postage is added to C.O.D. orders, so remit with order and save postage. Canadian and foreign customers must always remit in advance by International postal money order or draft on any U. S. bank.

Address orders to HALDEMAN-JULIUS PUBLICATIONS, Dept. C-100, Girard, Kansas

factory prices!

—the Great Studebaker Watch Factory at South Bend Offers You America's Most Amazing Watch Values!

"I can sell you a watch at a much higher Price That Cannot Compare with It!—

—my Jeweler declared when I told him How Much I Paid for my STUDEBAKER WATCH."

"When I showed my Studebaker Watch to a jeweler and watchmaker here, he declared it a remarkably fine watch and when I told him how much I paid for it, he was surprised and said, 'I can sell you a watch at a much higher price that can't compare with it. It's a beauty!' He knew when he said it that Studebaker watches are sold DIRECT and in competition to him."—from a letter from T. J. F., Springfield, Mass., a letter typical of thousands we receive.

DAVID V. BUSH

225 N. Michigan Ave. Chicago, Ill.

"Take it easy for a while!" said a fresh young voice. "That was a narrow escape."

"14 WORDS of Magic Power"

—that is what the multi-millionaire gave to the young man who saved his life. He wouldn't give MONEY because given money usually breeds neglected opportunities. He couldn't give him a JOB because the young man didn't know enough. So he gave him instead that which had enabled himself to create his millions: FOURTEEN WORDS OF MAGIC POWER, and when that young man understood and used those fourteen words, *they* made him worth a *quarter of a million dollars in five years.*

What Are the Fourteen Magic Words?

You'll never know *until* you have read this fascinating little copyrighted story book by Charles Henry Mackintosh. It won't cost you a cent to do so and it may be worth a quarter of a million to *you* as it was to Arthur Holmes. *You* can understand the Magic Words and *you* can *use* them; if you *do* use them as Holmes did they should also make you rich, famous, useful and happy and *bring you whatever you want.*

This Fascinating Story Book *Free—IF*

I will send you this story FREE,—(1) *if* you are an ambitious forward-looking young man between the ages of 16 and 32. (2) *If* you live in the United States or Canada (others enclose $1.00), and (3) *if* you are willing to consider (without obligation) using a part of your spare time in preparing to fill a *worth-while* position in the big-pay fields of Drafting, Engineering, Electricity or Architecture. Such positions are open to men who take training under any one of these three plans:

FIRST: A regular three year (B. S. Degree) Course or a two year (Diploma) Course in Engineering or Architecture at Chicago Technical College. This well-known school has had 25 years experience in training young men for the *higher salaried* positions. Opportunities to earn while learning. Day and Evening Classes,—or

SECOND: A short 4 Months' Special Course in Mechanical, Electrical, Structural or Architectural *Drafting.* We help you to secure position when through training,—or

THIRD: Train at Home in Drafting. Keep your present job and prepare for a better one in spare time right in your own home. All tools furnished without extra cost.

Mail the Coupon—*Read With Profit*

Send for this little book and read the fascinating story—the FOURTEEN WORDS and what they did—and may do for YOU! I'll send it Free! I only ask that you *carefully* fill out the coupon below.

I Will Show You How Quickly and Easily You Can Do So

Send me your name and address, and let me mail you a Test Lesson Chart which will teach you how to draw comic faces.

Whether you think you have talent or not make this interesting test.

I want to show you that with the aid of my PICTURE CHART METHOD of teaching original drawing you can learn to draw as easily as you learned to write. Every step in producing original heads, figures, animals, and all details of original cartoon drawing are PICTURED on an extensive series of Charts, and the text with each lesson shows how to apply the various steps in producing original drawings of your own. This plan is endorsed by nationally known newspaper artists and is today recognized as the most effective method of teaching drawing ever devised.

FRECKLES

Mere words cannot express my appreciation of the course of lessons I received from the Landon School.
Merrill Blosser.

REG'LAR FELLERS

I attribute my success to the thorough and highly competent course I received from you.
Gene Byrnes.

RESULTS
TELL THE STORY

Former students of this school are producing cartoons on political and national affairs, sports, comic strips, etc., for leading newspapers and syndicates all over the United States and Canada.

Here are two of the famous characters created by Landon students who have attained national reputations as Comic Strip Cartoonists.

Many newspapers now employ from two to five students of this School; one big newspaper employs nine. Many successful students who prefer to work at home are selling their drawings by mail. The record of results produced by this school is evidenced by the demand for Landon graduates.

Send NOW for complete information and sample Picture Chart to test your ability. *Please state your age, and enclose 6c in stamps for postage.*

C. N. LANDON,
Director.

3000 National Bldg., Cleveland, O.

450 Miles on a Gallon of Gas!

According to a recent article by the president of the world's largest motor research corporation, there is enough energy in a gallon of gasoline if converted 100% in mechanical energy to run a four-cylinder car 450 miles.

New Gas Saving Invention Astonishes Car Owners

A marvelous device, already installed on thousands of cars, has accomplished wonders in utilizing a portion of this waste energy and is producing mileage tests that seem unbelievable. Not only does it save gasoline, but it also creates more power, gives instant starting, quick pick-up, and eliminates carbon.

FREE SAMPLE and $100 a Week

To obtain national distribution quickly, men are being appointed everywhere to help supply the tremendous demand. Free samples furnished to workers. Write today to E. Oliver, Pres., for this free sample and big money-making offer.

Writing—

a source of income that many people neglect

Mrs. Cherry Bomer Smith, 2815 Cherry St., Vicksburg, Miss.: "I have enjoyed the course very much indeed, and wish to report that I just sold a feature article for $40.00 to the Hearst newspapers' Sunday Supplement — the American Weekly Magazine."

Mr. J. L. Williamson, 11 St. Andrews Ave., Center Island, Toronto, Ont., Canada: "You may be interested to know that with the help of the knowledge gained from your course I have secured a place on the editorial staff of the Toronto Globe, and now, besides doing general reporting, I am editing a special column entitled 'Aviation Topics.'"

Mrs. Drusilla Crankshaw, 28 Irving St., Cambridge, Mass.: "You can imagine how thrilled your over-fifty-year-old cub was when she opened her mail early this week to find a fifty-dollar check for a description of a trip she took last August. I am very much pleased with the training your copy desk has given me."

MANY people who *should* be writing never even try it because they just can't picture themselves making "big money." They are so awe-struck by the fabulous stories about millionaire authors that they overlook the fact that $25, $50 and $100 or more can often be earned for material that takes little time to write—stories, articles on home or business management, sports, travels, recipes, etc.—things that can be easily and naturally written, in spare time.

You, too, can learn to write!

How? By WRITING!

The Newspaper Institute of America offers an intimate course in practical writing—a course as free from academic "isms" and "ologies" as a newspaper office—a course as *modern* as the latest edition of this morning's paper. Week by week, you receive actual assignments—just as if you were right at work on a great metropolitan daily. Your writing is *individually* corrected and constructively criticized. A group of men with 182 years of newspaper experience behind them are responsible for this instruction. Under such sympathetic guidance, you will find that (instead of vainly trying to copy some one else's writing tricks) you are rapidly developing your own distinctive, self-flavored style. You are learning to write by writing—acquiring the same experience to which nearly all well-known writers of short-stories, novels, magazine articles, etc., attribute their success.

How you start

To insure prospective student-members against wasting their time and money, we have prepared a unique Writing Aptitude Test. This tells you whether you possess the fundamental qualities necessary to successful writing—acute observation, dramatic instincts, creative imagination, etc. You'll enjoy this test.

....Successful Men Say.....

Be Law-Trained
it Brings Greater Opportunities!

A legal training equips you to rise quickly to the very top in the business world. You will see the proof in your own community! The leaders of big business are Law trained. That is why so many successful men say "Law training makes success more certain."

Now . . . Easy to Learn at Home!

Now under modern methods you can get this success training right at home, during spare time. The man in business who knows law, has facts at his finger tips that make him far more valuable than his associates. That is why a Law training often brings bigger opportunities, more money, and even social prominence. Incomes of $5,000 to $10,000 a year in business are only ordinary salaries for Law trained men.

More Than 50,000 Have Enrolled

Our course and service is endorsed by members of the bench and bar. Founded in 1886. More than 50,000 have enrolled for our training. Thousands of graduates are successfully practicing law or filling positions of prominence in the business and political world.

What to do with Old Razor Blades!

DON'T throw them away! For old razor blades are worth *real* money—now that KRISS-KROSS rejuvenates them an amazing way—and gives them the kind of edge you have only *dreamed* about until now. And not only that, it can take a *new* blade right out of a fresh package and increase its sharpness almost 100%!

KRISS-KROSS makes blades *last* astonishingly too. Ten weeks of slick shaves from a single blade is only a *low* average—while any number of cases are on record where one blade has lasted for 365 keen, cool shaves a year!

New Type Razor Blade FREE!

To introduce Kriss Kross stropper, we are including this month free samples of a revolution in razor blade construction. Made to fit your present razor. Guaranteed to last longer and shave better than any other. Expect a new shaving sensation — Kriss Kross blades are made of a unique steel, made a new and better way. Find out about it today. No obligation. Clip coupon below for offer. Mail it now.

AGENTS $30 A DAY

Find out how to make $100 a week and more just showing KRISS-KROSS to men in your locality. Full or spare time. R. S. Hopkins (Mich.) made $20 first day. We show you how. It's easy. Check bottom of coupon for details and generous proposition. Mail it now.

CROOKED SPINES CORRECTED

Over 57,000 Cases Successfully Treated

Here is comforting news for all afflicted with spinal curvature or other deformities of the back. In over 29 years the Philo Burt Method has successfully treated more than 57,000 cases of spinal trouble—many of them thought "incurable." No need to feel your case hopeless. The Philo Burt Method should afford immediate relief. Let us prove its value to you with

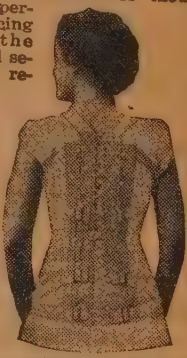
30 Days Free Trial

This offer means you have everything to gain and nothing to lose by giving the Method a trial. Regardless of your age, the length of time you have been afflicted, or the nature of your trouble, we prove to your satisfaction that this Method is just what you require.

No Casts or Steel Braces

The spinal appliance used in the Philo Burt Method is cool, flexible and easily adjusted. The average weight is but 16 ounces. Compare this with the rigid, heavy and torturous braces of steel, plaster casts or leather jackets. This wonderful invention can be worn by the youngest child or the oldest adult without discomfort.

A parent writes—"The Philo Burt Method for my daughter, who had a bad curvature of the spine, effected a complete cure. It's nearly ten years since she discontinued its use and there has never been any return of the trouble". Sworn statements of thousands of grateful persons are convincing evidence that the Pailo Burt Method secures the desired results.



Send for This Free Book

Write to us at once describing your case in detail so we can send you definite information. A valuable book will be sent you with the letter.

Philo Burt Company

227-0 Odd Fellows Temple Jamestown, N. Y.

"Last night I came home with Great News"

"I'D TELEPHONED Nora that I had a surprise for her and she could hardly wait for me to get home. You should have seen her face when I told her the Boss had called me in and given me a $25 increase in salary.

"'It's wonderful,' she said, 'just wonderful. Now we can pay some of those bills that have been worrying us and even put a little in the bank each week.

"'Remember the night we saw that coupon in a magazine and you decided to take up an I. C. S. course? It made a new man of you, Bob, and I knew it wouldn't be long before the firm would notice the difference in your work.

"'We certainly owe a lot to the International Correspondence Schools. You would never have received this increase if you hadn't studied at home and prepared yourself for bigger work.'"

How about *you?* Are you always going to work for a small salary? Are you going to waste your natural ability all your life? Or are you going to get ahead in a big way? It all depends on what you do with your spare time.

Don't let another precious hour pass before you find out what the I. C. S. can do for you. It doesn't cost you a penny or obligate you in any way to ask for full particulars, but that one simple little act may be the means of changing your entire life. *Do it now!*

INTERNATIONAL CORRESPONDENCE SCHOOLS, Box 4396-D, Scranton, Penna.

"I Gambled 2c and won *$35,840* in 2 Years"

A Story for Men and Women who are dissatisfied with themselves

Two years ago my earnings were $2,080 per year! I was discontented, unhappy. I was not getting ahead. And I wanted the luxuries of life like other people.

But it all seemed hopeless. I was beset with fears—afraid of losing my job—afraid of the future. I was "scatterbrained." I had a thousand half-baked ideas to make more money, but acted on none of them.

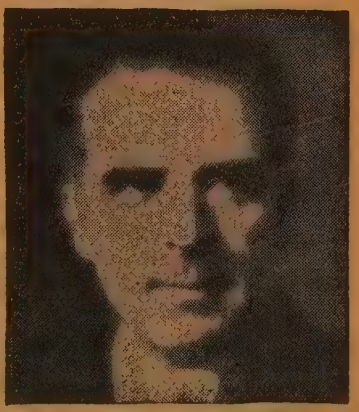
Today I have an income of $20,000 a year—$17,920 more than it was two years ago. A difference of $35,840.

Once I wandered through life aimlessly. Today I have a definite goal and the *will* to reach it. Once I looked forward hopefully to a $5-a-week increase in salary. Today I look forward confidently to a $100-a-week increase in my earnings.

What magic was it that changed my whole life? Here's the answer in one word—Pelmanism. I gambled 2c on it. Yet without it, I might have stayed in a rut for life.

Pelmanism taught me how to think straight and true. It focused my aim on one thing. It dispelled my fears—improved my memory. Initiative, organizing ability, forcefulness, were a natural result. Inertia disappeared—as also mind-wandering and indecision. With new allies—and old enemies beaten—I was prepared for anything.

I want other average men to gamble 2c as I did. For the cost of a postage stamp I sent for the booklet about Pelmanism, called "Scientific Mind Training." Reading that free book started me on my climb.



The Pelman Institute will be glad to send a copy of "Scientific Mind Training" to any interested individual—FREE. It explains Pelmanism—tells how it has helped over 700,000 people during the past 25 years. World figures like T. P. O'Connor, Frank P. Walsh, Prince Charles of Sweden, and many others praise this book—which may completely alter your own life. And it's FREE. No obligation. Simply mail coupon NOW. THE PELMAN INSTITUTE OF AMERICA, 71 West 45th St., Suite W.A.30, New York City, N.Y.

THE PELMAN INSTITUTE OF AMERICA
Suite W.A.30, 71 West 45th St., New York City

Jersey City

A SEAPORT—Jersey City, located on the west bank of the Hudson river (opposite New York), as well as on the east bank of the Hackensack river, is one of the world's great seaports; quite as important a part of the Port of New York as New York itself.

A RAILROAD TERMINAL—Jersey City, the leading railroad city of the East, is terminal for the following trunk lines:

Pennsylvania R. R. — Erie R. R.
Lehigh Valley R. R. — Central R. R. of N. J.
Delaware, Lackawanna & Western (Freight)

INDUSTRIAL—Jersey City, with matchless railroad and water shipping (ocean-going vessels as well as light-draft vessels), is a center of industry. Its industries are diversified and include many large plants employing thousands; as well as hundreds of small plants.

RESIDENTIAL—Jersey City, though in the "large city" classification, has much of the attractiveness of suburban life. The Heights runs the entire length of the city, apart from the industrial sections, and overlooks two rivers.

Ample water supply, looking centuries into the future demands of a great city; no drought of recent years has even threatened a curtailment.

Jersey City's own diversified labor market is amplified by those of New York and Newark, and other parts of the metropolitan section.

Factory sites, factory buildings, lofts for light and heavy manufacturing.

Piers on two rivers; plots with railroad sidings.

Private homes, modern apartments, good schools, good churches, fine parks and playgrounds; unexcelled hospitals.

Nearer downtown New York than a greater part of Greater New York.

Become an Expert Accountant

The profession that pays big incomes

The demand for skilled accountants—*men who really know their business*—is unceasing. Big corporations are in constant need of expert counsel in matters relating to Auditing, Cost Accounting, Business Law, Organization, Management, Finance. Men who can prove their qualifications in this important branch of business are rapidly promoted to responsible executive positions—given an opportunity to earn real salaries. The range is from $3,000 to $10,000 a year—even to higher income-figures.

Train at Home Under the LaSalle Problem Method

Why let the other fellow walk away with the better job, when right in your own home you can equip yourself for a splendid future in this profitable profession?

Under the LaSalle Problem Method you can acquire a thorough understanding of Higher Accountancy, master its fundamental principles, become expert in the practical application of those principles—this without losing an hour from work or a dollar of pay.

Your training will be under the direct supervision of William B. Castenholz, A.M., C.P.A., former comptroller and instructor, University of Illinois, member of American Institute of Accountants, and a director of the National Association of Cost Accountants. He is assisted by a large staff of instructors—legal staff, organization and management specialists; business efficiency engineers, and Certified Public Accountants.

Preliminary knowledge of bookkeeping is unnecessary. You will be given whatever training, instruction or review on the subject of bookkeeping you may personally need—and without any extra expense to you. Our big free book on the accountancy profession fully explains how we train you from the ground up, according to your individual needs, from the simplest bookkeeping principles to the most advanced accounting problems. All text material supplied in the course has been especially prepared in clear, easy-to-understand language, so that you can readily master the principles by home study.

If you are dissatisfied with your present equipment—if you recognize the opportunities that lie ahead of you through home-study training—you will do well to send at once for full particulars.

The coupon will bring you an inspiring story—"Ten Year's Promotion in One"—of how one man, through study at home, cleared the path to success: also the true facts about present-day opportunities in Accounting, all without obligation. Our convenient-payment plan places these opportunities within the reach of everyone.

The man in earnest to get ahead will find the coupon just below this text his most profitable aid to progress. It takes but a moment to fill it out and sign and mail it—and the time to START towards greater things is NOW.

"They Snickered When I Got Up To Speak"

—But from the First Word, I Held Them Spellbound

THE banquet hall was crowded. Suddenly I heard the chairman's voice say—"We will now have a few words from Mr. Byron Munn." It came like a flash of lightning! He was unexpectedly calling on *me* for a speech!

As I started to get up, I heard a titter run around the table.

"Watch him make a fool of himself," I overheard someone whisper. "He's so bashful he's afraid of his own voice."

I knew they were expecting me to make myself ridiculous, but I only grinned inside. I stood squarely on my two feet and started in!

"But When I Commenced to Speak"—

Almost from the first word, the smiles and derision faded from their faces. Instantly the atmosphere became so tense that you could have heard a pin drop! No snickers nor sneers *now*! My voice, clear as a bell—strong, forceful, unfaltering—rang out through the banquet hall as I hammered home each point. I let myself go—soaring to a smashing finale that almost brought them to their feet!

When I finished, there was an instant of dead silence! And then it came—a deafening wave of applause, rolling up from one hundred pairs of hands—spontaneous, excited, thrilling!

Was Once a "Human Clam"

After it was all over, Jack Hartray fell into step beside me as I left the hall. "Gee, that was great!" he said enthusiastically. "You certainly raised yourself about 100% in the eyes of every person in that place tonight. . . . And yet they used to call you 'a human clam'—and the quietest man in the office!"

It was true, too. All my life I *had* been handicapped with a shy, timid and retiring nature. With only a limited education. I never could express my ideas in a coherent, forceful way. As a result I saw dozens of men with less ability pass me by simply because they were good talkers and knew how to create the right impression. It was maddening.

A Lucky Accident

At last I accidentally ran across a little book entitled *How to Work Wonders With Words*. Between its covers I discovered certain facts and secrets I had never dreamed of. Difficulties were swept away as I found a simple way to overcome timidity, stage-fright and self-consciousness—and how to win advancement, popularity and success.

What 20 Minutes a Day Will Show You

How to talk before your club or lodge.
How to propose and respond to toasts.
How to make a political speech.
How to tell entertaining stories.
How to make after-dinner speeches.
How to converse interestingly.
How to write letters.
How to sell more goods.
How to enlarge your vocabulary.
How to overcome stage fright.
How to develop self-confidence.

Today I hold the sort of position that I had alway envied. My salary has been increased, I am no only in constant demand as a speaker in public but I am asked to more social affairs than I have time to attend. To sum it all up, I am meeting worthwhile people, earning more than I ever dared expect and enjoying life to the fullest possible degree! And furthermore, the *sheer power of convincing speech* has been the big secret of my success!

* * *

Being able to say the right *thing* in the right *way* at the right time has perhaps been responsible for more brilliant success than any other one thing under the sun. Get this amazing book FREE! Right now, we offer to send you absolutely free, a copy of *How to Work Wonders With Words*. This remarkable little book will show you how to develop the priceless "hidden knack" of effectivespeech that has brought success social position, power and wealth to so many. It will open your eyes to a new realization of what life holds in store. See for yourself! There is no obligation. You can obtain a copy free by just sending the coupon.

Free to Asthma and Hay Fever Sufferers

Free Trial of Method That Anyone Can Use Without Discomfort or Loss of Time

We have a method for the control of Asthma, and we want you to try it at our expense. No matter whether your case is of long standing or recent development, whether it is present as Chronic Asthma or Hay Fever, you should send for a free Trial of our method. No matter in what climate you live, no matter what your age or occupation, if you are troubled with Asthma or Hay Fever, our method should relieve you promptly.

We especially want to send it to those apparently hopeless cases, where all forms of inhalers, douches, opium preparations, fumes, "patent smokes," etc., have failed. We want to show everyone at our expense, that our method is designed to end all difficult breathing, all wheezing, and all those terrible paroxysms.

This free offer is too important to neglect a single day. Write now and begin the method at once. Send no money. Simply mail coupon below. Do it Today!

THEN CHOOSE AVIATION!

ARE you a red-blooded, daring, he-man? Are you eager for a life of constant thrills, constant excitement and fascinating events? Do you crave adventure, popularity, admiration, and the applause of great crowds? Then why not get into the Aviation Industry—the greatest adventure since time began—the greatest thrill ever offered to man?

Aviation is growing so swiftly that one can hardly keep track of all the astonishing new developments. Air-mail routes have just been extended to form a vast aerial network over the entire U. S. Airlines and airplane factories are springing up all over the country. Men like Henry Ford are investing millions in the future of commercial Aeronautics in America! The possibilities are so tremendous that they stagger imagination!

Everything is set for the greatest boom in history. The fortunes that came out of the automobile industry and out of motion pictures will be nothing compared to the fortunes that will come out of Aviation! There is just one thing holding it up—lack of trained men! Even in the beginning thousands will be needed—and generously paid. The opportunities open to them cannot be over-estimated. Those who qualify quickly will find themselves on the road to undreamed of money—success—popularity—and prominence!

Easy to Get Into Aviation by This Home Study Course

Get into this thrilling profession at once while the field is new and uncrowded. Now—by a unique new plan—you can quickly secure the basic training for one of these wonderful high salaried jobs, at home, in spare time. Experts will teach you the secrets—give you all the inside facts that are essential to your success. And, the study of Aviation is almost as fascinating as the actual work itself. Every lesson is chockfull of interest—and so absorbing that you actually forget you are studying. But best of all are the ultimate rewards you are fitting yourself to gain!

W-6, Anita Building, Newark, N. J.

"What? Learn Music by Mail?" *they laughed*

"Yes," I cried, "and I'll bet money I can do it!"

ONE day after lunch the office crowd was in the recreation room, smoking and talking, while I thumbed through a magazine.

"Why so quiet, Joe?" someone called out. "Just reading an ad," I replied. "Says here anyone can learn music in a few months at home, without a teacher. Sounds easy."

"Do you suppose they would say it was *hard?*" laughed Fred Lawrence.

"Perhaps not," I came back, "but it sounds so reasonable I thought I'd write for their booklet."

What a razzing I got then! Fred Lawrence sneered: "He really believes he can learn music by mail!"

"Yes, and I'll bet money I can do it!" I cried, and the crowd roared. Fred never missed a chance to give me a sly dig about my bet.

My Chance Arrives

Then came the office outing at Pine Grove. After lunch it rained, and we had to sit around inside. Suddenly someone spied a piano. Fred saw a fine chance to have some fun at my expense.

"Folks," he cried, "Joe has consented to give us a recital."

That gave the boys a good laugh. "Play the 'Varsity Drag'!" shouted Fred.

I smiled to myself. This was a wonderful setting for my little surprise. Assuming a scared look, I began fingering the keys, and then .... I broke right into the very selection Fred asked for. In a few minutes the whole crowd was dancing. I played one selection after another until I finished with "Crazy Rhythm" and the crowd stopped to applaud me. I turned around, and there was Fred holding a tenspot under my nose.

"Folks," he said, "I want to apologize to Joe. I bet him he couldn't learn music by mail. He sure deserves to win the money!"

"Learn to play by *mail!*" exclaimed a dozen people. "That sounds impossible! Tell us how you did it!"

I told them how I had read the U. S. School of Music ad, and how it was the biggest surprise of my life when I got the first lesson—everything was as simple as A-B-C. No scales or tiresome exercises.

"And," I continued, "all it required was part of my spare time. In a short time I was playing jazz, classical pieces, and in fact, anything I wanted."

Free Booklet and Demonstration Lesson

You, too, can *teach yourself* to be an accomplished musician—at home—in half the usual time—through this simple new method which has already taught over half a million people. No matter which instrument you choose, the cost averages just a few cents a day.

If you are in earnest about wanting to play your favorite instrument—send at once for the Free Booklet and Free Demonstration Lesson which explain this remarkable method. No cost—no obligation. Instruments supplied when needed, cash or credit. U. S. School of Music, 1130A Brunswick Building, New York.

Kwiture Truss Troubles

Reduced Fac-Simile Grand Prix awarded at Paris

Decide NOW to stop wearing a Truss. Yes, make up your mind to stop it. You know by your own experience it is only a makeshift, a false prop against a collapsing wall and that it is undermining your health, because it tends to retard the circulation of the blood. Why, then, resign yourself to a lifetime of truss wearing? Here is a better way, which you can now have proof of for yourself, free of charge.

Reduced Fac-Simile Gold Medal awarded at Rome

STUART'S ADHESIF PLAPAO-PADS

are entirely different—being mechanico-chemical applicators—made self-adhesive purposely to keep the herbal muscle-tonic called "PLAPAO" continuously applied to the affected parts, and to minimize dangerous slipping and painful friction. It is a well-known fact that friction usually means galling and blistering—anyway a dislodgment of the pad. The fabric is soft as velvet, and being adhesive, it clings closely to the body, to keep the pad affixed thereto in place, without straps, buckles or springs. Easy to apply—comfortable—inexpensive.

For almost a quarter of a century stacks of sworn testimonials from many different countries report success—without delay from work. The epidermatic absorption of "PLAPAO" and the utilization of "mechanico-chemico therapy" tend towards a natural process of recovery, after which there is no further use for a truss. Make up your mind to close the hernial opening so the RUPTURE CAN'T COME DOWN.

THOUSANDS GRATEFUL

Men and women, young and old, in all walks of life, have gone before an officer qualified to acknowledge oaths, and sworn that they used the PLAPAO-PADS and cured their ruptures—many of them most aggravated cases, and of long standing.

READ ENDORSEMENT BELOW

"I have undergone two surgical operations for rupture, but without lasting results. After using your PLAPAO-PADS according to directions, I can truthfully say that I have been absolutely cured."

EMILE POISSENOT, *Care Third Precinct Police Station, New Orleans, La.*

SEND TODAY FOR FREE PLAPAO

Make a personal test of its value. *Send no money*, for the ten days, or two week's test of the remedial factor "PLAPAO" costs you nothing, yet it may mean a health restoration more precious than much fine gold. Send your name and address by return mail, and you will receive the Free Trial "PLAPAO," with a copy of Mr. Stuart's 48-page illsutrated book on rupture, containing valuable information. You obligate yourself in no way. What we send you gratis is not to be returned or paid for,—now or ever.

Stammerers Can Regain Perfect Speech

THERE was a time when stammering was regarded as a mysterious affliction from which the stammerer could not escape. But study and experience has discovered the cause of stammering—and when the cause became known there was a natural way to overcome the affliction. When the cause of stammering is eliminated stammering must stop—and perfect speech is naturally restored. Stammering is due to a lack of coordination between the speech muscles and the brain, and in order to restore perfect speech it is necessary to establish proper functioning of the speech musculature.

Stammering can be overcome permanently. Perfect speech is being restored to stammerers day after day and week after week at the Bogue Institute for Stammerers through the application of the Bogue Unit Method, which is based on the principle of co-ordination between the mind and the speech organs and is the result and outgrowth of the personal experience of Benjamin N. Bogue, president and founder of the institute, who freed himself from stammering after having been afflicted for twenty years.

The Bogue Institute for Stammerers was founded in 1901, and has steadily grown in prestige and power. To thousands of students—persons in every walk of life—from all parts of the United States, from European countries, and from China, India and Japan—persons from families of influence and distinction—this Indianapolis institution has brought the priceless gift of perfect speech.

Beginning on page 15 of the book offered you below, you will find the story of Mr. Bogue's experiences—how he suffered as a stammerer and how he regained perfect speech. Commencing on page 72 is a detailed description of the causes of stammering. Beginning on page 196, you will find of decided value the explanation of the Bogue Unit Method, through the application of which stammerers without number have been restored to Perfect Speech.

This authoritative book, entitled "Stammering—Its Cause and Cure," containing 288 pages of valuable information to any stammerer, will be sent to you free upon request. Find out what the Bogue Institute can do for you. Mailing the coupon below will put you under no obligation whatsoever. Remember—stammering cannot be outgrown—but it can be overcome.

BENJAMIN N. BOGUE,
10,605 Bogue Building, 1147 N. Illinois St.,
Indianapolis, Indiana.

Without obligation on my part, please send me the book, "Stammering—Its Cause and Cure"—and full information regarding the Bogue Institute and the new scientific cure for stammering and stuttering.

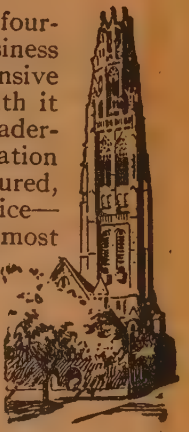
The Equivalent of a
College Education

In This One Fascinating Volume



Now you may have all that the graduate of a general four-year College course takes with him into social and business life. The broad cultural background and the comprehensive grasp of general knowledge CAN BE YOURS and with it the ability and confidence required for positions of leadership in any circle. No one who was denied a college education need any longer be placed at a disadvantage among cultured, educated people. An amazing book is now at your service—in reality SIX books in ONE—offering the easiest, the most effective, the most lasting, the most interesting method of self-education. A few minutes of reading daily will give you a liberal education in an amazingly short time.

6 Great Outlines
In a Single Volume

Think of getting, *in one volume*, The Outlines of HISTORY, SCIENCE, LITERATURE, ART, PHILOSOPHY, RELIGION—the six books you must read to be up to date on every subject! A tremendous range of knowledge, yet each of the six Outlines is thorough and complete. Here is the knowledge that forms the background of cultured, educated people—that can win for YOU the leadership and admiration of your associates—that brings SUCCESS. Written simply to be easily understood; concisely to save your time; in lively, fascinating style to be easily remembered.

THE OUTLINE OF MAN'S KNOWLEDGE

Written by Clement Wood with such success that the Pittsburgh *Sun-Telegraph* calls it "A University in itself"; and the Philadelphia *Public Ledger* says it is "The ONE book to read and know." Here is the whole scope of modern education in one thrilling narrative of 700 sparkling pages— the cream of the world's knowledge for quick and easy self-improvement.

Button Rupture Newest Way [Without Pressure]

SCIENCE now advises discarding cruel steel springs, barbarous leg straps, and other harness that press against the rupture and thus prevent nature from healing it. A new sensible method has been perfected, after thousands of test cases, called Magic Dot—entirely different from any other way. Instead of "pressing" it "seals" rupture, and of course allows users to run, jump, bend and cough in perfect safety.

Breathes Air

With this 1-25th oz. device is a new kind of pad, air-porous and washable. It actually breathes air, and cannot slip off the rupture—a feature, you'll frankly admit, that is lacking in your present appliance. In fact, it is so superior and different that it is praised by physicians as "an entirely new departure." Users report they have forgotten they are wearing it. But don't buy it yet.

See It First

By a special arrangement you can now have it sent to your home without obligation to wear it. Don't send a penny or order it now. Just mail the coupon for full description of "Magic Dot" and details of this unusual offer. Act now for quick relief. Write your name and address on the coupon and mail it today!

AUTO

5 AUTO BOOKS SENT FREE!

Mail the coupon and we'll send you a set of these remarkable auto books, just off the press. Whether you are mechanic or helper, expert or student, auto owner or driver, if you're interested in autos, by all means take advantage of this opportunity to see the latest and most complete work on autos we have ever published. Built by eighteen of America's greatest automotive engineers. Simple enough for men with little schooling to understand, yet in daily use by hundreds of engineers, service-station superintendents and foremen as an authoritative REFERENCE Cyclopedia. This new edition includes straight eights, 4-wheel brakes of all types and other features of the 1928 models.

Put the JIFFY INDEX *to work for you!*

Can You FIX IT?

Can you take out "play" in differential? Can you kill the "Shimmy" in steering? Can you reset TIMING? Can you put your finger on engine trouble without guessing or tinkering? Can you pull the starter off and fix it? Can you adjust and repair transmission, engine, rear axle, bearing?

These Books Tell How

They bring the answer to any auto problem **instantly**. And they show the best, quick, professional way to do EVERY repair and replacement job you will ever need. Auto owners say the cost is saved over and over again by showing how to make adjustments and emergency repairs on the road.

5 Big De Luxe Volumes just off the press

2400 pages, over 2000 illustrations, wiring diagrams, equipment charts, etc. De Luxe edition with gold-stamped flexible binding. Sent FREE for 15 days' use. If not wanted return express collect. If kept, send only $2 after 15 days, then $3 a month until special advertising price, $24.80, is paid.

A Year's Consulting Membership FREE

Privilege of consulting engineers of million-dollar American Technical Society on any automotive problem for one year without charge, if you mail coupon immediately.

American Technical Society

Dept. A-181, Drexel Ave. & 58th St.

CHICAGO, ILL.

The billion-dollar auto industry offers rich prizes to men with gumption enough to really learn all branches of automotive mechanics. A better job, bigger pay—a chance to go into business and get a share of the huge profits, are waiting for any man who even half tries to improve his ability to deliver service. And here's the shortest, easiest way: No tedious studying, no memorizing, no lessons or examinations. Just LOOK UP the fact you seek. You'll find the answer to any auto problem literally at your finger-tips, in the famous JIFFY INDEX. No need to "carry it in your head" at all.

"Was garage hand—now have Shop of my own," writes W. Sidle of Toboso, O.

J. H. Geise of Detroit says: "I received $50 worth of information out of them the first 5 days."

"I got a raise," says P. Ervin of Yarmouth, N.S., shortly after getting his books.

And D. S. Reid of Siluria, Ala., was offered $4,000 for invention worked out with these Auto Books.

Dont Send a Penny!

AMERICAN TECHNICAL SOCIETY
Dept. A-181, Drexel Ave. and 58th St.
Chicago, Ill.

I would like to see the new 5-volume edition of your AUTO BOOKS, but without obligating me to buy them. I will pay the few cents delivery charges only, but if I choose to, I will return them express collect and owe you nothing. If after 15 days' use I prefer to keep them, I will send you $2 and pay the balance at the rate of only $3 a month, until $24 80 is paid. Please include free membership.

Of Special Interest to TEACHERS!

MR. C. I. VALENTINE, Chairman of the Music Department of Newtown High School, New York, says: "After experimenting extensively for a number of years with every type of musical instrument used in modern times, I have come to the conclusion that the harmonica is the logical instrument with which to begin a musical education.

"The simplicity of its technic, the purity of its tone, the absolute correctness of its intonation, the ease with which it is manipulated, the convenience of its size, its universal appeal, and its small cost make it the ideal instrument for training the ear and for practice in reading music notation."

TO TEACHERS: We shall be pleased to send an interesting Brochure entitled "The Harmonica as an Important Factor in the Modern Education of Girls and Boys."

M. Hohner, Inc.,
Dept. 563-A,
114 E. 16th St., N. Y. C.

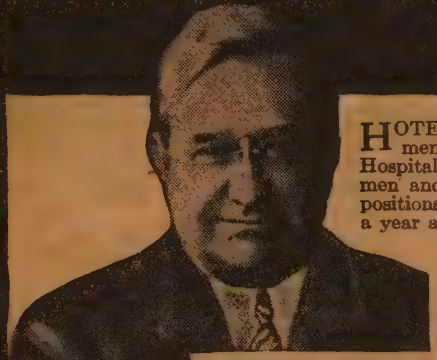
1000 Hotel Positions Open!



HOTELS, Restaurants, Clubs, Apartments, Institutions, Schools, Colleges, Hospitals, etc., everywhere need trained men and women. Over 70,000 high-class positions paying from $2,500 to $10,000 a year are open each year in the hotels of the United States. Nearly one and three-quarter billions of dollars' worth of new hotels, clubs, restaurants and institutions being built this year will need over 200,000 trained men and women.

I Will Train You In Your Spare Time

Through my home study course on hotel work you will learn all that the leading experts know about the business—men earning from $5,000 to $50,000 a year—and at any time there are over 1,000 hotel positions open in this industry. I put my students in touch with positions. All over the United States they are eagerly sought by the biggest and best hotels. Hotels start you at salaries up to $3,500 a year with your living usually included. If you want a steady, permanent position with quick advancement, fascinating work, big pay, fine living, with meals and luxurious apartment usually furnished FREE—you can find it in hotel work.

No Previous Experience Necessary

We train you by mail in your spare time at home with the Lewis Simplified Study Plan and put you in touch with big opportunities. All of your training under the personal supervision of Clifford Lewis, former U. S. Government Hotel and Restaurant Expert, now Managing Consultant for over 300 hotels throughout the United States.

Through Lewis Training, D. A. Robinson became Manager of a beautiful country club at *double* the salary he earned before taking the course. Joseph P. Wray, through the Lewis Course, became Assistant Manager of a large hotel—at the age of 19! Christine K. Mitchell was appointed Housekeeper of a magnificent Detroit Hotel even before she received her diploma from the Lewis Schools.

Free Book Gives Full Details

No matter what your present occupation is—there are opportunities for you in this big paying hotel industry. Many students have obtained splendid hotel positions paying as high as $2,500 a year, even before they had finished the course. My Free Book—"Your Big Opportunity"—shows how you can do as well and explains how you are registered in our National Employment Bureau.

Mail the coupon at once for your free copy of "Your Big Opportunity," showing how we can train you for one of these splendid positions and explaining our Money-Back Agreement. Send for it today—NOW—before you forget.

The Original and Only School of Its Kind in the World

LUMINOUS PAINT

Make Your Watches, Clocks, Etc., Visible by Night The very latest discovery in the scientific world. Hitherto, practically unobtainable except at an exorbitant price, we have at last succeeded in producing this remarkable LUMINOUS PAINT, which, applied to the surface of any article, emits rays of white light, rendering it perfectly visible in the dark. THE DARKER THE NIGHT, THE MORE BRILLIANT IT SHINES. Quite simple to use. Anyone—you can do it. A little applied to the dial of your watch or clock will enable you to tell the time by night. You can coat the push buttons or switch plates of your electric lights, match boxes, and innumerable other articles, make your own Luminous Crucifixes, Luminous Rosaries, etc. Small bottle, price 25c. Larger sizes 50c and $1 postpaid. JOHNSON SMITH & CO. Dept. 940 RACINE, WIS.

CIGARETTE MAKER

Roll your own and save money. Better and quicker; saves more than half. Use your favorite brand of tobacco. Neat, useful, handy. Pocket size, weighs ½ oz. Made entirely of metal, nickel plated 25c, 3 for 65c postpaid anywhere.

GOOD LUCK RING

Very striking, quaint and uncommon. Silver finish, skull and crossbones design, two brilliant, flashing gems sparkle out of the eyes. Said to bring good luck. Only 25c ppd.

Exploding Cigarettes

JUST LIKE ORDINARY CIGARETTES, BUT SUCH REAL STARTLERS! The box contains ten genuine cigarettes of excellent quality. They appear so real, but when each cigarette is about one-third smoked, the victim gets a very great surprise as it goes off with a loud BANG! A great mirth provoker yet entirely harmless. Price 25c box.

NOVELTY BADGES

Kissing Permit 10c *Garter Inspector 10c*

Two very novel metal badges, nickel plated, that you can wear, giving you fun out of all proportion to their trifling cost 10c, each badge, 3 for 25c, or 75c per doz. postpaid anywhere.

MIDGET BIBLE

GREAT CURIOSITY Smallest Bible in the World. Size of a postage stamp. 200 Pages. Said to bring good luck to the owner. A genuine work of art. Must be seen to be appreciated. Make good money selling them to friends, church acquaintances, etc. PRICE 15c each 3 for 40c, 12 for $1.35, 100 for $7.50. Also obtainable in Leather Binding, with gold edges Price 50c each, 3 for $1.25, $4.50 per doz. Magnifying Glass for use with Midget Bible 15c.

STAGE MONEY

With a bunch of these bills, it is easy for each person of limited means to appear prosperous by flashing a roll of these bills at the proper time and peeling off a genuine bill or two from the outside of the roll, the effect created will be found to be all that can be desired. Prices, postpaid: 40 Bills 20c, 120 for 50c, or $3.50 thousand postpaid.

MAGIC NOSE FLUTE

Post Paid 10c

The Magic Nose Flute, or Humanatone, is a unique and novel musical instrument that is played with nose and mouth combined. There is just a little knack in playing it which, when once acquired after a little practice, will enable you to produce very sweet music that somewhat resembles a flute. There is no fingering, and once you have mastered it you can play all kinds of music with facility, and ease. When played as an accompaniment to a piano or any other musical instrument, the effect is as charming as it is surprising.

SURPRISE MATCHES

More fun than fighting with your wife. Look just like ordinary matches. Put up in boxes just like regular Safety Matches. 10c As the victim tries to light one he gets quite a surprise. Price 10c per box, 3 boxes for 25c, 12 for 75 cents.

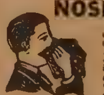
STAR TOY MAKER

Greatest boys' book written. Tells how to make a Pinhole Camera, a Canoe, model Railroad, a Telephone, Boomerang, Telegraph Instrument, Box Kite, Talking Machine, Microscope, Electric Motor, Electric Door Bell, Water Wheel, Paddle Raft, a pair of Skis, a Dog Sled, Bird House, Rabbit Yard, etc 64 pages. 150 illustrations. PRICE 10c postpaid.

Wonderful X-Ray Tube

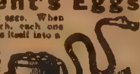
A wonderful little instrument producing optical illusions both surprising and startling. With it you can see what is apparently the bones of your fingers, the lead in a lead pencil, the interior opening in a pipe stem, and many other similar illusions. A mystery that no one has been able to satisfactorily explain. Price 10c, 3 for 25c, 1 dozen 75c. Johnson Smith & Co.

NOSE BLOWER



When some men blow their noses it sounds like a trombone. Now the *NOSE BLOWER* has come to torment us. It is a startler! It is ingeniously concealed in the handkerchief. Proceed to blow your nose and your friends will think they heard a steam engine or something. You can blame the hideous noise to your having a very bad cold and keep up the fun as long as you like. *PRICE 10c, 3 for 25c, or 75c doz. postpaid*

Serpent's Eggs



Box contains 12 eggs. When lit with a match, each one gradually hatches itself into a snake several feet long, which curls and twists about in a most life-like manner. Price per box, 10c postpaid, 3 for 25c

JOHNSON SMITH & CO.

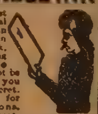
INVISIBLE INK



The most confidential messages can be written with this ink, for the writing makes no mark. Cannot be seen unless you know the secret. Invaluable for many reasons. Keep your postals and other private memorandums away from prying eyes Great fun for playing practical jokes Only 15c a Bottle; 3 for 40c

Rubber Chewing Gum

It is just like a regular package of chewing gum and looks so real that it fools everybody Of course no one suspects it is not genuine until they start to chew it. There's a world of fun in this rubber chewing gum — 5 sticks to the package Price, 10c Pkg.; 3 for 25c; 12 for 75c postpaid. Johnson Smith & Co., Dept. 940, Racine, Wis.

Watch Charm Pistol $1.75

Exact reproduction of a real pistol, actually fires REAL BLANK CARTRIDGES of miniature size. Illustration is actual size. 1¾ inches long, with ring at end for attaching to watch chain.

Loads like a regular pistol. Pull the trigger and it goes off with a loud bang. Pistol is break open type; illustration shows position for loading Made entirely of high grade steel, nickel plated, octagon barrel, handsomely engraved handles, complete in box with cleaning rod PRICE $1.75. Also furnished with pearl handles, $2.50. BLANK CARTRIDGES, 50c per box of 25. JOHNSON SMITH & CO., Dept 940, RACINE, WIS.

MICROPHONE TRANSMITTER BUTTON

$1.00 Postpaid

You can easily make a highly sensitive detectophone by using this Transmitter Button to collect the sound waves. You can build your own outfit without buying expensive equipment. It is simple and inexpensive. You can install an outfit in your home and hear conversations being held all over the house. You can connect up different rooms of a hotel. This outfit was used by secret service operatives during the war. It is being used on the stage It is ultra-sensitive and is the greatest invention in microphones. You can mount the button almost anywhere—card board boxes, stove pipes, stiff calendars, on the wall behind a picture frame, etc. Button is so light and small it cannot be detected Persons can be overheard without suspecting it. You can listen in on conversations in another room. A deaf person in the audience can hear the speaker Connected to phonograph, piano or other musical instrument, music can be heard hundreds of feet away. Button may be used to renew telephone transmitters; often makes an old line "talk up" when nothing else will. The ideal microphone for radio use; carries heavy current and is extremely sensitive. Amplifies radio signals. Countless other similar uses will suggest themselves. Experimenters find the button useful for hundreds of experiments along the lines of telephones, amplifiers, loud speakers, etc. Many fascinating stunts may be devised, such as holding the button against the throat or chest to reproduce speech without sound waves. PRICE $1.00. JOHNSON SMITH & CO., DEPT. 940, RACINE, WIS.

BOYS! BOYS! BOYS!

Throw Your Voice

Into a trunk, under the bed, under a table, back of the door, into a desk at school, or anywhere. You get lots of fun fooling the teacher, policemen, peddlers, and surprise and fool all your friends besides.

THE VENTRILO

is a little instrument that fits in the mouth out of sight. Cannot be detected. It is used in connection with the above, and with the aid of this wonderful **DOUBLE THROAT**, or **VENTRILO**, you can imitate many kinds of birds, animals, etc. Remember you get everything for **ONLY TEN CENTS**—a booklet giving you full instructions how to become a ventriloquist and throw your voice, the **Double Throat**, or **Ventrilo**, and our big 600 page catalog of novelties, tricks, puzzles, masks, books, etc., **ALL SENT POSTPAID TO ANY ADDRESS FOR ONLY 10 cents**

MEXICAN JUMPING BEANS

Scientists are unable to give a reasonable explanation for what purpose nature created these curious **Jumping Beans.** They are found growing on small trees in the high mountainous regions of Mexico. The Beans **Wiggle, Move, Jump, Flop Over, Etc.** It is amazing to see them keep up this endless activity. Send for a few of these great curiosities. **Three Sample Beans sent for 25c, 12 for 75c, or One Gross (144) for $7.50 Postpaid.**

MAGICIAN'S BOX OF TRICKS

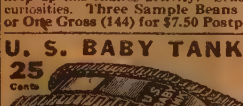
Apparatus and Directions for a Number of Mysterious Tricks, Enough for an Entire Evening's Entertainment..... $1.00

ANYONE CAN DO THEM

It is great fun mystifying your friends. Get this Conjurer's Cabinet, and you will be the cleverest fellow in your district. It contains the apparatus for ten first-class tricks, including THE MAGIC BALL AND VASE TRICK (a wooden ball is placed inside, and upon replacing the lid has disappeared and is found in someone else's pocket); The HINDOO TRICK CARDS (can be made to change completely no less than five times); DISAPPEARING COIN BOX (a coin, placed in the wooden box, vanishes entirely or changes into a coin of another denomination). The GLASS GOBLET TRICK (a coin is dropped into a glass of water and when the water is poured out the coin has vanished and is found somewhere else); the RIBBON FACTORY FROM THE MOUTH TRICK (a seemingly endless supply of colored paper ribbons comes out of your mouth); the DISAPPEARING HANDKERCHIEF (a handkerchief held in the hand mysteriously vanishes); the WIZARD'S RING COIN TRICK; the ENCHANTED BOTTLE (no one but yourself is able to make it lay down); the GREAT HAT AND DICE TRICK (a large dice is placed on top of a hat, disappears, and is found underneath yet no one has touched the hat), and last, but not least, the GREAT PHANTOM CARD TRICK, or two from five leaves nothing. Full instructions are sent for performing each trick. In addition to the above, a number of other feats and illusions are fully explained for which you can easily make or procure the necessary apparatus. **Price complete $1.00 postpaid. JOHNSON SMITH & CO.**

U. S. BABY TANK

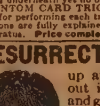
25 Cents



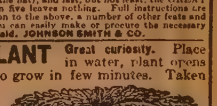
It goes with real Yankee Pep—by its own power

Most remarkable toy ever invented. By drawing the Tank backward, either with the hand or over the floor or table and then placing it down, it will crawl along, overcoming all obstacles, in the same lifelike manner as the larger Tank that proved so deadly in the great war. What makes it go is somewhat of a mystery, for there is no mechanism to wind up as is usually understood with mechanical toys, yet this tank will keep plodding along ten times longer than the ordinary run of toys. It will perform dozens of the most wonderful stunts; 2¾ inches long. **Price only 25c prepaid. Stamps accepted. JOHNSON SMITH & CO.**

RESURRECTION PLANT



Great curiosity. Place in water, plant opens up and starts to grow in few minutes. Taken out it dries up and goes to sleep until put in water again. **PRICE 10c, 3 for 25c, 75c dozen, postpaid.**

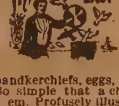


THE NEW POTATO PISTOL

NEW

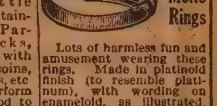
This is surely the most ingenious of all air pistols. For ammunition *ALL YOU NEED IS AN ORDINARY POTATO*, and that isn't hard to get. Merely place the point of the barrel of the pistol into a potato, as shown in the illustration, withdraw the pistol and fire. Nothing could be simpler. It fires quite a distance, goes off with a report like all air guns, and there is absolutely no danger. Well and strongly made entirely of metal. **Price Postpaid. Only 35c**

250 Magic Tricks 10c



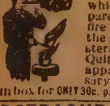
An excellent little book containing 250 Parlor Tricks, tricks with cards, coins, handkerchiefs, eggs, rings, glasses, etc. So simple that a child can perform them. Profusely illus. Sent postpd to any address for only 10c, 3 copies for 25c

Comical Motto Rings



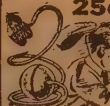
Lots of harmless fun and amusement wearing these rings. Made in platinoid finish (to resemble platinum), with wording on enamelled, as illustrated. **Price only 25c Postpaid.**

Great Fire Eater



A great trick by which you can apparently breathe fire from mouth, to the horror and consternation of all. Quite harmless. All apparatus necessary sent complete in box for **ONLY 30c. p. pd. JOHNSON SMITH**

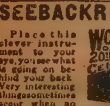
SQUIRT ROSE



25c

A REAL STARTLER. This is the most popular of all squirt tricks. The flower in your coat looks so fresh and sweet that everyone is tempted to inhale the delightful perfume. Then is the moment to press the bulb. Gee whillikers. Don't they jump! There is a very long rubber tube that easily reaches to the pocket of your coat or trousers, and the bulb is large enough to make a dozen shots with one loading. **PRICE 25c each, or 3 for 65c postpaid.**

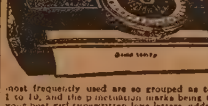
SEEBACK ROSCOPE



Place this clever instrument to your eye, you see what is going on behind your back. Very interesting things sometimes occur when no one thinks you are looking. Just like having eyes at the back of your head. **PRICE 25c POSTPAID**

The "Little Giant" Typewriter

A First Class Writing Machine For $1.50



A perfect little typewriter for $1.50. There are thousands of persons who would like to use a typewriter but whose needs, and business do not warrant the expense attached to the purchase and upkeep of one of the standard-size machines. To such persons we confidently recommend our Little Giant. It is strongly made, but simple in construction, so that anyone can quickly learn to operate it, and write as rapidly as they would with pen and ink. The letters of the alphabet most frequently used are so grouped as to enable one to write rapidly, the numerals 1 to 10, and the punctuation marks being together. With this machine you can send your best girl typewritten love letters, address envelopes, make out bills, and do almost any kind of work not requiring a large, expensive machine. With each typewriter we send a tube of ink and full printed instructions for using the machine. **Price complete $1.50 by mail postpaid to any address in the world.**

Send remittance (Postage Stamps accepted) for all articles listed above also in our other ad on previous page

JOHNSON SMITH & CO. Dept. 340 Racine, Wis.

Like a Conquering Army THESE BOOKS

have marched triumphant through the centuries

THE LIBRARIES of the old world and the new are crammed with volumes, shelf on shelf, which a thousand men in a thousand lifetimes could never find time to read. And millions more volumes have passed forever into oblivion, not even to find shelter in the archives of public libraries.

Yet *these* books have come thundering down through the centuries, influencing, teaching and delighting mankind with their indomitable power. They are as new and invigorating as when their immortal authors instilled in them the breath of immortal life.

Emerson once said: "Would that some charitable soul, after losing a great deal of time among the false books and alighting upon the few true ones which made him happy and wise, would name those which have been bridges or ships to carry him over the dark morasses and barren oceans into sacred cities, into places and temples."

It was one of the monumental achievements of America's greatest educator, Dr. Charles W. Eliot, to bring together the truly great books, to sift the pure gold from the mass of writings the ages have produced. For forty years President of Harvard University, Dr. Eliot realized the need of a library offering everyone the culture which a university strives to give.

The Five-Foot Shelf (Harvard Classics) is the magnificent result of his inspiration and knowledge. These books are the criterion of all literary selection. Through them people have found that the classics are not dull—but intensely stirring; not beautiful antiques, but lively, stimulating modern thought with vital application to everyday life.

In this wonderful library are the writings of 302 immortal authors.

The busy man and woman of today need not stumble through hopeless masses of reading matter, for in the Harvard Classics are the books that live forever, the books that have as proud possessors more than a quarter of a million intelligent, ambitious families.

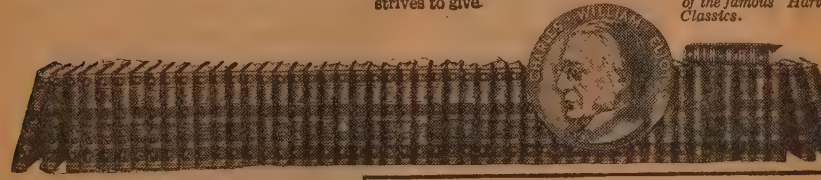
These books stand for stimulation of thought and, above all, endless enjoyment. They are the books which have won for themselves the well-deserved tribute, "A liberal education in fifteen minutes a day."

P. F. Collier and Son Company has published good books since 1875. By the famous Collier plan, you can pay for these books while you are reading and enjoying them.

CHARLES W. ELIOT, *forty years President of Harvard University, Editor of the famous Harvard Classics.*

DR. ELIOT'S FIVE-FOOT SHELF OF BOOKS

(The Harvard Classics)



The certificate is for your convenience. Before you spend another penny for books, get a copy of this FREE booklet, "Fifteen Minutes a Day"—the famous booklet that tells how to turn wasted minutes into growth and increased power. It's ready and waiting for you. Sending for it does not obligate you in any way.

Since 1875 COLLIER Good Books

P. F. COLLIER & SON CO., 250 Park Ave., N. Y.

By Mail, free, send me the booklet that tells all about the most famous library in the world, Dr Eliot's Five-Foot Shelf of Books (The Harvard Classics), and contains Dr. Eliot's own plan of reading. Also, please advise how I may secure the books by small monthly payments.

DRAW!

FOR PLEASURE AND PROFIT

Sharpen a soft pencil. Follow the simple lines in this amazing book, "Figure Construction," copy the illustrations several times — and PRESTO! you can sketch a head, a hand, a figure, with the ease and grace of a real artist.

It is lots of fun to draw and sketch—there may be profit, too, from your sketches as you advance. Don't think you *can't* draw until you have tried the easy instructions of this excellent course—now in one handy, beautiful book.

As Easy As A B C

Every intelligent man or woman will find *great satisfaction* in being able to sketch a head, a figure, a landscape, easily and rapidly. It is so easy to follow the Foundation Line System as contained in this course that any one that can handle a pencil at all can make progress quickly. Even if you thought you "couldn't draw a straight line," you will get remarkable results from only 15 minutes' practice a day.

Complete Beginner's Course Only $2.50

Although a beginner's art class would cost a great deal in time, money, and materials, you can obtain all the elements you need in this elegant course—book for only $2.50. The book is 7″x11″, heavy calendared paper; over 100 progressive illustrations to follow; full-page plates; easy instructions. Who knows but what this valuable instructor may introduce you to the highly profitable field of commercial art?

Every man or woman who likes pictures and desires to do something with a pencil besides "scribbling" should send for, and examine, this fascinating book.

SEND NO MONEY

Send the coupon below and deposit the purchase price of $2.50 (and postage) with the postman when your "Figure Construction" book arrives. You may have your money back at any time within 30 days if you return the book as unsatisfactory.

GREGG PUBLISHING CO., 20 Weat 47th Street, New York, N. Y.

New book club cuts price of month's leading books to 42c

by ARTHUR K. WHITLEY

NEVER before in the history of book publishing has there been so wide and varied a deluge of important—really significant—books. A recent list of best sellers includes such names as Julian Green, Suzan Ertz, John Galsworthy, Hugh Walpole. There is no doubt that American readers want good literature, and are willing to read any amount of good books—if they are within reach.

But so many books are published each year that it is almost impossible for the average reader to buy every volume he would like to own. As a result, hundreds of worthwhile volumes are overlooked—due to the "high cost of literature."

Why are books so expensive? Why can they not be sold as cheaply as magazines? This has long been the problem of a group of distinguished writers, educators and publishers.

The Writer said: "The author's earnings do not increase the price of good books. He would much prefer having 50,000 readers purchase his book for 42c a copy than only 5,000 at $2.50."

The Educator said: "Free public education has given the average citizen an appreciation of good books. More fine literature is being read today than ever before."

The Publisher said: "If enough buyers can be secured in advance, I can publish important new books, have them artistically designed, durably bound—and sell them for 42c a volume, or 1/6 the present prices."

And so the writer, educator and publisher conferred with printers, artists, distributors—*and worked out their plan.* The result is: *Paper Books.* This is a wonderful new book club that provides one outstanding volume a month—12 important, notable books a year—for the unheard of price of only 42 a volume! The books average 300 pages and contain as many words in as large type as the average $3 or $4 book.

Thousands upon thousands of readers who never dreamed that fine books, beautifully designed and printed could be sold for only 42c a volume, have already become charter members. After subscribers received their first two selections, "The Golden Wind" by Takashi Ohta and Margaret Sperry, a fascinating novel, and "Frederick the Great" by Margaret Goldsmith, a vivid, *full length* biography—letter after letter came to the Editorial Board expressing amazement that such a publishing feat could have been accomplished.

The New York *Times* writing of the first Paper Book selection says: "Not only is 'The Golden Wind' remarkable for a most unusual and successful blending of East and West in romantic narrative, but its selection marks it as a portent in American publication. With cover and end-papers designed by Rockwell Kent, it is a distinguished piece of work, compounded of good paper, clear type and well bound."

The third *Paper Book* selection was "Dewer Rides" by L. A. G. Strong. This novel created a sensation in England where it received greater praise from critics than any other novel in recent years. Selections like these more than justify the original plans of this remarkable new book club. Now everyone can enjoy a whole year's distinguished reading—*for less than the price of two books;* and still have sufficient in their book budget to buy other volumes that may interest them.

Some of the men responsible for this wonderful new publishing innovation are: Padraic Colum, author, Everett Dean Martin, distinguished educator, Lincoln Colcord, eminent critic, Louis Untermeyer, outstanding American editor, poet and critic, Horace M. Kallen and Charles Boni.

Rockwell Kent, art editor, and Elmer Adler, director of printing, are responsible for the beauty and artistry of the volumes.

The largest number of charter members ever to subscribe to a book club have joined the *Paper Book Club.* Membership is now open to all. Through this club anyone can purchase the leading books of fiction, history, biography, poetry philosophy, travel—*for only 42c a volume!*

Perhaps you would like to take advantage of this revolutionary idea in book publishing. Perhaps you would like to receive 12 outstanding volumes a year—for less than the price of two. If so, clip the coupon at the bottom of this page. It will bring you the current Paper Book by return mail. If you like it simply send $5 for one year's subscription to this unusual book club. Thereafter you will receive every month one outstanding book of fiction or non-fiction which ordinarily sells for $2.50, $3.00 or $5.00. If you do not care to join, you may return the book without cost or obligation. Send you subscription *now* to Charles Boni, Paper Book Club, Dept. 730, 80 Fifth Avenue, New York.

Charles Boni, Paper Book Club,
Dept. 730, 80 Fifth Avenue, New York

Please send me the current Paper Book. Within 5 days after receiving the book I will send you $5.00 for my paid-in-full subscription to Paper Books (a new book each month for 12 months) or return the book without cost or obligation. Send check with coupon if you prefer.

YOU *CAN* CHOOSE IF YOU WILL

CHANCE governs the general trend of too many lives. By chance many people live in a certain place, attend a certain school, take the opportune job; they chance upon certain associates, books, and thoughts.

But by courage and determined effort they could choose oftentimes where to live, what to study and, to a large extent, what to accomplish.

Hundreds of thousands of ambitious people are studying at home in their leisure time. Increased earning capacity is the objective that many are attaining. But whether the attainment be greater efficiency in business, or a more interesting social life, or the real joy of developing a more cultured point of view, the studies that lead to these objectives are available, wherever one lives, through Columbia Home Study Courses. The range of subjects is wide.

COLUMBIA UNIVERSITY

Offers Home Study Courses of University Grade in the Following Subjects:

Accounting	Chemistry	European History	Magazine Article Writing
Algebra	Child Psychology	Fire Insurance	Marketing
American Government	Classics	French	Mathematics
American History	Composition	Geometry	Personnel Administration
American Literature	Dramatic	German	Philosophy
Applied Grammar	English	Government	Photoplay Composition
Astronomy	Various Languages	Grammar	Physics
Banking	Lyric Poetry	Greek	Psychology
Biblical Literature	Contemporary Novel	Harmony	Psychology in Business
Biology	Drafting	High School Courses	Public Speaking
Botany	Drama	History	Religion
Boy Scouting	Drawing and Painting	Investments	Secretarial Studies
Business Administration	Economics	Italian	Short Story Writing
Business English	Economic Geography	Juvenile Story Writing	Slide Rule
Business Law	English	Latin	Sociology
Business Mathematics	English Literature	Library Service	Spanish
Business Organization	Essay Writing	Literature	World Literature, etc.

THESE courses have been prepared by our instructors to meet the special requirements of study at home. While all basic material essential to the full understanding of each subject is fully covered, sufficient elasticity is allowed to permit adaptation to the individual needs of the student. Everyone who enrolls for a Columbia course is personally taught by a member of the University teaching staff. Special arrangements can be made for group study.

The University will send on request full information about these home study courses. A coupon is printed below for your convenience. If you care to write a letter briefly outlining your educational interests our instructors may be able to offer helpful suggestions. Mention subjects which are of interest to you, even if they are not listed here, as additions to the courses offered are made from time to time.

HIGH SCHOOL AND COLLEGE PREPARATORY COURSES

COLUMBIA University Home Study Department has prepared courses covering the equivalent of four years of High School study. This complete High School or College Preparatory training is available to those who can not undertake classroom work. We shall be glad to send you our special bulletin upon request.

COLUMBIA UNIVERSITY, University Extension—Home Study Department, New York, N. Y. Please send me full information about Columbia University Home Study Courses. I am interested in the following subjects:

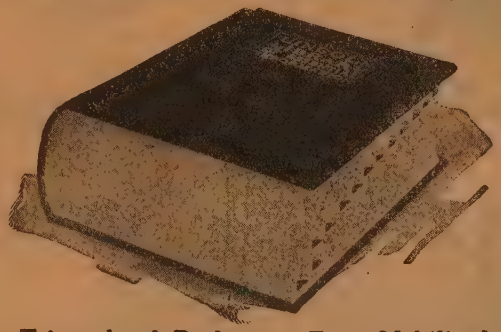
Can You Find Out What You Need to Know?

KNOWLEDGE today is king. He who commands the essential facts when needed, is recognized everywhere as the man of power and influence. This fundamental fact explains why thousands of men and women of affairs are relying daily on that unique source of quick reference—

The Lincoln Library
OF ESSENTIAL INFORMATION



"A Supreme Triumph of Book Value Over Book Bulk"

2286 pages—yet less than 3 inches thick.
Over 20,000 topics—yet less than 6 pounds in weight.
Over 800 beautiful and instructive illustrations.
Natural arrangement—topics scientifically classified.
Answers over 300,000 questions.
330 fact-rich tabulations.
Full index of unerring precision.
The cream of modern knowledge couched in concise, simple, interesting language.

Price in attractive, durable binding as low as $15.50.

Standard Equipment Throughout the Nation

For sheer usefulness there is nothing like it. It is fast becoming the standard reference source in many thousands of offices, homes, schools, and libraries. It is valued by statistical services, school children, college presidents, reference libraries, editors, club women—in fact, by all students, juvenile or adult, who recognize the value of being well informed.

Facts Mobilized for Use

In *one authoritative volume* it mobilizes for instant use the essentials of the world's knowledge in history, biography, government, science, economics, art, literature, and much more—all brought close to the passing hour.

It presents a greater amount of useful, well-organized, up-to-date information than can be purchased elsewhere for several times the price.

If you wish to increase your efficiency and your confidence—if you wish to obtain an education or make your present education more effective—you cannot afford to put off inquiring further into this great work and what it will do for you.

"She is Yours Master"

SICK at heart the trembling girl shuddered at the words that delivered her to this terrible fate of the East. How could she escape from this Oriental monster into whose hands she had been given—this mysterious man of mighty power whose face none had yet seen?

Here is an **extraordinary situation.** What was to be the fate of this beautiful girl? Who was this strange emissary whom no one really knew?

To know the answer to this and the most exciting tales of Oriental adventure and mystery ever told, read on through the thrilling, absorbing, and fascinating pages of the

Masterpieces of ORIENTAL MYSTERY

By SAX ROHMER

11 Superb Volumes

Written with his uncanny knowledge of things Oriental

THESE are no ordinary mystery stories. The hidden secrets, mysteries and intrigues of the Orient fairly leap from the pages. Before your eyes spreads a swiftly moving panorama that takes you breathless from the high places of society—from homes of refinement and luxury, to sinister underworlds of London and the Far East—from Piccadilly and Broadway to incredible scenes behind idol temples in far off China—from hidden cities in the jungles of Malay along strange paths to the very seat of Hindu sorcery.

11 Mystery Volumes Packed With Thrills! Be the first in your community to own these, the most wonderful Oriental mystery stories ever published—books that have sold by the hundred thousand at much higher prices—books you will enjoy reading over and over again. Handsomely bound in substantial cloth covers, a proud adornment for your table or shelf. A constant source of enjoyment at less cost than any other form of entertainment.

Forget Your Troubles—Relax!

These are the sort of stories that ex-Premier Baldwin, Edison and other great men read to help them relax—to forget their burdens. To read these absorbing tales of the mysterious East is to cast your worries into oblivion—to increase your efficiency.

Extraordinary Offer

Don't wait a minute

Printing these volumes by the hundred thousand when paper was cheap makes this low price possible. Only a limited number left. Don't lose a minute.

Send No Money—Just mail the Free Examination Coupon Today Sure! Read them TEN DAYS FREE, without a penny down.

42 Miles on 1 Gallon of GAS

WILL YOUR CAR DO IT?

New Moisture Humidifier & Carbon Eliminator

for all Makes of Cars, Trucks, Tractors and Engines

An amazing Scientific Humidifier has been patented throughout the World that beats any ever got out. It makes engines run ALL THE TIME with the same wonderful efficiency they do on a cool moist night. It gives MORE pep and power, HIGHER top speed, eliminates hard carbon, and gives AMAZING mileage. Fords report 28 to 42 miles per gallon. Other makes (both American and Foreign) report marvelous increases of ¼ to double mileage. Some of the best records are:

	Miles		Miles		Miles		Miles
Buick	28¼	Essex	32	Nash	30	Pierce Arrow	22
Cadillac	21¾	Ford (Model T)	42	Oakland	31	Pontiac	31
Chevrolet	41	Ford (Model A)	40	Oldsmobile	34½	Reo	26½
Chrysler	30¾	Hudson	23½	Packard	21½	Studebaker	29
Dodge	31½	Hupmobile	24½	Plymouth	29	Whippet	41
Durant	41¾	Marmon	21½	Graham-Paige	23½	Willys-Knight	29

And Hundreds of Other Wonderful Records on ALL American and Foreign Makes

Big Profits

to

Man with Car

Spare or Full Time

$350 to $1500 a month

1 man $4,939.66 in 3½ months. Another $1,566.60 in 58 days. $5,150.00 in 5 months to another. BIG MONEY can be—IS being made.

Fitting Motors With Vix

One man sold 8 first morning. Another sells all 3 men can install. Another's profits as high as $100.00 a day.

VIX sells itself by 8 STARTLING demonstrations — BIG, STUNNING, ASTOUNDING DEMONSTRATIONS. Successful VIX men make MORE MONEY than they ever made before.

Free Trial

Try This New Principle Gas Saver AT MY RISK

Try this wonderful VIX Moisture Humidifier and Carbon Eliminator AT MY RISK on YOUR OWN CAR to prove that VAPOR MOISTURE (drawn from Radiator to Engine) gives you that wonderful night driving effect ALL THE TIME with MORE mileage from gas and oil—eliminates hard carbon accumulation — gives MORE power, a SNAPPIER, PEPPIER motor. FASTER acceleration, a SMOOTHER, QUIETER running engine and HIGHER top speed.

VIX will PROVE ITS MONEY SAVING MERIT on your own car by 8 DEMONSTRATIONS—conducted by yourself AT MY RISK—the most SENSATIONAL, most ASTOUNDING, most CONVINCING DEMONSTRATIONS you ever saw. If you don't find from your tests that it does MORE than I claim, return it and it COSTS YOU NOTHING. **I want wide-awake, hustling, County, State, Province and National Agencies everywhere, part or full time, to make $350 to $1500 per month filling the great DEMAND for this wonderful invention wherever introduced. Write for my FREE TRIAL and MONEY MAKING OFFER. Use coupon below.**

Pictures here and at top show Model "B" VIX attached to my own New Model A Ford. This car is wonderfully improved in performance with the VIX Moisture Humidifier. So is every Auto, Truck, Tractor, Taxi, Bus, Marine, Stationary and Aircraft Engine, both American and all Foreign makes.

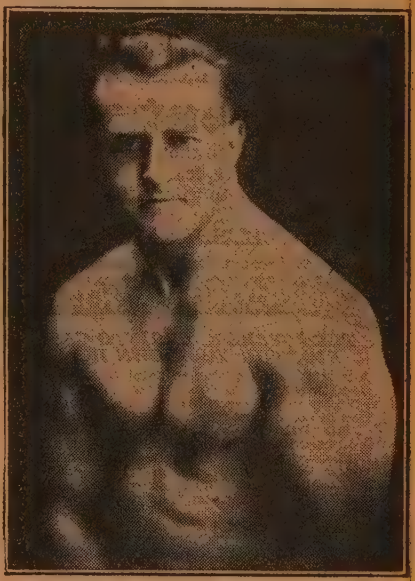
The Man I Pity Most

POOR OLD JONES. No one had any use for him. No one respected him. Across his face I read one harsh word—FAILURE. He just lived on. A poor worn out imitation of a man, doing his sorry best to get on in the world. If he had realized just one thing,he could have made good. He might have been a brilliant success.

There are thousands and thousands of men like Jones. They, too, could be happy, successful, respected and loved. But they can't seem to realize the one big fact—that practically everything worth while living for depends upon STRENGTH—upon live, red-blooded, he-man muscle.

Everything you do depends upon strength. No matter what your occupation, you need the health, vitality and clear thinking only big, strong, virile muscles can give you. When you are ill the strength in those big muscles pulls you through. At the office, in the farm fields, or on the tennis courts, you'll find your success generally depends upon your muscular development.



EARLE LIEDERMAN—The Muscle Builder
Author of "Muscle Building," "Science of Wrestling," "Secrets of Strength," "Here's Health," "Endurance," etc,

Here's a Short Cut to Strength and Success

"But," you say, "it takes years to build my body up to the point where it will equal those of athletic champions." It does if you go about it without any system, **but there's a scientific short cut.** And that's where I come in.

30 Days is All I Need

In just 30 days I can do things with your body you never thought possible. With just a few minutes work every morning, I will add one full inch of real, live muscle to each of your arms, and two whole inches across your chest. Many of my pupils have gained more than that, but I GUARANTEE to do at least that much for you in one short month. Your neck will grow shapely, your shoulders begin to broaden. Before you know it, you'll find people turning around when you pass. Women will want to know you. Your boss will treat you with a new respect. You'll look ten years younger, and you'll feel like it, too. Work will be easy. As for play, why, you'll realize then that you don't know what play really means.

I Strengthen Those Inner Organs Too

But I'm not through with you. I want ninety days in all to do the job right, and then all I ask is that you stand in front of your mirror and look yourself over.

What a marvelous change! Those great square shoulders! That pair of huge, lithe arms! Those firm, shapely legs! Yes, sir. They are yours, and they are there to stay. You'll be just as fit inside as you are out, too, because I work on your heart, your liver—all of your inner organs, strengthening and exercising them. Yes indeed, life can give you a greater thrill than you ever dreamed. But, remember, the only sure road to health, strength and happiness **always demands action.** *Send for my New Book.*

"Muscular Development"

64 pages and--- IT IS FREE

It contains forty-eight full-page photographs of myself and some of the many prize-winning pupils I have trained. Some of these came to me as pitiful weaklings, imploring me to help them. Look them over now and you will marvel at their present physiques. This will not obligate you at all, but for the sake of your future health and happiness do not put it off. Send today—right now before you turn this page.

Now Young Men Find a New Short Cut to Success

HERE is the fastest way to business advancement that has ever been discovered. *Learn Stenography!* It is the surest way to get yourself into the big pay, big job class. Here are the names of some successful men who used stenography as a stepping stone to wealth and honor.

John J. Raskob
George B. Cortelyou
William Loeb
Frank A. Vanderlip
Hugh Chalmers
Samuel Insull
George B. Jones
T. P. O'Connor
Judge Kenesaw M. Landis
Frank M. Black
Norman Hapgood

Good competent *men* stenographers are preferred by big business men. More of them are wanted every day, because just as soon as a man stenographer proves his worth he is "boosted" to a better place.

A knowledge of speedy, accurate stenography opens the door that leads into the private office of the president. You are trusted with valuable secrets. Your employer comes to you for advice. Before you realize it you are advanced to more important positions and ever-increasing salary.

SPEEDWRITING Can Make You An Experienced Stenographer in 72 Hours!

No matter what your training or education may be, Speedwriting prepares you quickly for a responsible stenographic position. You can learn Speedwriting in an amazingly short time—only 72 study hours. Many have done it in less time. What other occupation do you know that prepares you *so fast* to earn money?

Speedwriting is so easy, so simple that you begin to write shorthand in your very first lesson, and almost before you know it, develop the speed of efficient stenographers.

This is the shorthand *you* want. You can learn it in one-quarter of the usual time. In only 72 practice hours you will have speed enough to take down any kind of correspondence as fast as any man can talk. Best of all, Speedwriting is based on such common-sense principles that you can transcribe your notes accurately. That is what brings you quickest advancement—speed and accuracy!

Write for FREE BOOK

An interesting, illustrated book has just been prepared that tells all the facts about Speedwriting. In it you get actual facts that prove Speedwriting is the easiest, simplest, most reliable shorthand. This valuable book is FREE. Send for your copy today.

One of these Boys Will Fail - IF

BOTH possess equal health and intelligence, both have qualities that make for success, but only one will succeed, for the other one stammers—he will fail. He is dominated by fear. He will dread to meet people, for he will lack the self-confidence so necessary to succeed in all walks of life, but especially in business; and the humiliation of his disability will result in an impairment of his nervous system—a condition often the beginning of ill health.

All stammerers are fully aware of their handicap; they know how it feels to be regarded as "different" from other people—and often laughed at. They know that their affliction sets them apart from all others who are normal. They know that stammering is a handicap which prevents their greatest success in business or their participation in social affairs. But all stammerers do not know that their handicap can be removed.

From childhood Benjamin Bogue was afflicted with a chronic case of stammering. For nearly twenty years he endured the experience common to all stammerers. But after long years of tireless effort, after endless nights of study and days of research he developed the method by which he cured himself.

STAMMERING

ITS CAUSE AND CURE

In the book offered below, Mr. Bogue relates the story of his own experiences, and describes how he restored himself to perfect speech. As stammering is due to a lack of co-ordination between the speech muscles and the brain, he quotes in the book the eminent authorities that for years recognized the well-known fact that stammering cannot be "outgrown," but instead becomes "ingrown," and that in order to restore perfect speech it is necessary to establish proper functioning of the speech musculature.

Beginning on page 72 will be found an explanation of the causes of stammering. The results of stammering are also fully described, giving the basis of the conviction held by leading speech authorities that stammering should be removed before it becomes deeply rooted in the muscular and nervous system. The text beginning on page 196 is devoted to a description of the Bogue Unit Method, which is based on the principle of co-ordination between the mind and the speech organs. It has restored perfect speech to stammerers everywhere. No drugs or medicine are used, and the method is highly endorsed by physicians.

In this book will be found the reason for the world-wide reputation of the Bogue Unit Method and its international recognition as the standard method for the cure of stammering and stuttering. Hundreds of helpful facts are embodied in this valuable book entitled "Stammering, Its Cause and Cure," a copy of which will be sent on receipt of ten cents mailed with the coupon.

BENJAMIN N. BOGUE,
10606 Bogue Building,
1147 N. Illinois St., Indianapolis, Ind.

Enclosed is 10 cents for which please send me the book "Stammering—Its Cause and Cure"—and full information regarding the Bogue Unit Method for the cure of stammering and stuttering.

Order Your 1931 Almanac in Ample Time!

THE demand for THE WORLD ALMANAC for the past few years has severely taxed the facilities for production. As a consequence, many lifelong friends of THE ALMANAC have had delay and sometimes difficulty in obtaining the new volume.

The best, the easiest way, to assure yourself of a copy immediately upon publication is to attach a sixty cent check, postal or express money order to this coupon and mail it now while you think of it.

The World Almanac, ...1930
63 Park Row, New York.

I enclose 60 cents for which please enter my order for the 1931 Almanac immediately upon publication.

If you desire a cloth-bound copy, check this square and remit $1.10.

IMPORTANT—Letters containing coin, currency or postage stamps should be registered, otherwise at sender's risk. The safest way to remit is by bank check, postal or express money order.

SUCCESS—

Will You Pay the Price?

IF you are normal, you want the comforts and luxuries which are the by-products of success—a home of your own—a new car—the leisure to read—the means to travel.

You want these things very much.

But—you are keen enough to perceive that experience and facility in handling *routine* work will never get them for you.

What, then, are you doing to gain that *specialized* experience—that *trained* ability—for which business firms are willing to pay real money?

During the past twenty years more than 700,000 men have found the answer to that question in home-study training under the LaSalle Problem Method.

Evening after evening, they have seated themselves, to all intents and purposes, at the desks of men in high-salaried positions, and have squarely faced the *problems* of those positions.

Evening after evening, they have been shown the *principles* involved in the solution of such problems—and how those principles are applied by highly successful business houses.

Evening after evening, they have tackled concrete problems, lifted bodily from business life, and under the direction of some of the ablest men in their respective fields *have worked those problems out for themselves.*

That they have been *well rewarded* for their foresight and their earnestness is shown by the fact that during only six months' time as many as 1,248 LaSalle members reported salary increases totaling $1,399,507—*an average increase per man of 89%.*

Send for Free Book
Ten Years' Promotion in One

If you—knowing these facts—are content to drift, you will not profit by reading further.

If on the other hand you have imagination enough to see yourself in a home of your own, enjoying the comforts and luxuries of life—the coupon below may shorten your journey to success by many years.

Note, please, that the coupon will bring you full particulars of the training which appeals to you, together with your copy of that most inspiring book, "Ten Years' Promotion in One"—all without obligation.

If you want success, and are willing to pay the price, ACT!

LA SALLE EXTENSION UNIVERSITY

The World's Largest Business Training Institution

—Find Yourself Through LaSalle!—

LA SALLE EXTENSION UNIVERSITY, Dept. 3316-RA CHICAGO

I shall be glad to have details of your *salary-increasing plan,* together with complete information regarding the opportunities in the business field I have checked below. Also a copy of "Ten Years' Promotion in One," all without obligation.

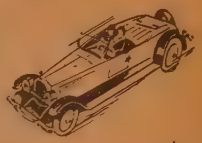
Airplane *and* Automobile



MECHANICS

In Big Demand

Steady Work — Good Pay for Stewart Trained Men

Send us more trained mechanics! That is the constant cry of Aircraft and Automobile employers everywhere. Intelligence and proper training are the first and most important requirements. Salaries of $50 to $100 a week and even more are gladly paid to men with ability to fill them. Advancement is unusually rapid.

Fine Starting Positions

EVERY ambitious man with a liking for mechanics should consider one of these two fields now and how he can prepare himself for them in the quickest and most economical way. A bright future awaits him. But every day's delay means a loss of time and money.

Good positions, right from the start, are always waiting for Stewart trained men. And in these two great industries promotions come rapidly to men with ability and a willingness to apply themselves.

You Owe It to Yourself to Investigate

We cordially invite you to visit and inspect our school. Then only will you realize why it is recognized by the Aircraft and Automobile Industries as being the *best* equipped—most efficient and up-to-date Aircraft and Automotive Training School in the United States.

Learn About Our Methods

Investigate and judge our methods for yourself—methods tried and proven after 20 years, experience in training men of all ages. See how our students are thoroughly trained in every phase of mechanics, construction, operation, repair and maintenance of every modern type of automobile or airplane. How they learn—by actually working on—taking apart and re assembling—cars and planes of every standard make.

Inquire about our *Free Employment Service* and our *Easy Payment* Plan for students who need financial help while training.

We assure you a cordial reception without any obligation on your part.

Call at once or phone Endicott 3066 or fill out and mail the attached coupon for additional information. Kindly state which branch you prefer.

For your home . . . the right STEINWAY and the right price

THE STEINWAY has been the personal instrument of almost every great pianist since Liszt. In the truest sense, it is "The Instrument of the Immortals." Yet it is primarily a piano for the home—and particularly for the home of limited income. For the lifelong service which this great piano will give you—30, 40, or even 50 years and more—spells real economy. Its wonderful singing tone will be *always* yours. You need never buy another piano. There is a model and a price to suit every home, and the terms are very convenient. The nearest Steinway dealer will gladly explain them to you. See him today!

There is a Steinway dealer in your community, or near you, through whom you may purchase a new Steinway piano with a 10% cash deposit, and the balance will be extended over a period of two years. Used pianos accepted in partial exchange.

Prices $875 *and up—plus transportation*

10% down *balance in two years*

American contributions to architecture

With reason the world is recognizing the leadership that America has assumed in architecture. For an essential part of true art is utility: in skyscrapers, in towering apartments, in factories, and in dwellings, American architects are fulfilling ideals of utility, beauty, and sincerity.

Crane Co. takes some pride in having made contributions to this art. By adhering to sound principles of design, it has evolved plumbing fixtures that help builders remain true to their objectives.

Its materials represent a complete range of appointments for cottages and mansions, for clubs and factories. In appearance, each unit serves the purpose for which it was designed. In quality, each fixture, each fitting embodies the honest and lasting craftsmanship which will ultimately determine the value of American architecture.

OCCURRENCES DURING PRINTING.

Six New Cardinals (Page 433)—Pope Piux XI at a secret consistory on Dec. 16, 1929, followed by a public consistory on the 18th, elevated to the cardinalate these six prelates:

Mgr. Emanuele Concalves Cerejeira (born 1879), Patriarch of Lisbon;

Mgr. Luigi Lavitrano (1874), Archbishop of Palermo;

Mgr. Carlo Dalmarzio Minoretti (1861), Archbishop of Genoa;

Mgr. Joseph MacRory (1861), Archbishop of Armagh;

Mgr. Jean Verdier (1864), Archbishop of Paris; and

Mgr. Eugenio Pacelli (1876), Nuncio to Berlin.

Austria (Pages 630, 631)—The Australian Parliament passed a revised constitution on Dec. 10, 1929 The President of the republic hereafter will be elected by popular vote instead of by Parliament and the term is extended from four years to six. He will have the right to issue decrees during national emergencies which, however, must have the consent of the Cabinet and within eighty days Parliament must be convened and within four weeks must confirm or reject the decree.

Canada (Page 569)—James A. Robb, Dominion Minister of Finance, died Nov. 11; Charles A. Dunning, former Premier of Saskatchewan, was appointed to succeed him.

Greece (Page 666)—Admiral Paul Koundouriotis, President of Greece, resigned that office because of ill health Dec. 10, and Alexander Zaimis was elected by Parliament on the 14th to succeed him.

Switzerland (Page 713)—Karl Scheurer, Vice-President of the Federal Council of Switzerland, who in the normal course would have been elected President for 1930, died Nov. 14. Jean Marie Musy was, on Dec. 16, elected President for the coming year.

Japan (Page 676)—The Japanese Government announced on Nov. 21 that the gold embargo pot on in September, 1917, would be removed on Jan. 11, 1930; and that a stabilization credit of 100,000,000 yen half in New York and half in London, had been arranged.

New Zealand (Page 616)—Lord Bledisloe has been appointed Governor-General in succession to Gen. Sir Charles Fergusson, Bt., whose term will expire early in 1930.

Iraq (Page 671)—Nazi Bey Suwaidi was made Premier of Iraq on Nov. 19 following the suicide of his predecessor.

Curacao (Page 691)—Maj. Van Slobbe was, on Dec. 2, named as Governor-General of Curacao to succeed M. de Fruytier who retired as a result of the raid of the Venezuelan filibusters.

Aviation (Page 186)—Maj. Tadio Larre-Borges and Lt. Challes started from Seville, Spain, Sunday Dec. 15, to fly to Montevideo, but were forced down when over Brazil, escaping with slight injuries.

New York City (Page 544)—The New York City Board of Aldermen, on Dec. 17, voted increases of salary for the Mayor from $25,000 to $40,000; Comptroller, from $25,000 to $35,000;P resident of the Board of Aldermen, from $15,000 to $25,000; and Borough Presidents, from $15,000 to $20,000 each. The Board of Estimate on Dec.19 unanimously ratified this action. Increases take effect on Jan. 1, 1930.

Benefactions (Page 141)—The Rockefeller Foundation, on Dec. 15, gave $250,000 to the American Schools of Oriental Research over a seven-year period, and a further sum of $250,000, tentatively, conditional on the raising of a like amount by the research organization

Steamship Fort Victoria Sunk in Collision—Just outside New York Harbor, on Dec. 18, in a fog, the outgoing steamship Fort Victoria, for Bermuda, and the Algonquin, for West Indian ports, collided, and the former sank in 60 feet of water. There was no loss of life.

The World.

JOSEPH PULITZER.
April 10, 1847 ✣ October 29, 1911.

THE WORLD, as established by JOSEPH PULITZER, May 10, 1883:—

"An institution that should always fight for progress and reform, never tolerate injustice or corruption, always fight demagogues of all parties, never belong to any party, always oppose privileged classes and public plunderers, never lack sympathy with the poor, always remain devoted to the public welfare, never be satisfied with merely printing news, always be drastically independent, never be afraid to attack wrong, whether by predatory plutocracy or predatory poverty."

Again, as always since the Great War, the Armistice and the peace treaties profoundly changed the current of world affairs, the editorial comment and policy of The World in 1929 turned first of all to the service and seeking of international peace. As the year closed, humanity had reason for high hopes of the outcome of a five-power naval conference to be held in the early days of the new year. The visit of Ramsay MacDonald, Labor Prime Minister of Great Britain, to the United States and his conversations with President Hoover upon the subject of Anglo-American relations provided suitable occasions to urge and commend the policy of further limitation of naval arms, a policy which The World, while frankly pointing out the difficulties which lie in the way, has consistently advocated. With Great Britain, Italy, France and Japan joining in the conference there is a fair prospect of success. Though The World had frankly and forcibly opposed the election of Republican Congressmen and a Republican President in 1928, it gave Mr. Hoover in his effort to promote sea disarmament more effective support than any newspaper organ of his own party, and cordially welcomed his selection of an excellent delegation to represent the United States in the Conference.

A little before Mr. MacDonald's visit a citizen of the Republic, Owen D. Young had accomplished with The World backing him at every step, an important work for delimitation of the war debts by carrying through the plan of payment—superseding the Dawes plan, which had served its purpose of affording a temporary arrangement for the payment and allocation of the German indemnities—which bears his name. The World has not ceased to urge that the scale of payments be kept within the bounds of what is reasonably possible.

An event or series of events quite out of the usual course was furnished during the year by the unprecedented rise of stock quotations on Wall Street and the resultant inevitable crash which carried many speculators to ruin. The World did not fail to speak words of caution during the rise; it upheld the efforts of the Federal Reserve to check wild speculation; it emphasized the basic soundness of the country in the days when disaster hung heavy on the Street; it energetically urged acceptance of President Hoover's plans for speeding up useful constructive undertakings, public and private, to avert possible unemployment in the wake of the slaughter of paper values; and it stood ready to rebuke fantastic remedies proposed in the halls of legislation, some of which would have proved in practise worse than the evils they were designed to cure.

The World continued to support with hearty approval President Hoover's Mexican policy of friendly understanding, ably carried out upon the ground by Ambassador Morrow. Toward the end of a year signalized by better relations between the sister republics than has been known in a lifetime there came a welcome illustration of the new spirit in Mexico, which we had aided in strengthening. The election of Senor Ortiz Rubio was the third in succession where the title and power of President passed from hand to hand by ballots and not by bullets, the election disturbances being local only. As a result the prospects of the new executive for a peaceful term were excellent. Mexico sorely needed a breathing spell to recover from the waste and destruction of civil disturbances. To the extent that the United States could aid in that process of recovery The World was unremitting in its efforts to spur and speed official action.

The elections of the year were generally of a minor character. New York State and City being no exception. Mayor Walker's re-election—by almost exactly half a million plurality, as it happened—was so easily foreseen that there was scarcely a conflict. The World, while preferring a continuation of the Walker Administration to the election of Major La Guardia, the Republican candidate, was sympathetic to the casting of a vote of protest for Norman Thomas, the candidate of the Socialist Party. Many thousand such votes were cast by men and women who had no intention of espousing the Socialist cause, and the lesson thus indicated seemed not to have been lost upon the Mayor, who promptly announced for his new term an admirable program of civic progress. City planning was at last taken up vigorously, with a timely report by Day & Zimmerman as the Mayor's experts; while the success of a referendum vote upon the Sanitary Commission plan promised another step forward in the long overdue reorganization of the city's departments for more effective functioning and the elimination of waste and duplicated work.

Upon the general subject of farm relief The World, though a metropolitan newspaper, maintained a sympathetic attitude. It backed Governor Roosevelt's policy of relieving the poorer counties of part of their road and school costs though the result was to add more state costs to city taxpayers. The World would have welcomed any real relief to staple farmers from the deliberations of Congress in special session though of their great relief by tariff reductions cheapening the cost of their purchases there was unhappily little hope. Circumstances being as they were, The World again commended Mr. Hoover for his desire to limit the action of the special session to the purposes named in the call. As to tariff changes in general, The World adhered to the policy announced by Governor Smith in the 1928 campaign that no attempt should be made at a general revision bill at any time; that tariff changes when actually needed should be made by separate single-purpose bills. Following this principle, The World urged the defeat of the Hawley-Smoot bill as mischievous and unnecessary.

In the affairs of New York State The World continued to commend the policy inherited by Governor Roosevelt from Governor Smith; of preserving to the people the benefits of their water power properties by public rather than private development. It supported also the Roosevelt policy of issuing bonds for the more rapid reconstruction of the State's backward hospitals. Before the year was out the appeal to the States by President Hoover to rush construction projects to prevent unemployment was to show how wise the bond policy, blocked by the Republican Legislature, would have been. Consistently also The World commended the splendid progress made by the State Park Board in developing parks and parkways in every part of the commonwealth.

The year was one of great progress in the construction of new subways; of little progress, if any, toward the unification of the systems, the new municipal lines with the two private corporations engaged in transit work. The World urged unification as the ultimate solution of the transit problem. It repeatedly called attention to the added pressure upon transit lines made by the mad race to erect the "tallest buildings in the world." It prodded the City Administration to speed up a solution of

the omnibus problem and the relief of street congestion.

THROWING LIGHT IN DARK CORNERS.

Since financial disturbances loomed so large in the year's history, it was inevitable that The World should have played an important part in throwing light into the darker corners. Early in January it was revealed that David Steinhardt, New York lawyer who had been appointed receiver in seventeen bankruptcy cases, was missing. Investigation by The World revealed that United States District Judge Francis A. Winslow had awarded a large proportion of these receiverships to Steinhardt. Enough evidence was gathered to indicate suspicious favoritism on the part of a member of the Federal bench. Largely as a consequence of The World's survey Congressman F. H. La Guardia moved Judge Winslow's impeachment. The Judiciary Committee of the House of Representatives appointed a sub-committee to take testimony, but before it began hearings Winslow resigned. Steinhardt committed suicide. Max D. Pinner, a court attache enmeshed in the scandal, after attempting to kill himself gave important aid to the investigators.

The situation revealed in Manhattan caused attention to be directed to Brooklyn, where it came to light that United States District Judge Grover M. Moscowitz had bestowed Federal receiverships generously on former law partners, and that the door of the office they occupied still carried the name of Judge Moscowitz. Congressman Arthur W. Somers of Brooklyn moved at Washington for the impeachment of Moscowitz, who for a time withdrew from the bench, later resuming his seat. The charges against him, it is expected, will be taken up during the current session of Congress.

When the City Trust Company, a state-chartered institution with several branches, closed its doors, following the suicide of its president, Frank M. Ferrari, The World developed many incidents revelatory of intimacy between Ferrari and Frank H. Warder, State Superintendent of Banks. Acting on these disclosures and those of other newspapers Acting Governor Herbert H. Lehman ordered a Moreland Act Inquiry. Warder resigned his state office, was tried and convicted of accepting a bribe. He is now free on heavy bail pending decision on his appeal.

Early in the year The World charged editorially that the Public Service Commission had become woefully ineffective for the purposes for which it was designed. This declaration brought immediate reaction among legislators, who with little dissent agreed with The World's conclusions. A legislative commission on revision of the public service law was the outcome. A mass of testimony has been collected and the commission's conclusions will be reported to the Assembly this year.

A series of prison revolts during the summer, two of them in leading New York state penal institutions led The World to undertake an inquiry which revealed a deplorable condition of over-crowding in prisons throughout the United States. The excess population of these institutions was found in cases to run as high as 121 per cent. Following publication of these facts, and of those gleaned from a special inquiry into conditions in New York prisons, Governor Roosevelt conferred with leading penologists on methods of relieving the situation.

A survey by The World which evoked immediate sympathetic vibrations from the hearts of its New York City readers was of noises that distract residents of the metropolis. Radio loudspeaker, riveter, traffic noises of a dozen kinds—all were considered dispassionately with a view to laying foundation for effective steps in abatement. The letter response to the published articles revealed, perhaps for the first time in a serious fashion by any important publication, that unnecessary street noises are a serious menace to happiness, health and in many cases to business. Health Commissioner Wynner was quick to catch the import of the survey, appointing a commission which is now well on its way in studies of noise conditions and their remedies.

Space limitations forbid detailed review of all of The World's public service activities during the year. It has continued to expose the sub-meter system whereby apartment house owners in New York City are milking their tenants. It was alone in its revelation that Bishop James Cannon, Jr., advisory member of the Methodist Board of Temperance, Prohibition and Public Morals, had lost heavily in stock speculation through a New York concern of the bucket shop variety. In a series of articles The World showed how the people of New York contribute not less than $200,000,000 yearly to the city's racketeers.

At the close of the theatrical year 1927-1928, St. John Ervine, distinguished English playwright and critic, returned home and his place at the head of The World's staff of dramatic reviewers was taken by Robert Littell. His lucid, interesting critiques have maintained the tradition's established and carried along by such men as Louis V. Defoe, Heywood Broun, and Alexander Woolcott. In the field of music Samuel Chotzinoff has carried on. Quinn Martin continues as an assayer of motion pictures. Harry Hansen continues to delight with his sane, always interesting book reviews, competently assisted by Harry Salpeter.

The Conning Tower of F. P. A. still holds its place facing the editorial page, companioned at the right by Elsie McCormick and William Bolitho. In lighter vein The World, as always, sustains a high standard of diversion. Three times a week and on Sundays Frank Sullivan contributes mirth-provoking comment on timely topics. Milt Gross and James M. Cain are other humorous writers who cannot be imitated successfully. Denys Wortman with his Metropolitan Movies delights an ever-growing public, while not less eagerly awaited day by day are Will B. Johnstone's topical cartoons, Mutt and Jeff and Webster's drawings.

IN THE FIELD OF SPORTS.

In keeping with the standard of previous years, reports of sports activities were accurate and thorough. To meet the needs of the demand of the greatly increased number of sports readers, The World has a staff thoroughly versed in its sphere with an ability to present its news in clear and flowing style.

George Daley, who writes horse racing, is one of the leading authorities on the turf in America. G. W. Daley, one of the real experts in baseball, has close friendships with players, managers, club owners and league presidents; he also holds a similar status in the field of ice hockey. Ned Brown, a close observer of boxing affairs, also dwells each day in his column, "Pardon My Glove," on both serious and facetious comment on the continual whirl of fistic activities. Dick Williams writes on golf and other sports with a rare descriptive touch. Jack Lippert is a close follower of tennis, and track and field. William Hennigan also reports the happenings in the baseball world with a deep background in the sport. Donald Gibbs presents the mirthful side of many sport events in his own inimitable style. L. de B. Handley is the foremost swimming authority in the United States.

The entire staff is under the direction of James Robbins, sports editor, who possesses a wide knowledge of sports in general.

Augmenting this regular staff for its daily contributions to The World is a large group of staff correspondents covering the large centers of population and the various college campuses dotting the country. From these points come dispatches as news warrants. In addition there are local correspondents whose duties are to supply The World with the news of the many minor sports.

Not only has The World its regular and staff correspondents, but to further satisfy the reader's appetite for sports news, offers the actual thoughts and opinions of combatants and near combatants of the field of play.

When the Philadelphia Athletics defeated the Chicago Cubs in the World's Series, The World printed daily stories by Connie Mack and Joe McCarthy, the contending managers; Al Simmons, of the Athletics; Hazen Cuyler, of the Cubs, and Babe Ruth. This same application to detail was to be found in the big golf events. When Abe Espinosa was beaten in the play-offs of the U. S. Open by Bobby Jones, Espinosa's account of the event was to be found in the columns of The World. Likewise at the amateur play, George Von Elm had an account each day from the competitor's point of view and Harrison Johnston gave his version of his brilliant victory over Dr. O. F. Willing in the final. Maureen Orcutt, Metropolitan and Eastern Women's Golf champion, covered all the important women's matches on the links.

Tad Jones gave The World readers intimate stories of the Harvard-Michigan, Yale-Princeton, Yale-Harvard and Army-Notre Dame football games; Knute Rockne, the Notre-Dame-Southern California and Notre Dame-Navy frays; Glenn Warner, the the Stanford-Southern California and Stanford-California games, and William Alexander, the Georgia Tech-Notre Dame contest. Albie Booth Yale's spectacular midget halfback, gave an account of the Yale-Harvard game.

Through Ned Brown, in his column, "Pardon My Glove" maimed veterans of the war located in Metropolitan hospitals are able to visit boxing shows in New York City without cost. The World's ring authority strongly advocated this measure and as a result several generous promoters extend courtesies to fifteen veterans at each of their boxing and wrestling programs.

NOTABLE COLOR GRAVURES.

The World, in its Color Gravure Section, continued during 1929 the earlier progress made in the presentation in color of paintings and living subjects. Of particular note was the spring fashion section published March 10, containing two pages of direct color photographs made from living models. During April a series of ten Wild West paintings from the famous collection of Dr. Philip G. Cole was greatly admired.

Throughout the year the Gravure Section continued the publication of the latest pictures illustrating events of national and international importance and The World often published there exclusive gravure photographs of paramount interest; outstanding were illustrations of Sir Hubert Wilkins's airplane exploration of the Antarctic, the cruise from Germany to Palestine of the German dirigible Graf Zeppelin and of its world cruise that was the aviation sensation of the year.

THE NEW WORLD MAGAZINE.

The year 1929 witnessed the advent of the new Sunday World Magazine, a marked improvement in both tone and content over its predecessor. With the first issue, September 15, there was brought to readers of The World something new in the Sunday magazine field. The praise and comment which this publication has aroused attest to its popularity.

Noticeable among the added features of the new magazine was the inclusion in its pages of direct color photographs, formerly appearing in the Color Gravure Section. This made possible the exclusive reproduction, in color, of many famous scenes, including the historical rooms of the White House in Washington.

Stories and feature articles by world famous writers appeared in each issue of the new magazine, as did illustrations and covers by such artists as Herb Roth, Samuel Cahan, Leo Kober, Gustav Tenggren, Penrhyn Stanlaws, Neysa McMein, Arthur M. Lewis, J. Recoder, and Garretto, the caricaturist.

The Sixteen Best Short Stories of 1929 again were presented in the Sunday Magazine early in the year, the fifth annual publication of this unusual anthology. The stories, selected from among those nominated by the editors of sixteen leading fiction magazines, included works by Vina Delmar, Coningsby Dawson, Katherine Newlin Burt, Stephen Vincent Benet, Thomas Boyd, Konrad Bercovici and Alice Duer Miller.

Other features in the Sunday Magazine from January 1 to September 15 included "Famous Mis-Steps of Justice," by Joseph Gollomb, a series of eight stories of true detective adventures that baffled the courts; "Master Detective—Joe Smith of the Waldorf," by Alan Macdonald, detailing the experiences of the secret service chief at the famous hotel; stories by Jack McLaren, telling of adventures and customs of the South Seas; "How I Carried the Message to Garcia," by Col. Andrew Summers Rowan, a thrilling account by the hero of his famous exploit; "New Honors to the Birds of War," by Alan Macdonald, a story of the nation's winged hero veterans of many battlefields; "Ladylips—Ghost of the Sea," by G. K. Spencer, weird version of a marine mystery, and a number of feature articles by Emery Derl, relating romances and intrigues of European personages.

With the arrival of the new Sunday Magazine in September, came the first publication in any form of a new novel by William J. Locke, entitled "Ancestor Jorico." This gripping serial, illustrated by Tenggren and Gordon Grant, was received enthusiastically. Additional features in the new magazine were weekly fashion pictures, in direct color photograph, of the latest styles from both Paris and New York, and a double page each week on which some colorful scene or object, lately before the eye of the color camera, was produced in bright hues. Marion Meyer Drew contributed articles on astrology, and answered queries on that subject from readers. Milton C. Work, well-known expert, conducted a weekly department on "How to Play Bridge."

Some noted literary features of the new magazine included "Take Him for a Ride," by Alan Macdonald, remarkable true story of astoic young gangster who was tortured, shot and left for dead on the New Jersey meadows; "Master Manhunters of the North," by Joseph Gollomb, a series of five stories dealing with the dramatic experiences of the Northwest Mounted Police; and fiction and feature articles from such artists as Edna Ferber, Robert E. Sherwood, F. Britten Austin, Homer Croy, E. Phillips Oppenheim, John Galsworthy, James Branch Cabel, Mary Roberts Rinehart, Peter B. Kyne, Edgar Rice Burroughs, S. S. Van Dine, P. G. Wodehouse, Octavus Roy Cohen, Clarence Buddington Kelland Achmed Abdullah.

Among the celebrities who contributed articles were Mary Pickford, Adolphe Menjou, Rudy Vallee, Dolores Del Rio and Joe Humphreys.

PULITZER PRIZE WINNER.

The Evening World continued, in 1929, in both its editorial and news columns the crusade against the abuse of legal practices which won from the Trustees of Columbia University the gold medal for the most disinterested and meritorious public service rendered by an American newspaper during the year 1928, a prize established by Joseph Pulitzer, who established the Evening World Oct. 10, 1887, 42 years ago.

The citation under which the medal was awarded read:

> For its effective campaign to correct evils in the administration of justice, including the fight to curb "ambulance chasers," support the "fence" bill, and measures to simplify procedure, prevent perjury and eliminate politics from municipal courts; a campaign which has been instrumental in securing remedial action.

Exhaustive and fearless research was made into the abuses of the bankruptcy process by lawyers and unscrupulous clients, and in one instance at least by judges, speedily brought results—the judge resigned; numerous lawyers resigned from the bar, a United States auctioneer was removed; and constructive changes were made in the entire procedure of bankruptcy cases, especially in the conservation of the assets of the bankrupt for the benefit of the creditors.

The campaign for the simplication of legal procedure in all courts was pressed. William H. Taft, Chief Justice of the Supreme Court of the United States, presented through the Evening World a notable pronouncement that such reforms of practice and simplifying of codes and procedure as were advocated by the Evening World were essential to the preservation of liberty and equal justice in the republic.

The Evening World has been active in disclosing the personal irresponsibility of lawmakers and administrators in conforming to the statutes for which they should be responsible; it has kept its readers enlightened as to the meaning of "free entry" past customs offices and other chimerical privileges claimed by congressmen and other public servants who have seemed to regard themselves as public concessionaires. A staff correspondent early in the year put before the readers a state of affairs very like the public exposure of official negligence of duty which was punished later in the year by sending three Washington reporters to jail.

The work of promoting better housing and living conditions has been continuous. Public interest in such movements has been stimulated and official action energized always for the good of the greatest number and the neediest. It was at the suggestion of the Evening World that the Libby's Hotel property on the lower east side, condemned and awaiting destruction to make room for the Chrystie-Forsythe street municipal housing plan was temporally leased to a trustee so that its stockholders who had lost their savings, might recover some of their investment.

The interpretation, in simple, clear terms, of the complications of politics enabled Evening World readers to understand the movement which brought about the renomination of Comptroller Berry after he had offended the dominating political leaders of his party by his conscientious independence of action in office. Evening World readers knew in advance the reason for the cancellation of the franchise of the Equitable Bus company when its policy, changed from a will to give public service and find a market for bus manufacturers to a project to peddle bus concessions to other corporations. Similarly the significance of events leading up to the election of a new leader of the City Democracy were so told that readers of the Evening World were able to forecast definitely what the result would be. The same was true of the municipal election.

The combined Movie and Radio Supplement of the Saturday issue were built up. The practical aid to the users of radio sets and the students of radio was increased by a comprehensive service of answers to questions by readers. In the moving picture department particular attention was given to the development of business leaders, artistic and scientific, in moving and talking pictures, in addition to their personalities and to critical reviews.

The scope of the education department to the city schools has been augmented by space devoted to the housebuilder, the housewife and the parent with an increased staff and an expanded field of activity.

The Evening World, in 1929, organized an independent service for the reporting of financial and business activity in terms understandable by those uninitiatiated in the technical language of "experts." This service was supplemented by articles written in the same manner by such authorities as Roger W. Batson and Irving Fisher. A daily report on stock prices has been broadcast by the Financial Department direct over the radio.

THE YOUNG PLAN SUCCEEDS THE DAWES PLAN.

The Belgian, British, French, German, Italian and Japanese governments reached a decision in Geneva on Sept. 16, 1928, to set up a committee of independent financial experts to draw up a complete and final settlement of the Reparations problem. Emphasis was given to the need for this work by the fact that the five-year program of the Dawes Plan would be completed on Aug. 31, 1929.

The report of S. Parker Gilbert, Agent-General for Reparations Payments issued on Jan. 1, 1929, on the fourth year of the workings of the Dawes Plan was optimistic. The total payments of 1,750,000,000 gold marks (250,000,000 marks more than for the previous year) had been punctually and fully made and the problem of transfer had presented no difficulties. The income from industrial debentures, railway bonds, the transport tax and other controlled revenues pledged for reparations payments had yielded "a total return which provides a margin considerably more than 100% over the standard budget contribution of 1,250,000,000 marks" and without impairing the resources or efficiency of the railways and other sources from which these revenues were derived. General business conditions were good, the aggregate production high, exports and imports nearly equalized and 5,000 contracts for deliveries in kind completed in the fourth annuity year. The only item increased for the fifty year over the fourth is the amount which the German budget is required to bear, about 750,000,000 more marks. He considered Germany able to pay the 2,500,000,000 gold marks ($625,000,000) called for by the Dawes Plan for the fifty or maximum year. He held that a fixation by mutual agreement of the aggregate amount of payments would be in the interest of the creditors of Germany as well as of Germany itself. "Fundamentally," he said, "confidence has been restored and Germany has been reestablished as a going concern on a relatively high level of economic activity."

The Committee of Experts met in Paris on Feb. 11, 1929. The members were:

Belgian—Emile Francqui, former member of Camille Gutt—alternates: Baron Terlinden, H. Fabri.

French—Emile Moreau, Governor of the Bank of France, Jean V. Parmentier, member of the Reparations Committee on Transfers—alternates: C. Moret, Edgar Allix.

German—Dr. Hjalmar Schacht, President of the Reichsbank; Dr. Adolph Voegler—alternates: Dr. C. Melchior, Dr. L. Kastl.

British—Sir Josiah Stamp and Lord Revelstoke, both directors of the Bank of England—alternates: Sir Charles Addis, Sir Basil Blackett.

Italian—Dr. Alberto Pirelli, Prof. Fulvio Suvitch—alternates: Giuseppe Bianchini, Bruno Dolcetta.

Japanese—Kengo Mori, former Financial Attache in London; Takashi Aoki, Under Governor of the Imperial Bank of Japan—alternates: Saburo Sonoda, Yasumune Matsui.

American—Owen D. Young, J. P. Morgan—alternates: Thomas N. Perkins, T. W. Lamont.

The American experts were selected and appointed by the six countries, the United States Government having declared that it had no objection. Owen D. Young was elected Chairman, Lord Revelstoke died on April 19 and was succeeded by Sir Charles Addis. Dr. Albert Voegler resigned and was succeeded by Dr. Ludwig Kastl.

FEATURES OF THE YOUNG PLAN.

The committee worked steadily, facing and overcoming a harassing multitude of difficulties, finally reached complete accord on June 4, and all signed the voluminous report on June 7. The main points of this report, which is everywhere called the Young Plan, are as follows:

First—That all financial controls, special securities and liens imposed on Germany by the former treaties and agreements shall be abolished and the Dawes Plan be suppressed as of August 31, 1929, when the new plan will go into effect.

Second—That Germany shall pay as from Sept. 1, 1929, in thirty-seven annuities closing on March 31, 1966, a total sum having a present value of 32,866,000,000 marks, the average annuity for this period, inclusive of the service of the Dawes loan, being 2,050,800,000 marks. An additional twenty-two annuities are to be paid from April 1, 1966 to March 31, 1988, these payments to equal the Allied outpayments on war debts to the United States during these years. The grand total present value of the Young Plan payments, including the 1,240,000,000 marks of the last five months of the Dawes Plan, is computed at 36,996,000,000 marks, with the interest figured at 5½%.

Third—That 660,000,000 marks from each of the first thirty-seven annuities shall be paid unconditionally in foreign currencies, without the right of postponement, being thus available for commercialization and mobilization. Of this unconditional portion of each annuity, 500,000,000 marks will be allocated to France. The unconditional annuity will be guaranteed by the imposition of a direct tax on the Reich railroads for the amount of 660,000,000 marks. All other payments represented by the first thirty-seven annuities will be derived from the budget of the Reich. The last twenty-two annuities are to be paid from a special sinking fund which will be built up by the allocation of 80% of the profits of the projected International Bank of Settlements. In the event of a reduction of the Allied payments on the debt to America, 66 2/3% of such reduction is to be allocated to Germany and 33 1/3% to the chief creditor nations.

Fourth—That there shall be set up a Bank for International Settlements which will be outside the field of political influence and which will take the place of the existing machinery for reparations collection. German payments will flow into this bank, from which, it is claimed, advantages will accrue both to Germany and to the creditor nations by putting the payments on a business basis, making their receipt more certain and facilitating their movement.

Fifth—That in periods of economic difficulty or crises Germany may, on appeal to the Special Advisory Committee of the Bank, be granted a postponement of part of the postponable portion of the annuities for a period not exceeding two years. Under continued abnormal conditions, part of the payments may be suspended entirely.

Sixth—That the system of deliveries in kind shall be gradually decreased from the value of 750,000,000 marks to 300,000,000 marks by the tenth year of the application of the new plan, such deliveries to be entirely suppressed thereafter.

Seventh—That there shall be a general liquidation within a year of the financial questions raised by the war and the subsequent peace treaty, affecting the restoration of German property and assuring the renunciation of claims, such as those of Germany against the successor States to the Austro-Hungarian Empire.

The Belgian experts signed after an understanding was reached with the German experts, that the settlement by direct negotiation of Belgium's claim for the making good for the worthless paper marks with which the country was flooded during the Invasion. This was duly carried and an agreement reached on July 13. (See page 631.)

The five creditor nations and Germany signed also a concurrent memorandum specifying the amounts of the annuities which are required to cover outpayments (i.e., the war debts due to the United States) for 59 years and providing that of any relief which any creditor power may effectively receive in respect of its net outward payments on account of war debts, as regards the first 37 years, Germany is to benefit to the extent of two-thirds by reduction of her annuity, and one-third of the net relief shall be retained by the creditor concerned; and as regards to the last 22 years, the whole of such relief shall be applied to the reduction of Germany's liabilities.

THE HAGUE CONFERENCE.

The nations concerned, with representatives also from the British Dominions, Greece, Poland, Portugal, Roumania, Yugo-Slavia and Czechoslovachia, met at The Hague Aug. 6 to consider the experts' report. An American observer, Edwin C. Wilson, First Secretary of the Embassy at Paris, was present. Philip Snowden, the British Chancellor of the Exchequer, declared that Great Britain had been most unfairly treated in the distribution of the German annuities and demanded that the Spa percentages be followed and that Great Britain be allotted a larger share or his government would withdraw. After much acrimonious haggling over terms a compromise was reached meeting a very substantial part of Snowden's financial demands—France, Italy, Belgium, Japan and Germany agreeing to guarantee Great Britain $9,528,000 (36,000,000 marks) of the $11,433,000 increase in Britain's annual receipts which he demanded, which brought Great Braitain's share of the unconditional annuities up to $22,867,200 (96,000,000 marks).

The distribution of the balance of the unconditional part of the annuities under the experts report, 70,000,000 marks, was fixed at: The British Empire, 55,000,000 marks; Japan, 6,600,000 marks; Yugo-Slavia, 6,000,000; and Portugal, 2,400,000 marks.

Guarantees were also given against the reexport of deliveries in kind which Snowden declared threatened British trade, and in no case are deliveries in kind to continue for more than ten years longer. Moreover the Italian State railways were pledged by Italy to buy a million tons of British coal annually

for the next three years "at the best British export market price."

It was further agreed that within eight months after the ratification of the Young Plan by France and Germany, and in any case by June 30, 1930, the evacuation of the Rhine Zone should be complete. (The British troops left Wisbaden Sept. 15, and the French began the evacuation of the Coblenz zone in November.)

The Conference adjourned Aug. 31 after its president, Premier Henri Jaspar of Belgium had announced that all the governments had accepted the Young Plan in principle, and by agreement Germany pays according to the Young Plan beginning with the end of the fifth year of the Dawes Plan, Aug. 31, 1929.

THE INTERNATIONAL BANK.

The subcommittee appointed by the Hague Conference to draw up the statutes for the Bank for International Settlements met at Baden-Baden Oct. 3, and completed their work on Nov. 14. Although the United States Government declined to have anything to do with it, Jackson E. Reynolds, president of the First National Bank of New York, and Melvin A. Taylor, president of the First National Bank of Chicago, selected by Owen Young, sat on the committee by invitation. Jackson E. Reynolds was made chairman.

Charter, statutes and trust deeds were drawn up and signed making compact and precise the Young Plan scheme and the home of the bank fixed at Basle, the protest of the Belgian members who desired Brussels be chosen, proving uneffective.

Under the terms of the Young Plan, 65% of the sums to be paid by Germany are to go to cover war debt payments to the United States, while 35% will be applied to war damage, mostly in France.

The Experts concluded "if our proposals are adopted with good will by all concerned, and the rest of the world has confidence in the constructive value of this mutual accord, then indeed there can be no reasonable doubt that the agreement will be capable of complete fulfillment and the nations it concerns will be brought to a high level of economic stability and of mutual understanding than ever before."

SHARE OF THE UNITED STATES.

In the division of the German annuities to be allotted under the Young Plan the United States consented (if other nations make similar sacrifices, and subject to the authorization of Congress) to a 10% reduction of its claim for reimbursements of costs of its army of occupation. The recommended share of the annuities for this and for the war claims was an average of 66,100,000,000 marks (approximately $15,731,800) for 37 years, and 40,800,000 marks (approximately $9,710,000) for 15 years thereafter. Of this the Secretary of the Treasury recommended to Congress that 40,800,000 marks annually be allotted to the satisfaction of mixed claims.

The total Army of Occupation cost charges (gross) as of Sept. 1, 1929 was $292,633,436 less credits to Germany of $44,797,790, leaving a net of $247,-86o,646; as against which payments were received under the agreement of May 25, 1923 of $14,725,154; and under the Paris agreement of Jan .14, 1925 of $39,203,726, a total of $53,928,880, leaving a balance due as of Sept. 1, 1929 of $193,936,765.

The estimated balance due as of Sept. 1, 1929, on account of mixed claims, some unsettled, was $256,-656,713, Germany having paid $31,831,472 during the five years of the Dawes Plan.

"RIGHTS OF MAN"—AN INTERNATIONAL DECLARATION.

The Institute of International Law, Dr. James Brown Scott, President, had its first meeting in the United States at Briarcliff Manor, N. Y., Oct. 21, 1929, and adopted unanimously the following declaration of the "Rights of Man":

"It is the duty of every State to recognize for every individual the equal right to life, liberty and property and to accord to every one on its territory the full and complete protection of the law without distinction for nationality, sex, race, language or religion.

"It is the duty of every State to recognize for every individual the right to the free exercise both public and private of every faith, religion or belief of which the practice is not incompatible with public policy and good morals.

"It is the duty of every State to recognize the right of every individual to the free use of the language of his choice and for instruction in this language."

These resolutions were drafted by a committee composed entirely of European lawyers under the chairmanship of Andre N. Mandlestam, formerly head of the Legal Department of the Foreign affairs Ministry of Russia and now a resident of France, and followed a long discussion.

* Pres. of Comm. † City Manager. § Pres. of Council.

FOOD SHIPS AND FREEDOM OF THE SEAS.

President Hoover, in his Armistice Day speech, Nov. 11, in the Washington, D. C. Auditorium, said in part:

"There is another of these age-old controversies which stir men's minds and their fears. That is the so-called freedom of the seas. In reality in our day it is simply the rights of private citizens to trade in time of war, for there is today complete freedom of the seas in times of peace.

"If the world succeeds in establishing peaceful methods of settlement of controversies, the whole question of trading rights in time of war becomes a purely academic discussion. Peace is its final solution.

"But I am going to have the temerity to put forward an idea which might break through the involved legal questions and age-old interpretations of right and wrong by a practical step which would solve a large part of the intrinsic problem. I have not made it a governmental proposition to any nation and do not do so now. This is not a proposition for the forthcoming naval conference.

"For many years, and born of a poignant personal experience, I have held that food ships should be made free of any interference in times of war. I would place all vessels laden solely with food supplies on the same footing as hospital ships. The time has come when we should remove starvation of women and children from the weapons of warfare.

"The rapid growth of industrial civilization during the past half century has created in many countries populations far in excess of their domestic food supply and thus steadily weakened their natural defenses. As a consequence, protection for overseas or imported supplies has been one of the most impelling causes of increasing naval armaments and military alliances.

"The fear of an interruption in sea-borne food supplies has powerfully tended toward naval development in both importing and exporting nations. In all important wars of recent years, to cut off or to protect such supplies has formed a large element in the strategy of all combatants.

"The world must sooner or later recognize this as one of the underlying causes of its armed situation, but, far beyond this, starvation should be rejected among the weapons of warfare.

"To those who doubt the practicability of the idea, and who insist that agreements are futile for the purpose of controlling conduct in war, I may point out that the Belgian Relief Commission delivered more than 2,000 shiploads of food through two rings of blockade and did it under neutral guarantees continuously during the whole World War."

LATE SPORTS.

Bicycle—Six-day Race, Dec. 1-7, Madison Sq. Garden, N. Y. City—

Team.	Miles.	Laps.	Pts.
Georgetti-Debaets	2,270	9	505
Spencer-Deulberg	2,270	8	651
Letourner-Brocardo	2,270	8	276
Hill-Walthour	2,270	8	126
McNamara-Bellont	2,270	7	576
Horder-Linari	2,270	7	435
Bichill-Reiger	2,270	7	342
Beckman-Winter	2,270	6	598

Football—Results of games played December 7:

Centenary 6	Loyola (New Orleans)	0
Florida 20	Oregon	6
Georgia 12	Georgia Tech	6
Haskell Inst. 20	Tulsa	14
Louisiana Tech 24	S. W. Louisiana	7
North Carolina U. 48	Duke	7
Oklahoma City 27	Davis-Elkins	14

Position.	Name and Club.	Time.
1	Gus Moore, Univ. of Pittsburgh	31:14
2	Eino Heikkila, Dorchester Club	31:50
3	Eldridge Stevens, Dorchester Club	32:08
4	George Rapp, Meadowbrook Club	32:15
5	William C. Zepp, Dorchester Club	32:13

THE JONES-WHITE ACT.

The Jones-White merchant marine act, approved May 22, 1928, was intended to put American shipping on an equal footing with the shipping of other nations. It contemplated primarily the financing, by Government loans, of ship construction for private ownership and operation. For this loan service it authorized the construction loan fund to be increased to a total of $250,000,000 and provided that from this fund private ship builders might borrow, on long terms and at low interest rates, up to three-quarters of the cost of the ships they build for foreign trade, and one-half of the cost of vessels built for the coasting trade. More liberal mail subsidies and long-term mail contracts were also provided, and the U. S. Shipping Board was also authorized to create an insurance fund in which it may insure in whole or in part, against all hazards commonly covered by insurance policies in such cases, any legal or equitable interest of the United States in any vessel constructed or in process of construction and in any plants or properties in the possession or under the authority of the Board.

RULERS OR HEADS OF GOVERNMENTS OF THE WORLD.

The date of birth, when known, is given in parentheses.

Country.	Name of Ruler, Etc.	Accession.
Abyssinia	Waizeru Zauditu (1876), *Empress*; Ras Tafari, *King and Regent*	1916
Afghanistan	Nadir Khan, *King*	1929
Albania	Ahmed Zogu (1894), *King of the Albanians*	1924
Argentina	Dr. Hipolito Irigoyen (1852), *President*; term, six years	1928
Australia	Lord Stonehaven (1874), *Governor General*; I. H. Scullin, *Premier*	1925
Austria	Dr. Wilhelm Miklas (1872), *President*; Johann Schober, *Premier*	1928
Belgium	Albert (1875), *King*	1909
Bhutan (Br. Protectorate)	Jik-me Wangchuck, *Maharajah*	1926
Bolivia	Hernando Siles, *President*; term, four years	1925
Brazil	Dr. Washington Luis Pereixa de Sousa (1870), *President*; term four years	1926
Bulgaria	Boris III. (1894), *Czar*	1918
Cambodia	Monivong, *King* (French protectorate)	1927
Canada	Lord Willingdon (1866), *Governor General*; Mackenzie King, *Premier*	1926
Chile	Gen. Carlos Ibanez (1882), *President*; term, six years	1927
China	Gen. Chiang Kai-shek, *President*	1928
Colombia	Dr. Miguel Aradia Mendez, *President*; term, four years	1926
Costa Rica	Cleto Gonzales Viquez (1858), *President*; term, four years	1928
Cuba	Gen. Gerado Machado, *President*; re-elected 1928 for six years	1925
Czechoslovakia	Thomas G. Masaryk (1850), *President*; for life	1920
Danzig	Heinrich Sahm (1877), *Senate President*	1921
Denmark	Christian X. (1870), *King*	1912
Dominican Republic	Gen. Horacio Vasquez, *President*; term, four years	1924
Ecuador	Dr. Isidro Ayora (1879), *President*; re-elected Mar. 2, 1929 for five years	1926
Egypt	Fuad I. (1868), *King*; Adly Pasha, *Premier*	1922
Estonia	Otto Strandmann, *State Head*	1926
Finland	L. K. Relander (1883), *President*; term, six years	1925
France	Gaston Doumergue (1863), *President*; term, seven years	1924
Germany	F. M. Paul von Hindenburg (1847), *President*, seven years	1925
Greece	Alexander Zaimis, *President*	1929
Guatemala	Dr. Lazaro Chacin (1873), *President*; term, six years	1926
Haiti	Louis Borno, *President* (under American quasi protectorate)	1922
Hejaz and Nejd, The	Abd-el-Aziz es Saud ibn Saud (1882), *King*	1926
Honduras	Dr. Vincente Mejia Colundris, *President*; term, four years	1929
Hungary	Admiral Nicholas von Horthy (1868), *Regent*	1920
Iceland	Christian X. (1870), *King*	1912
India (British)	Lord Irwin (1881), *Viceroy*	1926
Iraq (Mesopotamia)	Feisal I. (1887) *King*	1921
Irish Free State	William T. Cosgrave (1880), *Presdent* of the Dail Eireann	1922
Italy	Victor Emmanuel III. (1869), *King*; Benito Mussolini, *Premier*	1900
Japan	Hirohito (1901), *Emperor*	1926
Latvia	Gustav Zemgals (1871), *President*; term, three years	1927
Liberia	Charles D. B. King, *President*; term, four years, reelected 1924, 1928	1920
Liechtenstein	Francis I. (1853), *Prince*	1929
Lithuania	Antona Smetona, *President*	1926
Luxemburg	Charlotte (1896), *Grand Duchess*	1919
Mexico	Emilio Portes Gil (1891), *Provisional President* to Feb. 5, 1930 Pascual Ortiz Rubio (1877), *President-elect*, term. four years	1928 1930
Monaco	Louis (1870), *Prince*	1927
Morocco	Moulai Mohammed (1913), *Sultan*, third son of Moulai Yusef	1922
Nepal	Tribhubana Bir Bikram (1906), *Shah*	1911
Netherlands	Wilhelmina (1880), *Queen*	1890
Newfoundland	Sir John Middleton (1871), *Governor*: Sir Richard Squires, *Premier*	1929
New Zealand	Sir Charles Fergusson (1865), *Gov. Gen.*; Sir Joseph Ward, *Premier*	1924
Nicaragua	Gen. Jose Maria Moncado, *President*; term, four years	1929
Norway	Haakon VII. (1872), *King*, son of Frederick VIII. of Denmark	1905
Oman	Seyyid Timour ibn Feisal (1886), *Sultan*	1913
Palestine	Sir J. R. Chancellor (1870), *British High Commissioner*	1928
Panama	Dr. Florencio Arosemena, *President*; term, four years	1928
Paraguay	Dr. Jose P. Guggiari (1884), *President*; term, four years	1924
Persia	Mirza Reza Pahlavi (1878), *Shah*	1925
Peru	Augusto B. Legula, *President*; term, five years (re-elected 1924 and 1929)	1919
Poland	Prof. Ignatz Mosciski, *President*	1926
Portugal	Gen. Antonio Carmona (1869), *President*	1926
Prussia	Herr Otto Braun (1872), *Premier*	1922
Roumania	Michael (1921), *King*; Prince Nicholas et als, *Regents*	1927
Russia (U. S. S. R.)	Governed by Soviet Commissars headed by Alexis Rykov	1924
El Salvador	Dr. Pio Romero Bosque (1863), *President*; term, four years	1927
Siam	Prada Dhipok (1893), *King*	1925
Soudan, Anglo-Egyptian	Sir John Loader Maffey, K. C. V. O., (1877), *Governor General*	1926
South Africa, Union of	Earl of Athlone (1874), *Governor General*; J. B. M. Hertzog, *Premier*	1924
Spain	Alfonso XIII. (1886), *King*; Gen. Primo de Rivera (1870), *Premier*	1886
Sweden	Gustaf V. (1858), *King*	1907
Switzerland	Jean Marie Musy, *President*, term, one year	1930
Syria (French Mandate)	Auguste Henri Ponsot (1877), *High Commissioner*	1920
Tunis	Sidi Ahmed, *Bey*	1929
Turkey	Mustapha Kemal Pasha (1880), *President* of the Grand Natl. Assem.	1923
United Kingdom	George V. (1865), *King and Emperor*; Ramsay MacDonald, *Premier*	1910
United States	Herbert Hoover (1874), *President*; term, four years from Mar. 4, '29.	1929
Uruguay	Dr. Juan Campisteguy (1859), *President*; term, four years	1927
Vatican City, State of	Piux XI (1857), *Pope*	1922
Venezuela	Dr. Juan Bautista Perez (1870), *President*; term, seven years	1929
Yugo-Slavia	Alexander (1889), *King*	1921
Zanzibar	Seyyid Khalifa ibn Harub (1879), *Sultan*	1911

Wisconsin, east.	L. H. Bancroft	Milwaukee.
Wisconsin, west.	S. M. Ryan	Madison.
Wyoming	A. D. Walton	Cheyenne.

U. S. COURT OF CUSTOMS AND PATENT APPEALS.

Presiding Judge—William J. Graham, of Ill.; *Associate Judges*—Oscar E. Bland, of Indiana; Charles S. Hatfield, of Ohio; Finis J. Garrett, of Tennessee; Irvine L. Lenroot, of Wisconsin; *Marshal*—Frank H. Briggs, of Maine; *Clerk*—Arthur B. Shelton, of Maryland.

The act of Congress of Aug. 5, 1909, created the United States Court of Customs Appeals.

By this act the court was given exclusive jurisdiction to review, by appeal, final decisions of the Board of General Appraisers (now the United States Customs Court), and it further provided that the judgment or decrees of the Court of Customs Appeals should be final in all cases.

By act of Aug. 22, 1914, it was provided that review by the Supreme Court might be had on certain conditions, involving constitutional questions or treaty rights, or where the Attorney General might, previous to the decision of a case, file with the court a certificate to the effect that the case is of such importance as to render expedient its review by the Supreme Court.

The Act of March 2, 1929, effective April 1, changed the title of the United States Court of Customs Appeals to the United States Court of Customs and Patent Appeals, and conferred on the court the jurisdiction formerly vested in the Court of Appeals of the District of Columbia in respect to appeals from the Patent Office in patent and trade-mark cases.

On April 1, 1929, patent and trade-mark cases to the number of 241 were transferred to this court. Since then, and up to Nov., 1929, 144 patent appeals have been filed, making a total of 385.

THE U. S. BOARD OF TAX APPEALS.

The office of the Board at Washington, D. C., is open each business day from 9 A.M. to 4.30 P.M.

Chairman—Logan Morris; other members: W. C. Lansdon, John J. Marquette, Charles P. Smith, John M. Sternhagen, Charles M. Trammell, Sumner L. Trussell, Percy W. Phillips, William R. Green, Jr., William D. Love, C. Rogers Arundell, J. Edgar Murdock, Ernest H. Van Fossan, Stephen J. McMahon, Eugene Black, and Herbert F. Seawell.

Robert C. Tracy, *Secretary*; B. D. Gamble, *Clerk*; Charles E. Gebhardt, *Reporter*.

1931.	Patrick J. Sullivan, R.	Rawlins.

Number of Senators, 96; Republicans, 56; Democrats, 39; Farmer Labor, 1.

Henry J. Allen, Kansas, was appointed to the vacancy caused by the resignation of Charles Curtis, Mar. 3, 1929, before being sworn to the Vice-Presidency. David Baird, Jr., New Jersey, was appointed Nov. 21, 1929 to the vacancy caused by the resignation of Walter E. Edge, confirmed that day as Ambassador to France; Governor Larson of New Jersey announced that Mr. Baird would retire in 1930 and Dwight W. Morrow (R.) now Ambassador to Mexico would be appointed to fill the unexpired term on his return from the Naval Disarmament Conference to be held in London in January, 1930. Roscoe C. McCulloch, Ohio, was appointed to the vacancy caused by the death of Theodore E. Burton Oct. 28, 1929. W. E. Brock, Tennessee, was appointed to the vacancy caused by the death of Lawrence D. Tyson, Aug. 24, 1929. The death of Francis E. Warren, Wyoming, on Nov. 24, 1929, when Congress was not in session, left a vacancy that must under the State Law be filled by a special election in January, 1930; Gov. Emerson, on Dec. 3, appointed Patrick J. Sullivan to fill the vacancy until then. Joseph R. Grundy, Pa., was appointed by Gov. Fisher to the vacancy created on Dec. 6., 1929, when the Senate, by a vote of 58 to 22, refused to seat William S. Vare, R., who was elected in 1926 for a full term.

THE HOUSE OF REPRESENTATIVES

Elected Nov. 6, 1928; terms from March 4, 1929, to March 4, 1931. Salary of members, $10,000 a year.

INVISIBLE BALANCE OF TRADE OF THE UNITED STATES, 1927 AND 1928.

The estimated balances of international payments of the United States for the calendar years 1927 (revised) and 1928 as prepared by the United States Department of Commerce is here given. More items have been taken into consideration, so no comparison can be made with the figures for 1922-1925 printed in previous World Almanacs. The net debit balance for 1926 (revised) was estimated at $186,000,000.

The "invisible items" as prepared by Dr. Ray O. Hall, Assistant Chief of the Finance and Investment Division of the Department, are as follows:

Classes of International Transactions.	Cal. Year, 1927 (rev.).			Cal. Year, 1928.		
	Creds.	Debs.	Balance.	Creds.	Debs.	Balance.
			(*In Millions of Dollars.*)			
Commodity Trade:						
Merchandise exports and imports (as reported)	4,865	4,184	+681	5,129	4,091	+1,038
Silver	76	55	+21	87	68	+19
Bunker coal and oil sales to foreign vessels	60	29	+31	50	25	+25

Foreign securities publicly offered here (at par)	.....	1,537	−1,537	.....	1,483	−1,483
Deduct for "refunding to Americans"	235	.....	+235	237	.....	+237
Deduct for American underwriters' commissions	63	.....	+63	59	.....	+59
Deduct for securities issued below par	56	.....	+56	63	.....	+63
Add new "direct invest." abroad by Americans	.....	257	−257	.....	378	−378
Add foreign stocks and bonds bought from foreigners in small lots (*b*)	.....	166	−166	.....	568	−568
Reductions of previou Amer. investments abroad:						
Bond-redemptions payments rec. from foreigners	200	.....	+200	260	.....	+260
Sinking-fund payments rec. from foreigners	104	.....	+104	101	.....	+101
Resale to foreigners of direct investments	51	.....	+51	50	.....	+50
Foreign stocks and bonds resold to foreigners	398	.....	+398	442	.....	+442
New foreign investments in the U. S.:						
Direct investments	28	.....	+28	70	.....	+70
American stocks and bonds sold to foreigners (*b*)	861	.....	+861	1,634	.....	+1,634
Reductions of previous foreign investments in U. S.:						
Redemption and sinking-fund pay's to foreigners	.....	70	−70	.....	70	−70
Purchase of American properties from foreigners	.....	.....	.....	.....	.....	.....
Amer. stocks, bonds bought back from foreigners	.....	661	−661	.....	1,153	−1,153
Total private, long-term capital items	1,996	2,691	(*d*) −695	2,916	3,652	(*c*) −736
Movement of short-term capital:						
Net change in international banking accounts, as revealed by questionnaire	.....	.....	.....	.....	226	−226
Pure Cash Items:						
Gold shipments	201	207	−6	561	169	+392
Changes in ear-marked gold	183	23	+160	68	188	−120
Total gold and currency	384	230	+154	629	357	+272
Grand total, all items	9,160	9,113	(*d*) +47	10,648	10,608	(*d*) +40

(*a*) Largely a deduction from American tourist expenditures.

(*d*) One of four important items whose amounts are extremely uncertain. It is supposable that most of the net discrepancy in the entire statement (arising from errors and omissions) results from errors in this group of items. Accordingly, the original estimates of these items were all altered according to a uniform ratio which would eliminate 60 per cent of the net discrepancy in the entire statement. Before the items were thus altered, the net discrepancies for the years 1927 and 1928 were respectively +118 and +101.

(*c*) Estimated net export of long-term private capital.

(*d*) Discrepancy, due to net errors and omissions.

Astronomical Calculations for 1930.

The Astronomical Calculations are given in local Mean Time, except as otherwise indicated, and were made expressly for The World Almanac by Henry B. Hedrick, Ph.D., Washington, D. C.

(Time after noon is indicated by **black-face** type.)

THE SEASONS.

In the temperate zones, these are four in number: Spring, Summer, Autumn and Winter; beginning respectively at the vernal equinox, the summer solstice, the autumnal equinox and the winter solstice; for which, in the north temperate zone, the approximate dates are March 21, June 21, September 23, and December 21.

In the south temperate zone, the vernal equinox or the beginning of Spring is September 23, the summer solstice or the beginning of summer is December 21, and so on.

The earth's axis continually points in the same direction, and if the axis were perpendicular to the plane of the earth's orbit around the sun there would be no change of seasons. Day and night would everywhere be of equal length and equable conditions of temperature would prevail.

But the axis is tilted 23° 27′ away from a perpendicular to the orbit, and only in March and September is the axis at right angles to the direction of the sun.

In those months occur the equinoxes, when day and night are equal the world over.

In June, the North Pole is tilted 23° 27′ toward the sun and the days in the northern hemisphere are longer than the nights; at the same time, the days in the southern hemisphere are shorter than the nights.

In December the North Pole is tilted 23° 27′ away from the sun, and the nights in the northern hemisphere are longer than the days; at the same time the nights in the southern hemisphere are shorter than the days.

The heating influence of the sun increases with the length of the day and with the sun's altitude at noon. The greatest daily accession of heat is, therefore, at the time of the summer solstice.

In June, in the north temperate zone, the heat received by day far exceeds the loss through radiation by night, and it is not until July or August that the two become equal and the maximum temperature of the year is experienced.

In December, the heat received by day fails to make good the loss by night, and it is not until January or February that gain and loss become equal and the thermometer ceases to show a downward tendency.

The seasons in 1930 (Eastern Standard Time) begin as follows: Vernal Equinox (Spring) March 21, 3.30; Summer Solstice (Summer) June 21, 10.54; Autumnal Equinox (Autumn) September 23, 1.37; Winter Solstice (Winter) December 22, 8.40.

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week July 4, 1918, fell, look in the table of years for 1918, and in a parallel line under July is figure 1, which directs to column 1 in which it will be seen that July 4 fell on Thursday.

* 1752 same as 1772 from January 1 to September 2. From September 14 to December 31 same as 1780 (September 3–13 were omitted). (Whitaker's Almanack).

Morning Stars in 1930.

Mercury—January 22 to April 1; May 20 to July 15; September 21 to November 7. Greatest elongation February 15, June 14, October 7.

Venus—January 1 to Feb. 6; November 22 to the end of the year. Greatest brilliancy December 28.

Mars—January 1 to the end of the year.

Jupiter—June 20 to the end of the year.

Saturn—January 1 to June 30.

Evening Stars in 1930.

Mercury—January 1 to January 22; April 1 to May 20; July 15 to September 21; November 7 to the end of the year. Greatest elongation January 5, April 27, August 25, December 19.

Venus—February 6 to November 22. Greatest elongation September 13. Greatest brilliancy October 18.

Mars—Not during the year.

Jupiter—January 1 to June 20.

Saturn—June 30 to the end of the year.

METHOD OF USING THE TABLE ABOVE.

Directions:—For New York City, subtract 4m. from the Calendar for that city and the result is in Eastern standard time; for other cities, use the Calendar named at head of column and add or subtract the given number of minutes; this gives the required standard time, which is Eastern, Central, Mountain or Pacific, according as the letter E, C, M or P is found in the table. A small letter indicates that in case of sunrise and sunset, a correction for latitude is advisable; which correction is to be found in the table below, in the column headed by the small letter and on line with the date.

CORRECTION TO SUNRISE.

The year 1930 corresponds to the year 7438-39 of the Byzantine era; 5690-91 of the Jewish era, the year 5691 commencing at sunset September 22; 2683 since the foundation of Rome, according to Varro; 2706 of the Olympiade or the second year of the 677th Olympiad, commencing July 1; 2590 of the Japanese era, and to the 54th year of the period entitled Showa; 1548-49 of the Mohammedan era, the year 1349 beginning at sunset May 25.

The 155th year of the independence of the U. S. begins on July 4, 1930.

THE ANCIENT AND MODERN YEAR.

The Athenians began the year in June, the Macedonians in September, the Romans first in March and afterward in January, the Persians on August 11, the ancient Mexicans on February 23, the Mohammedans in July.

THE CHINESE YEAR.

The Nationalist Government in China decreed that the Gregorian Calendar should go into effect on Jan. 1, 1929; but, owing to internal conditions, its practical enforcement has been limited to the great ports and to official activities and agencies.

The old Chinese year began late in January or early in February and was similar to the Mohammedan, having 12 months of 29 and 30 days alternately; but in every 19 years there were 7 years, each of which had 13 months. This did not work out quite right, so the years were arranged in 60-year cycles with 22 extra months distributed through each cycle.

Each of the old years in China had an animal for its symbol. There are 12 of these animals, coinciding in number and order with the signs of the Zodiac.

Year	Symbolic Animal	Zodiac Sign	Year	Symbolic Animal	Zodiac Sign	Year	Symbolic Animal	Zodiac Sign
1928	Dragon (Shan)	Leo	1932	Monkey (Shan)	Sagittarius	1936	Rat (Tzu)	Aries
1929	Serpent (Ssu)	Virgo	1933	Cock (Yu)	Capricornus	1937	Ox (Chou)	Taurus
1930	Horse (Wu)	Libra	1934	Dog (Hsu)	Aquarius	1938	Tiger (Yin)	Gemini
1931	Sheep (Wei)	Scorpio	1935	Boar (Hai)	Pisces	1939	Hare (Mao)	Cancer

This 12-year animal-cycle of year has persisted in China and also in Japan. The superstitious oriental believed each of the animals named rules events in its corresponding year.

CHURCH FASTS.

The Roman Catholic Days of obligation are: Jan. 1 (Circumcision of Christ); Ascension Day (forty days after Easter Sunday); Aug. 15 Assumption of the Blessed Virgin Mary); Nov. 1 (All Saints' Day); Dec. 8 (Immaculate Conception); Dec. 25 (Christmas), and all the Sundays of the year.

The Roman Catholic canon law prescribes abstinence for every Friday of the year. Abstinence and fast together are to be observed on Ash Wednesday, the Wednesdays and Fridays of Lent (in the United States), the Ember Days, the Vigils of Penetcost' the Assumption of the Blessed Virgin Mary, the feast of All Saints, and the Nativity of Our Lord. The law of fast alone is prescribed for all the remaining days of Lent except Sundays.

In the American Episcopal Church the days of fasting or abstinence to be observed, according to the Book of Common Prayer, are the forty days of Lent, the Ember Days, the three Rogation Days, and all the Fridays of the year except Christmas Day. In the Greek Church the four principal fasts are those in Lent, the week succeeding Whitsuntide, the fortnight before the Assumption, and forty days before Christmas.

Ember and Rogation Days are certain periods of the year devoted to prayer and fasting. Ember Days, twelve annually, about the beginning of the four seasons, are the Wednesday, Friday, and Saturday after the first Sunday in Lent, in Spring; after the feast of Pentecost (Whitsunday), Summer; after the festival of the Holy Cross, Autumn, and after the festival of St. Lucia, Winter. Ember Weeks are the weeks in which the Ember Days appear.

The Ember Days in 1930 at March 12, 14, 15; June 11, 13, 14; Sept. 17, 19, 20; December 17, 19, 20.

Rogation Days occur on Monday, Tuesday, and Wednesday immediately preceding Ascension Day, and in 1930 fall on May 26, 27, 28.

GREEK CHURCH CALENDAR, 1930.

Date.	Holy Days.	Date.	Holy Days.	Date.	Holy Days.
Jan. 1	Circumcision.	May 29	Ascension.	Sept. 8	Nativity of Theotokos.
Jan. 6	Theophany (Epiphany).	June 8	Pentecost.	Sept. 14	Exaltation of Cross
Feb. 2	Hypapante (Purification).	June 9	Holy Ghost.	Oct. 1	Patronage of Theotokos.

THE FRENCH REVOLUTIONARY ERA.

The year was divided into twelve months of thirty days each. These months were called Vendemiaire, the month of vintage; Brumaire, the month of fog; Frimaire, the month of frost; Nivose, the snowy; Pluviose, the rainy; Ventose, the windy month; Germinal, the month of buds; Floreal, the month of flowers; Prairial, the month of meadows; Messidor, the month of reaping; Thermidor, the month of heat; Fructidor, the month of fruit. In ordinary years there were five extra days, from the 17th to the 21st of our September, and at the end of every fourth year was a sixth complementary day. This reckoning was first used on November 22, 1793, and was continued until December 31, 1805.

ASH WEDNESDAY AND EASTER SUNDAY.

The English word "Easter" is derived from the name of the Saxon goddess, *Eostre*, whose festival was in April.

Year.	Ash Wed.	Easter Sunday.	Year.	Ash Wed.	Easter Sunday.	Year.	Ash Wed.	Easter Sunday.	Year.	Ash Wed.	Easter Sunday.

In A. D. 325 the Council of the Christian Churches at Nicaea adopted the present rule for determining the date of Easter, which is that Easter shall be on the first Sunday following the Paschal Full Moon which happens upon or next after the 21st of March. The principal reason, says George Eastman, for placing Easter Sunday on this date was that the pilgrims needed moonlight to travel on their way to the great yearly Easter festivities. The date of Easter may vary at present between March 22 and April 25, over a period of 35 days.

If Paschal Full Moon falls on a Sunday, then Easter Day is the next Sunday. The Paschal Full Moon is the Fourteenth Day of a Lunar month reckoned according to an ancient ecclesiastical computation and not the real or astronomical full moon.

The Golden Number used in the table below, is greater by unity than the remainder obtained upon dividing the given year by 19; for example; 10 is the Golden Number for the year 1928; from the table, the date of Paschal Full Moon is April 5, and this being Thursday, Easter Sunday is on April 8, 1928.

Lent begins on Ash Wednesday, which comes 40 days previous to Easter Sunday, not counting Sundays.

DATE OF PASCHAL FULL MOON, 1900-2199.

Golden Number.	Date.	Golden Number.	Date.	Golden Number.	Date.	Golden Number.	Date.
1	April 14	6	April 18	11	Mar. 25	16	Mar. 30
2	April 3	7	April 8	12	April 13	17	April 17
3	Mar. 23	8	Mar. 28	13	April 2	18	April 7
4	April 11	9	April 16	14	Mar. 22	19	Mar. 27
5	Mar. 31	10	April 5	15	April 10		

The Greek and Orthodox Churches having adopted the Gregorian Calendar, their Easter coincides with that of the Western nations.

Both festivals and fasts were common among the ancients before the Christian Era.

In Babylon, in Spring, a 40-day fast was observed. In Kurdistan the Yezides, or Sun Worshippers, still keep a period of 40 days.

The Egyptians annually fasted 40 days in honor of Osiris.

The Romans held a 40-nights' wailing for Proserpine.

The Mexicans, according to Humboldt, began, 3 days after the Vernal Equinox, a solemn fast of 40 days in honor of the Sun.

WEDDING ANNIVERSARIES.

First year, paper; second, calico; third, muslin; fourth, silk; fifth, wood; sixth, iron; seventh, copper; eighth, bronze; ninth, pottery; tenth, tin; fifteenth, crystal; twentieth, china; twenty-fifth, silver; thirtieth, pearl; thirty-fifth, coral; fortieth, ruby; forty-fifth, sapphire; fiftieth, gold; fifty-fifth, emerald; sixtieth, diamond; seventy-fifth, diamond.

DAYLIGHT SAVING TIME IN EFFECT IN 1929.

Daylight Saving Laws like those of Massachusetts present no interference with Federal rights and raise no questions over which Federal courts have jurisdiction, the U. S. Supreme Court ruled in October, 1921, in dismissing a case appealed by the Massachusetts State Grange, the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen and others.

Daylight Saving Time was observed from the last Sunday in April (the 28th) to the last Sunday in September (the 29th), during 1929 by State law in the entire states of Massachusetts and Rhode Island. In 1928 it became Sunday, April 27th, and ends Sunday, Sept 30th. The use of Daylight Saving in New York City began in 1918 March 19. The date of beginning and end of the period of advancing the clock one hour became set for 2 A M., on the last Sunday in April and the last Sunday in September in 1923; but there are some local exceptions to this statute. It was observed by municipal ordinances in the entire New York Metropolitan District.

In the state of New York it was observed by these cities: Albany, Amsterdam, Beacon, Buffalo, Cohoes, Glen Cove, Cohoes Falls, Gloversville, Hudson, Ithaca, Jamestown, Johnstown, Kingston, Little Falls, Lockport, Long Beach, Mechanicville, Middletown, Mount Vernon, Newburgh, New Rochelle, New York, Niagara Falls, Peekskill, Poughkeepsie, Rensselaer, Rome, Saratoga Springs, Schenectady, Tonawanda, Troy, Utica, Watervliet, Westfield, White Plains and Yonkers; 149 incorporated villages and 22 cities retained standard time.

The Connecticut Legislature has passed a law making it an offense to show other than Eastern Standard Time on clocks publicly displayed, but Daylight Saving was observed by all banks, offices, stores and factories in Ansonia, Bridgeport, Danbury, Greenwich, Hartford, Meriden, Middletown, New Britain, New Haven, New London, Norwalk, Norwich, South Norwalk, Stamford, Wallingford, Waterbury, Willimantic and Winsted, and 15 other towns.

Maine in 1925 enacted a law similar to that of Connecticut but Daylight Saving was in general use in Portland and vicinity and in Bar Harbor.

In New Jersey by municipal ordinance it was observed in 118 cities and towns, including all in the Metropolitan district.

In New Hampshire by State law any community adopting any but standard time is liable to a fine of $500.

In Vermont it was observed in Rutland and Bennington.

In Pennsylvania it was observed in Philadelphia and Pittsburgh, and in Ambridge, Braddock, Chester, Coatesville, Easton, McKeesport, Norristown and West Chester.

In Delaware it was observed in Wilmington; in West Virginia in Wheeling; in Illinois in Chicago and its suburbs and Evanston; and in Indiana in Crown Point, East Chicago, Fort Wayne, Garrett, Gary and Hammond.

In Ohio due to the demands for Daylight Saving in cities, towns and villages, the entire State was put on Eastern Standard Time, effective April 3, 1927, by order of the Interstate Commerce Commission.

In Michigan, in addition to the cities located in that portion of the State which is within the Eastern Standard Time Zone, practically all the cities and towns in the lower peninsula follow Eastern Standard Time the year 'round.

In Minnesota members of the Minneapolis Chamber of Commerce observed Daylight Saving Time.

In North Dakota the State Legislature in 1926 enacted a law fixing the standard time for the State as Central time. In certain sections the railroads continue to operate on Mountain time.

In Canada Daylight Saving Time, with varying limits, is observed in Halifax, Montreal, Oshawa, Ottawa, Quebec, Regina, St. John, Sherbrook, Three Rivers, Toronto and Welland.

"Summer Time" (Daylight Saving) has been in effect in Great Britain for several years, beginning with the third Sunday in April (21st in 1929) and ending the first Sunday in October (6th in 1929).

DIVISIONS OF TIME.

The interval between two consecutive meridian transits of a fixed star having no proper motion of the interval during which the earth makes one absolute revolution on its axis, is invariable.

The use of the word *invariable* is not absolutely accurate. According to Ernest W. Brown, Sterling Professor of Mathematics at Yale University, the earth is continuing to rotate with certainty of its accustomed speed, which is one rotation in approximately 24 hours.

His statement is based on 340 observations in 1927, taken all over the world, of occultations of the moon, that is, of the obscuring of stars when the moon passed in front of them. The Variable Star Observers supplied nearly two-thirds of these observations.

"The earth's rotation," said Brown, "is our clock for determining time. We might also, if we wanted, use the motion of any other body in the solar system as the clock. But comparison of the earth with the other bodies showed that one of the clocks was wrong and observations have relied upon the earth's rotation as the time instrument which varies.

"The rotation will sometimes hold the same pace for many years together. Some of the changes have occurred very abruptly.

"They amount at most to about one thirty-millionth of the day, or one three-hundredth of a second.

"The cause of the variations is unknown. The only theory that seems to fit the facts is that the earth swells or contracts from time to time. How it does so, and why, we do not know. The amount of swelling, if its exists, is very small, at most only a few inches, perhaps ten or twelve.

"It is supposed that the expansion and contraction may lead to disturbance of the earth's crust, such as occurs during earthquakes. I have made an attempt to correlate the changes in rotation periods with the frequency of earthquakes.

"There is some similarity, but that which I found from studying the records of British and California quakes was not sufficient to mean possible a definite statement."

A Sidereal Day is the interval between two consecutive transits of the Vernal Equinox over any meridian.

The Vernal Equinox is that point on the celestial equator from which the right ascension of the heavenly bodies are measured. It is also on the ecliptic, the annual path of the Sun, and when the Sun reaches this point, on or within a day of March 21, Spring commences.

The interval between two consecutive transits of the Sun over any meridian is called an Apparent Solar Day. Its length varies from day to day by reason of the variable motion of the earth in its orbit and the inclination of this orbit to the Equator.

The interval between two consecutive transits of a fictitious mean sun that moves uniformly in the celestial equator, completing the circuit in a tropical year, is called a Mean Solar Day. It is the average or mean of all the apparent solar days in a year, and equals to one day, three minutes and 56.555 seconds, when measured in units of the Sidereal Day.

Mean Solar Time is that shown by a well-regulated clock or watch.

The mean sun cannot, of course, be observed but when the Sun is on the meridian of any place it is local apparent noon and this Almanac gives for each day in the year the local mean time of apparent noon under the heading "SUN ON MERIDIAN OF WASHINGTON."

This may be taken as the local mean time of apparent noon for any other meridian in the United States within four seconds since the maximum daily change is 30 seconds.

Also, the Right Ascension of Mean Sun is the sidereal time when the mean sun is on a meridian, and the right ascension of the stars is the local sidereal time each star is on a meridian.

The interval during which the earth makes one absolute revolution round the Sun is called a Sidereal Year, and consists of 365 days, 6 hours, 9 minutes and 9.6 seconds.

The Tropical Year, on which the return of the seasons depends, is the interval between two consecutive returns of the sun to the Vernal Equinox.

If this were a fixed point, the Sidereal and Tropical Years would be identical, but in consequence of the action of the Sun and Moon upon the equatorial protuberance of the Earth's mass and, in a much less degree, the disturbing influence of the planets upon the Earth's orbit, the Equinox has a slow, retrograde mean motion of 50".26 annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes 24.6 seconds.

The Tropical Year, therefore, consists of 365 days, 5 hours, 48 minutes and 46 seconds. The Tropical Year is not of uniform length, it is now slowly decreasing at the rate of .530 second per century, but the variation is not always positive.

STANDARD TIME.

The United States adopted standard time in 1883, on the initiative of the American Railway Association, and at noon of November 18, 1883, the telegraphic time signals sent out daily from the Naval Observatory at Washington were changed to the new system, according to which the meridians of 75°, 90°, 105° and 120° west from Greenwich became the time meridians of Eastern, Central, Mountain, and Pacific standard time respectively.

By Act of Congress, approved March 19, 1918, standard time is made the legal time throughout the United States. In addition to the four time meridians already mentioned, the meridian 150° west from Greenwich is established the time meridian of standard Alaska time. Authority to readjust the boundary line between the time zones is lodged with the Interstate Commerce Commission.

In May, 1928, the Commission made a readjustment so as to bring the limits of the zones as nearly half-way between the Standard meridians as the Junction and division points of common carriers would permit.

United States standard Eastern time is used from the Atlantic Ocean to a line through Toledo, O.; Norton, Va.; Johnson City, Tenn.; Asheville, N. C.; Atlanta and Macon, Ga., and Apalachicola, Fla.

U. S. standard Central Time is used from this first line to a line through Mandan, N. D.; Pierre, S. D.; McCook, Neb.; Dodge City, Kan., and along west line of Okla. and Tex. Standard Mountain time is used from the second line to a line that forms the western boundary of Mont., thence follows the Salmon River westward, the western boundary of Idaho southward, the southern boundary of Idaho eastward, and thence passes southward through Ogden and Salt Lake City, Utah; Parker and Yuma, Ariz.

U. S. standard Pacific time is used from the third line to the Pacific Ocean.

Almost all countries throughout the world use standard time that differs from Greenwich time by a whole number of hours or half hours; a few countries, however, use standard time based on the longitude of their national observatories.

TIME DIFFERENCE.

HISTORY OF THE CALENDAR.

The Egyptians determined the true length of the year—365.242 days—and divided it into 12 months of 30 days each. The 5 extra days (or 6 extra days in Leap Years) were devoted to festival holidays. The month was divided into three 10-day periods.

After the conquest of Egypt, Julius Caesar, in 46 B. C., adopted the Egyptian calendar for the Roman Empire, except, says George Eastman, that he did not continue the equal months of the Egyptians. He distributed the 5 extra days throughout the year by adding one day to every other month, January, March, May, July, September and November, and took one day off February.

In 28 B. C., Augustus Caesar, in order to have as many days in the month of his birth (August) as there were in the birth month of Julius Caesar (July), and also to be known in history as having altered the calendar, moved the 29th day of February to August.

Property owners who rented by the quarter objected to the unequal quarters caused by this change, as there would have been 90 days in the first quarter and 93 in the third. Augustus compromised by moving September 31st to October 31st. That caused two 31-day months to come together, and a further change was made by moving November 31st to December 31st.

The calendar of the two Caesars, Julius and Augustus, was based upon a 365.25 day year, with a Leap Year every fourth year. The actual year is 365.242 days, therefore .008 of a day was accumulated every year. By 1582, the accumulation, it is pointed out by Eastman, had amounted to 10 days, and Pope Gregory XIII in that year ordered the 10 days between October 5 and October 15 dropped from the calendar, and adopted the present rule for Leap Year. It is said that Gregory's purpose was to keep the Equinox to the same day of the year.

Of the centurial years only those which are exactly divisible by 400 thenceforward contained 366 days. The length of the mean Gregorian Year may therefore be set down at 365 days, 5 hours, 49 minutes, 12 seconds, and the error will amount to one day in 3,000 years.

The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A. D. 325, when the rule for Easter Day was established and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between Julian and Gregorian Calendars is 13 days.

The Gregorian Calendar was adopted by Japan in 1873, by the Chinese Republic in 1912, by the Turkish Parliament in 1917, by the Soviet Government of Russia in 1918, by Roumania in 1919, and by Greece and the Greek Church in 1923.

The Mosaic 7-day week of the Hebrews was made legal by Constantine the Great in 321 A. D., when he adopted Christianity.

TABLE OF DAYS BETWEEN TWO DATES.

The tabulation that appears below will enable any reader of The Almanac to make interest and other calculations with certainty.

A TABLE OF THE NUMBER OF DAYS BETWEEN ANY TWO DATES WITHIN TWO YEARS.

Day Mo	Jan.	Feb.	March.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.

31.	396	...	455	...	516	...	577	608	...	669	...	730

The above table applies to ordinary years only. For leap year, one day must be added to each number of days after February 28.

DAYS' LENGTHS AT NEW YORK CITY.

The table shows the length of each day—from the rising to the setting of the sun—throughout the year, in the latitude of the metropolis. It serves, also, as the basis for similar computations elsewhere. There is, of course, no connection between the days' lengths and either standard or daylight time.

HOLIDAYS OF THE WORLD.

Christmas and New Year's are observed the world over.

In Episcopal countries, such as England, the only church days which are regular legal holidays, aside from Christmas, are Good Friday, Easter Monday, and Whit-Monday. This holds good for the British colonies, in some of which several Roman Catholic Church holidays are established.

In Roman Catholic countries, such as Spain, the church days other than Christmas which are almost universally legal holidays are Epiphany, Ascension, Assumption, All Saints', and Immaculate Conception. Throughout the Latin-American countries it is usual to observe, in addition, Good Friday and Corpus Christi. Good Friday is in many of these countries a 3-day holiday season, beginning on Holy Thursday and closing on Holy Saturday.

In Lutheran countries, such as Sweden and Prussia, Epiphany, Annunciation, Good Friday, Easter Monday, Ascension Day, Whit-Monday Ash Wednesday, and Corpus Christi are holidays.

OLD ENGLISH HOLIDAYS.

JANUARY 6. TWELFTH DAY, or Twelfth-tide, sometimes called Old Christmas Day, the same as Epiphany. The previous evening is Twelfth Night, with which many social rites have long been connected.

FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year. Also known as "Groundhog Day."

FEBRUARY 14. OLD CANDLEMAS: St. Valentine's Day.

MARCH 25. LADY DAY: Annunciation of the Virgin. April 6 is old Lady Day.

JUNE 24. MIDSUMMER DAY: Feast of the Nativity of John the Baptist. July 7 is old Midsummer Day.

JULY 15. ST. SWITHIN'S DAY. There was an old superstition that if rain fell on this day it would continue forty days.

AUGUST 1. LAMMAS DAY. Originally in England the festival of the wheat harvest. In the church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

SEPTEMBER 29. MICHAELMAS: Feast of St. Michael the Archangel. Old Michaelmas is October 11.

NOVEMBER 1. ALL-HALLOMAS: All-hallows, or All Saints' Day. The previous evening is All-hallow-e'en, observed by home gatherings and old-time festive rites.

NOVEMBER 2. ALL SOULS' DAY: Day of prayer for the souls of the dead.

NOVEMBER 11. MARTINMAS: Feast of St. Martin. Old Martinmas is November 23.

DECEMBER 28. CHILDERMAS: Holy Innocents' Day.

Lady Day, Midsummer Day, Michaelmas and Christmas are quarter (rent) days in England, and Whit-Sunday, Martinmas, Candlemas and Lammas Day in Scotland.

Shrove Tuesday, the day before Ash Wednesday, and Maundy (Holy) Thursday, the day before Good Friday, are observed by the church.

LEGAL OR PUBLIC HOLIDAYS IN THE UNITED STATES IN 1930.

The chief legal or public holidays are:

Jan. 1—New Year's Day (all the States, Territories and colonial possessions).

Feb. 12—Lincoln's Birthday (Alaska, Cal., Colo., Conn., Del., Ill., Ind., Ia., Kan., Ky., Mich., Minn., Mo., Mont., Neb., Nev., N. J., N. Y., N. M., N. Dak., Ohio, Ore., Pa., S. Dak., Tenn., Utah, Wash., W. Va., Wyo. and observed by Governor's proclamation in Mass.).

Feb. 22—Washington's Birthday (all the States, Territories and possessions).

April 18—Good Friday (Conn., Del., Fla., La., Md., Minn., N. J., Pa., Philippines, Porto Rico, Tenn.). In Conn. Good Friday is usually proclaimed by the Governor as a day of fasting and prayer.

May 30—Decoration or Memorial Day (all States and possessions, except Ala., Ark., Fla., Ga., La., Miss., N. Car. and S. Car.)

July 4—Independence Day (all the States, Territories and possessions).

Sept. 1—Labor Day (every State and Territory except the Philippines).

Oct. 12—Columbus Day (Ark., Ariz., Cal., Col., Conn., Del., Fla., Idaho, Ill., Ind., Kan., Ky., La., Me., Md., Mass., Mich., Mo., Mont., Neb., Nev., N. H., N. J., N. Y., N. Dak., Ohio, Ore., Pa., R. I., Tex., Utah, Vt., Wash., W. Va., also in Porto Rico. In Arkansas and Kansas it does not affect notes or judicial proceedings).

Nov. 4—General Election Day (1st Tuesday after 1st Monday in Nov.). Every State and Territory except Alaska, Conn., Dist. of Col., Hawaii, Ill., Mass., Miss., Ohio, Philippines and Vt. In Illinois it is a legal holiday in Chicago, Springfield, East St. Louis, Galesburg, Danville, Cairo and Rockford. In Ohio it is a half holiday. In Maine it is a legal holiday only as to the courts, which also close on the State Election Day (biennially, 2d Monday in Sept.).

Nov. 11—Armistice Day (Ala., Ariz., Ark., Cal., Col., Conn., Fla., Ill., Iowa, La., Minn., Mo., Mont., Neb., N. H., N. J., N. Car., N. Dak., Pa., R. I., S. Dak., Tenn., Tex., Vt., Va. and Hawaii. In other States by Governor's proclamation only).

Nov. 27—Thanksgiving Day (last Thursday in Nov.) Every State, Territory and possession.

Dec. 25—Christmas Day (every State, Territory and possession).

OTHER LEGAL OR PUBLIC HOLIDAYS IN 1930 (SEE ALSO ARBOR DAYS).

Jan. 8—Battle of New Orleans (in La.).

Jan. 19—R. E. Lee's Birthday (in Ala., Ark., Fla., Ga., Ky., Miss., N. C., S. C., Tenn. and Va.).

Feb. 12—Georgia Day (in that State only. Date of Oglethorpe's landing in 1733).

Feb. 14—Admission Day (in Arizona).

Mar. 2—Texas Flag Day (in Texas).

Mar. 4—Inauguration Day (once every 4 years in the Dist. of Col. only), also, *Pennsylvania Day*, in that State, whose charter was granted Mar. 4, 1681.

Mar. 4—Shrove Tuesday (observed as Mardi Gras in Ala., Fla. and La.).

Mar. 22—Emancipation Day (in Porto Rico).

Mar. 25—Maryland Day (in that State only).

Mar. 30—Seward Day (in Alaska).

April 12—Date of passage of Halifax Independence Resolutions (in North Carolina).

April 13—Birthday of Thomas Jefferson (in Ala.).

April 15—(3d Tuesday) State elections (in La.).

April 16—De Diego's birthday (in Porto Rico).

April 17—Holy Thursday (in the Philippines).

April 19—Observed as Patriots' Day (in Me. and Mass.).

April 21—Anniversary Battle of San Jacinto (in Tex.).

April 24—(Last Thursday)—Fast Day (in N. H.).

April 26—Confederate Memorial Day (in Ala., Fla., Ga. and Miss.).

May 1—Labor Day (in Philippines).

May 10—Confederate Memorial Day (observed in Ky. and N. Car.).

May 20—Anniversary signing of Mecklenburg Declaration of Independence (observed in N. C.).

May 30—Confederate Memorial Day (in Va.).

June 3—Confederate Memorial Day (in Tenn.).

June 3—Birthday of Jefferson Davis (in Ala., Ark., Fla., Ga., La., Miss., S.C., Tex. and Va.).

June 11—Kamehameha Day (in Hawaii).

June 15—Pioneer Day (in Idaho).

July 13—Birthday of Gen. Bedford Forrest (in Tenn.)

July 17—Munoz Rivera Day (in Porto Rico).

July 24—Pioneer Day (in Utah).

July 25—Occupation Day (in Porto Rico).

July 27—Dr. Barbosa's Birthday (in Porto Rico).

Aug. 1—Colorado Day (in that State only).

Aug. 13—Occupation Day (in Philippines).

Aug. 16—Anniv. Battle of Bennington (in Vt.).

Sept. 6—Lafayette Day (also the anniversary of the First Battle of the Marne) is not a legal holiday, but is celebrated in New York and ten other States.

Sept. 9—Admission Day (in Cal.).

Sept. 12—Defenders' Day (in Md.).

Oct. 1—Missouri Day (in that State's schools).

Oct. 9—Fraternal Day (Alabama only).

Oct. 18—Alaska Day (in Alaska only).

Oct. 31—Admission Day (in Nev.).

Dec. 28—Woodrow Wilson's Birthday (in S. C.)

Dec. 30—Rizal Day (in Philippines).

Mother's Day is the second Sunday in May; May 1, Child Health Day (by annual Presidential proclamation); June 14, Flag Day; Sept. 26 (fourth Friday), American Indian Day; Sept. 17, Constitution Day (fixed date).

Saturday afternoon is a legal holiday in Ill. (cities over 200,000) Ind. (cities over 35,000) La. (cities and towns over 10,000), Md. (Annapolis, Baltimore, Ellicott and Westminster and Baltimore, Cecil, Hartford and Montgomery Counties) N. J., N. Y., O., S. C. (Richmond and Charleston Counties).

Banks close Saturday afternoons also in Ariz., Ark. (larger cities after 1 P. M.) Cal., Col. (cities over 25,000), D. C., Del. (New Castle and Kent Counties, and Wilmington), Idaho, Kan., Me., Mass., Mich., Miss., Mo. (large cities), Mont., Neb., N. H., N. C., N. D., Penn., R. I., Tenn., Utah, Vt., Va., Wash., Wyo.; also in Alaska, Hawaii, Philippines and Porto Rico.

DATES ON WHICH ARBOR DAY IS OBSERVED.

Arbor Day in the United States is mostly a spring observance. In some States it is combined with Bird Day. In the following list, the first year named is when observance began, the second is when the law was enacted. "Proclamation" means date is set each year by Governor's proclamation. Arbor Day was first observed in Nebraska, on April 10, 1872, on which occasion more than 1,000,000 trees were planted.

Alabama (1887)—In Spring, often on Audubon or Bird Day. Proclamation.
Arizona (1890)—In northern part, first Friday after April 1; in southern part, first Friday after February 1.
Arkansas (1906-1905)—First Saturday in March.
California (1886-1909)—March 7, Luther Burbank's birthday.
Colorado (1885-1889)—Third Friday in April. Proclamation.
Connecticut (1886-1886)—In the spring. Proclamation.
Delaware (1901)—In April. Proclamation.
District of Columbia (1920)—Third Friday in April.
Florida (1886)—First Friday in February.
Georgia (1887-1890)—First Friday in December.
Hawaii (1905)—In November. Proclamation.
Idaho (1886-1903)—In April. Fixed by County School Superintendents.
Illinois (1887-1887)—April and October. Proclamation.
Indiana (1884-1913)—Third Friday in April.
Iowa (1887)—Proclamation.
Kansas (1875)—At option of Governor.
Kentucky (1886)—In autumn. Proclamation.
Louisiana (1888)—Second Friday in January.
Maine (1887)—In spring. Proclamation.
Maryland (1884-1884)—In April. Proclamation.
Massachusetts (1886)—Last Saturday in April. Proclamation.
Michigan (1885)—April or May. Proclamation.
Minnesota (1876)—Latter part of April. Proclamation
Mississippi (1890)—December and February. Set by State Board of Education.
Missouri (1886-1889)—First Friday after first Thursday in April.
Montana (1888-1887)—Second Tuesday in May.
Nebraska (1872-1885)—April 22, J. S. Morton's birthday. Public Holiday.
Nevada (1887)—Proclamation.
New Hampshire (1886)—Early in May. Proclamation.
New Jersey (1884-1908)—Second Friday in April.
New Mexico (1890)—Second Friday in March. Proclamation.
New York (1889-1889)—By proclamation of the Commissioner of Education; usually choice given of 3 dates late in April and (or) early in May; for different localities in State. Bird Day is usually the second Friday in April.
North Carolina (1893-1915)—First Friday after March 15.
North Dakota (1882)—Proclamation.
Ohio (1882-1892)—In April. Proclamation.
Oklahoma (1898-1901)—Friday after second Monday in March.
Oregon (1889)—Second Friday in February in west; second Friday in April in east.
Pennsylvania (1887-1887)—In Spring and Autumn. Proclamation.
Philippines (1906)—September or October. Proclamation.
Porto Rico—Last Friday in November.
Rhode Island (1887-1887)—Second Friday in May. Public Holiday.
South Carolina (1898-1898)—Third Friday in November.
South Dakota (1884)—Usually observed in April.
Tennessee (1875-1887)—First Friday in April. Proclamation.
Texas (1890-1889)—Washington's Birthday.
Utah—April 15
Vermont (1885)—First Friday in May. Proclamation.
Virginia (1892-1902)—In spring. Proclamation.
Washington (1894)—First Friday in May. Proclamation.
West Virginia (1883)—Second Friday in April.
Wisconsin (1892-1889)—First Friday in May.
Wyoming (1888)—First Friday in May. Proclamation.

ASTRONOMICAL CONSTANTS.

MEAN solar parallax, 8″.80. Nutation constant, 9″.21.

Aberration constant, 20″.47. Annual precession, 50″.2564+0″.000222 (*t*—1900).

Obliquity of the ecliptic, 23° 27′ 8″.26—0″.4684 (*t*—1900).

Annual diminution of obliquity, 0″.4684.

Moon's equatorial horizontal parallax, 57′ 2″.70.

Moon's mean distance from the earth (centre to centre), 238,857 miles.

Sun's mean distance from the earth (astronomical unit), 92,897,416 miles.

Velocity of light, 186,324 miles per second.

Light travels unit of distance—viz. 92,897,416 miles in 498.580 seconds.

Length of the Year—Tropical (equinox to equinox, 365.2421988 days. Sidereal or absolute revolution, 365.2563604 days. Anomalistic (from perihelion to perihelion), 365.2596413 days.

Length of Day—Sidereal, 23 hours 56 minutes 4.091 seconds (mean solar time). Mean solar, 24 hours 3 minutes 56.555 seconds (sidereal time).

Length of the Month—Synodical (from new moon to new moon), 29 days 12 hours 44 minutes 2.8 seconds. Tropical, 27 days 7 hours 43 minutes 4.7 seconds. Sidereal (absolute revolution), 27 days 7 hours 43 minutes 11.5 seconds. Anomalistic (from perigee to perigee), 27 days 13 hours 18 minutes 33.1 seconds.

Dimensions of the Earth—Equatorial radius, 3,963.34 miles. Polar radius, 3,949.99 miles. Eccentricity of the oblate spheroid, 0.0819981.

ASTRONOMICAL SIGNS AND SYMBOLS.

☉ The Sun.	♂ Mars.	☌ Conjunction.
☾ The Moon.	♃ Jupiter.	□ Quadrature.
☿ Mercury.	♄ Saturn.	☍ Opposition.
♀ Venus.	♅ Uranus.	☊ Ascending Node.
⊕ The Earth.	♆ Neptune.	☋ Descending Node.

Two heavenly bodies are in "conjunction" (☌) when they have the same *Right Ascension*, or are on the *same meridian*, *i. e.*, when one is due *north* or *south* of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (☍) when in opposite quarters of the heavens, or when one rises as the other is setting. "Quadratu're" (□) is half way between conjunction and opposition. By "greatest elongation" is meant the greatest apparent *angular* distance from the sun; the planet is then generally most favorably situated for observation. Mercury can be seen with the naked eye only at this time. When a planet is in its "ascending" (☊) or "descending" (☋) node it is passing through the plane of the earth's orbit. The term "Perihelion" means nearest to the sun, and "Aphelion" furthest from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

THE ZODIAC.

THE sun's apparent yearly path among the stars is known as the ecliptic. The zone 16° wide, 8° on each side of the ecliptic, is known as the zodiac. Beginning at the point on the ecliptic which marks the position of the sun at the vernal equinox, and thence proceeding eastward, the zodiac is divided into twelve signs of 30° each, as follows:

Spring Signs.	1. ♈ Aries.	The Ram.
	2. ♉ Taurus.	The Bull.
	3. ♊ Gemini.	The Twins.
Summer Signs.	4. ♋ Cancer.	The Crab.
	5. ♌ Leo.	The Lion.
	6. ♍ Virgo.	The Virgin.
Autumn Signs.	7. ♎ Libra.	The Balance.
	8. ♏ Scorpius.	The Scorpion.
	9. ♐ Sagittarius.	The Archer.
Winter Signs.	10. ♑ Capricornus.	The Goat.
	11. ♒ Aquarius.	The Water-Bearer.
	12. ♓ Pisces.	The Fishes.

These signs are named from the twelve constellations of the zodiac; with which the signs coincided in the time of the astronomer Hipparchus, about two thousand years ago. Owing to the precession of the equinoxes, that is to say, to the retrograde motion of the equinoxes along the ecliptic, each sign in the zodiac has, in the course of two thousand years, moved backward 30° into the constellation west of it; so that the sign Aries is now in the constellation Pisces, and so on.

THE SUN'S RIGHT ASCENSION AND DECLINATION.

(Washington—Apparent Noon.)

THE POLES OF THE EARTH.

The geographic poles, or points where the Earth's axis of rotation cuts the surface, are not absolutely fixed in the body of the Earth. The pole of rotation describes an irregular curve about its mean position. Two periods have been detected in this motion: (1) an annual period due to seasonal changes in barometric pressure, load of ice and snow on the surface and to other phenomena of seasonal character; (2) a period of about fourteen months due to the shape and constitution of the Earth. In addition there are small but as yet unpredictable irregularities. The whole motion is so small that the actual pole at any time remains within a circle thirty or forty feet in radius centered at the mean position of the pole.

The pole of rotation for the time being is of course *the* pole having a latitude of 90° and an indeterminate longitude.

The north magnetic pole may cover a region of considerable area, and the present approximate mean position is latitude 70.8° N. and longitude 96° W.

For the south magnetic pole, the position latitude 72.7° S. and longitude 156° E. has been tentatively adopted.

The magnetic poles are not stationary; but their motion is undoubtedly slow.

ECLIPSES IN 1930.

In the year 1930, there will be four eclipses, two of the sun and two of the moon.

1. A partial eclipse of the moon, April 13, 1930. Visible at Washington; the beginning visible generally in the southwestern part of Europe, northwestern part of Africa, the Atlantic Ocean, North America, South America, and the Pacific Ocean except the western part; the ending visible generally in the Atlantic Ocean, North America, South America, and the Pacific Ocean except the western part.

2. A central eclipse of the sun, April 28, 1930. Visible at Washington as a partial eclipse. The eclipse will be total in Northern California, Oregon, Idaho, Nevada, and western Utah. The central eclipse will be total for about thirty-eight minutes at the middle of its duration. For the rest of its duration it will be annular. The central eclipse will change from annular to total at 10:49 A.M. Pacific Time, on April 28th.

3. A partial eclipse of the moon, October 7, 1930. Invisible in the United States; the beginning and ending visible generally in Asia, Australia, the Indian Ocean, Europe, and Africa.

4. A total eclipse of the sun, October 21-22, 1930. Invisible in the United States. The path of totality crosses the South Pacific Ocean. The partial eclipse begins at sunset at Cape Horn, and begins at sunrise in eastern Australia.

POLE STAR, 1930.

Upper transit of Polaris, or of any star, occurs 3m. 56s. earlier each day. The interval between lower and upper transit of Polaris is 11h. 58m. 2s. In the United States, the greatest Eastern elongation of Polaris occurs 5h. 55m. before upper transit and 6h. 3m. after lower transit; while the greatest Western elongation occurs 5h. 55m. after upper transit and 6h. 3m. before lower transit.

TELESCOPES.

Astronomical telescopes are of two kinds, refracting and reflecting.

In the first, the light falls upon a lens which converges the rays to a focus, where the image may be magnified by a second lens, called the eyepiece, or may be directly photographed.

The reflector consists of a concave mirror, generally of glass coated with silver, which throws the rays back toward the upper end of the telescope, where they fall on the eyepiece or on the photographic plate, as in the case of the refractor.

Since the rays of light do not pass through the mirror, far less perfect glass is required and reflectors can be made much larger than refractors.

For many kinds of celestial photography reflectors are better than refractors, but the latter is the best all-around instrument. It is not sensitive to changes of temperature and is the only one which can be used on the sun.

The largest and most active telescopes in the world are in America. They are, for refractors: The 40-inch of the University of Chicago, at the Yerkes Observatory (62 feet long); the 36-inch of the University of California, at the Lick Observatory, Mount Hamilton; the 30-inch photographic refractor of the University of Pittsburgh; the 26-inch instruments at the U. S. Naval Observatory, Washington, and at the University of Virginia.

There are several excellent instruments of 20-24 inches at different institutions.

The largest reflector yet constructed, 100 inches in diameter, is at the observatory of the Carnegie Institution on Mt. Wilson, California. This observatory has also a very fine reflector of 60 inches aperture.

By using a combination of auxiliary mirrors different focal lengths, even running as high as 150 feet, can be obtained with these instruments.

A splendid reflector of 72 inches is installed at the Dominion Astrophysical Observatory, Victoria, B.C.

The Perkins Observatory of the Ohio Wesleyan University at Delaware, Ohio, is installing a reflector of 61 inches. The glass disk for the mirror is 70 inches in diameter, 9 inches thick and weighs over a ton. It was cast by the United States Bureau of Standards, and is the largest single piece of optical glass ever made in the United States.

Harvard Observatory has a 60-inch reflector at Cambridge, Mass. and has just built a new one for its station in South Africa.

Other active reflectors are: The 40-inch of the Lowell Observatory, Flagstaff, Arizona; the 37½-inch of the University of Michigan, Ann Arbor; the 36-inch of the Lick Observatory, at Mt. Hamilton, and another of the same size at its southern station at Santiago, Chili; a 24-inch at the Yerkes Observatory, and a 24-inch at the Harvard Observatory.

All of the refractors given above were constructed by Alvan Clark & Sons, except the third, that of the Allegheny Observatory, Pittsburgh, which was figured by Brashear.

The principal large telescopes in use in Europe are: The 30-inch refractor at the Observatory of Pulkova, Russia; the 32-inch at Meudon, France; the 28-inch at the Royal Observatory, Greenwich, England.

Reflectors of large size are in use as follows: A 30-inch at Hamburg, and at Heidelberg.

Photographic refractors having a four lens objective are smaller in size and shorter in length. The best known of these are: t he 27-inch refractor of the University of Michigan, at Bloemfontein, South Africa; the 26-inch refract or of Yale University, at Johannesburg, South Africa ; the 24-inch of the Harvard Observatory at its station in South Africa; two of 16 inches at Heidelberg and at the Harvard Observatory; and the 10-inch Bruce telescope at the Yerkes Observatory.

The light-gathering power of a telescope is proportional to the area of its lens or mirror. The 40-inch Yerkes refractor increases the amount of light forty thousand times that received by the eye.

The magnifying power of a telescope is proportional to its length as well as to the shortness of focus of its eyepiece.

Thus the use of different eyepieces yields various magnifying powers, but those exceeding 1,000 are seldom used because of the trembling of the earth's atmosphere.

METEORITES.

(From a Bulletin of the American Museum of Natural History, N. Y.)

Meteorites, as we know them, are bodies of iron or stone, ranging in size from particles of dust up to masses of 30 tons weight, that circle through space like little planets. Ordinarily they are too small to be seen, but when they enter the earth's atmosphere, as thousands of them do daily, they become visible through being made hot from the friction of the air.

The small meteorites burn up when far above the earth and are the familiar "shooting" stars; the larger masses, known as meteors during their glowing passage through the air, often reach the earth as meteorites.

These falls are accompanied by dazzling light and usually, or often, by violent explosions, due to the breaking up of the mass, and so loud that they have been heard at a distance of sixty to one hundred miles.

The molten particles given off by meteors as they hurtle blazing through the air fall like rain in the form of minute drops and when this occurs over the ocean these particles sink to the bottom, and at great depths, where not disturbed by currents, this cosmic dust, as it was termed by Sir John Murray, has, in time accumulated in places to form a perceptible, if small portion of the ocean floor.

The largest meteorite of which the date of fall is known is the one which fell at Knyahinya, Hungary, on June 9, 1866. It weighed 644 pounds.

An iron meteorite found in 1921 in the desert of Adrar, in Mauretania, is said to be 300 feet long.

A meteorite weighing many tons has been found buried in limestone, near Gibeon, Grootfonstein, Southwest Africa.

The Bacubirito meteorite is 13 feet 1 inch long, 6 feet 4 inches wide, and 5 feet 4 inches high. It was found in 1863 at Bacubirito, in the State of Sinaloa, Mexico, and is still there.

Among the meteorites in the American Museum of Natural History are—

Ahnighito, weight 36½ tons; brought from Greenland by Peary in 1897; called the Tent by the Eskimo, christened Ahnighito by Marie Ahnighito Peary. Presented, together with the Woman and Dog by Mrs. Morris K. Jesup, 1905.

The Woman, one of the Cape York iron stones; weight, 3,000 lbs., found by Esquimos.

The Dog, one of the Cape York meteorites, weight 1,100 pounds. For centuries the Dog stood watch over the woman on an island in Melville Bay, Greenland.

Williamette, the largest found in the United States; discovered in 1902, near Portland; 10 ft. long; weight, 15½ tons; deeply pitted on one side.

Forest City (Iowa), which fell at 5.15 p.m. on Friday, May 2, 1890. Its flight was accompanied by thunder and explosions heard 100 miles away. Fragments were scattered over an area 1 mile wide and 2 miles long. The fragment in the museum weighs 75 lbs.

Holbrook, a stony meteorite, is one of those that fell in a shower of fragments, 2,000 of which are in the collection of the museum. They range in size from 1/90 of an ounce up of 14 2/3 pounds and have a collective weight of 485 pounds. The fall took place on July 12, 1912.

Long Island is collectively the largest stony meteorite; Selma, from Alabama, weighing 300 pounds, is the heaviest single stone in the United States, the largest known being a stone of the Knyahina fall, weighing 645 pounds, now in the British Museum.

First Officer N. Levy of the American steamer President Harding reports to the U. S. Hydrographic Survey, that on May 4, 1929, at 12.02 a.m., eastern standard time, in lat. 40° 37′ N., lon. 72° 04′ W., a meteor was observed, apparently only a ship length to starboard. On account of the cloudy condition of the sky it was impossible to determine accurately the bearing or course of the meteor, but it bore approximately N. by W. and appeared to be traveling to the eastward.

The meteor was exceptionally brilliant, its light exceeding that of daylight, and was visible for about 2/3 seconds. Barometer, 29.72 inches; air temperature, 44° F.

Victor A. Rapport, of New Haven, Conn., reports that near midnight on May 3, 1929, he observed a great ball of fire descending from northeast to east and leaving sparks in its wake; color, yellowish white. Several minutes later a distinct report as of blasting was heard. The light was sufficiently intense as to cast shadows of trees and buildings on the ground.

HALLEY'S AND OTHER COMETS.

Of the great number of comets which have temporarily visited our solar system or have become permanent members of it none has surpassed Halley's in historical associations. It has a record dating back to B. C. 240; its visitations spread alarm and consternation throughout Europe during the Middle Ages, it was the first whose return was predicted by an Astronomer Royal of England, and will, therefore, for these reasons, be an object of great scientific interest for all time. Its periodic time is 76.8 years, and in April, 1910, it made the perihelion passage for the twenty-ninth time.

ENCKE'S COMET.

The second of the periodic comets to be discovered was Encke's, as Halley's was the first. Encke's Comet has the shortest period known—namely, about 40 months. The observed visitations, from January, 1819, to September, 1924, form an uninterrupted series, thirty-three in number.

Encke's is unique among comets in that its motion is constantly accelerating and its period is decreasing in proportion, being now 1,203 days as compared with 1,205 days in 1819. At first this was ascribed to a resisting medium, but it is more probably due to repeated passage of the comet through a cloud of meteors.

COMETS OF 1843 AND 1882.

In the last 100 years only two comets have been brilliant enough to be seen by day with the unaided eye. Of these one was in February, 1843, the other in September, 1882. Together with the comet of 1668 and that of 1887, they form a comet group; each member, at perihelion, nearly brushes the sun's surface, that of 1843 having a velocity of 366 miles per second and passing halfway around the sun in two hours. These visitors are expected to return after six or seven centuries. The four comets were probably a single body until too close an encounter with the sun resulted in disruption.

DONATI'S COMET.

This was the finest comet of the nineteenth century and is known as the typical comet. In October, 1858, its tail reached halfway from the horizon to the zenith. Its period is 2,000 years.

COMETS THAT HAVE MADE AT LEAST TWO PERIHELION PASSAGES.

GLACIERS.

(By Dr. Chester A. Reeds, Curator of Geology, American Museum of Natural History, N. Y.)

Present-day glaciers are formed on those portions of the earth's surface that are permanently above the snow-line. This line varies locally, even in the same latitude, being in some places higher than in others, but generally speaking, it is of the nature of an elliptical surface surrounding the earth with its longest diameter in the equatorial belt, and its shortest in the polar regions, where it touches sea level.

From the Arctic to the Antarctic circles this cold surface rises upward in a broad dome 16,000 to 18,000 feet high over the tropics, and cuts a number of lofty peaks and mountain ranges whose upper levels receive all their moisture in the form of snow.

Glaciers consequently have a wide distribution. They occur in Greenland, which is covered with an entire sheet of ice, except for the marginal ribbon of land, which is usually from five to twenty-five miles in width with a few places where the edge of the ice is 60 to 100 miles from the shore. Ice caps and valley glaciers are found in Baffin Land, Ellesmere Land, and a few of the islands to the westward, in Iceland, Norway, Sweden, Spitsbergen, Franz Joseph Land and Novaya Zemlya. Glaciers of the Alpine or valley type occur in the Old World in the Alps, Pyrenees, Caucasus, Himalayas, Tian Shan and East Sayan mountains of Central Asia, and the high peaks on the Equator in East Central Africa.

In North and South America glaciers occur in the high mountain ranges facing the Pacific Ocean. They are most fully developed in Alaska, and in Chile and Argentina, where they face moisture-laden westerly winds. In New Zealand numerous lakes, waterfalls and glaciers, one eighteen miles long, are to be found in the south island. In the south polar region, the Antarctic continent is not only covered with a great ice cap, but it affords the largest glaciers in the world.

While the facilities and accommodations for seeing the 1,155 glaciers of the Alps are unsurpassed, it should be noted that most of the glaciers are small, some of them being only a few hundred yards in length. The largest of these is the Aletsch, which is ten miles long, and with its snow field, fifteen miles. It is about a mile wide, and terminates about 4,000 feet below the snow-line, which is at an elevation of 8,500 feet.

Little is known as to their thickness, but it is estimated that they attain a depth of from 800 to 1,200 feet. As to the rate of motion there is a considerable difference. The smaller ones may be quiescent, while the larger ones move at the rate of several feet a day. The Mer de Glace, one of the largest, was observed in 1912 to have a daily rate of 18 inches near the sides, much less at the margins, and about 27 inches in the central axial portion.

IN THE CAUCASUS.

Large and small valley glaciers of the Alpine type are also found in the Caucasus Mountains, where the snow-line appears at 8,500 feet at the western and 14,000 feet at the eastern end. Numerous large valley glaciers occur in south central Asia, in the Himalayas, and the Tian Shan Mountains, with a snow-line at 16,000 feet at the south and several thousand feet higher along the northern margins.

In the Himalayas, the Rose glacier, which is forty five miles long and two and a half to two and three-quarters miles wide, is the longest glacier in Asia and is comparable in length with the large glaciers in Alaska. In the Tian Shan Mountains the largest glacier is the Imylchek, which is reported to be forty and a half miles long and one and a quarter to two and a quarter miles wide.

The glaciers of Alaska are the largest in the world, except those in the polar regions. The broad sustained mountain range bears thousands of them; a few hundred have received names; some have been partly mapped, but many have never been seen. Beginning near the sixty-third parallel, they increase in size and depth until the lofty region between Mount Fairweather and Mount St. Elias is reached, where a considerable number discharge into the waters of the ocean. Between latitude 56 and 60 degrees there are probably 5,000 glaciers, hundreds of large size descending through the forests, with more than twenty-five discharging into the sea.

Icebergs are given off from them, but due to the intricate labyrinth of channels and high-walled fjords, few of them reach the open ocean before melting.

Through British Columbia, the broad mountain chain is generally glacier-bearing. The upper branches of nearly every one of the main canyons are occupied by glaciers, which gradually diminish in size southward.

In Washington and Oregon groups of active glaciers still exist on all of the highest mountains, particularly on Mounts Jefferson, Adams, Saint Helens, Hood, Rainier and Baker. Of these, Mount Rainier is the highest and iciest. Twenty-four glaciers from seven to fifteen miles long radiate from its snow-covered cap to form the sources of the principal streams. One of these rivers, arising from the snout of the longest glacier at an elevation of 4,500 feet, pours a stream opaque with glacial mud into the head of Puget Sound.

"In California there are about 65 small residual glaciers in the Sierra Nevada Mountains, between latitudes 36 degrees 30 minutes and 39 degrees distributed singly or in small groups on the north sides of the highest peaks at an elevation of about 11,000 to 12,000 feet above the level of the sea—all remnants of the grand glaciers that once covered the range.

Between latitudes 37 and 38 degrees they form the highest sources of the San Joaquin, Toulome, Merced and Owens Rivers.

Mount Shasta, near the northern boundary of California, has five shrinking glacier remnants, the largest about three miles in length.

In South America there are many glaciers in the Andes, even beneath the Equator itself; and though these glaciers are small and mostly confined to the highest peaks, toward their southern end along Smyth Channel and in the Strait of Magellan they are large and flow far down the slopes and at several places enter the sea.

The snow-line of the Andes is highest in parts of Peru and Bolivia, where it lies at about 17,500 feet. Its general elevation from the extreme north to Patagonia is 14,500 to 16,500 feet, but along the Patagonian frontier it sinks rapidly, being 5,000 feet in Central Chile, 2,300 in Southern Chile and 1,600 in Tierra del Fuego.

The snow-line is generally about 2,500 feet lower on the east than on the west side of the mountains except in Southern Chile, where it is lower on the west side.

In Antarctica snow and ice cover the land so completely and to such great thickness that it has been impossible to determine whether it is one great continent or a series of islands covered with great glaciers. In numerous places glacier tongues and shelf ice appear about the margin of the continent. Furthermore, a zone of pack ice about ten degrees in width, which encircles the continent, offers a serious obstruction to those who would approach it.

It is a large continent with margins coinciding roughly with the Antartic circle, and having an estimated area varying from 3,000,000 to 5,000,000 square miles. So little land is exposed that solar radiation has no effect upon the snow and ice masses during the long dark Winters, and but little during the summer months. The average temperature at widely separated points on the margin of the continent is 29 degrees Fahrenheit during the summer and—35 degrees Fahrenheit during the winter, with maximums of—45 degrees Fahrenheit.

There is no melting and probably no other form of precipitation than that of snow, which has been estimated to be from seven to ten inches annually. It is difficult, however, to take such observations, owing to the drifting of loose snow by the wind.

The depth of the inland ice is unknown, but it may well be thousands of feet thick. Amundsen and Scott, after crossing the level ice of the Great Ice Barrier, climbed up from 1,000 to 8,000 feet over huge glaciers, between mountain peaks approximating 11,300 feet high, to an ice-covered plateau, the greatest elevation of which was 9,860 feet.

The elevation at the South Pole as noted by Scott was 9,070 feet.

The numerous glacier outlets from this ice plateau to the Great Ice Barrier below vary as to size. Through one of them passes the Beardmore Glacier, which is more than 125 miles long and from ten to twenty miles wide, with a total area of at least 5,000 square miles. This is the largest valley glacier that has been recorded anywhere.

The Great Ice Barrier is different from these glaciers in many ways. Various explorers have shown that it is afloat for at least 400 miles from east to west along its outer margin on the Ross Sea. It exposes a seaward cliff from fifty to 280 feet above the water, and forms a vast plain of ice extending southward about 400 miles, along the foot of the high mountains bordering South Victoria Land.

The numerous glaciers, which move down from this high land to the barrier, cause the ice of the Barrier to move forward toward the Ross Sea at the rate of 1,500 feet per year.

THE MOON.

The moon completes a circuit around the earth in a period whose mean or average length is 27 days 7 hours 43.2 minutes; but in consequence of its motion in common with the earth around the sun, the mean duration of the lunar month—that is, the time from new moon to new moon—is 29 days 12 hours 44.05 minutes, which is called the moon's synodical period.

If the earth were motionless in space the moon's orbit would be nearly an ellipse, having the earth in one of the foci; hence the distance from the earth varies during the course of a lunar month.

The mean distance from the earth is 238,857 miles. The maximum distance, however, may reach 252,715 miles, and the least distance to which the moon can approach the earth is 221,466 miles.

Its diameter is 2,160 miles, and if we deduct from her distance from the earth the sum of the two radii of the earth and moon—viz., 3,963 and 1,080 miles, respectfully—we shall have for the nearest approach of the surfaces of the two bodies 216,423 miles.

Its form is that of a serpentine curve, always *concave* toward the sun, and its plane is inclined to the plane of the earth's orbit at an angle of 5° 9′.

These points of intersection with the ecliptic are called nodes, and it is only at or near them that eclipses can occur.

The nodes have a retrograde motion, which causes them to make an entire revolution in 18 years 281 days 21 hours 22 minutes and 46 seconds.

Both sun and moon return to a node after 18 years and 11 days, so that an eclipse is followed by another of the same general character at the end of this period.

The moon always presents the same face to the earth, as is evident from the permanency of the various markings on her surface. This proves that the moon revolves on an axis, and the time of rotation is exactly equal to the time of revolution around the earth—viz., 27.32166 days.

The moon's axis is not perpendicular to the plane of her orbit, but deviates therefrom by an angle of about 6° 41′.

By reason of irregular motion in her orbit, we see more of the eastern or western edge at one time than at another.

The moon's surface contains about 14,657,000 square miles, or nearly four times the area of Europe; the volume is 1-49 and mass 1-81 that of the earth, or about 3 2-5 that of water.

At the lunar surface gravity is only 1-6 of what it is at the earth.

The centre of gravity of the earth and moon, or the point about which they both actually revolve in their course around the sun, lies *within* the earth; it is 1,050 miles below the surface.

The tides are caused mainly by the moon, the tide-raising power of moon and sun being as 11 to 5.

APOGEE, 1930.

	D.	H.		D.	H.
January	1	11	July	13	9
January	28	11	August	9	2
February	24	8	September	5	5
March	24	12	October	3	4
April	21	8	October	30	9
May	19	3	November	27	6
June	15	8	December	25	3

Each month the moon is said to be in perigee when nearest to the earth and in apogee when furthest from the earth.

The average time from perigee to perigee, or from apogee to apogee, is 27d. 13h. 18m. 33s; and this period is known as the anomalistic month.

The moon's distance when in perigee or apogee is not exactly the same in different months but varies considerably according to the phase and the month of the year.

The distance is least when the full moon nearest to January 1 occurs at the time of perigee.

The distance is greatest when the new moon nearest to January 1 occurs at the time of apogee.

COMETS BELONG TO OUR OWN SOLAR SYSTEM.

Comets, according to Prof. N. T. Bobrovnikoff of the Lick Observatory, University of California, are not visitors.

"We have evidence on one hand," he says, "that comets are true members of our solar system; they do not come from inter-stellar space. On the other hand, their age seems to be incompatible with the age of the major planets; no comet could have survived 10,000,000,000 years (the estimated age of the solar system). It is possible to reconcile these results by postulating the capture of comets by the sun a comparatively short time ago, not exceeding 1,000,000 years.

"We may think that the sun appropriated them during one of its passages through diffuse clouds of obscuring matter. Such a theory has been developed by F. Nolke on entirely different grounds. His estimate of the span of time between the adoption of comets by the solar system and the present is from 50,000 to 100,000 years.

"The sun is traveling through space with the velocity of about twenty kilometers a second. This means it covers distance covered by light during one year in 15,000 years. It came from the region of Orion where agglomerations of meteoric matter are suspected. A million years ago our solar system was some seventy light years away from its present position in the general direction of Orion. These considerations give a certain weight to the capture theory of comets.

"Nolke goes so far as to suggest the possible explanation of the earth's glacial periods by the action of diffuse matter through which the sun once passed. We may note here that there are indications that meteorites were less abundant in the early geological epochs. The conspicious absence of meteorites from the strata older than 1,000,000 years has been interpreted by some investigators as an argument for their terrestrial origin. It may with equal right be regarded as an indication of the absence of meteorites from the solar system before the quaternary epoch.

"In their obedience to the law of disintegration, comets form a system all members of which follow the same career with the same ultimate fate. The matter in comets must be in a very peculiar state of excitation which does not occur often in the universe. Yet all comets have fundamentally the same spectrum, regardless of their orbital elements. These facts constitute strong evidence for the common origin of comets.

"The system of comets is closed; that is, we have no influx of fresh comets coming from the depths of the universe. The disintegration of comets is an irreversible process. There is no building up of new comets from the meteoric and gaseous matter diffused in space.

"Comets are gradually losing their power to form a tail and their gaseous envelopes disappear in the course of time. They are ultimate sources of meteors in our solar system, and also may be responsible for the presence in it of larger bodies, like asteroids."

A closed season for comets, predicted by the Lick Observatory Astronomer, will take away from the starry firmament one of its most popular occasional attractions.

THE MILKY WAY AND THE UNIVERSE.

The Sun is one of the relatively small stars in the Milky Way. So Prof. Harlow Shapley, director of the Harvard University Observatory told the American Association for the Advancement of Science, at its 1929 convention, at New York City.

There are approximately 30,000,000,000 stars in this home circle, arranged in what Dr. Shapley called a discoidal system, the general shape of this star mass being that of a thin watch, or of two plates held together face to face. Studies of the last year indicate that the diameter of our galaxy is 200,000 light years, a light year being 6,000,000,000,000 miles.

It has been established by foreign astronomers, according to the speaker, that this star mass turns around and around like a grindstone, completing a circle once every 300,000,000 years. The earth is a distance of 50,000 light years from the hub of this wheel of stars. The hub or center of gravity of the mass is in the southern constellation Sagittarius, where a dense swarm of stars is located.

The ten billions stars in these parts, however, form only a very trifling part of the universe, as it is now unfolding before the researches of Dr. Shapley and others engaged in taking soundings in space. The natural partiality of astronomers for the home galaxy formerly exaggerated its importance, but it is now known to be merely one of many thousands of equally interesting galaxies. In the past year, Dr. Shapley said, several thousand new galaxies have been discovered at Harvard alone.

These galaxies, according to Dr. Shapley, are not independent organizations, but are merely units in larger organizations which he called galaxies of galaxies. The nearest of these galaxies of galaxies, he said, is eleven million light years from here. It is situated in the constellation of Coma and Virgo. It contains about 250 constituent galaxies. These are galaxies of a dwarf type. They apparently measure only from five to twenty thousand light years in diameter.

Forty-five separate clouds of galaxies have been studied at Harvard during the last year. Some contain only a few galaxies, others contain several hundred.

Dr. Shapley then asked the question whether these clouds of galaxies, or galaxies of galaxies, formed other super-organizations—that is, whether there exist galaxies of galaxies of galaxies.

Dr. Shapley said his studies indicated that space is transparent.

He added that observation seems to show that the universe is *closed*; that every part of it is related by the force of gravity or the Einstein space effect. It was found that the light from the distant nebulae varied from that on earth.

Every wave length of light from these greatest distances was broadened—the greater the distance the greater the broadening. The wave lengths of light from stars which are traveling outwardly, or away from the earth, are broadened, and this effect is used as a speedometer in telling how fast the stars were traveling.

Used on a distant nebula, this speedometer indicated that it was traveling at the rate of 2,500 miles a second, an unheard-of rate of speed even for astronomy. Mathematicians worked over this and other results to prove that the distant nebulae are in some manner tangled up in the outer folds of the universe, so that their light waves are being broadened by the Einstein effect rather than by their speed.

PLANETARY CONFIGURATIONS. 1930.

To find the time when star is on meridian, subtract R. A. M. S. of the sun table below from the star's Right Ascension, first adding 24h. to the latter, if necessary; mark this result P. M. if less than 12h.; but if greater than 12h. subtract 12h. and mark the remainder A. M. Thus, on January 1, Sirius is on the meridian at 12.02 A. M., approximately.

Our universe—the space marked out by the distance to the outermost star of the Milky Way—is believed to be 350,000 light years across.

A light year is the distance that light travels in a year, moving at the rate of 186,324 miles a second. It is the yardstick of modern astronomy.

A light year is in round numbers six trillion miles, and the distance across our universe is taken as 350,000 times six trillion miles.

RIGHT ASCENSION OF MEAN SUN, 1930.

(At Washington—Mean Noon.)

The Right Ascension of Mean Sun increases 3.913 to 4 less (gain)

TABLE OF MAGNETIC DECLINATION.

Or Variation of Compass for January, 1929—With the Annual Change in 1926 for Selected Places in the United States.

A plus (+) sign to the annual change denotes that the declination is increasing, and a minus (—) sign the reverse. (Specially prepared for The World Almanac in the office of the United States Coast and Geodetic Survey.)

FOG DURATION AVERAGES.

The following table shows the average hours of fog per year at various U. S. Lighthouse Service Stations.

Station.	Hours	Station.	Hours	Station.	Hours
Moose Peak, Me	1,644	The Cuckoids, Me	1,297	Humboldt Bay, Cal	1,086
Petit Manan, Me	1,607	Seguin, Me	1,278	Great Round Shoal, Mass	1,086
Libby Islands, Me	1,574	Swiftsure Bank, Wash	1,272	Pollock Rip, Mass	1,084
Whitehead, Me	1,511	Pollock Rip Slue, Mass	1,243	Bass Harbor Head, Me	1,084
Mount Desert, Me	1,418	Calumet Harbor, Ill	1,174	Isle au Haut, Me	1,083
Egg Rock, Me	1,404	Blunts Reef, Cal	1,166	Point Arena, Cal	1,059
Great Duck Island, Me	1,393	Nash Island, Me	1,162	Two Bush Island, Me	1,048
Point Reyes, Cal	1,384	San Francisco, Cal	1,148	Pemaquid Point, Me	1,039
Scotch Gap, Alaska	1,378	Cape Hinchinbrook, Alaska	1,134	Tenants Harbor, Me	1,017
West Quoddy Head, Me	1,374	Bonita Point, Cal	1,122	Nantucket Shoal, Mass	1,016
Matinicus Rock, Me	1,361	Manana Island, Me	1,109	San Luis Obispo, Cal	1,010
Little River, Me	1,300	Point Cabrillo, Cal	1,087		

The absolute maximum record is that at Seguin, Me., 2,734 hours in 1907, equivalent to about 30 per cent. of the entire year, 8,760 hours.

The maximum observed on the Great Lakes was at Calumet Harbor, near Chicago, Ill., where 2,269 hours of fog occurred in 1913, amounting to about 26 per cent. of the year.

This and other stations near large cities are affected somewhat by smoke in the vicinity.

The highest Pacific Coast record was observed in 1916 on San Francisco Light Vessel, Cal. being 2,221 hours, or about 25 per cent. of the year.

* Observatories. † Highest latitude in U. S. territory Lt. lighthouse. ‡ State capitol.

To find the value in hours, minutes and seconds divide the degrees minutes and seconds by 15.

Latitude of a place is its angular distance from the equator and is measured by an arc of the meridian between the zenith and the equator. Longitude of a place is measured by the arc of the equator, intercepted between the prime meridian and the meridian passing through the place, or by the angle at the pole between these two meridians.

There is a periodic shifting of the latitude of the poles of the earth, according to many scientists. The movement is difficult to detect because of the small area over which the pole shifts—the size of a baseball diamond.

UNITED STATES NAVAL OBSERVATORY, WASHINGTON, D. C.

The Naval Observatory at Washington, D. C., maintains continuous observations of the sun, moon, planets, and fundamental stars for the determination of absolute positions, including the position of the equator and the equinox among the stars, and essential contributory observations.

It also prepares and publishes the American Ephemeris and Nautical Almanac, and derives and disseminates the standard time of the United States.

Other astronomical investigations of general or special scientific value, either independently or in cooperation with other observatories, are undertaken so far as time, opportunity, and the demands of the principal observational work of the Observatory admit.

In addition, the Observatory provides for the development, supply, upkeep, and repair of chronometers, compasses, sextants, and other nautical instruments which afford means of safe navigation to naval vessels and aircraft.

The Observatory's time signals, based on precise star observations, are sent out at 3 A. M., noon, and 10 P. M., Eastern Standard Time, on telegraph-control lines which operate automatically the radio stations at Arlington and Annapolis, and in addition at noon those at Key West and San Diego.

NEW YORK (GOVERNOR'S ISLAND) TIDE TABLES FOR 1930.

Note—Add 1 hour for Daylight Saving Time. First line each day is for morning tides.

TIME OF HIGH WATER AT POINTS ON THE ATLANTIC COAST.

The standard time of high water at the following places may be found approximately for each day by adding to or subtracting from the time of high water at Governor's Island, N. Y., the hours and minutes annexed. To the result add 1 hour for Daylight Saving Time.

	H.	M.		H.	M.		H.	M.
Albany, N. Y.	add	9	45	Key West, Fla.	add	2	20	Portland, Me.	add	2	50
Annapolis, Md.	add	9	00	League Island, Pa.	add	5	25	Portsmouth, N. H.	add	3	10
Atlantic City, N. J.	sub.		55	Marblehead, Mass.	add	2	55	Poughkeepsie, N. Y.	add	4	45
Baltimore, Md.	add	11	00	Nahant, Mass.	add	2	55	Providence, R. I.	sub.		10

Under normal atmospheric conditions the visibility of a light depends upon its height and intensity, the distance due to the former being known as the geographic range, and to the latter as the luminous.

As a rule, for the principal lights the luminous range is greater than the geographic, and the distance from which the principal lights are visible is limited by the horizon only, and under some conditions of atmospheric refraction, the glare or loom of the light and occasionally the light itself may be visible far beyond the computed geographic range.

Roughly speaking, the distance of visibility in nautical miles is equal to eight-sevenths of the square root of the height of the light above sea level.

The actual curvature of the surface of the earth for the first mile is about 9 inches, and increases at first approximately as the square of the distance.

A light 130 feet high is seen just at the horizon; what, under ordinary atmospheric conditions, is its distance from the observer?

	Nautical Miles.
From table, distance corresponding to 130 feet height	13.03
Add distance corresponding to height of eye above sea level, say 15 feet	4.43
Distance of light	17.46

HEIGHT ABOVE SEA LEVEL OF CERTAIN LIGHTHOUSES.

The Fire Island, N. Y. Light is 167 ft. high; visible 19 nautical miles.

WEATHER SIGNALS.

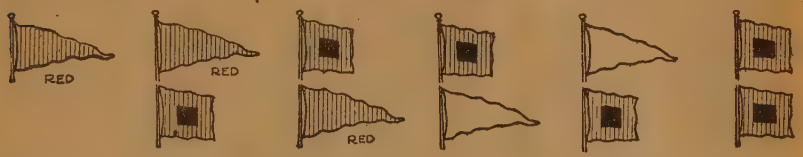
The Weather Bureau, United States Department of Agriculture, furnishes, when practicable for the benefit of all interests dependent upon weather conditions, the "Forecasts" which are prepared daily at the Central Office in Washington, D. C., and certain designated stations. These forecasts are telegraphed to stations of the Weather Bureau, railway officials, postmasters, and many others, to be communicated to the public by telegraph, telephone, radio, and mail, and, to a limited extent, by steam whistles.

Whistle Signals.—A warning blast of from fifteen to twenty seconds' duration is sounded to attract attention. After this warning the longer blasts (of from four to six seconds' duration) refer to weather, and shorter blasts (of from one to three seconds' duration) refer to temperature; those for weather are sounded first.

Blasts.	Indicate.
One long	Fair weather.
Two long	Rain or snow.
Three long	Local rain or snow.
One short	Lower temperature.
Two short	Higher temperature.
Three short	Cold wave.

The forecast messages are telegraphed at the expense of the Weather Bureau to places where they are distributed to nearby and local communities; they are furnished to individuals or firms at the regular commercial rates and sent "collect."

Small Craft, Storm and Hurricane Warnings. All square flags shown here are red with black center when displayed as warnings.



Small Craft Warning—A red pennant indicates that moderately strong winds that will interfere with the safe operation of small craft are expected. No night display of small craft warnings is made.

Northeast Storm Warning—A red pennant *above* a square red flag with black centre displayed by day, or two red lanterns, one above the other, displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northeast*.

Southeast Storm Warning—A red pennant *below* a square red flag with black centre displayed by day, or one red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southeast*.

Southwest Storm Warning—A white pennant *below* a square red flag with black centre displayed by day, or a white lantern *below* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southwest*.

Northwest Storm Warning—A white pennant *above* a square red flag with black centre displayed by day, or a white lantern *above* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northwest*.

Hurricane, or Whole Gale Warning—Two square flags, red with black centres, one above the other, displayed by day, or two red lanterns, with a white lantern between, displayed by night, indicate the approach of a tropical hurricane, or of one of the extremely severe and dangerous storms which occasionally move across the Great Lakes or up the Atlantic Coast.

DEFINITIONS OF WINDS.

A *gale* is any wind exceeding certain limiting velocities. In practice gales are subdivided into *fresh, strong* and *whole*. A fresh gale is any wind having force 8 in the Beaufort Scale. (Force 8 is equivalent to a velocity of approximately 47 to 54 m.p.h. while a whole gale may have a speed of 55 to 63 m.p.h.)

Whirlwind: any limited mass of air in violent whirling motion. Whirlwinds range in degree of violence from the common dust whirl that may be observed at street corners due to opposing winds to that of the dry dust whirlwind, an intermediate form seen at times of still air in hot desert regions, and from that form up to the most violent whirling storm known—the tornado, which see.

Tornado: A violent whirling storm of extremely small diameter characterized by a pendant whirling funnel-shaped cloud that progresses rapidly across the country in a rather narrow path that in general is marked by the total destruction of objects in its course. The force of the wind in the vortex of a tornado is too great to measure; trees are uprooted or twisted off and the remnants scattered over the landscape, frame-buildings are demolished and those of more enduring construction are severely damaged, heavy objects may be carried up into the funnel cloud only to be dropped to the ground a little farther on.

Cyclone: This term is persistently applied to the tornado, just described. Properly speaking a cyclone is an area of low barometric pressure, often circular or oval in form and usually with gentle to fresh winds, though in cases the winds may and do reach gale force. The direction of the winds of a cyclone, viz., toward and around the center of the area of low pressure in a direction contrary to the movement of the hands of a clock as it lies face up on a table, commonly referred to as counterclockwise, is what gave the name "cyclone" to storms of this character.

Cyclones are divided into two main groups, *tropical* and *extra-tropical* according to the latitude of origin. Tropical storms originate near but not on the equator and they are known under different names in various parts of the world· thus in the Far East they are known as *typhoons* or *baguios* and in the West Indies as *hurricanes*. There is no essential difference between a typhoon and a hurricane. The characteristics of a tropical cyclone are violent winds, intense rainfall, the presence of a calm spot at the center of the storm (the "eye" of the storm) and the absense of an anticyclone

Extra-tropical cyclones are as their name implies the storms of the temperate zone, they are also known simply as LOWS, or barometric depressions, they are of great geographic extent some having diameters of 1,000 miles in length. The tornado occurs, mostly, in the southeast quadrant of a cyclone.

EARTHQUAKE VIBRATIONS

A violent shock makes the whole earth tremble, vigorously in the vicinity of the origin and with decreasing amplitude at more distant points. Hundreds or thousands of miles from the source the dying impulse, imperceptible to our senses, may be recorded faithfully by a delicate seismograph mounted on bedrock.

What can strike a blow sufficiently hard to shake the earth? Heavy volcanic explosions give rise to earthquakes, but a far more common cause is the abrupt snapping of the rocky crust under enormous strain. Movements on such breaks, known to geologists as *faults*. occur at frequent intervals in many parts of the earth.

Three distinct kinds of impulses move outward from the locus of such a shock; two kinds penetrating into the earth, and the third traveling around the circumference.

One of the throughwaves, called the *primary* or *longitudinal* wave, travels with a velocity of several miles a second. Arriving at the position of a distant seismograph, it produces the first preliminary tremor, making a slight vibration on the record

The other throughwave, called the *secondary* or *transverse* wave, moves at a distinctly slower rate, and reaches the seismograph later than the primary, to set up the second preliminary tremor.

The third impulse, traversing the longer route along the curvature of the earth, is the last to reach the station. This wave is the most vigorous of the three, and sets the arm of the seismograph swinging widely.

NORMAL TEMPERATURE AND RAINFALL.

(Prepared in the office of the Chief of the Weather Bureau, U. S. Department of Agriculture.)

RULES FOR FORETELLING THE WEATHER.

Adapted for Use with Aneroid Barometers.

A Rising Barometer.

A rapid rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in Summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

A Steady Barometer

with dry air and seasonable temperature indicates a continuance of very fine weather.

A Falling Barometer.

A rapid fall indicates stormy weather.

A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in Summer, and snow in Winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in Winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northerly winds, including from northwest by north to the eastward for dry or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from southeast by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, when moderate wind, with rain or snow, comes from the northward.

44,000 THUNDER STORMS OCCUR DAILY ON EARTH.

At any one moment, statistics show, there are on an average about 1,800 thunder storms in progress in the world, giving 300,000 lightning flashes an hour, or 100 a second, says the London Daily Mail.

These are among the figures contained in a report issued by the Air Ministry meteorological office on "The Distribution of Thunder Storms Over the Globe." The earth will experience 16,000,000 thunder storms a year, or 44,000 daily.

From more than 3,000 stations observations are being made of thunder storms. At certain tropical stations distant thunder is so common the observer may not be aware of its occurrence.

Java is probably the most thundery region of the earth.

Areas where thunder is rarely or never heard include the Arctic and Antarctic regions.

WEATHER WISDOM.

A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain. A halo occurring after fine weather indicates a storm. A corona growing smaller indicates rain; growing larger, fair weather. A morning rainbow is regarded as a sign of rain; an evening rainbow of fair weather. A deep-blue color of the sky, even when seen through clouds, indicates fair weather, a growing whiteness an approaching storm. Fogs indicate settled weather. A morning fog usually breaks away before noon. Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicates rain. The first frost and last frost are usually preceded by a temperature very much above the mean.

ABSOLUTE ZERO—ABSOLUTE TEMPERATURE.

The zero points on the Fahrenheit, Centigrade, and Reaumur thermometer scales are simply arbitrary. Absolute zero—the point at which bodies on the earth are entirely devoid of heat—exists at 459.4 degrees below the Fahrenheit and 273.1 degrees below the Centigrade zero points. This is the beginning of what is known in dynamic meteorology as Absolute Temperature, as determined by observations of the contraction of gases when cooled, and from thermo-dynamical considerations. Thus, water freezes at 273.1 degrees of Absolute Temperature on the Centigrade scale of registration.

At Colon, Canal Zone, the rainfall in the wet season averages 116.3 inches.

The temperature at Colon averages 79 to 80 degrees throughout the year.

The hottest place on earth is the town of Azizia, in Tripoli, about 25 miles south of the Mediterranean. There the temperature in the summer of 1924 was recorded at 136.4 degrees, Fahrenheit.

The temperature, July 10, 1913, was 134.1 at Greenland Ranch, Death Valley, Cal.

Inquiry by experts of the Mayo Foundation indicates that rheumatic persons can "sense" the approach of rain.

Humidity and rainfall are closely related, and both are governed by altitude and by proximity to large bodies of water.

In the Temperate Zone there is more rainfall at sea level than in the mountains.

Figures represent mean of the 8 A. M. and 8 P. M. relative humidity, seventy-fifth meridian time, for the period 1889 to 1913, inclusive. A few of the stations have a shorter record.

"T," trace, less than .01 inch. † Showers in vicinity.

The weather recording instruments at the city of New York are located on top of the tall building at 17 Battery Place, where the bureau has its headquarters.

The degrees of heat registered therefore often are slightly lower than shown by thermometers in the "canon" streets in lower Manhattan, especially around noon.

Record of the Year.

Chronology, Dec. 11, 1928—Dec. 11, 1929.

1928—DECEMBER

Dec. 11—The Prince of Wales arrived at London from his African hunting trip and was greeted at Buckingham Palace by his father, King George, suffering from pneumonia. On Dec. 12 the surgeons cut into the right side of the King's chest and drained it.

—The Buenos Aires police discovered and prevented a plot to bomb U. S. president-elect Hoover's train on its approach from Chile. The train left Santiago, stopped overnight at Los Andes, crossed the Andes Mountains on Dec. 12, and arrived at Buenos Aires, Argentina, on Dec. 13, and was formally welcomed on Dec. 14. He reached Montevideo, Uruguay, on Dec. 16; he boarded the American battleship Utah at Montevideo on Dec. 18, arriving at Rio de Janeiro, Brazil, on Dec. 21; on Dec. 22 he addressed the Brazil Congress and the Supreme Court and he spoke also at a state dinner at the Presidential Palace. He left Rio on Dec. 23 on the Utah, reaching Norfolk and Washington on Jan. 6, 1929.

—Commander Richard Byrd's ship City of New York radioed from the Antartic that the existence of Scott Island had been confirmed.

Dec. 12—Rumania's first free election gave the government of Julius Maniu, leader of the National Peasant Party, 85 per cent of all the votes. The remainder chiefly went to the Liberals and the Hungarians. The Communists and anti-Semites did not poll a sufficient ballot to win any representation.

—Princess Marie Louise d'Orleans, former wife of the Prince of Bourbon, was married to Walter F. Kingsland Jr. of New York, at Chichester, England.

—Armed robbers got $104,500 in an armored car that had just left the Yonkers, N. Y., post office.

Dec. 13—Ex-Mayor J. C. Hundley, 76, and his wife, Luella, 57, were shot to death at their home, Carbondale, Pa.

—At Canton, Ohio, confessing to her husband that she was the young woman who killed Vernard E. Fearn, a coal operator, Mrs. Margaret Heldman, 21, of Lorain, Ohio, committed suicide.

Dec. 14—Thomas ("Red") Moran, a N. Y. City police slayer, was executed at Sing Sing prison.

Dec. 15—At Portsmouth, England, Gene Tunney, Captain in the Reserve Corps of the U. S. Marines, presented a silver cup sent to the British force by the Marine Corps as a token of friendship and mutual admiration, and led in silent prayer for the recovery of King George.

—Goro Graziano and his bride, of Canarsie, were shot to death at a wine-stocked bungalow near Belmont Park, L. I. They had been "taken for a ride." On April 16, 1929, a jury at Mineola found Frankie Plaia and Mike Sclafonia guilty of the murder.

Dec. 16—The strike in the banana region of Colombia ended when the Communist leader, Alberto Castrillon, was killed by troops.

—At Santa Barbara, Cal., a woman set out to cook a pot of beans and got a Schubert melody. The voice of a radio announcer burst through the steam of a quiet kitchen and the strains of "Ave Maria" followed. The beans were simmering on an electric range.

REBELLION IN AFGHANISTAN.

Dec. 17—A rebellion has begun in Afghanistan, attributed to the King's drastic Westernization reforms and to Queen Souriya's desire to abolish purdah, or the seclusion of women. Women and children who took refuge at the British legation were removed by airplanes. On Jan. 11, 1929, the King withdrew his "reforms" and a committee of 50 was appointed to review laws passed by Parliament.

—Bolivia reported that she had ordered fighting at the border stopped and Paraguay agreed to accept the mediation offer of the International Conference of American States on Conciliation and Arbitration, in session in Washington. Bolivia, Dec. 18, agreed to arbitration.

—The S-4 (sunk a year ago in collision, with loss of 40, and raised) was sunk off Block Island in 55 feet of water in a naval test of her safety devices. The craft was raised on Dec. 19.

—At N. Y. City, Governor Smith laid the cornerstone of the new $6,000,000 State Office Building which when completed, will cover the square block bounded by Centre, Worth, Leonard and Baxter Streets, just north of the new County Court House.

HONORS FOR THE WRIGHTS.

—A monument to commemorate the first airplane flight of Wilbur and Orville Wright (Dec. 17, 1903) was unveiled at Kitty Hawk, N. C., and the cornerstone of the government's memorial was laid. Orville Wright, surviving brother, was present. In the Science Museum at South Kensington, in London, beneath the wings of the Wright brothers' first airplane 100 leaders and pioneers in British aviation held a dinner to commemorate the first flight by the Wrights at Kitty Hawk.

Dec. 18—Congress appropriated $32,500,000 for prohibition enforcement in the next fiscal year.

—Grover A. Whalen was sworn in as Police Commissioner of N. Y. City, succeeding Joseph A. Warren.

Dec. 19—At Nanking an Anglo-Chinese tariff treaty was signed by Sir Miles Lampson, the British Minister, and Dr. C. T. Wang, the Chinese Foreign Minister.

—There are now over 900,000 cases of influenza in this country.

—The body of Capt. B. J. Marden, British explorer, missing since he started several months ago on a conquest of the Aconcagua, the highest peak on the American continent, has been found on the mountain, in the Andes, at a height of 14,760 feet.

—Martinez de Pinillos and Lieutenant Zegarra, Peruvian good-will flyers, completed a non-stop flight over the peaks of the Andes from Santiago, Chile, to Buenos Ayres.

—Trading in securities on the New York Produce Exchange opened.

—The Wilkins-Hearst Antartic Expedition, commanded by Capt. Sir Hubert Wilkins, during a 1,200-mile flight in a land plane from Deception Island, has been able to establish that Graham Island is separated from the polar continent by an ice-filled channel.

Dec. 20—Two new theatres—the Ethel Barrymore, on W. 47th St., and Proctor's, on E. 58th St., were opened at N. Y. City.

—Pope Pius celebrated the close of the 49th year of his priesthood by opening the new Vatican library, to which The Carnegie Foundation contributed.

—Air mail pilot I. J. McGinn died in crash of plane in snowstorm at Huron, O.

—Vincent Rice, 17, who strangled to death Alice Joost, 15, on Staten Island, was sentenced to 20 years to life in state prison.

Dec. 21—Fire partly destroyed the Riverside Baptist Church under construction at 122nd St. and Riverside Drive, N. Y. City. Rev. Harry E. Fosdick, pastor, John D. Rockefeller, Jr., chief donor.

BOULDER DAM BILL SIGNED.

—President Coolidge signed the Boulder Canyon Dam bill providing for a reclamation, flood control and power project on the Colorado River. Under the measure the government is to supply $165,000,000 for the construction work in Black Canyon on the Nevada-Arizona boundary.

—At Tokio, the Home Ministry dissolved the Tokio Municipal Council on the grounds that with 25 members held on charges of corruption, it found difficulty in forming a quorum.

—State's Attorney Fachot, prosecutor in the recent trials of the Alsatian autonomists, was shot at Paris by an assailant who surrendered with the words: "I killed him to save Alsace-Lorraine."

—At Carmi, Ill., the almost headless body of Miss Anna Preher, 45, a grade school teacher and secretary-treasurer of the White County Teachers' Institute, was found in her home. An effort had been made to burn the house by setting fire to bed clothing.

—George Graham Rice (Jacob Simon Herzig), who was convicted of mail fraud in the sale of the stock of the Idaho Copper Corporation, was sentenced at N. Y. City to four years in the Atlanta Penitentiary and fined $5,000 by Federal Judge Knox. Walter K. Yorston, president of the Idaho Corporation, was sentenced to nine months, and The Wall Street Iconoclast was fined $10,000. Sentence of the Idaho Corporation, also convicted, was suspended for five years.

Dec. 22—Premier Mussolini dissolved the 27th Italian Parliament until after the 1929 general elections.

—President Coolidge restored citizenship rights to former Representative John W. Langley of Kentucky, who served a prison term for aiding the obtaining of liquor withdrawal permits.

Dec. 23—In Brooklyn, where robbers raided a poker game in Peter Cardones flat, on 9th Ave. near Greenwood Cemetery, the host shot 2 of the in-

vaders to death. A thug killed one of the players and another player tumbled out of a window in the fight and died.

—The new Japanese Parliament opened at Tokio.

—The U. S. Shipping Board steamer Casper was destroyed by fire after striking a rock in the Baltic Sea, off Finland; 2 died.

Dec. 24—At Washington, the nation's Christmas Eve festivities were opened by President Coolidge, who touched the button that lighted the Community Christmas Tree in Sherman Square. In doing so he sent greetings to the people of the United States.

Dec. 25—President and Mrs. Coolidge ate their Christmas dinner at the White House, then left by train, for Brunswick, Ga., whence, on Dec. 26, they went by boat to Sapelo Island, Ga., 11 miles at sea, where they became guests of Howard E. Coffin, Detroit auto maker, on his extensive estate where Mr. Coolidge shot pheasants and wild turkeys. They ended their vacation on Jan. 1, 1929, returning to Washington on Jan. 2.

—At Mexico City, President Emilio Portes Gil issued an order for the abolition of summary executions.

TO BETTER PROHIBITION ENFORCEMENT.

—Major Chester P. Mills, formerly Federal Prohibition Administrator for the N. Y. District, is the winner of the $25,000 prize offered by W. C. Durant for "the best and most practicable plan for making the Eighteenth Amendment effective." The plan offered by Mills presented in detail his method of preventing the diversion of industrial alcohol at its source, which he held to be mainly responsible for the bootlegger.

The winner of the $5,000 school prize is Malcolm D. Almack, representing the Palo Alto (Cal.) High School. Under the terms of the contest $1,000 goes to the boy and $4,000 to his school.

The bark City of New York, with Commander Richard Byrd, arrived at the Antarctic ice barrier in Ross Sea.

—A boundary treaty signed at Rio de Janeiro between Brazil and Bolivia, fixes definitely a common frontier in places which were not included in the treaties of 1867 and 1903. This boundary line starts between the source of the Rapirao River and the Arroyo Bahia, continuing directly to the mouth of the latter at Chipamanu and then to the mouth of the Acre River. The line will follow the Madeira River, between the rivers Beni and Mamore up to the Abuma River, running equidistant from the margins of the stream. Brazil will have jurisdiction over the islands closer to its shore, and Bolivia retains the islands closer to its bank.

The treaty also includes plans for a railroad which will connect Cochabamba and Santa Cruz de Las Sierras, extending from there to the ports on the Amazon and Paraguay Rivers.

STUDENT DRINKING.

Dec. 26—Drinking among high school and college students goes on mostly at parties, dances, hotels and in parked automobiles, according to the findings in a survey announced by the Methodist Board of Temperance, Prohibition and Public Morals.

Dec. 27—The age of the earth was estimated at a billion years by a scientist at the opening, at N. Y. City, of the 85th meeting of the Amer. Assoc. for the Advancement of Science.

Dec. 28—David Ware, 50, a negro, beheaded with a razor State Trooper Peter Gladeyes, 22, who had arrested him near Robbinsville, N. J. The negro fled to the forest. Later he was pursued by 150 state troopers, 200 American Legion men, other posses, bloodhounds, airplanes, and an Army balloon. He was found Dec. 30 at Carteret, N. J. and, after conviction, was executed on May 31, 1929.

Dec. 29—Mrs. Mary Parks Arnold, 72 (widow of Francis R. Arnold and mother of Miss Dorothy Arnold, who on Dec. 12, 1910, when 17, vanished from her home at N. Y. City) died of heart disease.

Dec. 30—Fire destroyed the steamship Paul Lecat at its dock, Marseilles, France; loss, $4,000,000.

Dec. 31—Near Parchman, Miss., Charley Shepherd, negro trusty, who escaped from the State Prison Farm after murdering a guard and abducting the murdered man's daughter, was burned to death on a plantation. He was tied to logs and they and his body were soaked with gasoline.

—At Riverside, Cal., Mrs. Sarah Louise Northcott pleaded guilty to the murder of Walter Collins, one of four boys alleged to have been tortured and murdered in the Northcott chicken ranch, and was sentenced to life imprisonment.

LIFE SENTENCE IN LIQUOR SELLING.

—At Lansing, Mich., because she had been convicted of selling liquor four times, Mrs. Etta Mae Miller was sentenced in Circuit Court to life imprisonment in the Detroit House of Correction. A jury, composed of eight men and four women, deliberated thirteen minutes and reported it found her an "habitual criminal," as defined by Michigan's new criminal code. Under the code a life sentence was mandatory.

1929—JANUARY

Jan. 1—Franklin D. Roosevelt, Dem., was sworn in at 12.01 a.m., at Albany, as Governor of New York, succeeding Alfred E. Smith, Dem. The Legislature opened on Jan. 2 and in joint session heard him deliver his first annual message. The session ended on Mch. 28.

—Police raids on speakeasies, cabarets and bootleggers, took some of the "wet" out of the New Years' celebration at N. Y. City.

—Gen. Jose Maria Moncada was inaugurated president of Nicaragua, at Managua.

—"Tex" (George Lewis) Rickard, 58, N. Y. sports promoter, was operated on at Miami, Fla., for appendicitis. There was a second operation. He died on Jan. 6 and his body, in a $15,000 (2,200-lb.) bronze coffin was taken to N. Y. City, where it lay in state Jan. 8-9, and then was buried, Jan. 9, at Woodlawn Cemetery.

Jan. 2—Presidential electors in all the states met at their respective Capitals and cast their official ballots, which then were sent to the U. S. State Dept.

—The Broadway Theatre closed, at N. Y. City. It opened in 1888 with the first American production of "La Tosca." On its stage Edwin Booth and Sir Henry Irving made their farewell Broadway appearances. One of the biggest and most important attractions to be staged there was "Ben Hur."

NIAGARA FALLS AGREEMENT.

—The construction of works in the Niagara River above Niagara Falls to preserve and improve the scenic beauty of the Falls, but permit a larger diversion of water for power purposes, was authorized in a convention signed at Ottawa by William Mackenzie King, Prime Minister of Canada, and William Phillips, the American Minister.

Jan. 3—Congress reassembled after the holidays.

—At Washington, the Pan American Conference on Arbitration and Conciliation brought to a successful conclusion its efforts to obtain a peaceful settlement of the Bolivian-Paraguayan dispute and at the same time agreed on two multilateral treaties to prevent future outbreaks of hostilities in the Western Hemisphere. These treaties were signed on Jan. 5. They exclude Tacna-Arica and Honduras—Guatemala boundary disputes.

A protocol of conciliation of the controversy between Paraguay and Bolivia was signed by representatives of the two countries.

—The German Minister of the Interior ordered ended by arbitration the strike of 50,000 men at shipyards, which began 3 months ago.

—The Rockefeller Foundation and the Laura Spelman Rockefeller Memorial were consolidated into a new philanthropic corporation, to be known as the Rockefeller Foundation, with total net assets of $264,602,447.

—The French steamer Malakoff sank in gale off the west coast; 38 lost.

Winslow of the Southern District of New York of various acts of misconduct in office and seeking an inquiry to determine whether the jurist should be exonerated or impeached. A Federal Grand Jury inquiry was begun at N. Y. City. Judge Winslow resigned and the President accepted the resignation on April 1. Winslow said he had done no wrong but he felt his usefulness had been impaired.

—President Juan Gomez of Venezuela, accompanied by an escort, was riding in his automobile in the environs of Maracay, seventy miles by road from Caracas, the capital of Venezuela. Six men opened fire on the car, but the escort returned the shots and all the conspirators were killed.

—The Salvation Army High Council, at London, again deposed, 52 to 5, Gen. Bramwell Booth as Commander-in-Chief, and elected, 42 to 17, Commissioner Edward J. Higgins as his successor.

—Herbert Hoover was officially declared elected President and Senator Charles Curtis Vice-president at a joint session of the House and Senate held in conformity with the constitutional requirement to count the electoral vote.

SEVEN CHICAGO GANGSTERS MASSACRED.

Feb. 14—At Chicago, posing as policemen, gunmen trapped seven members of the North Side "mob" of George ("Bugs") Moran in a garage on North Clark Street, disarmed them and then shot six of them to death and fatally wounded the seventh with sawed-off shotguns and machine guns fired at a range of two feet.

Feb. 15—Melville E. Stone, 80, counselor of The Associated Press since his retirement as general manager of the organization in 1921 after twenty-eight years as its directing genius, died at his home, N. Y. City.

—President-elect Hoover visited the Florida Everglades. Heading a caravan of automobiles, Mr. Hoover traveled through sections which in the last three years have been practically wrecked by wind and water, with a loss of more than 2,000 lives.

—Explosions on the water front at Buenos Aires, Argentina, consumed 500 English automobiles that had just been imported. Several score American machines also were destroyed, but a big shipment of 900 cars that had just been landed from an American vessel escaped.

—The Interstate Commerce Commission approved the plan submitted by a committee of railway executives under which the Railway Express Agency, which has been incorporated by eighty-six Class I railroads, will on March 1 acquire and operate practically the entire express business of the country.

PRIESTS IN MEXICO TO REGISTER.

Feb. 16—Bishop Miguel M. De La Mora, acting head of the Catholic Church in Mexico, gave permission to the priests of Mexico to register their residences with the Ministry of Governacion. President Gil on Feb. 12 issued an indict calling upon priests to register within fifteen days or be declared rebels.

—Edward Lawrence Doheny, Jr., the oil man's 36-year-old son, who figured in the Teapot Dome investigation of 1924 as the messenger who carried the "little black bag" containing $100,000 to former Secretary Albert B. Fall, was shot to death in a bedroom in his Beverly Hills, Calif., mansion by his secretary and companion, Theodore Hugh Plunkett, 34. The latter then killed himself by firing a bullet through his brain.

Feb. 17—The weather smiled unexpectedly on the opening of the Port Newark Airport as New York's air mail terminal, replacing Hadley Field, at New Brunswick, N. J.

Feb. 18—Herbert Hoover returned to Washington from Florida, and Sec. of State Kellogg, in an identic note delivered to diplomatic representatives of all governments which have signed the World Court protocol, invited their governments to conduct an informal exchange of views among themselves with a view to admitting the United States into membership and participation in the court.

—Fifty persons were injured, six seriously, and 1,200 affected by smoke and fumes, when the third car of a seven-car Hudson Tube train, bound for Hoboken from N. Y., caught fire about 1,000 feet west of the Christopher Street station, at a point under Morton and West Streets.

Feb. 19—At London, cries of "pronounce it" in the House of Commons greeted the attempts of Sir Robert Thomas, Liberal member for Anglesea, to obtain for the village of Llanfairpwllgyngwyllgogerychwyrndrobwillllandysiliogogoch the services of a Welsh-speaking postmaster.

Feb. 20—Foreign Secretary Sir Austen Chamberlain informed the House of Commons that American proposals for naval limitation put forward in Secretary of State Kellogg's note to Great Britain, Sept. 28, are "inacceptable."

—Spain carried out dissolution of its artillery corps, apparently without disorder except at Segovia where cadets made a demonstration. Troops throughout the kingdom were confined to their barracks in order that there might be no interference when officers of other branches relieved those of the artillery, of their commands.

—At Northampton, Mass., 4 army trucks arrived with goods shipped from Washington by President Coolidge.

Feb. 21—Six months to 3 years in prison was the sentence passed on Mrs. Dorothy Leonard, who stabbed and fatally wounded her husband, Patrolman Michael Leonard, in their home, Flushing, N. Y., on Sept. 15, 1928.

—Col. C. A. Lindbergh has been appointed technical adviser to the aeronautics branch of the U. S. Dept. of Commerce, at $25 a day when on duty.

Feb. 22—President Coolidge in his last public address as Chief Executive presented George Washington as the best business man of his day, pointed out the necessity and dangers of educational specialization, said the United States is at peace with the world, and urged continued national "detachment" as necessary to world peace. He delivered his address at the commencement exercises at George Washington University. He said it was Jefferson and not Washington who spoke of "entangling alliances."

VARE DENIED SENATE SEAT.

—The committee which investigated the Pennsylvania and Illinois election scandals of 1926, recommends that the seat in the Senate which Mr. Vare has been waiting to occupy since the present Congress convened in December, 1927, be denied him.

—The Irish Free State Parliament approved the Kellogg Pact, 83 to 50; it was approved, at Ottawa, by the Canadian House of Commons, the Senate having already approved.

—The Mexican Government has promised to capture the bandits who seized for ransom and then killed J. M. Underwood and C. C. Aiesthorpe, American employes of the Guanajuato Reduction and Mines Co. Their bodies are in the American hospital at Guanajuato; 10 bandits were caught and killed on Feb. 28.

Feb. 23—The Prince of Wales sold at auction at London, his 12 hunting horses for $20,980.

—George Haldeman flew from Windsor, Ont., near Detroit, to Havana, Cuba, 1,404 miles, in 12 hours, 56 minutes, non-stop.

—A military coup in China by Li Tsung-yen, leader of the Kwangsi faction, has overturned the government of Hunan Province and a new government, named from Hankow, has been instituted without consulting Nanking. In Shantung the fighting is already known to have accounted for 700 dead and 2,000 wounded and the sound of guns has been audible at Chefoo for forty-eight hours.

—At Manila, a vast crowd bade good-by to Gov. Gen. Henry L. Stimson when he left for Washington to take a place in the Hoover Cabinet. He left his pet parrot, "The Old Soak," behind, but it followed him, in a cage, to Washington, in June.

—At Washington, reversing its action of yesterday, the Senate voted 48 to 32 against an amendment to the naval appropriation bill withholding funds necessary to maintain marines in Nicaragua, and a few minutes later passed the bill without a roll-call.

JOAN OF ARC CELEBRATION.

—In France, all the bells of the Department of the Meuse, those bells in whose chimes she heard the voices of the saints, rang out at 4 p.m. to celebrate that day and minute, five centuries ago, when Joan of Arc rode out from Vaucouleurs for Chinon to begin the great adventure which crowned King Charles at Rheims, liberated France, and ended for her on the burning faggots in the market place of Rouen.

—Near Cranford, N. J., there was found the blazing body of a woman who had been shot to death and tossed to a roadside snowbank, where the slayer had ignited the gasoline-soaked clothing of his victim. The body was identified on April 11 as that of Mrs. Mildred Mowry of Greenville, Pa., widow of a steel worker, a trained nurse. On April 11 the police arrested at his home at Elizabeth, Henry Colin Campbell (real name Close), 55, civil engineer and ad writer, who said he married the woman on Aug. 23, 1928, at Elkton, Md., under the name of Dr. Richard M. Campbell, though he had a wife and 3 children. He killed her, he said, to get rid of her. He was put on trial at Elizabeth on June 10 convicted, and sentenced to death.

—Marshall McCormack, deposed Mayor of Herrin, Ill., convicted of conspiracy to violate the national prohibition act, was sentenced to two years in Leavenworth Federal Prison and a fine of $3,000.

Feb. 24—Col. C. A. Lindbergh, alone in a 4-passenger car, flew from Eagle Pass, Tex. to Mexico City, and motored to Cuernavaca, 50 miles, to visit his fiancee, Miss Anne Spencer Morrow, daughter of the American Ambassador, Dwight W. Morrow.

—Five British airplanes carried the staffs of the Italian and French and English legations from Kabul, Afghanistan, to Peshawur, India.

Feb. 25—Tornadoes killed 17 at Duncan, Miss., and 11 more in Tex. and Ark.

—Jack Dempsey, boxer, reported that an intruder, intent on kidnapping, shot at him in the home of Harry Mohr, Miami Beach, Fla.

—Women friends of the wife of President Coolidge called at the White House and gave her a diamond brooch and chain.

—The South African Parliament refused to give the voting privilege to negroes.

—The Spanish dictator, Primo de Rivera, summarily removed Jose Cruz Conde as Governor of Seville.

—The Rev. Newell Dwight Hillis, 70, pastor emeritus of Plymouth Congregational Church, Brooklyn—Beecher's old church—died from paralysis at his home, Bronxville.

—At Los Angeles, Martin Aguirre, 71, last of the old-time sheriffs of California, who generally used a bowie knife instead of a revolver to maintain order, died in his sleep.

Feb. 26—There was no bloodshed at the Chicago aldermanic election. The Thompson "machine" keeps control of the board.

—At N. Y. City, David H. Gladstone, 60, and Merrill E. Gates Jr., 52, attorneys, were sentenced to prison for eighteen months and one year, respectively, for embezzling funds entrusted to them as receivers and trustees in bankruptcy. Each had pleaded guilty.

—A national referendum on the question of modifying the Volstead law was approved by the Wisconsin Legislature.

—Mother Superior Maria Planematch of the Ostrog Convent near Damilograd, Montenegro, was stabbed to death by an unidentified man who escaped. She was a relative of the late King Nicholas.

Feb. 27—At Valbuena Flying Field, Mexico City, the Travel Air monoplane City of Wichita, after carrying Charles A. Lindbergh and his fiancee, Miss Anne Morrow, on a flight, overturned and was wrecked in a cloud of dust as the trans-Atlantic flyer tried to land it. Loss of a wheel in taking off at some place on this journey caused the accident.

—Overriding a special message from Gov. Roosevelt, Dem., the N. Y. Legislature, which is Republican, passed the $249,556,986 Budget bill.

—Nationalist China signed, at Nanking, the Kellogg Pact.

—Orville Wright was presented by Secretary Davis at the War Department with the Distinguished Flying Crosses awarded by Congress to him and posthumously to his brother, Wilbur. Secretary Davis in making the presentation read the citations accompanying the award and Mr. Wright expressed his thanks.

JONES BILL PASSED.

Feb. 28—The U. S. House of Representatives, 283 to 90, passed the Jones bill to punish first offenses against the Prohibition law by a $10,000 fine or five years' imprisonment, or both, in the discretion of the court. The measure was accepted by the House in the form that it was passed by the Senate, Feb. 19, by a vote of 65 to 18, and it was signed by President Coolidge on Mch 2.

—To keep their nerve at normal a day after their crash, Col. Lindbergh and Miss Morrow, in a borrowed plane, made several flights from Mexico City. His right shoulder was in a bandage, so he drove the biplane with his left arm.

—William Walker, England's oldest man, died at Nottingham at 108. On his one hundredth birthday Walker ate five meals and when his health finally failed his only regret was that he could not continue having his daily half pint of beer and his favorite meat, pork, to which he attributed his long life.

—Major Thomas F. Lynch, said to be the oldest civilian employe of the army, left that service after 47 years at a ceremony at Governors Island. For the last 40 years he has been custodian of the Army Building on Whitehall Street, N. Y. City.

MARCH

Mch. 1—The French Chamber of Deputies, 570 to 10, ratified the Kellogg anti-war pact.

OIL TRUCE IN RUSSIA.

—"The most important English and American firms operating in the British oil market—including Sir Henri Deterding's company (the Royal Dutch)—have agreed to the establishment of normal trade relations with the Soviet Oil Corporation," says I. G. Sokolnikoff, director of the Soviet Oil Syndicate, in an interview at Moscow, in Isvestia.

—The railroads of this country, under the name of the Railway Express Agency, Inc., formally took title to the business of the American Railway Express Company, which is now left without a business or executive.

—Henry Hanson, American resident manager of the San Nicholas Mining and Milling Company at

Vocas, Durango, and C. W. Reid, a British subject employe, were captured by Mexican bandits. T. L. Carnahan, American mining engineer, was kidnapped on Mch. 18 at La Noria, in Zocatecas. Two American mining men, J. M. Underwood and C. C. Alesthorpp, were kidnapped and killed, Mch 12.

Mch. 2—At Washington, 11 nations deposited their ratifications of the Kellogg Anti-War Treaty with the State Department, thereby completing the final act in their pledge for the renunciation of war.

—A jury at N. Y. City failed to agree in the suit of Mrs. Harry Hahn against Sir Joseph Duveen, for $500,000, because he said her painting "La Belle Ferronniere," was only a copy of a Leonardo da Vinci in the Louvre Gallery, Paris.

REVOLUTION STARTS IN MEXICO.

Mch. 3—In Mexico a revolutionary movement got under way in the state of Vera Cruz, in the southeast, and in Sonora and the mountain states of Sinaloa, Chihuahua, Laguna, Durango, Coahuila, Jolisco, Michoacan, Colina and Guanajuato. The movement is directed by Gen. J. M. Aguirre, Gen. F. R. Manzo, and Gen. J. G. Escobar. The rebels captured Monterey on Mch 5, and the federals took Orizaba and Esperanza, thereby isolating Vera Cruz. The federals on Mch. 6 retook Monterey, and on Mch. 7 they regained Vera Cruz, but on Mch. 8 they lost Juarez, and also Mazatlan. They recovered Mazatlan the next day.

—At Rome, condemnation of Gen. Umberto Nobile, commander of the Italia expedition to the Arctic last year, but vindication of Commanders Mariano and Zappi, who were with Dr. Finn Malmgren on the trip to find aid for their companions on which the latter died, was pronounced by the committee of inquiry into the Italian polar expedition, which tendered its findings to Premier Mussolini on Mch. 13. Nobile announced his resignation from the Air Service.

—Hundreds arrived at Washington by airplanes to attend the Hoover inaugural. They came, men, women, and children, in big and little planes, from all over the country.

—A jury at Denver found Miss Farice King, a nurse at the General Hospital, guilty of murder in having shot a patient, policeman "Robert Evans," when she recognized him as John C. Bobzine, who had jilted her 6 years before.

HOOVER'S INAUGURATION.

Mch. 4—Herbert C. Hoover of Calif., and Charles Curtis of Kansas were sworn in at the Capitol at Washington as President and Vice-President, succeeding Calvin Coolidge of Mass., and Charles G. Dawes of Ill. It rained on the vast crowd. In his inaugural address, broadcasted over 117 long-wave and three short-wave radio stations, all over the United States and the world, Mr. Hoover urged law enforcement. Thirty airplanes, the dirigible Los Angeles, and 4 blimps wheeled overhead. The Curtis ceremonies were held in the Senate chamber; those for Mr. Hoover on the Capitol's east portico. Ex-President and Mrs. Coolidge went from the Capitol to a train and reached their old home, Northampton, Mass, at 1.10 a.m. on March 5. The Inaugural Parade was a big one; also the Inaugural Ball.

—Explosions in the Bulgarian Army arsenal at Sofia killed 28, mostly women; hurt 30.

—Pres. Coolidge in the forenoon signed the bill extending the life of the Federal Radio Commission on to Jan. 1, 1930.

—Poison liquor has killed 13 at Peoria, Ill.

Mch. 5—The U. S. Senate met in special session. The decision of President Hoover not to send the name of Secretary Mellon to the Senate for confirmation led to the Senate's adoption of a resolution directing the Judiciary Committee to investigate first whether Mellon could legally hold over from the Coolidge Administration, and second, whether he was disqualified from office under a law barring Cabinet officers from being directly or indirectly interested in trade or commerce. While Mellon's name was not presented, nor that of Secretary of Labor Davis, the names of the eight remaining Cabinet members were sent to the Senate, which confirmed them in a thirty-five minute executive session, without opposition. Later, the committee decided Mellon had the legal right to hold over.

—At Tokio, Senji Yamamoto, 40, a leader and deputy who had worked his way through high school at Vancouver, B. C., by doing odd jobs and later became a university professor, was assassinated by a reactionary who objected to the deputy's activities.

—The Court, at Newport, R. I., granted, on the ground of non-support, a divorce to Muriel Vanderbilt Church from Frederick Cameron Church, Jr. They were married there on July 25, 1925. There are no children.

Mch. 6—Thomas Taggart, 72, long the Democratic leader of Indiana, and for a time U. S. Senator, died at his Indianapolis home.

—A landslide in the Valley of St. Vincent, Madeira Island, swept 9 houses into the river and thence to sea, drowning 40.

Mch. 7—An announcement in Mexico that President Hoover had decided to permit the sale of arms to the Mexican Government, if the latter requested it, was received with great rejoicing in the capital.

—Thomas (Fatty) Walsh, body-guard of Arnold Rothstein, slain N. Y. City gambler, was shot to death in an early morning card row in a hotel room at Coral Gables, Fla. Arthur L. Clark of N. Y. City, was wounded during the fracas.

—At N. Y. City, the amended complaint in the suit of the heirs and next of kin of John Nicholas Emerick for two-thirds of the proceeds of the estate of the first John Jacob Astor, estimated at $39,000,000, was dismissed by Federal Judge Thacher. The complaint alleged that Emerick, furrier and merchant, made Astor a one-third partner in his business in 1787 and later made him trustee of his estate for ninety years, when it was to be divided among the descendants of Emerick's brothers, Christopher and Valentine. It was alleged that this was not done and that no accounting ever had been made. Emerick died in 1816 and Astor in 1848.

ROCKEFELLER WON IN STANDARD OIL FIGHT.

—John D. Rockefeller, Jr. and his financial friends (Rockefeller is in Egypt—it was a proxy fight) dominated the annual meeting, at Whiting, Ind., of the Standard Oil Co. of Indiana, and turned out Col. Robert W. Stewart as chairman of the board. 5,510,313 shares were voted for the Rockefeller slate and 2,954,986 shares for the Stewart ticket; 31,337 shareholders voted for Stewart, 15,204 voted against. Only 300 stockholders were present. Stewart's place as director was filled by the election of W. M. Burton, ex-pres. of the concern.

—A verdict of murder in the first degree was returned by a jury in General Sessions, N. Y. City, against Frederick W. Edel, 39, an ex-convict, for the slaying of Mrs. Emeline O. Harrington, an actress, with a hammer in her apartment, West 190th St., Dec. 23, 1927. It was the first case in fifteen months in which a first degree murder verdict had been returned in this county. He was given the death sentence March 14.

—Voting more than 60 per cent of the outstanding stock, or 210,000 shares, a group identified with du Pont interests wrested control of the Childs Co. string of restaurants from William Childs, founder of the firm, at the annual stockholders' meeting, at N. Y. City, and elected a board of nine directors in sympathy with the reforms proposed.

Mch. 8—Arms, 10,000 rifles, surplus U. S. war supplies, 10,000,000 rounds of ammunition, and commercial airplanes (20), were made available by action of the Dept. of State at Washington, for purchase by and shipment to the Mexican Government.

—The Council of the League of Nations, in secret session at Geneva, referred to a committee Elihu Root's proposed revision of the covenant terms under which the U. S. might or could join the World Court. The Root formula was approved on Mch. 18 by the League's committee of jurists.

Mch. 9—Col. C. A. Lindbergh opened the 500-mile air mail line between Mexico City and Brownsville, Tex. With a heavy cargo of mail and 9 passengers, he left the Capitol at 7.56 a.m., stopped at Tampico, and landed at Brownsville at 1.34 p.m. He flew back with 13 passengers, on Mch. 10, in 5 hours, 18 minutes, including a stop at Tampico. Three of the mail sacks were stowed under the wings and were not found until April 9. On Mch. 14 he again flew the mail from Mexico City to Brownsville. Thence he flew to Long Beach, Calif.

—An airplane carrying mail flew over the Andes, from Santiago, Chile, to Buenos Aires, Argentina. It was piloted by Count de la Vault, Pres. Internat'l. Aeronatical Fed.

Mch. 10—The first national quinquennial assembly or first general conference of the General Fascist staff, 5,000 in number, was held at Rome, and presided over by Premier Mussolini. It included the prefects of all the 92 provinces, the Podestas (as Fascism now calls its Mayors) of all the provincial capitals, members of the Fascist Grand Council, 150 Fascist Senators, generals of the army, admirals of the navy, members of the directorate of the Fascist party, editors of all daily and weekly newspapers, all "Deputies designate" in the forthcoming Chamber. To this group of men—women were almost completely absent—the Premier summarized his accomplishments, hailed the Vatican

accord, and assured religious tolerance to non-Catholics.

—The Rev. Joseph A. Riccardi, 34, Roman Catholic priest, was shot to death in the doorway of his church, at Canton, O.

AUTOMOBILE SPEED RECORD.

Mch. 11—At Daytona Beach, Fla., Major H. O. D. Segrave, the English racing driver, established a new world's automobile speed record when he drove his 900-horsepower Golden Arrow car two ways over the beach course at an average speed of 231.36246 miles an hour. His mark excels by 23.81 miles an hour that of 207.55 miles an hour made here on April 22, 1928, by Ray Keech in the 1,500-horsepower triplex built by J. M. White of Philadelphia.

—President Portes Gil's spokesmen expresses pleasure that "Catholic leaders" have not identified themselves with the Mexican revolt. The rebellion has no connection with religion, it is asserted. Washington will never recognize the Mexican insurgents, says Secretary Kellogg. The rebel general, Simon Aguirre, was captured and shot by a firing squad at Santa Lucretia, Vera Cruz.

Mch. 12—At Mexico City, the government announced that it had confiscated property belonging to prominent rebel leaders and would auction it to help defray costs of suppressing the revolution. At Juarez, Chihuahua, Mexico, Gen. Gonzalo Escobar, commander in chief of the rebel forces, in a decree announced that the law affecting religious orders in Mexico, is abolished in territory under revolutionist control.

—President Hoover, at the White House, stated to the newspaper correspondents: "There will be no leases or disposal of government oil lands, no matter what category they may lie in; of government holdings or government control, except those which may be made mandatory by Congress. In other words, there will be complete conservation of government oil in this administration." Orders to this effect were given out to all Land Offices.

—120 died in fire and stampede at movie theatre, in a village in Vladimir Province, Russia.

—The 2nd Ave. trolley line, N. Y. City, ended its receivership, begun in 1908.

BIBLE KILLED SEEKING AUTO RECORD.

Mch. 13—At Daytona Beach, Fla., Lee Bible, automobile mechanic and dirt track racer, rode to death and took another life with his own when J. M. White's 1,500-horsepower Triplex, in which he was attempting to set a new world's automobile speed record, leaped from the course just after finishing the measured mile and plunged into the sand dunes. Charles Traub, a Pathé News photographer, was hit and instantly killed by the car in its plunge from the speedway.

—Anti-Rivera riots and strikes by students at Madrid, Barcelona, and elsewhere in Spain have resulted in 10 deaths. The universities affected were closed by royal decree, Mch. 16 to May 20.

—The services performed by Newton D. Baker as Secretary of War during the World War were recognized by the War Department with the presentation of a Distinguished Service Medal to him by Secretary Good.

—At Columbus, O., Bert B. Buckley, former State Treasurer, was sentenced to two years six months and one day in the Federal penitentiary at Atlanta and fined $1,000 on charges of conspiracy to bribe a Federal officer.

—An accomplice in the theft of $500,000 from the steamer Leviathan last June, Frederic Rybar, was sentenced by a Vienna court to 18 months in prison.

—The Belgian Chamber of Deputies unanimously ratified the Kellogg pact. The Senate had already done so. The two Chambers of the Swedish Riksdag, or national Parliament, have voted unconditional approval of Sweden's adherence to the pact.

Mch. 14—President Hoover issued an executive order that all future decisions of the Commissioner of Internal Revenue dealing with tax refunds in excess of $20,000 shall be open for public inspection.

—Floods in Pea River and White Water Creek isolated and partly submerged the town of Elba, Ala. Food was sent there by airplane. Then the people were rescued. The town of Geneva later was evacuated ahead of the flood. Deaths in the flood area totaled 16.

—At Chicago, Maj. Thornton Anthony Mills, friend of hoboes and storm center of the New England Congregational Church until he was ousted as its pastor, died from poison he swallowed with suicidal intent. He was a son of Benjamin Fay Mills, eminent as an orator and evangelist and an associate of Dwight L. Moody.

—Plantation fires in Cuba, in Camaguey and Oriente provinces have destroyed over 32,000,000 lbs. of sugar cane.

Mch. 15—George W. Olvaney handed to the Executive Committee his resignation as leader of Tammany Hall.

—The Mexican federal army, under ex-pres. Calles, captured the City of Durango, with no casualties.

—At Logan, W. Va., Mrs. Levisa Hatfield, 87, widow of "Devil Anse" Hatfield, who gained renown in the Hatfield-McCoy feud in the eighties, died at her home of pneumonia.

—The first Federal House of Detention was opened at N. Y. City (West and 11th Sts.).

LEGATION WINE SEIZED.

—Arrest in Washington of the American driver of a commercial truck loaded with sixty cases of wines and liquors for the Siamese Legation despite the fact that one of the secretaries of the embassy, armed with full credentials, was a passenger on the vehicle, created a stir in diplomatic row. The contents of the wagon were delivered by the driver. The Treasury Dept. on Mch. 22 issued an order giving complete immunity to wines and liquors imported for diplomatic use, and naming Baltimore as the proper port of entry.

Mch. 16—At N. Y. City, Federal Judge Thomas D. Thatcher, who presided at the investigation of the bankruptcy case in which Stewart Eaton, stepson of Federal Judge Francis A. Winslow, was given an automobile from the assets of the charge of E. Bright Wilson, appointee of the Judge, amended his written opinion as to Eaton. The amendment disbars Eaton from practice in the Federal Court along with Wilson, who is also disbarred.

—12 steel forts, six armored cars, a machine-gun car, eighty guards, twenty mounted policemen, forty foot-policemen, two squads of detectives, eighty bank policemen and a detail of sharp-shooters guarded $2,500,000,000 moved across La Salle St., Chicago, from the Continental Nat'l. Bank & Trust Co., to the Ill. Merchants Trust Co.

Mch. 17—Federal Mexican planes bombed the city of Torreon, killing 2 non-combatants. Fighting began east of that city between Federals under Gen. Ortiz and rebels led by Gen. J. G. Escobar, who evacuated Torreon on Mch. 18, fleeing to the north.

—For the second time in two weeks the Jersey meadows that surround Port Newark Airport added to the roll of air dead, when thirteen flying sightseers were killed and two others seriously injured, one fatally, in the crash of a Colonial Airways Wright-motored Ford about a mile from the flying field. The plane, trying to make a forced landing, crashed into a gondola car loaded with sand. It was flying with a thirty-mile tail wind and struck at 100 miles an hour. The victims were crushed in the cabin. The pilot, Lou Foote, 32, of Newark, and a Brooklyn friend with him in the cockpit, were thrown clear of the wreck.

—At Berlin, negotiations between General Motors Corporation and the Opel works were concluded when an agreement was signed by Alfred P. Sloan and Fritz von Opel, whereby General Motors receives a majority of Opel shares.

—The Flonzaley (string) Quartet ended its 25-yr. career at Town Hall, N. Y. City.

Mch. 18—Prince George, the King's youngest son, has been retired from the navy in order to begin duties at the Foreign Office, it was announced at Buckingham Palace, London.

—Harry Miner's Bowery Theatre, a landmark of "Little Old New York," was destroyed by fire.

Mch. 19—The first conviction in a Federal Court, at N. Y. City, under the Jones amendment to the Volstead Law, was that of Ernest Dougall, an ex-Lieut. in the 69th Reg't., who got 3 months for selling drinks to customers at an "inn" on W. 50th St.

—An estate appraised at $56,914,260, exclusive of real property, was left by Rodman Wanamaker, merchant, of New York and Philadelphia, who died March 9, 1928, according to the inventory filed by the executors today with the Registrar of Wills at Norristown, Pa.

—The N. Y. Court of Appeals, at Albany, ruled that ex-Police Commissioner Richard Enright of N. Y. City is entitled to a yearly pension of $3,750, dating from Jan. 1, 1926.

—A sentence of two and a half to five years in Sing Sing was imposed in General Sessions, N. Y. City, on William H. Pilkington, 29, who while manager of the American branch of Joshua Hoyle & Son, Ltd., English cotton converters, in the last three years stole $129,000 of the firm's funds.

DEATH OF MARSHALL FOCH.

Mch. 20—Sitting in an armchair at a window of his home in the old Quarter St. Germain, Paris, looking out across a peaceful garden at the sun setting

behind Les Invalides, Marshall Ferdinand Foch died at 5.50 p.m.

"Allons y" ("Let's go") were his last words. 1,000,000 marched past the body under the Arch of Triumph and 2 died and 100 were hurt in the heat and crush. The remains were placed in the Cathedral of Notre Dame where, on Mch. 26, the funeral was held and the body was laid in the Invalides, where Napoleon is entombed.

—Arbitration and conciliation treaties with Belgium were signed at Washington.

—A Mexican rebel force began attack on the city of Mazatlan, on the Pacific Coast. Gen. J. M. Aguirre, leader of the rebel forces at Vera Cruz, when it surrendered to the Federals on Mch. 7, was captured at Aguacatillo and was executed Mch. 21, by a firing squad at Almagres. His son is a student at a military school at Chester, Pa. Mexican navy officers at Vera Cruz were arrested on treason charges. The rebels were defeated at Mazatlan, Mch. 25, after a 3-day attack.

—17 were killed, 30 hurt, in a head-on collision of passenger trains of Canadian National Railway, at Drocourt, Ont. A colonist car behind the engine of the west-bound train was crushed.

—Sam Sacco, 36, ex-convict, reformed crook, protege of the Marshall Stillman Movement, was shot to death in revenge by gangmen who smashed into his flat at Ravenswood, N. Y. City. They also killed his wife. Both were in bed.

Mch. 21—The first royal wedding in 340 years united the reigning families of Norway and Sweden. Crown Prince Olaf of Norway took as his bride Princess Martha of Sweden.

—Explosion in the Kinloch coal mine at Parnassus, south-western Pennsylvania, killed 46; 266 escaped by walking 5 miles underground to an old exit.

—At N. Y. City, Blair & Co., Inc., announced consolidation with the Bank of America. This followed the recent union of the Guaranty Trust Co. with the Nat'l. Bank of Commerce, and of the Hanover Nat'l Bank with the Central Union Trust Co.

THE "I'M ALONE" CAPTURE.

Mch. 22—The British auxiliary schooner I'm Alone of Belize, suspected of being a contraband carrier, was sunk off the Louisiana coast by a Coast Guard craft, the Dexter. One member of its crew was drowned. The others, including Capt. J. T. Randall, were carried to New Orleans in irons. The British Gov't. protested. The U. S. Gov't. asserted the order to heave-to was given within 12 miles of the American Gulf coast and the pursuit was continuous 200 miles out into the Gulf. This was O. K. under the Tariff Act of 1922, it is stated officially. The drowned sailor, Leon Maingoy, was a French citizen. The Canadian Gov't, on April 9, entered formal protest with the American State Dept. On April 25, the two governments agreed to arbitrate the case.

—The Jugo Slav Government ordered the Latin alphabet to be used.

—The Parliament of Finland ratified the Kellogg anti-war pact.

Mch. 23—France lost another of her military geniuses by the death of Gen. Maurice Sarrail, whose name stands for his defense of Verdun at the outbreak of the war in 1914. Gen. Sarrail, who had been weakened by months of pleurisy, died at his residence on the Boulevard Pereire, Paris. He was buried in the Invalides, on Mch. 28.

—Tornadoes and floods caused 50 deaths in six States. The greatest loss of life was in Tennessee, where twenty were dead at Harriman, with two bodies recovered; seven at Rockwood, members of a Boy Scout troop, and three at Webster. Four of the deaths were in Kentucky.

—Chi Kunghuan, provincial government councilor in Peking and long a prominent figure in the republican movement in China, was assassinated in front of his home after alighting from a rickshaw.

Mch. 24—Italians turned out to participate in the general election for the first "Corporative Parliament," which will represent each art, craft, trade, profession and pursuit to which the citizens dedicate their activities instead of geographical divisions of the country.

Of the 9,650,570 qualified to vote for the 400 Deputies, 8,506,576 were for the Fascist ticket and 136,198 were against; 999,830 did not vote.

—150,000 celebrated Palm Sunday by visiting the airports around N. Y. City, and thousands took short flights; 300,000 went to the beaches.

ZEPPELIN VISITS EGYPT.

—The dirigible Graf Zeppelin left Friedrichshafen, Germany, for a non-stop flight over the Mediterranean and the Near East. She turned homeward at 8 p.m., on Mch. 26, having reached her goal at forty-seven miles east of Gaza and thirty miles north of El Arisch, near the Egyptian-Palestine border. The Zeppelin passed over Jerusalem, dropping mailbags at Tel-Aviv, and continuing on toward Syria, and the Egyptian boundary. She got back home on Mch. 28, having flown 5,040 miles in 81½ hours.

Mch. 25—The Spanish airplane, Jesus del Gran Poder (Capt.'s Francisco Jiminez and Ignacio Iglesias) left Seville, and flew to Bahia, Brazil, landing there on Mch. 26 at 8.30 a.m.—4,100 miles in 43 hours and 48 minutes. They flew on Mch. 28 to Rio de Janeiro; on April 2 they landed at Montevideo, whence they flew to Buenos Aires; and, on April 12, to Santiago, Chile.

—John L. Campion, 32, and 3 passengers were killed when his airplane, bound from Columbus, O. to N. Y. City, crashed in a fog in mountain treetops near Mt. Gretna, Pa.

—At Ottawa, Ont., lightning struck the buildings of Parliament twice. One bolt hit the huge granite Peace Tower, rocking it perceptibly and putting out of order the tower elevators.

—President Hoover has begun daily medicine-ball exercise in the White House grounds, 7-7.30 a.m., south lawn.

—Another economy step was taken by the President when the seven horses quartered at the White House stables were turned over to the War Dept. to be used at Fort Myer, Va. The black charger presented to President Coolidge at the beginning of his administration and used by him only once, when he was filmed trotting down Potomac Driveway, was sent to Northampton, Mass. It was his personal property. The Presidential yacht Mayflower, abandoned by the President, has been sent to the Philadelphia Navy Yard, where it will be removed from commission.

—Nash Rockwood, for 13 years Saratoga County Judge, was sentenced at N. Y. City to 3 months' imprisonment and $2,500 fine for failure to file income tax returns. He had pleaded guilty on Feb. 27.

KILLING OF MRS. DE KING.

—Prohibition agents shot to death Mrs. Gerald de King in a raid on her home at Aurora, Ill.; they beat de King on the head; the son shot a raider; a jug of wine was captured in the cellar.

—The steamship Cristobal arrived at N. Y. City from the Canal Zone, bringing a party of returning Congressmen, including W. M. Morgan, a "dry" member from Newark, O., who, a customs inspector stated under oath, had said he had in his baggage 2 bottles of whiskey and 2 of champagne, which his wife wanted for her father. Morgan got an order from the Custom House giving his baggage free entry and it was not opened by the inspector. Morgan, in public statements, denied he had or had said he had any liquor in his baggage.

Mch. 26—A brief but violent tumble in stock prices at N. Y. City shook out uncounted thousands of scared "margin" gamblers. Professional traders and big investors rushed in on a recovery wave; 8,246,740 shares were dealt in on the Stock Exchange as against 6,954,000 on Nov. 23, 1928. Banks stiffened the market on Mch. 27 by lending at 15 per cent. Daily interest charges total over $2,280,000. Among those who publicly announced lending to prevent a possible crisis was Charles E. Mitchell, pres. Nat'l City Bank and a director of the Federal Reserve Bank.

—Fire damaged the uncompleted North German Lloyd 46,000-ton liner Europa at Hamburg.

—President Hoover gave notice that the South must purge itself of its dealers in Federal patronage.

—Explosion of 3,000 lbs. of nitroglycerine at the du Pont plant at Gibbstown, N. J., killed 2 employes, hurt scores and smashed windows at Camden and Philadelphia.

—The Prince of Wales attended the funeral of Marshal Foch at Paris, then flew to London by airplane.

Mch. 27—The directors of the American Petroleum Institute met at N. Y. City and agreed to restrict production in 1929 to the 1928 basis. Later, the U. S. Atty. Gen. ruled that such an agreement was illegal.

—Greece and Jugoslavia signed, at Belgrade, a friendship treaty.

—Marshall Chang seized from the Nationalists the City of Chefoo, China.

—The Ecuador Congress, 42 to 8, elected Isidro Ayora as president. He has been Provisional President since the 1925 coup.

—George McManus, who is under indictment for the murder of Arnold Rothstein at a N. Y. City hotel on November 4, 1928, was released in bail of $50,000 in Supreme Court because of the failure of District Attorney Banton to bring him to trial.

NEW YORK LEVIES A GASOLINE TAX.

Mch. 28—The N. Y. Legislature adjourned sine die after laying a 2c.-a-gallon tax on gasoline, raising income tax exemptions and abolishing a direct tax. It began on Jan. 2.

—Col. Henry L. Stimson of New York took the oath of office as Secretary of State.

—Mrs. Laura B. Sutton, divorcee, vanished from her home at Los Angeles. Later, her headless body was found in the river near that city. Still later, the head was found.

Mch. 29—Crowds traveled to Lake Nemi from Rome to view the first of Caligula's famous galley to appear above the surface of the lake. They have been immersed 1,900 years. About two inches of a beam which formed part of the poop of one of the galleys is now visible.

—The body of a girl, found in the Connecticut River at Longmeadow, near Springfield, Mass., was identified, by the teeth, as that of Frances St. John Smith, 18, of N. Y. City, a freshman student at Smith College, Northampton, Mass., who vanished from there on Jan. 13, 1928. Autopsy showed death due to drowning.

—At Chicago, Rev. Charles A. Erkenswick was shot and fatally wounded in the courtyard of his church by the father of two boys who believed the priest responsible for the arrest of the boys on charges of robbing church poor-boxes.

—After a plea by Briand, Foreign Minister, the French Senate ratified the Pact of Paris outlawing war by a unanimous vote. The Chamber had previously approved the treaty with only the Communists and one extremist of the Right dissenting.

—A federal warrant was issued at Chicago charging Congressman M. A. Michaelson of that city with importing, transporting and possessing liquor, alleged to have brought from Cuba to Jacksonville, Fla., through Key West, Jan. 3-6, 1928. The indictment was found in Oct., 1928, but was not made public. The accused surrendered, and was tried and acquitted.

Mch. 30—Mexican rebels under Gen. Escobar fought Federal troops near Escalon, in the State of Chihuahua. The main engagement at Jiminez, in Chihuahua, was begun on April 1. Another rebel force was defeated at La Cruz on the West Coast, on April 1. Rebels on April 2 dropped bombs in Naco, Ariz., wounding an American.

—A plane from Los Angeles, carrying pilot D. R. Everitt, Jr., R. L. Balke, George Nico and T. J. Kelly, dashed, in a fog, against the mountain side of a high pass, and was destroyed with all aboard.

—An armed cutter of the Customs Service stopped and searched, in N. Y. Harbor, a yacht on which were Stuyvesant Fish and his family.

DEATH OF AMBASSADOR HERRICK.

Mch. 31—Myron T. Herrick, 74, former Governor of Ohio, and American Ambassador to France under four presidents, died at Paris of heart failure. He had been in bed two days, but had suffered from fatigue and slight cold for several days before he was willing to "give in to a slight cold," as he put it. The body was buried at Cleveland, O., on April 15, Col. C. A. Lindbergh accompanied the body from N. Y. City.

—The airplane Southern Cross, carrying Capt. Charles Kingsford-Smith and 3 companions, left Australia for England, but was forced down near Port George Mission, where the crew were discovered on April 12. Lieut. Keith Anderson and Robert Hitchcock in their place vanished on a search for the SouthernCross, and were forced down in the Taninie Desert, and perished there. They were found on April 21.

APRIL

April 1—The receiver for the Kansas City Joint Stock Land Bank, announced that a 100 per cent. assessment, aggregating $3,800,000, on the institution's 1,800 stockholders has been levied by the U. S. Farm Loan Board. The assessment was made on the receiver's recommendation. The bank's deficit was $6,498,812.62.

—At Atlanta, Ga., the State permitted George R. Harsh of Milwaukee and Richard G. Gallogly of Atlanta, former Oglethorpe University students, to plead guilty to the murder of two men in attempted hold-ups here last Fall and each was sentenced to imprisonment for life.

—Prussia formally annexed the old principality of Waldeck. This reduces the number of states in the Reich to 17.

April 2—The Mexican army under ex-Pres. Calles fought the rebels at Jiminez under Gen. Escobar. Among those killed in action was former Provisional President Eulalio Gutierrez, who rose in rebellion in his native State of Coahuila simultaneously with the revolt of other insurgent chiefs.

—At Santa Domingo, Dominican Republic, Charles G. Dawes and his group of American experts met the Cabinet of President Horacio Vasquez of the Dominican Republic and started to reorganize the government's finances. They finished on April 23 and left for N. Y. after filing their proposals with the Dominican Gov't.

—Michigan revoked its famous "life-for-a-pint" law when Gov. F. W. Green signed the Watson bill, eliminating 120 "minor" felonies from the list of crimes which draw the life penalty for fourth offenders.

—The Gorgas Laboratory for Tropical Research, at Panama City, was dedicated.

—At Amman, Emir Abdullah formally opened the first Legislative Assembly of the Transjordania Government, the town being decorated with banners, national flags and floral arches in celebration.

April 3—One of the bloodiest battles fought since the Mexican revolution got under way on March 3 took place at La Reforma, 12 miles north of Jimenez, when 5,000 Federal cavalry, led by Gen. Juan A. Almazan in person, overtook 3,500 rebel infantry whose northern retreat was held up there by a burned bridge. 1,000 were killed, 500 wounded, 2,000 captured.

PRECEDENCE FOR MRS. GANN.

—Vice-president Curtis announced that he would decline to accept a ruling made by Frank B. Kellogg just before he retired as Secretary of State that Mrs. Dolly Curtis Gann, the Vice-President's sister and wife of Edward Everett Gann, a Washington lawyer, would be seated after the wives of foreign Ambassadors and Ministers at official dinners and other functions.

—The auxiliary schooner Nomad was rescued by the Coast Guard at the mouth of Delaware Bay. The Captain, John D. Schofield, had fallen overboard. The crew and owner, J. H. Ross, were helpless.

—Mgr. Ignaz Seipel resigned as Chancellor of Austria.

April 4—Police Commissioner Whalen blamed prohibition for the increase in crime in this city, declared there were 32,000 "speakeasies" in New York, warned against the "hostess problem" which is "verging on vice conditions that were wiped out years ago," and scored "sob sister" judges who criticize police strong-arm tactics against criminals, in an address at a Rotary Club luncheon at the Waldorf.

—Twenty persons were killed and more than 100 were injured, many seriously, in a railway accident to the Bucharest-Jassy express near Boboca, Rumania. The cause was the wrong setting of a switch. As the train was rounding a curve on a high embankment it ran off the lines, being entirely derailed.

April 5—Governor Roosevelt signed the bill reducing the N. Y. State income tax by increasing the exemptions for single persons from $1,500 to $2,500 and for heads of families or married persons from $3,500 to $4,000.

—The Chinese National troops recaptured Hankow City.

DEATH TOLL OF PROHIBITION ENFORCEMENT.

—It was disclosed officially that since the Eighteenth Amendment became effective in 1920, 190 persons have been killed in the enforcement of the prohibition laws. Of these, 135 were citizens killed by prohibition agents and 55 were prohibition agents who met death in the line of duty. The figures for the nine years are:
In 1920, agents 6, citizens 5; 1921, agents 8, citizens 14; 1922, agents 12, citizens 13; 1923, agents 4, citizens 17; 1924, agents 2, citizens 22; 1925, agents 5, citizens 20; 1926, agents 6, citizens 17; 1927, agents 5, citizens 16; 1928, agents 7, citizens 10; 1929, agents none, citizens 1.

April 6—President Hoover went fishing, near Madison, Va.

—Mexican rebels attacked Naco, 75 bombs were found strewn along the tracks of the Southern Pacific Ry.

—The French liner Paris, outbound, stuck in the mud off Bay Ridge, Brooklyn, but was pulled off after 26 hours. On April 18, on her return voyage from Havre, the Paris went aground on Eddystone Rock near Plymouth, England. She pulled herself off on flood tide, discharged some of the passengers at Plymouth, then returned to Havre and docked for repairs of holes in her hull.

—Mahasha Rajpal, Hindoo author of the pamphlet "The Merry Prophet," which ridiculed Mahomet, was stabbed to death at Lahore, India.

—10 persons were killed in a fire at the Kirkwood Hotel, Des Moines, Ia.

April 7—A post office employee, seeking promotion,

made a "dud" bomb, and then "discovered" it at N. Y. City.

April 8—The U. S. Supreme Court refused to authorize the Interborough Rapid Transit Co. (N. Y. City) to charge a 7-cent fare. Thereupon the company prepared to seek relief from the state courts.

—The U. S. Shipping Board turned over to the U. S. Lines, a private concern, the steamship Leviathan, at N. Y. City. On her next trip to Europe the boat carried liquor to be sold to passengers on the return (west) trip only.

—Bombs were thrown from the gallery of the Indian Parliament at Delhi, injuring several members.

—The Canario Copper promoters, at N. Y. City, were sentenced to prison—John T. and Herbert C. Locke, 3 yrs. each; and G. F. Shurtleff, 4 yrs.

—The U. S. Supreme Court affirmed the 3-months' jail sentence passed on Harry F. Sinclair, convicted of contempt of the U. S. Senate in refusing to answer questions about Teapot Dome Oil. Sinclair, on April 17, petitioned for a rehearing which, on April 22, was denied.

—At Juarez, Gen. Jose G. Escobar was proclaimed, by the rebels, Provisional President of Mexico.

April 9—The Mexican rebel forces evacuated Chihuahua City.

MRS. GANN WON OUT.

—U. S. Secretary of State Stimson told the diplomatic corps in a letter to Sir Esme Howard, the British Ambassador, that the decision as to how Mrs. Edward Everett Gann, hostess and sister of Vice-President Curtis, or any other American officials and their wives should be received in their embassies rested wholly with the members of the corps. At the same time, in another letter to Vice-President Curtis, Secretary Stimson declared that for the State Department to attempt to settle questions of social precedence in Washington was inconsistent with its important government duties, and that he had issued instructions to the department to give no further advice or suggestions in such matters.

The Diplomatic Corps met and agreed to give Mrs. Gann the rank of a Vice-President's wife, and this she had on April 11 at the dinner given by the Chilean Ambassador, Carlos G. Davilae. After going to the table on the arm of the Chilean Ambassador, Mrs. Gann sat at the right, the place that would ordinarily be accorded the wife of the Vice-President, thereby taking precedence over the wives of all foreign diplomatic representatives present.

April 10—A tornado in Arkansas killed 25 at Swifton, 6 at Lorado, 25 at other places, injured 200, swept several hamlets away and did $1,500,000 damage.

—Ex-President Coolidge has accepted a membership in the board of directors of the N. Y. Life Ins. Co. He will serve on the agency committee. No salary is attached but he will receive $50 in gold for each directors' meeting he attends and $20 in gold at each committee meeting, plus free transportation to and from and 2 days' board.

—Farrell Frazer and 4 others were killed in an airplane crash at Tampico, Mex.

TEXAS GUINAN ACQUITTED.

April 11—At N. Y. City, Texas Guinan, night club hostess, indicted under the Volstead Act with ten men who pleaded guilty and are awaiting sentence, was acquitted by a jury before Federal Judge Thomas. She had been charged with maintaining a nuisance at the Salon Royale. Ten other attaches were fined.

—A jury in the Federal court at Chicago found sixteen members and officials of the Chicago Association of Candy Jobbers guilty of violating the Sherman anti-trust law. Eighteen others were found not guilty.

April 12—Declaring that the Legislature had "deliberately violated the spirit and letter of the Constitution" in its treatment of his Executive budget bill, Governor Roosevelt of N. Y. approved that measure with the exception of certain items which he vetoed in order to get a court ruling on the controversy between him and the Republican fiscal leaders.

—The Indian Legislature, at Delhi, passed a bill providing for the deportation of all non-Indian Communists and for a strict supervision of agitators.

—The Mexican rebel general, F. R. Manzo, with 15 of his staff, crossed into U. S. territory, at Nogales, Ariz., and were interned.

—At Belgrade, Jugoslavia, King Alexander, by royal ecree, retired General P. Pesitch, Chief of the General Staff and the highest military officer of the kingdom, three Army Corps commanders and 33 other officers.

—1,000 Chinese radical agitators are reported to have been executed by machine-gun fire during the past week in a campaign by the Canton authorities to stamp out radicalism here. Accused of instigating Communist agitation, 30 of the Nationalist Sun Yat-sen University were arrested, court-martialed and shot.

April 13—Premier Kasimir Bartel, of Poland, resigned and was succeeded by Maj. Kasimir Switalskizx, Minister of Education.

—A Scots Guardsman vanished from his sentry post outside Buckingham Palace, London. Later he walked to Aberdeen and surrendered. A court martial on June 3 discharged him from the army and sentenced him to 112 days at hard labor.

—At Detroit, A. H. Kreider, president of one of the airplane companies, was instantly killed, Capt. Alan E. T. Bruce, a pilot, was fatally injured, and William C. Naylor, an aviation engineer, was seriously injured in a collision of two airplanes over the Ford Airport. 8,000 persons, who had assembled for an air circus, witnessed the accident.

—The Tennessee House, 41 to 15, defeated a bill which the State Senate had passed and which required public school teachers to read a passage from the scriptures to their pupils every day.

—At Cincinnati, the U. S. Court sent 148 prohibition-law violators, including 3 women, to jail for terms averaging 2 years; 21 were fined $5,000 apiece.

April 14—At Madrid, 70,000 subjects, representing patriotic societies in all parts of the country, registered protest against the strike of the Madrid University students and other recent manifestations of opposition to the government.

April 15—The Seventy-first Congress convened in extraordinary session at the call of President Hoover to attend to farm relief and to take up tariff revision. Col. Nicholas Longworth, Rep. of Cinn., was reelected Speaker of the House.

BRITAIN TAKES TAX OFF TEA.

—The British Gov't announced in the House of Commons, in submitting the Budget, that the import tax on tea, in effect since the reign of Queen Elizabeth, would be abolished on and after April 22. This lowers the cost to consumers 8 cents a pound. Last year's consumption was 10 lbs. per capita.

—A Papal commission for authentic interpretation of the code of canon low, of which Cardinal Gasparri is chairman, has decided that applicants for the annulment of marriage may no longer plead "conditions imposed prior to celebration of the rite."

—The Board of Tax Appeals, at Washington, held that a deficiency assessment of $10,041,932 against the Wanamaker estate, levied as a Federal estate tax, should be eliminated on the ground that, in making a gift of the majority of his holdings to his son, Rodman Wanamaker, in 1920, Mr. Wanamaker had not acted in contemplation of death. The total amount of this gift had been fixed at $41,764,241.04, but later a readjustment was made, fixing the fair market value on Dec. 12, 1922, the date of Mr. Wanamaker's death, at $36,790,376.17.

—The Preparatory Disarmament Commission held its opening meeting at Geneva.

April 16—In his message to Congress, President Hoover's specific recommendations were:

Agricultural relief through a farm board which will assist co-operative associations and will have Government funds to be used for this purpose.

Tariff readjustment to aid such industries as have fallen behind in the race for prosperity, with a possible change of the present system of valuation of imported goods.

Repeal of the national origins provision of the Immigration Law, now set to go into operation July 1.

Emergency legislation for the census of 1930, which will carry action on the law for reapportionment of the House.

—The Senate confirmed the nomination of ex-Vice-President Charles G. Dawes to be Ambassador to Great Britain.

—U. S. Secretary of State Stimson in letter to Matthew Woll, Vice-President Amer. Fed. of Labor, said: "No change is under contemplation in the policy of this government with regard to the recognition of the present regime in Russia.

—President Portes Gil, in a statement addressed to Federal and State officials, labor leaders, educators and others throughout the republic calls on them to aid in an educational drive to create an effective sentiment in Mexico against alcoholic drinks.

—At Washington, without discussion and with one dissenting vote, the congress of the Daughters of the American Revolution sustained the ruling of the national board expelling Mrs. Helen Tufts Baille of Cambridge, Mass., for having criticized publicly the circulation among the Daughters of

so-called blacklists of prominent men and women.
—The Indian States Committee, headed by Sir Harcourt Butler, recommends that no federation be established between the native States and British India without the Prince's consent. The committee adds that any such federation is far in the future and that talk of democratic government by the Indian Legislature is premature.

"BABE" RUTH WEDS.

April 17—George Herman (Babe) Ruth, widower, baseball player, married Mrs. Claire Hodgson, widow, at 5.55 a.m., at the R. C. Church of St. Gregory, W. 90th St., N. Y. City.
—Angelo Paino, Brooklyn sewer contractor, was found guilty of having aided and abetted an attempt to bribe Borough President Harvey of Queens with a $10,000 note by a jury in the Queens County Court. He was sentenced to 4 to 8 yrs. in prison.
—12 were killed, including the engineer, when a fast passenger train from Paris for Cologne hit a freight near Hal, Belgium.
April 18—At Detroit, Mich., the three-story brick house on West Forest Avenue, in which Colonel Charles A. Lindbergh was born, has been bought by the Swedish Engineering Society and will be preserved as a memorial to the aviator.
—At N. Y. City, Helen Morgan, actress and night club entertainer, was acquitted by a jury before Federal Judge Edwin S. Thomas of a charge of maintaining a common nuisance under the national prohibition act at Helen Morgan's Summer Home. Seven employees at the place were fined.
—Masked men smashed the Union headquarters of the textile mill strikers at Gastonia, N. C.
—A Boston jury has again upheld the "obscene book" law, under which many recent novels have been barred, Donald S. Friede, a New York publisher, being found guilty of violating that statute in the sale two years ago of Theodore Dreiser's "An American Tragedy."
At N. Y. City, on April 19, the Court of Special Sessions overruled a magistrate in declaring Miss R. Hall's novel "The Well of Loneliness" not obscene.
April 19—At Philadelphia, David Steinhardt, attorney, of New York, and ousted trustee and receiver in bankruptcy, ended his life in his hotel room a few moments before the arrival of two U. S. Attorneys from N. Y.
—Sudden death at Paris of Lord Revelstoke (John Baring), a director of the Bank of England, halted the German Reparations Conference.
—A gun explosion (155-millimeter) in army target practice at Ft. Kamehameha, Oahu Island, killed 4 enlisted men and blew the arm off another.
—The British General Electric Co., Ltd., announced abandonment of the plan to exclude American stockholders from the new issue of shares.
—At Coronado, Calif., a mid-air collision of planes killed 4 naval fliers—Lieut. W. K. Patterson, Ensigns H. Bassett, Jr., and H. R. Sheehan, and radio operator H. H. Brown.
—The new 30,000-ton steamship Statendam reached N. Y. City on her first trip from Europe.
April 20—Opening Italy's new Parliament, Victor Emmanuel III declared that, inasmuch as successive disarmament conferences have hitherto proved abortive, it is henceforth the duty of the State to "take measures for defense, to render the mother country powerful and therefore respected." Power and respect, the King hastened to add, do not exclude a sincere foreign policy of peace, but rather favor it.
April 21—Daylight saving time began in Great Britain at 2 a. m. It ends on the first Saturday in October.

EXPORT DEBENTURE PLAN KILLED.

—Backed by written opinions by the Secretary of the Treasury, Commerce, and Agriculture, President Hoover has told C. L. McNary, Chairman of the Senate Committee on Agriculture, that the export debenture plan for farm relief is costly, uneconomical, and unworkable. On April 25 the House, 367 to 34, passed the administration's farm relief bill (no debenture), which provides for the creation of a Federal Farm Board of six members with a revolving fund of $500,000,000 for loans to agricultural organizations, for stabilization of corporations to act as farm marketing agencies.
On May 8 the Senate, 47 to 44, refused to strike the debenture clause out of the bill, and, on May 14, passed the measure including the export debenture clause, 53 to 33. The bill then went to conference, the debenture feature was cut out and the amended measure passed the House (no roll call) on June 7.
The Senate, on June 11, rejected, 46 to 43, the conference report which eliminated debentures, and was rebuked by President Hoover in a public statement accusing that body of blocking farm relief. The House, on June 13, rejected again the export debenture clause by 250 to 113. The Senate, on June 14, passed the conference bill without the debenture clause, 73 to 8, and President Hoover signed the measure on June 15.
—An army pursuit collided in mid-air, at San Diego, Calif., with a cabin passenger plane; 6 were killed, including Lieut. Howard Keefer.
—Rome celebrated its 2,682d birthday and the whole of Italy celebrated Labor Day, formerly observed on May 1. The transfer to April 21 was made by Premier Mussolini soon after he took office. The ceremony was marked by the entry into the Fascist militia of almost 100,000 young Avanguardisti, a kind of apprentice Fascist. They ranged in age from 12 to 16 years.
—The 70-ft. statue of Columbus, by Mrs. Gertrude Vanderbilt Whitney, was dedicated, at Palos, Spain.
—In Greece, elections for a reorganized Senate resulted in a victory for Premier Venizelos. Among the 92 elected Senators there were 72 belonging to his party. The election of 20 Royalists, mainly at Athens and Piraeus, indicates progress in the Royalist strength as compared with the last elections for the Chamber, when the Royalist block obtained only 10 per cent of the total votes.

HOOVER ON OBEDIENCE TO LAW.

April 22—With clinched fist, President Hoover told the Associated Press, at N. Y. City, that enforcement of and obedience to the laws is now the dominant national issue and problem. Prohibition, he asserted, is responsible for only 8 per cent of the major crimes. All crime, he said, had increased in the United States, from murder to forgery, to the point where life and property in this country were relatively more unsafe than in any other civilized country in the world. He added:
"A surprising number of our people, otherwise of responsibility in the community, have drifted into the extraordinary notion that laws are made for those who choose to obey them. And in addition, our law-enforcement machinery is suffering from many infirmities arising out of its technicalities, its circumstances, its involved procedures, and too often, I regret, from inefficient and delinquent officials."
—At Geneva, Ambassador Hugh S. Gibson presented before the Preparatory Disarmament Commission an American offer for settlement of naval controversies by applying the idea of "equivalent" tonnage.
—Frank H. Warder resigned and was succeeded by Joseph A. Broderick as N. Y. State Supt. of Banks.

CERTAIN NEWSPAPER DEALS.

April 29—At Boston, Archibald R. Graustein of New York, president of the International Paper and Power Co., appeared before the Rules committee of the Massachusetts Legislature and explained the company's purchase of a half interest in The Boston Herald and Traveler and the paper company's relations to power and gas interests in Massachusetts. Asserting that he had nothing to say as to the policies of The Herald-Traveler, the witness declared it would be bad business and "idiotic" for the International Paper and Power Co., which controls the New England power system, to attempt to use The Herald-Traveler to influence public opinion or to elect Legislatures favorable to the company's power interests. He listed his company's interest in newspapers as follows:

Brooklyn Daily Eagle—$1,954,000 in notes and 400 shares of common stock of the Brooklyn Daily Eagle Corporation.

Albany (N. Y.) Knickerbocker Press and Evening News—$450,000 in preferred and 3,000 shares of common stock.

Ithaca (N. Y.) Journal News—A contingent interest of $300,000 in notes.

Boston Herald and Boston Traveler—10,248 shares of common stock at $525 per share.

Chicago Journal—$1,000,000 of debentures and $600,000 of preferred stock of the Bryan-Thomason Newspapers, Inc., and 10,000 shares of the common stock of this paper.

Chicago Daily News—$250,000 worth of preferred stock and 5,000 shares of common stock.

Augusta (Ga.) Chronicle, Columbia (S. C.) Record and Spartansburg (S. C.) Herald-Journal-published by William Lavarre and Harold Hall—$855,000 in notes secured by the stock of these newspapers.

On May 4, Frank E. Gannett announced in an editorial in "The Brooklyn Daily Eagle" that he had delivered to the International Paper and Power Company a check for "better than $2,700,000" to retire all of the International's investment in "The Eagle," "The Knickerbocker Press," of Albany; "The Albany News" and "The Ithaca Journals News," which are among the seventeen newspapers controlled by him.

—Fausto Topete, Ricardo Topete, Eduardo Garcia, and Ramon Iturbe, Mexican rebel commanders, fled across the border into Nogales, Ariz. Nogales, Sonora was abandoned to Mex. federal troops. Agua Prieta surrendered on May 1.

23—Henry Ford attended at N. Y. City a public ner of 2,000 Jews to David A. Brown, a philan- pist, and issued a statement which was broad- saying:

n happy to come here to pay a tribute of tion to my good friend, and through him, Great race which is proud and fortunate to m among its own. He is a shining exam- great benevolence of the Jewish people, anthropy, their eagerness to make this er, to educate the untutored, to heal the re for the orphans; their intent and intel- ticipation in all that makes for civic s and social justice stamps them a

—At the church [illegible] oils, women were granted equal with men in a resolution adopted by the General Synod of the Reformed Church of North America. The resolution grants women the right to hold office in the church.

—The American author, Michael Strange, pen name of Mrs. Blanche Blythe, former wife of John Barrymore, the actor, was married at Kensington Register Office, England, to Harrison Tweed, N. Y. lawyer.

—At Paintsville, Ky., Carl Mahan, 6½ yrs., was convicted of shooting to death an 8-yr.-old playmate, and was sentenced to the State Reform School until he is 21. Later, the case was reconsidered, the boy was adjudged simply a delinquent, and on July 9 he was paroled to the custody of his parents subject to the supervision of probation officers.

—For "obstructing trade and commerce" a Soviet firing squad, at Moscow, ended the lives of M. von Meck, former chairman and largest shareholder of the privately-owned Moscow-Kazan Railway; Velichko, former head of the transport department of the imperial staff during the World War, and Palchinsky, former Assistant Minister of Trade and Industry under Premier Kerensky and recently professor at the Leningrad Mining Institute. The first two were recently high officials of the Soviet Commissariat of Communications. Professor Palchinsky commanded the troops defending the Winter Palace in October, 1917.

—At Rochester, N. Y., Glenn Jennings, Coast Guardsman, accused of fatally shooting Jacob Hanson, was acquitted by a Federal jury of the charge of manslaughter, second degree, at his second trial.

—Ex-King Amanullah, wife, brother Inayatullah, and other members of his former court, fled from Afghanistan into British India, at Chaman. They went by special train to Bombay.

May 24—The General Assemblies of the Church of Scotland and of the United Free Church met at Edinburgh, and voted to unite as a national body to be known as the Church of Scotland, officially effective next October.

—Ground was broken at Canal and West Sts., N. Y. City, for the West Side Elevated Express Highway.

—At Kansas City, Maurice Nagle, whose automobile five robbers used in June during the National Republican Convention in the hold-up of the Home Bank and Trust Company, was found guilty of murder and sentenced to life imprisonment.

—Miss Marion Talley, retired opera singer, has bought, she announces, near Colby, Kan., a farm "one mile square, and knee deep in wheat."

—Storms killed 120 on the Island of Leyte, Philippines.

May 25—The strike of the rayon (artificial silk) mills at Elizabethton, Tenn., was settled by an agent of the U. S. Dept. of Labor.

MACK SELLS BUFFALO TIMES.

—The Buffalo, N. Y., Times, including the Sunday issue, was sold to the Scripps-Howard newspaper organization by Norman E. Mack, founder of the paper fifty years ago.

—The first air mail from Peru (Lima, May 18) was delivered at N. Y. City.

—12,000 London "bobbies" marched past Buckingham Palace to mark the hundredth anniversary of the creation of the Metropolitan Police by Sir Robert Peel in 1829.

May 26—The election of an entirely new Chamber of Deputies and nearly half the membership of the Senate occupied attention in Belgium.

—Mrs. Mabel W. Willebrandt resigned as Ass't U.S. Att'y. Gen., in charge of prohibition prosecutions. She is to be counsel for an aviation concern.

—Borne with imperial pomp on the shoulders of 32 trained men, the body of Dr. Sun Yat-sen, father of the Chinese revolution and responsible for the overthrow of the Manchu dynasty, was carried through Peking and started the long train journey to the new capital at Nanking, to be permanently entombed in a $3,000,000 mausoleum on Purple Mountain.

—The Alaska Steamship Company's liner Aleutian (formerly the Panama, and the Havana), struck a rock in Yuak Bay on the coast of Kodiak Island, Alaska, and sank in deep water. Her crew of 135 and 15 passengers were taken off by the coast geodetic survey steamship Surveyor and carried to Seward.

—The German dye trust has absorbed, in advance, most of the new issue of stock of the German Ford (auto) Company.

—In a battle in the Tripolitan Desert, 430 rebels, under Mohammed Hassen, and 24 Italian troopers, were killed and several hundred were wounded.

LINDBERGH-MORROW WEDDING.

May 27—At Englewood, N. J., Col. Charles A. Lindbergh and Miss Anne Spencer Morrow, second

daughter of Dwight W. Morrow, American Ambassador to Mexico, were married at 4 p.m. in the drawing room of the Morrow home. Their honeymoon was spent on the groom's new motorboat, on Long Island Sound, and the Maine coast.

—May wheat fell on the Chicago Board of Trade—fell under $1 a bushel for the first time in 14 years. It touched 98 5/8 c. All grains, cotton, and many stocks, slumped. High money rates, bumper 1929 crop prospects, and heavy surplusages, still unsold, of the 1928 crops, are to blame.

—The U. S. Supreme Court, 6 to 3, barred Rosika Schwimmer, Hungarian pacifist lecturer, from American citizenship because of a declaration on her part that she would not bear arms in the defense of this country in event of war.

—The same Court, in another decision, unanimously affirmed the judgment of the Court of Claims in which the right of the President to block legislation by the "pocket veto" method is upheld.

—The Mexican Chamber of Deputies, meeting in extraordinary session, voted unanimously to expel fifty-two members of the bloc, accused of lending direct or indirect support to the recent rebellion.

—Chinese police raided the Soviet Consulates at Harbin, and at several other places in Manchuria.

May 28—President Hoover, addressing his National Enforcement Commission, at its first meeting, at the White House, George W. Wickersham, Chairman, said:

"The American people are deeply concerned over the alarming disobedience of law, the abuses in law enforcement and the growth of organized crime, which has spread in every field of evil-doing and in every part of our country.

"A nation does not fall from its growth of wealth and power, but no nation can for long survive the failure of its citizens to respect and obey the laws which they themselves make. Nor can it survive a decadence of the moral and spiritual concepts that are the basis of respect for law nor neglect to organize itself to defeat crime and the corruption that flows from it. Nor is this a problem confined to the enforcement and obedience of one law or the laws of the Federal or State Governments separately. The problem is partly the attitude toward all law."

HOUSE PASSES TARIFF BILL.

—The U. S. House, 264 to 147, passed the Hawley Tariff Bill. The proposal to remove the flexible provision, which would enable the President to raise or lower the rates, in favor of a fact finding commission responsible to Congress and which would register the difference of cost of production at home and abroad, was defeated 254 to 157.

—The American singer, Rosa Ponselle, made her London début at the Royal Opera in Covent Garden in "Norma."

—At Moscow, the Congress of Soviets closed after approving a five-year plan for economic development. A central executive committee of 586 members, including 132 women, was elected. Among those named to it were Kalinin, Rykoff, Stalin, Molotoff, Tchicherin, Litvinoff, Vorossiloff, Nikoyan, Dukharinx and Tomsky. Maxim Gorsky was elected by special decision of the delegates, although not a delegate to the Congress

A.I.Rykoff was reelected president of the All-Union Central Committee.

—Forest fires killed 40 children in a school at Esutori, Southern Saghalien, and destroyed 1,000 houses.

—At Edinburgh, the 600th anniversary of the granting of the city's charter by King Robert the Bruce was celebrated in the presence of the Duke and Duchess of York. After a service in St. Giles's Cathedral the procession went to the castle where the Duke unveiled statues of William Wallace and Bruce.

REAPPORTIONMENT BILL ADOPTED.

May 29—The U. S. Senate passed the census and reapportionment bill by 57 to 26. It carries $40,000,000 to be used in taking the 1930 census, which, in turn, will be the basis for reapportioning Congress. It is estimated that 23 House seats will be transferred from one group of States to another, as a result, but the total number of House seats will remain at 435. The bill gives the President power to declare a reapportionment of Congress after each decennial census if Congress fails to act. This new grant of authority resulted from the failure of Congress to reapportion since 1911. The House passed the bill, as amended in conference, on June 6, by 271 to 104. The president signed it June 18.

—At Alamo, Tenn., a mob of 100 entered the Crockett County Jail, removed Joe Boxley, 19, Negro accused of attacking the wife of a Justice of the Peace, and hanged him on a tree.

—The Governor of Wisconsin signed a bill repealing the State Prohibition Enforcement Act.

—Afghan rebels captured and tortured to death Guhlam Djelani Bey, Afghan Ambassador to Turkey.

—Boston, Harry J. Canter was sentenced to serve a year in jail for criminally defaming former Gov. Alvan T. Fuller, by carrying a placard bearing the words, "Fuller, murderer of Sacco and Vanzetti," during a demonstration in front of the State House.

May 30—President Hoover, speaking at the National Cemetery (Arlington, Va.), at Memorial Day exercises, said: "Despite the declarations of the Kellogg pact, every important country has since the signing of that agreement been engaged in strengthening its naval arm. We are still borne on the tide of competitive building."

—At N. Y. City, 15 veterans of the Union army who fought during the Civil War, held their final Memorial Day services at Grant's Tomb on Riverside Drive, during which they turned over to Lafayette Camp, Sons of Union Veterans, the task of carrying on further memorial services there. They represented Grand Post 327 of the G. A. R., which has held annual services at the tomb for forty-five years.

—King George, at Windsor, went back to bed with a cold and fever, and an abscess in his chest.

—Parliamentary elections in Great Britain resulted in such heavy gains by the Labor Party and such heavy losses by the Conservatives, that neither can control the House, and the Liberals under Lloyd George hold the balance of power. The result was —Labor, 289; Conservatives, 260; Liberals, 58; Nationalists, 3; Independents, 4; Prohibitionists, 1; total—615.

—Juan Bautista Perez was elected President of the Venezuelan Republic by the Congress for a period of seven years. Gen. Juan Vincente Gomez, former President, who was re-elected last month, but declined to accept, was unanimously chosen commander in chief of the army by Congress.

May 31—At Atlantic City, Vice-President Charles Curtis dedicated the new $15,000,000 municipal auditorium tonight at a festival of light in celebration not only of its opening but of the golden anniversary of the incandescent light by Thomas A. Edison and the diamond anniversary of the founding of Atlantic City. The lights of the Boardwalk were dimmed at the beginning of the three-day celebration, while searchlights blazed from the battleship Wyoming off shore and an army airplane overhead.

—Ferdinand Preuss, gas-shocked World War vet., at Chicago, got drunk and killed 2 policemen and a neighbor summoned by his wife. The next day he lay down on the rails and let a train cut off his head.

—At London, delegates of eighteen maritime nations who have been attending the conference on the safety of life at sea signed a convention which goes further than any yet devised in guarding the lives and property of those who travel on the ocean highways.

JUNE.

June 1—The Associated Press extended its news service to Brazil and Guatemala.

—The fraudulent trade in stamps, which has cost the U. S. Government about $4,500,000, was traced by Postal Inspectors to philatelists who had succumbed to temptation.

—Franklin Chase Hoyt, presiding justice of the N. Y. City Children's Court, was announced as the winner of the $25,000 prize contest for the best temperance plan, sponsored by the Hearst newspapers. The plan suggested a repeal of the Volstead act, by a new Congressional definition of intoxicating liquors, which would make possible light wines and beers under State control.

—At N. Y. City, aldehol, a government denaturant, contributed to the death of Richard Morris, 55. Dr. Alexander O. Gettler, city toxicologist declared. He also asserted aldehol had figured in other deaths, but that this was the first case where the poison was present in the victim's system in sufficient amounts to be identified. Raw alcohol was also found in Richard's stomach.

June 2—There was issued "a message to the American people" signed by Thomas A. Edison, Henry Ford, Captain Robert Dollar, J. C. Penney and twenty other prominent business men, recommending that "prohibition should be given an honest trial."

June 3—The U. S. Supreme Court upheld the contempt of court jury-shadowing sentences — 6 months for H. F. Sinclair, 4 months for H. M. Day, and $1,000 fine for W. S. Burns. The 15-day sentence for W. J. Burns was overturned.

—Admiral Paul Kondouriotis was re-elected President of Greece by the Senate and Chamber, receiving 259 votes out of a total of 309.

—The right of negroes of the "Ancient Egyptian Arabic Order of Nobles of the Mystic Shrine" to use the similar name and the titles, emblems and regalia of the white Shriners was upheld by the U. S. Supreme Court.

LABOR TAKES OFFICE IN ENGLAND.

June 4—At London, King George accepted the resignation of Stanley Baldwin as Prime Minister of Great Britain and summoned J. Ramsay MacDonald, leader of the Labor party, to form the second Labor Ministry in British history. MacDonald took office on June 6 at 10 Downing St., and announced his cabinet on June 7.

—The King of Albania decreed that all Moslem Albanians must discard the practice of taking the name of the town or village in which they reside and must adopt names in the general European fashion. He set an example by dropping the name of his native town of Mati and adopting the name Zog, without the letter "u," which in Albanian means bird.

—The $17,000,000 Bronx Terminal market, begun in 1922, at 152nd St. and the Harlem River, was opened, by Mayor Walker.

—Prince Henry, Duke of Gloucester, fell in a polo game at Vancouver, B. C., and broke his collar bone.

—At Harrison, N. J., the Rev. Paul Miezvinis, former acting pastor of the Lithuanian R. C. Church of Our Lady of Sorrows, shot Miss Helen Halitaies, 22, and then killed himself.

—Reports from Afghanistan said that General Abdul Qalyum, a follower of Habibullah Khan (Bacha Sakao), had occupied Kandahar at the head of regular troops without opposition or bloodshed.

June 5—Sir Esme Howard, the British Ambassador, at Washington, informed members of his diplomatic staff that from now on he would refuse to sign requests for shipments of alcoholic liquors.

TRIGO, 33 TO 1, WINS DERBY.

—The 3-yr. old horse, Trigo (a 33 to 1 shot), owned by William Barnett, of Ireland, and ridden by Jos. Marshall, won the English Derby race, at Epsom Downs. He carried 126 lbs., and won $57,000, before 250,000 persons. Distance, 1½ miles: time, 2.36⅗. Over $3,000,000 was won in the Calcutta and other sweepstake pools.

—Fire destroyed the Thalia Theatre, on the Bowery, N. Y. City. It was opened in 1826 as the Bull's Head, then became the American, the Bowery, finally the Thalia. It was burned in 1828, 1836, 1838, 1845, and 1923.

—The lava stream from the crater of Vesuvius, on the island of Sicily, after swallowing the communities of Pagano and Avani, was engulfing the village of Terzigno.

June 6—Berne, Switzerland, the first chamber of the Council of State ratified the Kellogg Pact unanimously, the second chamber having ratified it with two opposing votes.

June 7—At 11 a.m., Premier Mussolini, as Italian Foreign Minister representing King Victor Emmanuel—the first Italian Premier ever to cross the threshold of the Vatican—exchanged with Cardinal Gasparri, Papal Secretary of State, representing Pope Pius XI, ratifications of the treaties signed at the Lateran Palace on Feb. 11. By that act the sovereign independent State of Vatican City came into existence.

—At 6 p.m., at Paris, the document in which the delegates to the Paris reparations parleys recommended to Germany and her creditors how the Reich's obligations arising from the World War shall be liquidated, was signed by them in the Hotel George V. Eleven Parliaments must approve these recommendations. The settlement suggested by Owen D. Young and approved by the business leaders of Germany, England, France, Belgium, Italy and Japan, serving on the Committee of Experts, provides for the wiping out of Germany's total indebtedness to the Allies and the United States by 1989. J. P. Morgan, one of the Americans, left beforehand and arrived at N. Y. City, on the day of the signing. Owen D. Young, T. W. Lamont, and T. N. Perkins reached N. Y. City on June 14. They had declined an official reception.

—At Belgrade, ex-Deputy Punica Ratchitch was found guilty of killing Stefan and Paul Raditch and Dr. George Basaritchek and of wounding Drs. Ivan Pernar and Djuro Grandia in the Yugoslavian Parliament last year. He received a sentence totaling sixty years and six months, but Serbian law permits no punishment to exceed twenty years in prison.

—At Gastonia, N. C., L. Q. Aderholt, chief of police, was fatally shot in a fight with guards about a tent colony maintained by the National Textile Workers Union for strikers from the Loray Cotton Mill; 59 strikers were arrested.

REPUBLICAN CELEBRATION AT RIPON.

June 8—At Ripon, Wis., Secretary of War J. W Good, speaking at the 75th anniversary of the founding of the Republican Party, said that he had looked into the origin of his party and decided that "events, not men, called it into being" and that when fifty-eight men were called together in Ripon on March 20, 1854, by Alvan Earle Bovary to unite the scattered anti-slavery elements among Whigs, Free Soilers and Northern Democrats in one party, "similar gatherings were being held at the time throughout the country." Prohibition agents dried up the town for the occasion, and later raided a drug store at Madison, Wis., where they said that besides finding illicit liquor in the establishment they confiscated a long list of names, including those of legislators, State officials and prominent Madison residents said to have been favored liquor purchasers.

—The Sunrise Highway, a 26-mile concrete boulevard running from Liberty Ave., Brooklyn, to Amityville, on the Nassau-Suffolk line, was formally opened by Lieut. Gov. H. H. Lehman, Borough President James J. Byrne of Brooklyn, and officials and citizens of Brooklyn, Queens and Long Island municipalities.

—At Wilmington, N. C., Col. John A. Hambleton, vice-president of Pan-American Airways and flying companion of Col. C. A. Lindbergh when the company's new route to Panama was opened in February, was instantly killed when a monoplane crashed. J. Von der Hayden, the pilot, of the Consolidated Instrument Co. of N. Y., and Mrs. Von der Hayden, the other occupants of the plane, were killed.

—Henry Virkula, Big Falls, Minn., merchant, was shot and killed while driving home in an automobile with his wife and two children when he failed to stop at the command of border patrolmen assigned to liquor smuggling duty.
The next day, near Detroit, U. S. Customs Border Patrol Inspector, James Cox, shot Archie Eugster, 21, who it was alleged, had brought cases of liquor across the river from Canada. Over 200 prohibition agents were then concentrated in the Detroit region.

June 9—The Swedish seaplane Sverige was forced down at Skaptaros, an inlet on the south coast of Iceland, 130 miles east of here, by engine trouble at 11.23 p. m. Sunday, Greenwich mean time (7.23 p. m. New York daylight time). It had left Stockholm at 5.01 a. m. with mail and freight, bound for N. Y. City, and had stopped by Bergen, Norway. In charge was Capt. Albin Ahrenberg, with Lieut. Axel Floden, and wireless operator Robert Loungland. They flew on June 10 to Reykjavik, Iceland, and on July 11 they reached Ivigut, Greenland.

—Margaret Lawrence, Broadway actress since 1911, was shot and killed in her penthouse apartment on E. 51st St., N. Y. City, by Louis Bennison, actor and playwright, who then committed suicide. She was the widow of Wallace Eddinger, actor, and had several children. Bennison had a wife and child.

—At Willemstad, Curacao, Dutch West Indies, Venezuelan employees of the oil refineries, revolutionaries, assaulted Fort Amsterdam, kidnaped Dr. N. J. L. Brantjes, Governor of the colony, took possession by force of the American steamship Maracaibo which lay in the harbor, and forced her captain to land them on the north coast of Venezuela. Governor Brantjes returned in the ship unharmed, as did the commander of the local garrison, who also was kidnaped. Several policemen were killed and many persons were wounded in the fighting when the oil refinery employees raided the fort.
The rebels attacked Coro, Venezuela, but were repulsed.

June 10—At Washington, 600 prominent Democrats gathered at a testimonial dinner to Jouett Shouse, whom John J. Raskob has placed in charge of the newly opened Democratic National headquarters. Features of the speeches were an announcement by Mr. Raskob that he has no intention of resigning the Democratic National Chairmanship and an appeal by him for more intensive and efficient party organization.

—The Pope promulgated the "fundamental law" of the new Vatican State in 21 articles. The first of these gives the Pontiff full legislative, executive and judiciary powers. In case the Papacy should be vacant these powers go to the College of Cardinals, which can take legislative measures only in case of extreme urgency, however. The succeeding articles give the Pontiff full powers concerning the organization of ecclesiastical tribunals, the composition of the Papal Court, the representatives abroad and approval of the budgets and accounts

presented by the Governor of Vatican City. Executive powers merely are delegated to the Governor, who is responsible directly to the Pontiff.

FARM RELIEF BILL SIGNED.

June 11—The U. S. Senate, 46 to 43, rejected the non-debenture conference report on the Agricultural Marketing Bill. President Hoover in a public statement accused that body of delaying and endangering farm relief. The Senate, on June 14, passed the bill, 73 to 8, after the House had killed the debenture plan by 250 to 113. President Hoover signed the Act on June 15. Congress, on June 17, granted $151,000,000 of the authorized revolving fund of $500,000,000. The new Farm Relief Board, headed by Alexander Legge of Chicago, held its first meeting on July 15, at Washington.

—At Chicago, The Standard Oil Company of Indiana and fifty-one associated companies were found guilty of violating the Sherman anti-trust act by pooling "oil cracking" processes, in a decision rendered in the U. S. Dist. Court. Three federal judges sat in the lawsuit and the majority opinion was signed by Evan A. Evans and George T. Page; A. D. Anderson dissented. The decision grants the government a permanent injunction restraining the defendant companies from further violations of the law, and comes after more than four years of litigation.

June 12—At Washington, Robert E. Healy, chief counsel for the Federal Trade Commission, put in the record documents further supporting testimony that the National Electric Light Association has had many educators on its payroll. The names of eighteen college and university professors who received money from this organization were given out by him. Exhibits filed show that those named received about $46,000, and of this sum $32,959 were for services and the remainder expenses.

—W. B. Kinne, Idaho's Lieutenant Governor, abducted by four automobile bandits and left tied to a tree in the mountains after his car had been wrecked in a wild dash about the countryside, returned home to Orofino, uninjured.

—Parliamentary elections in the Union of South Africa give the Nationalist party, led by Premier J. B. Hertzog, a slight majority over all other parties.

—In the Atlas Mountains of Morocco a reconnoitering detachment of French colonial troops was nearly wiped out by Moorish tribesmen who have never submitted to French rule; 13 of the French troops were killed and ten wounded, including two officers. 83 members of the detachment are reported missing. The captives are being led from tribe to tribe in the fastnesses of the Middle Atlas range to work up warlike spirit among the natives.

—At the convention, at Moscow, of the Society of the Godless, it was asserted that 1,000,000 organized atheists were facing 1,500,000 organized religious propagandists in the fight on religion, including 500,000 rabbis and mullahs officiating in thousands of temples throughout the Soviet Union and that these propagandists had successfully copied the Communist methods of organization in their work among women and children.

—Mrs. Hoover had as a guest at tea in the White House, Mrs. Oscar De Priest, wife of the Negro Representative from Chicago. The other guests at the small party were Mrs. William D. Mitchell, wife of the Attorney General; Mrs. James W. Good, wife of the Secretary of War; Mrs. Arthur W. Free, wife of the California Representative; Mrs. Clyde Kelly, wife of the Pennsylvania Representative, and Mrs. Grace Burton, niece of the Ohio Senator, and about twenty others.

Protesting resolutions were adopted by the legislatures of Texas and Fla.

June 13—The U. S. Senate, 48 to 37, passed the 1930 Census and Congressional Reapportionment Bill.

FLIGHT OF THE YELLOW BIRD.

—The French monoplane, Yellow Bird (Armond Lotti, Jr., in charge, with pilots Jean Assolant and Rene Lefevre), left Old Orchard Beach, Me., at 10.08 a. m., bound for Paris. Several days before, Assolant had married Pauline Parker, of Winthrop, Me., show girl.

Although the French plane got away successfully, the attempt of the American plane, Green Flash, to start its flight to Rome had met with disaster. The Green Flash after a fine start struck a sand pocket on the Maine beach and both wheels were broken.

The Yellow Bird, owing to head winds (and the extra weight of a stowaway, Arthur Schreiber, 22, of Portland, Me.), landed at 4.30 p. m., on June 14, on the beach at Comillas, on the north coast of Spain. It flew from there to Paris on June 16.

—Wired to a post by loops around the neck, knees and feet, then consumed by fire, the body of a man was discovered in the woods near Three Lakes, Wis. Death was caused by shots from a sawed-off shotgun. The weapon was lying at the feet of the victim.

—The principal rebel chieftains who have been under arms against the Italian troops in Cyrenaica for many months surrendered unconditionally at Barka to Lieutenant Governor Siciliani.

June 14—Former Vice-President Charles G. Dawes, new American Ambassador to Great Britain, arrived at London, and was cheered by crowds. On June 15, he presented his credentials to King George and conferred with him and with the British Foreign Secretary, Arthur Henderson. On June 16, he conferred, at Forres, Scotland, with Ramsay MacDonald, the new Premier. They appealed for naval reduction on June 18 in simultaneous speeches, Dawes at a Pilgrims' dinner, London; MacDonald at a town meeting, in Scotland.

—The slashed body of a young woman, found on the N. Y. Central Rifle Range, five miles northwest of Columbus, O., was identified as that of Miss Thora K. Hix, 25, second-year medical student at Ohio State University, of Bradenton, Fla. On Aug. 14, Dr. James Snook, married, was convicted of the murder. He was sentenced to be electrocuted on Nov. 29.

—Arthur Gordon, 22, of Plattsburgh, N. Y., alleged rum and beer smuggler, was killed by U. S. Customs guards below the Canadian border, near Mooers, N. Y. Mickey Dilion, 22, was shot to death at Newport, Ark.; and Grady Phillips, 22, was killed near Buchanan, Ga. On June 17, the U. S. Prohibition Bureau at Washington, announced it would limit its agents to service pistols and would bar guns and rifles.

June 15—The Soviet Russia Supreme Council of National Economy has decreed a year of 360 work days, with 5 holidays.

—Ray Keech, auto racer, was killed in a collision on the speedway at Altoona, Pa.

June 16—Herbert Eden, 55, manager of the New Orleans Industrial Canal, shot and killed Mrs. Joseph Meyer, 24, and then fatally wounded himself.

—General Bramwell Booth, 73, son of the founder of the Salvation Army and until quite recently its leader, died at his home at Hadley Wood, near London, after a sudden relapse.

—Ferdinand Schulz, German glider, was killed when his sailplane Marienberg crashed over the market place of Stuhm, in West Prussia.

—The Rev. Norman Thomas was nominated, at N. Y. City, as the Socialist candidate for Mayor.

—Ernest Blythe, Vice-President of the Irish Free State, and four other ministers of the Free State government, in addition to judges, army and police officials and prominent public men took part in the funeral procession for John Devoy from Dublin City Hall to Glasnevin Cemetery. Burial was in the Fenian plot beside those of other Fenian leaders. Standing beside the grave were the widows of Thomas Clarke, who was executed by the British in 1916, and Arthur Griffiths.

GOLDEN JUBILEE OF LIGHT.

—As part of the Golden Jubilee of Light celebration at Niagara Falls, the sound of the falls was broadcast by radio, also a pontifical high mass in memory of Father Louis Hennepin, who accompanied the explorer La Salle, and gave the earliest detailed description of Niagara Falls. The scene was set on Goat Island, which splits the Niagara River into the Canadian and the American falls.

June 17—Seven persons, one of them an American, were drowned and six were rescued by ships when the City of Ottawa, an Imperial Airways plane en route from London to Paris, encountered engine trouble and plunged into the English Channel three miles southeast of Dungeness, at noon. The American was Adolph Meister, 73, banker and manufacturer, of Garfield, N. J. H. W. Tatham, of Minneapolis, was rescued.

—An earthquake killed 25 in New Zealand (South Island).

—At Geneva, charges that Austria is secretly arming in defiance of the terms of the peace treaty were contained in the final report of the liquidation board in connection with the removal of military control from that country.

—Pius XI, who is one of the leading librarians of Europe, as well as Pope, welcomed at the Vatican brother bibliophiles from many nations who are delegates to the World Congress of Librarians. About 500 book experts gathered in the large hall of the Vatican library where a special throne had been erected for the pontiff.

June 18—President Hoover, in a public statement,

said: "I deeply deplore the killing of any person. The Treasury Department is making every effort to prevent the misuse of arms. Any case of misuse will be determined by the orderly procedure of the department and the courts. I hope that the communities along the border will do their best to help the treasury end the systematic war that is being carried on by international criminals against the laws of the United States. It is these activities that are at the root of all our difficulties."

—A country-wide ring which allegedly dealt in paraphernalia whereby bootleg liquor could be marketed, was disclosed with the indictment in Brooklyn of 140 individuals and corporations located in 35 cities. The ring is accused of selling bogus internal revenue stamps, whisky bottles branded falsely with the names of foreign distilleries, printed corks, whisky cases stamped as having come from foreign ports and other trappings for dressing up ordinary bootleg liquor.

—The Soviet Russia Council of Peoples Commissars decided to retain bread cards and the rationing system for another year.

—The list of bank mergers at N. Y. City has been increased by that of the Chase National, and the National Park.

—Formation of a $450,000,000 power system connecting every important city in N. Y. State from Albany northward and westward announced by J. P. Morgan & Co. The system supplies more than 600,000 persons with electricity. The Niagara Falls plants and other power installations have a capacity of about 1,700,000 horsepower. The system also includes gas plants.

SENATE MAY OPEN ITS DOORS.

—Nominations to office by the President, treaties with foreign nations, and all other business with which the Senate has for years been dealing behind closed doors, will hereafter be considered in open session unless the Senate, in executive session, decide otherwise by a majority vote. This change in the Senate's rules was made when an amendment proposed by Robinson of Ark. was adopted by 59 to 15.

—J. Pierpont Morgan, banker, was given the honorary degree of Doctor of Laws by Princeton.

June 19—The 71st Congress adjourned—the Senate to Aug. 19., the House to Sept. 23. The Senate held its first open executive session under its new rules and confirmed a group of nominations as expeditiously as was customary when the doors were closed. Postponement of the payment of $400,000,000 by France to this country for the purchase of military supplies after the close of the World War was voted by both houses, but in the rush to adjourn the resolution was unsigned.

—At El Paso, Tex., poison gas that swept over a residence district near two oil refineries and a natural gas plant, taking the lives of two sleeping children and overcoming a score of other persons was identified as hydrogen sulphide.

—Woodrow Wilson's birthplace, the personage of the Presbyterian Church at Staunton, Va., has been bought for a national shrine by Mary Baldwin College.

June 20—At N. Y. City, the trial of James M McCunn and his three employees, Frank Collins, Edward Maloney and John H. Spellman, indicted for conspiracy to violate the national prohibition law, ended abruptly in U. S. Dist. Court when Edwin J. Carroll, Juror No. 2, admitted under questioning by the court that McCunn's brother's wife is an aunt of Carroll. Judge Edwin R. Holmes, of Mississippi, who presided, declared a mistrial, discharged the jury and placed the case on the calendar for a rehearing.

DEATH OF FAMOUS WAR PIGEON.

—The War Department was notified of the death, at Fort Monmouth, N. J., of the battle-scarred war pigeon "President Wilson," one of several "hero pigeons" of the army in the World War. The bird was 11 years old. Bred in France of unknown pedigree, this pigeon, on the morning of Nov. 5, 1918, was liberated at Grand Pre, France, with an important message. Twenty-five minutes later, flying through fire and fog, he arrived at Rampont, twenty-five miles away, with one of his legs shattered, his breast pierced by a bullet, but the message entrusted to him was still hanging to the torn leg.

—Near Montreal, the Hon. J. C. Jervis, M. C., 32, elder son of Lord St. Vincent and former aide de camp to the Gov. Gen. of Canada, and two companions were killed when a seaplane crashed in the St. Lawrence River between Point St. Charles and Nun's Island. The other victims were Pilot C. S. Caldwell of the Canadian Vickers and Dr. William D. Morris, 28, of Montreal.

—The U. S. Govt. will permit production of 2,000,000 gallons of medicinal liquor during the next year to replenish stocks depleted by thefts from warehouses, legitimate use and evaporation, Dr. James M. Doran, the Prohibition Commissioner, announced.
—David Cass, 23, was kidnapped, at Detroit, on July 25. J. A. Laman got $4,000 ransom from Cass' father and was shot by police in escaping.

SS. BREMEN SETS NEW RECORD.

July 22—The new North German Lloyd steamship, Bremen, arrived at N. Y. City from Cherbourg, on her maiden trip, covering the distance in 4 days, 17 hours, 42 minutes. This beat the Mauretania's

Sept. 1927 record of 5 days, 2 hours, 34 minutes. The Bremen brought 1,670 passengers. Her last days run was 713 miles. About 20 miles east of Fire Island an airplane was catapulted from the top deck and landed at the 58th St. pier, Bay Ridge, Brooklyn. This mail was delivered in Manhattan before the ship docked. The Bremen left New York City on July 27 at 1 A. M., and arrived off Plymouth, England (Eddystone Lighthouse) in 4 days, 17 hours, 30 minutes.

—At Chautauqua, N. Y., in tribute to the memory of her father, Lewis Miller, co-founder of Chautauqua Institute with Bishop John H. Vincent, Mrs. Mina Miller Edison (Mrs. Thomas A. Edison, wife of the inventor) addressed 1,000 members of the Women's club in opening "Miller Week" in observance of the centennial of the institute.

RIOTS IN DANNEMORA PRISON.

—1,300 of the 1,568 long-term convicts in Clinton State Prison, Dannemora, N. Y., made at 8 A. M. a break for liberty. They wrecked the power house and burned the carpenter shop, the wood kiln, and 75,000 feet of lumber. The felons, who had assembled in the prison yard, were unarmed, but hurled all kinds of missles. The prison walls were held by 124 guards, 35 state troopers and a posse of villagers. Three convicts were killed by gun fire —Charles F. Brunner and Herman Reese, robbers, and Clyde Shackelford, wife strangler. Six other convicts were seriously wounded and two guards were beaten by the mob. The prison is overcrowded, its normal capacity being 1,160. The inmates had been grumbling. The damage to property was $173,000.

July 23—At Santiago, the government signed Chile's adherence to the Kellogg treaty for renunciation of war without reservations.

—The Prince of Wales brewed ale at Burton-on-Trent, England, and quaffed a mug of old ale.

—The bodies of 27 persons of both sexes, including several tourists but no Americans, were discovered in the barrage of an electric power station at Rheinfelden on the Rhine. The victims were drowned while bathing. This brings the total for Switzerland to 48 victims during the week-end, not counting five climbers killed in the Alps.

—At Chicago, celebrating his millionth mile in the air, E. Hamilton Lee, senior pilot of the Air Mail Service, told the story of commercial aviation and lamented the passing of air thrills, to radio listeners tuned in on the National Broadcasting chain. More than 900,000 of Lee's 1,000,000 miles were flown on mail routes.

PACT OF PARIS PROCLAIMED.

July 24—President Hoover, in a ceremony in the East Room of the White House in the presence of former President Coolidge, former Secretary of State Kellogg and the Ambassadors and Ministers of 45 nations, proclaimed the Kellogg-Briand Anti-War Treaty in effect (at 1.22 P. M.) under which 62 leading powers have either pledged themselves or are about to pledge themselves to renounce war as an instrument of national policy.

Later in the day the president issued a supplementary statement from the White House, hailing as a new departure and a new contribution to peace Premier Macdonald's announcement in the House of Commons that Great Britain is suspending certain naval construction. Then Mr. Hoover announced the United States will not lay down the keels for three cruisers which were to have been started this fall, but will suspend construction "until there has been a full opportunity for full consideration of their effect upon the final agreement for parity which we expect to reach."

—The New Jersey State Banking Dept. closed at Passaic, the Hobart Trust Co., and its two branches, the Service Trust Co., and the Merchants Bank. An impairment of $600,000 in capital and surplus was alleged.

RIOT IN AUBURN PRISON.

July 28—At the State Prison at Auburn, N. Y., the convicts, of whom there were 1,756, mostly lifers and long termers (the place being, like Clinton, badly overcrowded) rioted at 1.15 P. M. when let out into the centre yard. Their leaders by a ruse, seized the prison arsenal and distributed riot guns, rifles, pistols and machine guns to their fellows. Under the cover of the smoke of six prison shops, which the convicts fired, they rushed the walls with scaling ladders, but were repelled by guards in the machine-gun towers. They attacked the prison gates with battering rams, but melted away under fire from the guards on the walls. For five hours the battle raged through the fire and smoke of the shop buildings, but in the end the guards, reinforced by state troopers and militiamen, drove the prisoners to cover with machine guns, rifles and tear bombs. The damage to property was $450,000. Two prisoners were killed—Joe Cirrongone (shot by a fellow), and George Wright, robber. Four convicts escaped.

—Roger Q. Williams and Lewis A. Yancey, whose airplane was the seventh after Lindbergh's to fly from America to Europe, reached N. Y. City. They were formally welcomed on July 29.

—At Santiago, Chile, the text of a complementary protocol to the general treaty ending the dispute over the provinces of Tacna and Arica between Chile and Peru was made public. It declared that

no part of the territory covered in the general treaty could be ceded to a third power.

July 29—Over 500,000 workers in 190 cotton mills in 20 towns in the Lancashire district, England, struck against a 12½ per cent wage reduction.

—Massacre by Mahomedans of 20,000 men and boys in Dangar City, Province of Chinghai, was reported by Findley Andrews, American missionary, with details which read like pages torn from the worst chapters of medieval persecution.

—Albert Mikenas, 3, of Ansonia, Conn., vanished at Silver Beach, Milford, Conn. His nude body, with a broken skull, was found in a woods, on Aug. 11. On Oct. 11, two boys, aged seven and nine, inmates of the New Haven County Home, at Allingtown, were arrested and confessed that they had smothered the child for mischief. They had been "farmed out" at the time of the killing.

—At Minneapolis, the endurance monoplane, Miss Minnesota, crashed on Wold-Chamberlin Airport, killing Captain P. J. Crichton, 35, outright and fatally injuring his co-pilot, Owen Haugland, 36. The flyers were in their seventh day in the air. At 5.25 A.M., when the big plane fell, they had passed 154 hours and 45 minutes in the skies.

—George Lea Lambert, 23, vice-president of the Von Hoffman Aircraft Corp., and Harold C. Jones, a student flyer, of New York, were killed when a dual-control training plane crashed in a field near Black Jack, St. Louis County, Mo.

AIRPLANE ENDURANCE RECORD.

July 30—After circling the Lambert-St. Louis Field for more than seventeen and one-half days—420 hours, 21 minutes, 30 seconds, the monoplane St. Louis Robin was landed at 7.38.30 P. M. (9.38.30 New York daylight time) tonight by its pilots, Dale ("Red") Jackson and Forrest O'Brine, amid a rain storm and the cheering of 15,000 persons. In their time in the air the pilots had flown 25,000 miles. Their time betters by 173 hours, 37 minutes, 58 seconds the record set July 12 at Culver City, Calif., By Roland Reinhart and Loren Mendell in the biplane Angeleno. Dale and O'Brine earned $15,672.50 each.

—The merger of up-state power enterprises into the Niagara-Hudson Company is not a violation of any N. Y. law, Attorney General Hamilton Ward advised Governor Roosevelt.

—To "improve" Red Square, at Moscow, Russia, the Soviet Government tore down the tiny shrine or ikon of the Iberian Virgin. It stood, six feet by six, between the two narrow entrances to the Square.

GRAF ZEPPELIN CROSSES ATLANTIC.

July 31—The German dirigible, Graf Zeppelin, with 19 passengers (and a stowaway) and a crew of 40, left Friedrichshafen at 10.29 P. M., bound for Lakehurst, N. J., and N. Y. City. It was 90 miles south of Pico Island, in the Azores group, at 8.05 P. M., on Aug. 2, and reached Lakehurst on Aug. 4, at 7.29 P. M.

—At London, Richard Joshua Reynolds, son of the late founder of the R. J. Reynolds Tobacco Company, of Winston-Salem, N. C., was found guilty of manslaughter and was sentenced to five months in prison. Reynolds was accused of driving the car which struck and fatally injured Arthur Graham, a young mechanic, while he was riding his motorcycle between Slough and London on May 14 last.

—The first air mail from Chile was distributed in New York in the first regular delivery. These letters left Santiago, Chile, July 21. The plane trip took ten days, as compared with four weeks by steamship.

VERDICT ON VESTRIS DISASTER.

—At London, the British Board of Trade inquiry court, after investigation as to the sinking of the liner Vestris, with loss of 112 lives last November, found the ship was overloaded and unfit to meet the perils of the sea when she sailed from Hoboken for South America. The court put the blame on four men, three of them connected with the New York agents for the Lamport & Holt Line, owner of the Vestris, and criticized the late Captain Carey, who perished with his ship. The board said of Captain Carey: "He is not here to justify himself." The court found that the ship was overloaded and that the SOS signal was sent out six hours later than it should have been.

AUGUST.

August 1—At Leavenworth, Kan., 900 inmates in the Federal prison rebelled over food, and discipline, and staged a five-hour riot in which one convict, Michael Martinez, was shot and killed and three were wounded.

—Jesse Harding Pomeroy was removed, by auto, from Massachusetts State Prison at Charlestown to the State Farm for the Criminal Insane, at Bridgewater; 53 years ago Pomeroy, then 17, was sentenced to be hanged for the murder of Horace Milan, ten. Two other youths were said to have been tortured and slain by Pomeroy, whose trials at the time were the sensation of the East. His sentence was commuted to life imprisonment and for 40 years he remained in solitary confinement.

—International Red Day was celebrated "peaceably" with oratory, by Communists at New York, London, Berlin and other places everywhere. At Paris there were 900 arrests.

—Ex-Premier and ex-President Raymond Poincare was operated on, at Paris, for prostatic trouble.

Aug. 2—Wilber B. Huston, 16, of Seattle, Wash., son of Bishop S. Arthur Huston of the Episcopal Diocese of Olympia, is the winner of the Edison Scholarship. Henry Ford, Edison, Col. C. A. Lindbergh, S. W. Stratton, and Lewis Perry were the judges.

—Ambrose Monel, 23, nickel manfr., of N. Y., and F. B. Gundry and Pilot J. L. Cagnani, died when their plane lost a wing and fell 2,500 ft. near Armonk, N. Y.

—The Mantere Cabinet, in Finland, resigned, and was succeeded on Aug. 17, by one under Kyosti Kallio, Agrarian.

—At Tokio, Chang Tsungchang, former war lord of Shantung, shot and seriously wounded Prince Hsien Kai, cousin of the former Emperor of China, Pu Yi.

Aug. 3—4 men in an auto at Bradley Beach, N. J., killed Geo. Danielson, a bank messenger, and escaped with $7,253.

—Richard J. Sandlands, of N. Y. City, a Customs Border patrol agent, was found drowned with a broken neck, at Detroit, after he and another agent, Milton Larson, had halted and boarded a speed boat, the Maxine, owned by John M. Heath, and on which Heath and his wife were present.

ZEPPELIN'S TRANSATLANTIC TRIPS.

Aug. 4—The German dirigible balloon, Graf Zeppelin, under Commander Hugo Eckener, arrived at Lakehurst, N. J., on her second trip to the United States. She was first over Lakehurst at 7.29 p.m., then continued to N. Y. City, turning at 42d St., and returning to Lakehurst, landing at 9.52 p.m. Her flying time from Friedrichshafen to Lakehurst was 93 hours; 67 hours, 30 minutes from coast to coast. Maintaining a steady speed of 55 nautical miles an hour, she had borne 20 passengers, two of them women, a crew of 41 men and a stowaway, a young German baker named Albert Buchsow, who decided at 18 to carve a career for himself in America. U. S. immigration officers took him to Philadelphia for deportation.

The Graf Zeppelin also brought a gorilla, a chimpanzee, 593 canaries, 30,500 letters, 31,500 postcards, a piano, dolls, etc.

The Graf left Lakehurst at 12.39 a.m., on Aug. 8 with 22 passengers, a dog, an alligator, and much cargo. The dog had come by airplane from Los Angeles. The dirigible passed over Paris and landed at Friedrichshafen on Aug. 10 at 8.02 a.m., (N. Y. Daylight Saving Time)—55 hours, 24 minutes.

—At Arrowe Park Camp, England, on the fifteenth anniversary of Great Britain's declaration of war against Germany, 50,000 Boy Scouts assembled from virtually every civilized nation of the globe—some from the Allied and associated powers, others from the former Central powers—formed up on the Arrowe Park rally ground to celebrate the peace of the world.

—At Ommen, Holland, Jiddu Krishnamurti, Hindu theosophist leader and head of the Order of the Star in the East, renewed his announcement of dissolution of the organization of his followers.

Aug. 5—Augusto B. Leguia was re-elected President of Peru for a five-year term, beginning Oct. 12.

—An outbreak of the feud between the On Leongs and the Hip Sings caused 1 death at N. Y. City, 2 at Boston, 1 at Chicago, and 1 at Newark, N. J. A peace pact was signed at N. Y. City on Aug. 7.

—13 drug addicts escaped in a riot of 100 at the Calif. State Narcotic Hospital at Spadra.

Aug. 6—Six long-term convicts made a break for liberty at the Kansas State Prison, Lansing; 2 were killed, 1 wounded, the others recaptured; 1 guard was injured.

—The White Star liner Britannic, largest British motor-driven ship, was launched at the Queens Island Shipyards, Belfast.

—Fighting between Rumanian coal miners of the Lupeny district and government troops resulted in the death of 58 with huadreds of wounded.

—Fires raged through the forests of Washington, Idaho and Montana, leaving 30,000 blackened acres.

—Lieut. Florentin Bonnet, of the French army, holder of the world's speed record for land planes and one of the four pilots chosen by the French Air Ministry to compete in the Schneider Cup races

at Calshot, England, was killed when the seaplane he was training crashed at Bordeaux.

Aug. 7—At Paris, the American Legion memorial, the Pershing Building, on the Rue Charron, was dedicated.

Aug. 8—The N. Y. Court of Appeals upheld the N. Y. City multiple-dwelling act of the recent legislature.

—The Federal Reserve Bank of New York advanced the rediscount rate from 5 per cent, the level which has been held since July 13, 1928, to 6 per cent. The bank also reduced buying rate on brokers' acceptances, from 5¼ per cent to 5½ per cent. This action was followed, on Aug. 9, by a break in Wall Street stocks which cost speculators $6,000,000,000. The decline swept over the world's stock markets.

—Incendiary fire destroyed Miner's Bowery Theatre, N. Y. City, opened in 1878.

ITALIAN MARRIAGE RULES.

—Throughout Italy the new marriage rules and regulations called for by the Lateran treaties between Italy and the Holy See became effective.

Wherever couples went to the altar they listened to the priest's explanation that henceforth marriage by the Church is sufficient and marriage by the State is not necessary.

Aug. 9—With a roar that shook the lower New York area, and an eighty-foot spurt of flame amidships, the 14,000-ton tanker William Rockefeller, of the Standard Oil Co. of New Jersey, with 140,000 bbls. of oil aboard, exploded at Bayonne, N. J., killing two men and injuring seven others, two of them seriously.

Aug. 10—President Hoover and family celebrated his 55th birthday at his fishing camp in the Virginia mountains. Among the guests were Col. and Mrs. Lindbergh.

—At Beverly, Mass., jewels valued at $250,000 were stolen from the summer home of Sydney E. Hutchinson, of Philadelphia. The gems were recovered, on Aug. 26, at N. Y. City, from 2 negroes.

—Cholera has reappeared in India in epidemic form following the overflowing of the Indus and infection is being spread by the migration of thousands of people from the region of the Upper Sind.

Aug. 11—Ex-Chancellor Hans Luther welcomed, at Berlin, the 4,000 delegates at the first session of the International Advertising Convention.

—An airplane crash near Clovis, N. Mex., killed Lieut. Orville Stephens, of Mitchel Field, Long Island, owner of the plane; T. E. Scully, manager of the Transcontinental Air Transport Company at Clovis, and Philip T. Berry, assistant to Scully.

—A Panama Canal slide of 20,000 cubic yards of earth on the east bank of Cucuracha, where a large slide occurred once before, extended into the channel but did not restrict navigation. The slide was caused by a break in the ninety-five-foot shelf.

—Venezuelan rebels attacked Point Cumana, and killed the Governor, Gen. Emilio Fernandez.

Aug. 12—Earth tremors which shook down the wall of a church at Attica, New York, were felt at 7.25-45 a.m. The area of disturbance extended as far east as Springfield, Mass., and as far west as Ashtabula, Ohio.

—Prince Francis I succeeded his dead brother. Joham II as ruler of Liechtenstein.

Aug. 13—At New Orleans 4 were shot and a number of city officials, including acting Mayor T. Semmes Walmsley were mauled and beaten when a mob of sympathizers with the street car strike which has been effective since July 2, invaded the City Council Chamber.

ZEPPELIN CROSSES ASIA.

Aug. 14—The Graf Zeppelin, with 20 passengers, left Friedrichshafen, Germany, at 11.35 p.m. (N. Y. Daylight Time, or 4.35 a.m., on Aug. 15 local German time) on the second part of her proposed trip around the world. The dirigible flew over Berlin, across Latvia, over European Russia north of Moscow, and, crossing the Ural Mountains, flew over Siberia. She was at Ajan, on the east coast of Asia, at 2 a.m., on Aug. 18; at noon that day crossed the Russo-Japanese frontier on Saghalien, and landed near Tokio about 6 p.m., on Aug. 19.

—Lieut. Gen. Ogawa and 7 other Japanese air officers died in bomber-plane crash, near Tokio.

—Gail Hamilton, 38, N. Y. City, employment agent, and Miss Montell Ovington Mansfield, divorcee, killed themselves after a party at her home, Spring Top Farm, near Poughkeepsie, N. Y.

Aug. 15—Fighting between Russian and Chinese troops along the Amur River is in progress.

Aug. 16—Col. C. A. Lindbergh drove an automobile around a concrete track at Utica, Mich., attaining a clocked speed of 112 miles an hour. His speed on single laps was 108 miles an hour.

—In the St. Lawrence River, near Alexandria Bay, N. Y., the speed-boat, Giggle, and the excursion steamer, Thousand Islander, were sunk in collision. The owner of the speed-boat, W. C. Lipe, of Syracuse, N. Y., wife, and pilot, Ford Dodge, were drowned.

Aug. 17—Speaking to welcoming throngs at Madison, Va., near his fishing preserve, President Hoover said: "It is generally realized and accepted that prayer is the most personal of all human relation, ship. On such occasions as that, men and women are entitled to be alone and undisturbed. Next to prayer, fishing is the most personal relationship of man, and, of more importance than the fact itself, everybody concedes that the fish will not bite in the presence of the public and the press."

—James Horace Alderman, 47, rum pirate, was hanged at the U. S. Coast Guard hangar, Ft. Lauderdale, Fla., for the murder of Robert K. Webster, a Secret Service man, and Victor A. Lamby and Sidney Sanderlin, coast guards.

Aug. 18—Nine negroes and 2 whites were burned to death in a train derailment at Henryette, Okla.

—Miss Thelma Martin, of Seattle, and K. Furuya, of Portland, Ore., perished in a snow-storm while climbing Mt. Shuksan, near Mt. Baker, Wash.

Aug. 19—Two young Swiss aviators, Oscar Kaesar and Kurt Luescher, left Lisbon in an airplane, Jung Schweitzerland, bound for New York (Mineola). They passed the Azores at 2 p.m. That was the last seen of them.

—Miss Marvel Crosson, 25, of San Diego, Calif., a contestant in the Women's Air Derby race from Santa Monica, Calif., to Cleveland, died when her plane fell near Welton, Ariz. She held the Woman's Altitude Record of 23,996 feet.

—Fire swept through the cabins and corridors of the steamship Paris, at Havre, and was followed by a second fire on Aug. 20.

—Over 500,000 cotton mill operatives at Manchester, England, ended a 3-week strike. Arbitration was agreed on.

—Control of the Tobacco Products Corp. and the United Cigar Stores Co. of America, retailers of cigars and cigarettes, shifted from George J. Whelan and his associates, to a group in the Management of the Gold Dust Corp., the American Waterworks and Electric Corp., the National Dairy Products Corp., the Guaranty Trust Co., the Cuba Cane Sugar Corp., the Corn Products Refining Co., and the Commercial Solvents Corp.

—Miss Eagle M. Ashmun, executive secretary of the San Francisco Chapter, American Red Cross, was stabbed to death by a man as she left her offices.

—Rush H. Knox, Attorney General of Mississippi, recently impeached by the House of Representatives of the state legislature, handed his resignation to Governor Bilbo.

Aug. 20—U. S. Gov't agents have seized, at Boston, Providence, and elsewhere, large quantities of anesthezia ether. The seizures were made as a result of an investigation by Dr. Allen W. Rome, of the Massachusetts Homeopathic Hospital, after patients had died under anesthesia.

—John Kolesar, 12, was shot to death, and two of three other children were wounded while in the cornfield, at night, on the farm of Craig Hoffman near Somerville, N. J. The September Grand Jury refused to indict Hoffman.

Aug. 21—The Chicago Daily Journal got out its last issue before merger with the Chicago Daily News.

—Earl Krieger and Albert McDonald were killed at West Frankfurt, Ill., by two policemen who halted the other car to search for liquor. The police said they first were fired on. A coroner's jury exonerated them.

—Building racketeers set off their eleventh incendiary fire in two months in the Bronx—a 105-family flat going up on Newbold Ave., Unionport; loss $200,000.

Aug. 22—Mrs. Calvin Coolidge helped the folks at Hancock, N. H., her girlhood home, celebrate the town's 150th birthday.

—Capt. Guiseppe Motta, Italian entrant in the Schneider Cup Race, died in plane fall on Lake Garda.

ZEPPELIN CROSSES PACIFIC.

Aug. 23—The dirigible, Graf Zeppelin, left Kasumigaura naval air port, 30 miles northeast of Tokio, Japan, at 1.13 a.m. (N. Y. daylight time; 2.13 a.m. Aug. 22 in Japan time). It passed over the Golden Gate near San Francisco, on Aug. 25, at 10.25 p.m. (N. Y. time) and landed at Los Angeles at 9.30 a.m. (N. Y. time) on Aug. 26. It had arrived over that city four hours earlier but circled around. Leaving there on Aug. 27, the Graf arrived at Lakehurst, N. J., on Aug. 29, at 8.13 a.m.

—At Jerusalem, 9 Jews and 3 Arabs were killed and 110 other persons were injured in a fresh outbreak. All shops were closed.

—"Uncle Jim" Parks, negro slave of G. W. Parke Custis, was buried with a military salute in Arlington, Va. National Cemetery.
—Mrs. C. A. Lindbergh made her first airplane flight alone, at Hicksville, L. I. The Colonel has been giving her lessons.
—The homestead of William Cullen Bryant, at Cummington, Mass., was dedicated as a national shrine. The Coolidges attended.
—Eight letters, one for each of her children, were handed to the jailer when he accompanied hangman Ellis to the cell in the prison of Hull, Que., where Mrs. Marie Viau and her lover, Philibert Lefebvre, paid with their lives for the crime of poisoning the woman's husband.
Aug. 24—King George left London and took up his residence at Sandringham, his farm.
—Arab-Jew outbreaks in Palestine continue, at Jerusalem, Hebron, Jaffa, and elsewhere. British warships are landing marines and airplanes are in use by the British.
Aug. 25—The 1929 Fair opened at Leipsig, Germany.
—Fire at the port of Hull, England, destroyed half a mile of docks, trawlers, the new million-dollar market, 150 fish cars; and put 60,000 persons idle.
Aug. 26—The Governors of New York and Vermont met above the waters of Lake Champlain and opened the new $1,000,000 bridge, which connects Crown Point, N. Y., with Chimney Point, Vt., and provides a short cut from the Adirondacks region of New York to the mountains of Northern New England and the coast of Maine.
—Warren Packard, auto manufacturer, died when his hydroplane fell 1,000 ft. into the Detroit River.
Aug. 27—The first leg of the Philadelphia-Cleveland air derby ended when the monoplane piloted by E. J. ("Red") Devereaux cracked under the strain of its speed and fell with him, his bride of three months and his mechanic to a mud flat off the Boston airport. Devereaux and the mechanic, Edward Reiss, were killed instantly, and Mrs. Devereaux, formerly Miss Herma Borges, was taken to the Hospital, where she died.
—Steps toward revision of the Federal public lands policy, to give the states of the West the authority and responsibility for an extensive conservation program will be taken by President Hoover, it was announced at the White House following receipt of a message from a conference of Western Governors approving such a course.
Aug. 28—The San Francisco daily Call, founded in 1856, has merged with the daily Bulletin, established in 1855.
—The yacht, Corsair, built in 1899 for the elder J. P. Morgan, has been given by the son to the U. S. Coast and Geodetic Survey.
—Police Commissioner Whalen, acting for the combined police, prosecuting and Magistrates' divisions of the city government announced that New York would refuse to assume the burden of enforcing the Prohibition laws by use of the State Nuisance Act as proposed by Federal Prohibition Director Maurice Campbell. He returned to Director Campbell more than one hundred complaints sent by Campbell to the Police Department in the past few days and said that all such complaints received in the future would also be returned.

ZEPPELIN ENDS ROUND THE WORLD TRIP.

Aug. 29—The dirigible, Graf Zeppelin, arrived at Lakehurst, N. J., from her trip around the World, at 8.13 a.m. She left there on Aug. 8, and covered over 19,000 miles in 21 days, 7 hours, and 34 minutes. The Byrd radio station at Little America, Antartica, conversed with the Grap while it crossed Pennsylvania nearing New York. Dr. Hugo Eckener, the balloon's commander, flew to Washington by airplane and was greeted by President Hoover. New York City officially welcomed him on Aug. 30.
The dirigible left Lakehurst with 22 passengers, on Sept. 1, at 8.18 a.m., and landed at Friecrichshafen on Sept. 4, at 3.52 a.m. (N. Y. daylight time) —a globe-circle from there in 20 days, 4 hours.
—At Cleveland, Lady Mary Heath, who was preparing to enter one of the women's contests in the national air races now under way there, crashed in her plane through a factory roof and was severely injured. Her hurts include a fractured skull, a fractured jaw and severe bruises. She recovered.
—Ruth Elder, 24, cross-Atlantic aviator, was married to Walter Camp, Jr., 38, at N. Y. City.
—Fire destroyed Lulworth Castle, built in 1588 on the Dorset coast of England.
—Moslem Arabs attacked the City of Safed, Palestine; killed 22 Jews, and burned the place.
Aug. 30—At Moscow, the Soviet Government accepted proposals of China for conclusion of a joint declaration for settlement of all questions arising out of the dispute over control of the Chinese Eastern Railway in Manchuria.
—The Council of the League of Nations met at Geneva.
—At the Hague the final preliminaries to the formal ending of the reparation conference were concluded, the delegates signing the agreements reached on evacuation of the Rhineland and on distribution of the Young plan annuities. The British troops will begin to leave the Rhine on Sep. 14 next.
—Sir Geo. H. Wilkins, explorer, married Miss Suzanne Bennett, actress, at Cleveland.
—The coasting steamer San Juan sank in collision with the Standard Oil tanker, S. C. T. Dodd, off Santa Cruz, Calif.; 70 were drowned.
—Over 60 died in collapse of a working folk tenement at Algiers, Africa.
—The N. Y. City Transit Commission settled for $9,250,000 a claim of $14,107,373.42 against the Interborough Rapid Transit Company and delivered to Controller Berry the company's certified check for $5,886,342.30. The claim represented accumulated withdrawals from joint revenue from subway operation under contract 3 between th company and the city from Jan. 1, 1919, to June 30, 1929.
—Fifty cases of typhoid have developed among children who were at a camp near Lakewood, Pa.
—Massacre by Chinese of 3,000 Moslems in Kansu Province was confirmed by letters from missionaries in the affected area.
Aug. 31—At Shanghai fears of rioting during the celebration of International Youth Movement Day were allayed by the execution by a firing squad of five youths, all in their teens, on charges of distributing Communist literature. The youths were arrested in the International Settlement and turned over to the Chinese authorities, who tried and executed them in less than two hours.
—The official bulletin issued by the Palestine Government lists the number of casualties and wounded to date as follows:
Killed: Moslems, 83, Jews 109, Christians 4.
Seriously wounded: Moslems 112, Jews 183, Christians 10.
—Near Cleveland, O., Thomas D. Reid established a new world's solo duration record. Two hours later he crashed to his death. Thirty-nine hours in the air, those who investigated the crash believe, was too much for the pilot. Drowsiness overcame him, it is thought.
—The three-year-old daughter of Fred Grorricicuk, Lowland, Manitoba, was killed when a black bear, driven out of the bush by fire and hunger, broke into the home and carried off the girl.

WAGGONER'S SWINDLE.

—Charles D. Waggoner, president of the Bank of Telluride, Colo., induced six New York City banks, by telegraphed orders, to give him a credit of $500,000. He cashed the orders. Waggoner was indicted for using the mails to defraud; on Oct. 10, 1929, he pleaded guilty, in the United States Court at New York City, and was sentenced to fifteen years in prison.

SEPTEMBER.

Sept. 1—At Berlin, an infernal machine planted on a basement window ledge of the Reichstag Building, exploded at 4 A. M. The bomb did little damage beyond smashing windows.
—Theatrical stage hands and musicians in the principal or syndicate-owned theatres at Philadelphia struck for continuous employment from September to May.
Sept. 2—Denying reports that Harry F. Sinclair, head of the Sinclair oil interests, who is serving a term in the District of Columbia jail for contempt of the United States Senate, had been taking pleasure trips in a motor car, Major William Peak, superintendent of the jail, disclosed that Mr. Sinclair had been engaged for the past two months in duties as assistant to the jail physician, which enabled him to go "several times weekly" to the municipal wharf by automobile. The Board of Welfare stopped the outings when informed of them.
Sept. 3—The temperature rose to 94.2 degrees Fahrenheit, at N. Y. City, 97 at Boston, and 99 at Plainfield, N. J. Snow fell in Montana.

T. A. T. PLANE DESTROYED.

—Lightning or an explosion sent a westbound Transcontinental Air Transport plane crashing on the south slope of Mount Taylor, 60 miles west of Albuquerque, N. M.; 8 died, including 5 passengers—W. H. Beers, Merrick, N. Y.; M. M. Campbell, Cinn.; Harris Livermore, Boston; A. S. McGaffey, Albuquerque; and Mrs. Corina Raymond, Glendale, Calif.
Sept. 4—Prof. Lewis M. Terman, of Leland Stanford University, has found, as a result of a series of tests made to determine masculinity and femininity

of mind, that married life tends to bring a man closer to the feminine type.

Sept. 5—Premier Briand of France outlined to the Assembly of the League of Nations, at Geneva, a plan for a United States of Europe.

—Uncle Sam's Navy was increased by one unit when the cruiser Northampton was launched at the Fore River, Mass., yards of the Bethlehem Shipbuilding Corporation. The craft took to its element after Mrs. Calvin Coolidge had smashed a bottle of mineral water across the port side of the bow.

Sept. 6—President Hoover, declaring he would tolerate no interference in his naval reduction moves from those with a financial interest at stake, announced that he had asked Attorney General Mitchell to investigate the statement of "a naval expert" that three large shipbuilding corporations employed him to help block a disarmament agreement at Geneva in 1927 and at other times.

—Secretary C. F. Adams on Sept. 9, stated publicly that the Navy Department did not authorize the activities of William B. Shearer at the three-power naval parley at Geneva.

Sept. 7—The corner-stone of the new Secretariat offices of the League of Nations was laid at Geneva.

—Hundreds were killed or wounded in fights on the Manchurian border between Russian and Chinese troops.

—Capt. Albert E. Woodbridge, who in the World War was credited with bringing down Baron Hauptmann von Richthofen, was killed with his mechanic and a passenger in landing an Indian air mail plane at Jask, Persia.

—100 persons, mostly children, drowned when the steamer Kurn sank in the Gulf of Finland. 24 died in sinking of steamer Dan in the Baltic.

Sept. 8—More than 200 deaths were caused by a typhoon which swept southern Luzon Island—with thousands of persons homeless in the stricken areas.

TEXTILE STRIKES IN NORTH CAROLINA.

Sept. 9—Insanity of a juror caused at Charlotte, N. C., mistrial in the case of the 16 textile mill strikers charged with the murder of Police Chief O. F. Aderholt at Gastonia, on June 7 last.

—After a union labor parade at Gastonia, a mob raided union headquarters there and at Bessemer City and Charlotte, and kidnapped Ben Wells, union organizer and flogged him and two companions, they charged.

Sept. 10—The U. S. Senate, 51 to 27, directed its Finance Committee "forthwith" to obtain from the Treasury statistics on corporation profits or losses when either the Republican majority or the Democratic minority of the committee makes such a request.

—The Rev. O. J. Kvale, U. S. Representative, was burned to death at his cottage, near Battle Lake, Minn.

—The freight steamer, Andaste, with crew of 25, sank in Lake Michigan, off Grand Haven.

Sept. 11—M. F. Morrison, 24, and W. E. Wilmot, 21, both of Elizabeth, N. J., were hanged in the prison at Moundsville, W. Va., for the murder, May 8, of Frank Bowen, at Len's Creek.

—Carl Hord, 21, and Ivan Hutsell, 27, were electrocuted in the prison at Eddysville, Ky., for the murder, in 1926, of two men and a woman.

—Jesse Spurrior, 16, a high school student, killed Helen McClaine, 13, and himself, at Port Angeles, Wash.

Sept. 12—Retaining the premiership and the portfolio of the Interior, Mussolini, at Rome, divided the other cabinet offices among his adherents.

—The Paraguay cabinet authorized a state of siege, owing to newspaper campaign. In Guatemala some constitutional guarantees were suspended.

—Baltimore began its 200th birthday with a parade. Mayor William F. Broening released a carrier pigeon which carried a message for President Hoover. Simultaneously, the Memorial Plaza echoed with the whirr of wings as the 500 other pigeons were freed, carrying messages of invitation and greetings to the Mayors of other cities.

—At Portland, Me., the veterans rose to their feet and shouted opposition to the proposed reunion of the soldiers of the North and South, as the Sixty-third National Encampment of the Grand Army of the Republic disapproved and rejected a resolution favoring a joint encampment.

—Raiph Fleagle, George J. Abshir, and Howard Rayston, at Lamar, Colo., pleaded guilty to murder, robbery, and kidnapping, as the sequel to their attack, in May, 1928, on a bank there, in which President A. N. Parrish and his son were killed. E. A. Kessinger was abducted and slain and Dr. W. W. Wineinger, after treating Royston's wounds, was shot to death at Dighton, Kan.

ST. LAWRENCE POWER MERGER.

Sept. 13—The Niagara Hudson Power Corporation, the $450,000,000 system recently formed by J. P. Morgan & Co. and associates, has purchased the Frontier Corporation and has thus acquired sites on the St. Lawrence River. The Morgan system already controls waterpower installations at Niagara Falls and other points of a capacity of 1,700,000 horsepower.

Sept. 14—Near Gastonia, N. C., a group of Anti-Communists watching the highway from Bessemer City to Gastonia to prevent mill workers attending the advertised meeting of Communists and members of the National Textile Workers' Union, fired into a truck in which twenty mill workers were riding and killed Mrs. Ella May Wiggins of Bessemer City.

—The body of Mrs. Robert A. McPherson, jr., was found at her apartment in Washington, D. C. It was alleged she had been strangled to death.

—Lightning touched off a $1,000,000 oil fire along the refinery docks at Linden, N. J., and spread along the New Jersey shore of the Kill Van Kull.

—At Geneva, the final chapter of America's second effort to get into The Hague Court, as far as the League of Nations is concerned, was written when the Assembly of the League unanimously approved the Root protocol and opened the document for signatures. Within a half hour eighteen delegations had signed.

—Airplane accidents throughout the U. S. killed 24 persons—6 at the new landing field at St. Catharines, Ont., Can.

—After a 61-day hunger strike, Jatindranath Das, 23, leader of the Bengal Youth Movement (Nationalist) died in the prison at Lahore, India. The body was removed to Calcutta, where 150,000 greeted it.

Sept. 15—After 120 years as a hotel, the Quincy House, Boston, closed its doors. It was built in a day when money was so scarce that the lease stipulated the rent should be paid in pounds of pig iron, grains of gold, or bushels of corn.

—Surgeons at Sing Sing Prison operated on Frank Plaia and removed his appendix. He was in a death cell, awaiting electrocution on account of the murder of Sorro Graziano and wife, near Belmont Park, N. Y.

Sept. 16—British troops killed 16 marauding Arabs at Hattin, near the Sea of Galilee.

—Sewer explosions at Newburgh, N. Y., killed 1, hurt 80, damaged 50 buildings, and caused several fires.

—Edmond Bayle, 50, in charge at the Paris of the criminal identification bureau, was slain by a cloth salesman whose signature to a document had been called fraudulent.

—Coal mine explosions killed 24 at Saarbruecken, Germany, and 11 near Metz, France.

—A diamond cutter has slashed 800 store windows at London.

Sept. 17—The Dist. of Col. Supreme Court fined Harry M. Blackmer, oil man, $60,000 on two charges of contempt growing out of his failure to obey subpoenas to appear as a witness in the trial of H. F. Sinclair and A. B. Fall. He is in Europe.

—H. H. Tallman, Boston-Newark, N. J., air mail pilot, died in a plane crash in fog near Berlin, Conn.

Sept. 18—Anti-Communists at Kings Mountain, N. C., kidnapped Cleo Tesneair, of Baltimore, textile union organizer, carried him into S. C., and beat him. A mob dynamited a speaker's stand at Kings Mountain.

—The Syracuse, N. Y. Post-Standard newspaper celebrated its 100th birthday.

WORLD COURT DEVELOPMENTS.

Sept. 19—At the Council Hall, Geneva, seven States signed the optional clause accepting in advance the World Court's compulsory jurisdiction in legal disputes. They signed in the following order: France, Great Britain, New Zealand, South Africa, India, Czechoslovakia and Peru.

Later the Council and Assembly, voting separately, elected Sir Cecil Hurst and Henri Fromageot legal advisers, respectively, of the British and French Foreign Offices to fill the vacancies on the World Court bench left by the death of the British and French judges.

—Representatives of the film industry signed, at Paris, an agreement continuing the status quo for one or two years, during which time both sides will work out a definite accord upon a principle other than the quota system.

—Military parades are a feature of the 3-day celebration of the 119th anniversary of Chilean independence.

—Frank Reed Whiteside, 63, treasurer of the Penn. Acad. of Fine Arts, was slain at Philadelphia.

SHEARER LOBBY CASE.

Sept. 20—William B. Shearer was employed by three shipbuilding companies only to "observe and report" in connection with the naval disarmament conference at Geneva in 1927 and the session of the preparatory disarmament commission, Clinton L. Bardo, president of the New York Shipbuilding Co., testified at the opening of the U. S. Senate Naval Committee's inquiry into charges that a lobby directed by Shearer wrecked the conference. He was not employed for propaganda purposes, Bardo declared. For his activities at Geneva and in connection with the merchant marine act of 1928, the shipbuilding companies paid Shearer a total of $46,750, of which his own company contributed $16,158, Bardo asserted. He added that the lobby conducted by the shipbuilders and allied interests in connection with the merchant marine act had cost $143,000, of which his company paid $102,000.

—Col. C. A. Lindbergh and wife left Miami, Fla., with passengers and mail, and landed at Havana, and then at Santiago de Cuba. On Sept. 21, he flew to Port au Prince, to Santo Domingo, and to San Juan, Porto Rico; on Sept. 22, his party was at Port of Spain; on Sept. 23, his official trip as a commercial pilot, opening the new air mail line, ended, via Georgetown, British Guiana, at Paramaribo, Dutch Guiana. Thence he and his wife toured on their own account.

—The Russian plane, Land of the Soviets, flew across Bering Strait, from Petropavlovsk, Kamchatka, to Attu, most western of the Aleutian Islands; on Sept. 24 it landed on Unalaska Island; on Sept. 27 it reached Seward, Alaska; at Sitka, Alaska, on Sept. 29.

—Clement Passal, a criminal, was buried by confederates in a forest, 30 miles west of Paris. Air and food were supplied through a pipe, but it choked, and Passal died of suffocation and hunger. His body was dug up by the police a month later, on a tip by the confederates.

—A messenger, Milton Alter, 18, went astray with $512,000 in securities in lower Broadway, N. Y. City. The stocks belonged to R. V. Hiscoe & Co., brokers. They were most all recovered.

—The British and French troops are evacuating the Rhineland.

—11 men and 9 women were burned or trampled to death in the Study Club, a downtown Detroit Cabaret; 47 were badly injured.

—Earthquakes in Anatolia destroyed seven villages.

Sept. 21—W. B. Shearer's secret employment as an "observer" at the Geneva Naval Conference in 1927 by the Bethlehem Shipbuilding Corp. came as a great surprise to Charles M. Schwab, Chairman of the Board of the Bethlehem Steel Corp., and Eugene G. Grace, its President, according to their sworn testimony before the Senate naval subcommittee.

PARDON REFUSED TO SINCLAIR.

—President Hoover let it be known that he would refuse the pleas for pardon from Harry Sinclair and his assistant, Henry Mason Day. Sinclair in a statement on Sept. 22, said his petition for clemency, denied by the President, was not based on ill health, but on the ground that he was imprisoned for doing something that was not prohibited by statute or rule of the courts.

Sept. 22—A White House statement to the press called on Senator Howell of Nebraska for "definite facts" to support his assertion in the Senate that the President could make Washington dry, if he insisted on it. The statement added that the President intends not only to secure the fullest enforcement in the District possible under this organization of enforcement agencies as provided by law, but to make it a model in the country.

—While carrying on his person a letter from Queen Marie of Yugoslavia to her mother, Queen Marie of Rumania, former Captain Serdici, intimate friend and adviser of former Crown Prince Carol of Rumania, was murdered near Gross Betschkerek in Banat Province. Serdici witnessed the marriage of Prince Carol and Zizi Lambrino.

Sept. 23—At Plainville, Conn., Maj. John Coolidge, son of former President and Mrs. Calvin Coolidge of Northampton, Mass., and Miss Florence Trumbull, daughter of Governor and Mrs. John H. Trumbull of Connecticut, were married in the Congregational Church. The elder Coolidge, before the ceremony, felt, with his foot, a microphone under the carpet, and a servant removed it.

—At Washington, inquiry by the Senate Naval Investigating Committee into the activities of William B. Shearer at the Geneva Conference of 1927, was featured by Samuel W. Wakeman, Vice-President of the Bethlehem Shipbuilding Corporation who characterized as "a damn fool decision" the agreement among shipbuilders to send Shearer to Geneva as an observer.

—Ignace J. Paderewski, pianist, was operated on for appendicitis at Lausanne, Switzerland.

—Mayor Gustav Boess of Berlin is in New York to return the visit Mayor Walker made to his city in 1927. He arrived on the steamer Berlin of the North German Lloyd. With him were four of his city officials. The group plans to study New York's municipal government before proceeding on a tour of other American cities.

—At Berlin, delegates from forty-three countries attended the opening of the congress of the International Interparliamentary Economic Union, in the hall of the Reichstag.

—The controversy that followed the Hebron massacre as to whether the Arab attackers mutilated the victims was closed with the issuance of statements by the Palestine authorities and by the Zionist Executive in Jerusalem. The Arab leaders assert their honor was saved. British doctors declare mutilations were not established and Jewish physicians insist that because of the conditions of the bodies when the exhumation took place, proper examination was impossible.

LIQUOR DRINKING IN WASHINGTON.

Sept. 24—In the U. S. Senate, Brookhart, of Iowa, told of the serving of liquor to newly elected and old Senators at the New Willard Hotel some years ago, at a function attended by Senator Smoot, chairman of the Finance Committee, and other Senators. Smoot denied he had known liquor was served there. The affair was given by a club which had no connection with the management of the hotel it was stated. Flasks had been hidden under the tables and guests reached under and got them, Brookhart said.

Sept. 25—Chancellor Sternwith of Austria, and his cabinet resigned. A new one was formed by ex-Chancellor, Police Chief, Johann Schober.

—At Berlin, Germany, a merger was announced of the Deutsche Bank and the Disconto Gesellschaft, with combined capital of $67,857,000, and deposits of $1,023,809,520.

Sept. 26—Col. C. A. Lindbergh, wife, and J. T. Trippe and wife flew from Port of Spain to Maracay, Venezuela; they were at Baranquilla on Sept. 28; at Cristobal, C. Z., on Sept. 29; at Managua, Nicaragua, on Oct. 2; at Guatemala City, on Oct. 3; at Belize, British Honduras, on Oct. 4.

—Representative Edith Nourse Rogers, Mass., presided over the U. S. House during its 4-minute session.

Sept. 27—At White Plains, N. Y., Earle F. Peacox, 22, radio mechanic, who, on April 21st last strangled his wife and burned her body, was found guilty of second-degree murder and was sentenced to prison for 20 years to life.

—A 3-day storm in the Bahamas killed 5 at Nassau, and destroyed property and shipping; 20 houses were wrecked at Ft. Lauderdale, Fla.; some damage was done at Havana.

—Mrs. Elsa Marshall was attacked and strangled and her body left in bushes near the Knollwood Country Club, Westchester County, N. Y.

—At Rome, Caesare Rossi, former friend of Premier Mussolini, who was accused of conspiring with Communists and others to overthrow the existing Italian regime and with fomenting attempts on the life of the Duce, was sentenced to thirty years' imprisonment by a special tribunal.

—The gold medal of the Veteran Wireless Operators' Association was presented on a radio talk at N. Y. City by David Sarnoff, to Malcolm Hanson, chief radio engineer of the Byrd Expedition, who returned thanks by wireless, from Little Antarctic, 11,000 miles distant.

—Dieudonne Coste and Maurice Bellonte left Le Bourget Field, near Paris, in their airplane, Interrogation Point. They landed Sept. 29, in a desert region in East Manchuria, having gone about 6,158 miles.

Sept. 28—Sir William Waterlow was chosen Lord Mayor of London, succeeding Sir Kynaston Studd.

LONG DROUGHT IN ENGLAND.

Sept. 29—Heavy rainfall in all southern counties of England, with storms of almost tropical intensity in some districts, broke the drought of 37 wholly rainless days. This was the longest such period for 71 years and had the drought lasted until tomorrow night it would have broken the records of a century.

—Daylight Saving Time at N. Y. City was succeeded at 2 a. m., by Standard Time.

—Two huntsmen potting at robins and woodpeckers, for which there is no open season, for the sake of the savory Italian dish polenta killed W. T. Kramer, a N. Y. state game warden, in the Idlewild woods near Jamaica, Queens, attacked another and then escaped. Frank Aldino was convicted of murder, 2nd degree.

Sept. 30—The Empress of Japan gave birth to a daughter—her third child, all girls.

—Rear-Admiral J. M. Reeves told the U. S. Senate Committee, at Washington, that he never had expressed the hope the Geneva Naval Conference would fail. The American delegation, he said, desired equality in naval strength, and, without such, the belief was the conference would fail.
—William B. Shearer, American shipbuilders' agent at the conference, denied he lobbied there against disarmament; he denied Scotland Yard (London) police accusation that he was an associate of international crooks and a suspect in two thefts on the Continent.
—Gov. Moody, Texas, proclaimed martial law in Hutchinson County, and State troops took possession of the towns of Stinnet and Borger. At the latter, Dist. Atty. John A. Holmes was assassinated on Sept. 13. It is a new oil town, and Moody charged it with being crime ridden.
—At Lemars, Iowa, Rex Frolkey, ordained Evangelical minister and former Western Union College football star, committed suicide after robbing the Sioux Centre State Bank.

OCTOBER

Oct. 1—The Borough of Sudbury, England, conferred the freedom of the place on C. G. Dawes, U. S. Ambassador, whose ancestor, William Dawes, emigrated thence to America, 1628-29.
—Having lost $124,000 in Wall Street speculation, W. J. Keyes, radio maker, jumped eleven stories to death at New York City.
—At Elizabethton, Tenn., Consul W. C. Kummer, acting president of the American Bemberg and Glanzstoff rayon plants, was found dead at his home, his wrists slashed with a razor.

STRIKERS KILLED AT MARION, N. C.

Oct. 2—At Marion, N. C., three strikers were killed and twenty were wounded when Sheriff Oscar Adkins of McDowell County and eleven deputies broke up a picket line in front of the mill of the Marion Manufacturing Co. The strikers were members of the United Textile Workers, affiliated with the American Federation of Labor.
—The U. S. Senate voted to take away from the President the power to change tariff duties on recommendation of the Tarriff Commission, which has been vested in the Executive since 1922. The vote was 47 to 42.
—At Frankfort, Ky., the first trial resulting from the recent indictment of Governor Sampson, members of his textbook commission and publishers, came to an end with an instructed verdict for acquittal of the Governor.
—The Church of Scotland, and the United Free Church of Scotland, apart 87 years, formally reunited, in a joint session, at Edinburgh.
—Henry Mason Day, associate of Harry F. Sinclair in oil enterprises, left the District of Columbia jail at 12:25 a.m. after completing a four months' sentence begun June 24 for jury shadowing in the Fall-Sinclair conspiracy trial.

COLORADO CONVICTS KILL IN MUTINY.

Oct. 3—A mutiny of convicts at the Colorado State Penitentiary, at Canon City, lasted until Oct. 4, when the four leaders of the revolt killed themselves and the rest surrendered. Seven guards and five felons were killed. The chapel mess hall, and two cell-houses were burned. The warden's quarters and several other buildings were damaged by dynamite used to effect a breach in the convicts' stronghold in cell-house No. 3. The damage exceeds $300,000.
Four of the guards who lost their lives were shot by their convict captors when Warden F. E. Crawford refused to accede to the demand of the ringleaders for safe conduct to freedom. The five convicts who are dead were Danny Daniels, A. H. Davis, Melvin Majors alias George Reilly, Albert Morgaridge, and James Purdue. Daniels, it was charged, killed 11 of the 12 who were slain, including himself.
—Gustav Stresemann, German Foreign Minister and ex-Chancellor, died of a stroke, at Berlin.

PREMIER MACDONALD'S VISIT.

Oct. 4—The British Premier, J. Ramsay MacDonald, and his daughter, Miss Ishbel, arrived at N. Y. on the Berengaria, received the freedom of the City, and went to Washington with U. S. Secretary of State, H. L. Stimson, where the Premier was greeted at the White House by President Hoover.
The President, the Secretary of State, and the Premier, and their party, motored late on Oct. 5 to the Hoover fishing camp near Orange, Va., where they discussed disarmament. The outcome was that on Oct. 7, invitations were issued from London to the United States, France, Italy, and Japan to a 5-Power Naval Conference at London in January, 1930. On that day the Hoover-MacDonald party returned to Washington, and the Premier spoke before the Senate and House and was the guest of honor at a state dinner at the White House. On Oct. 9 he was given an honorary degree by George Washington University. On Oct. 10 he gave a dinner at Philadelphia to the doctors who treated him there in 1927 for throat trouble. Then he and his daughter returned to New York City, where he spoke on several occasions. They went to Buffalo and Niagara Falls on Oct. 14, and entered Canada on Oct. 15.
—At New Orleans, two Negroes, Edward McKay and William Virgets, convicted of attacks upon white women, were hanged in the Orleans Parish jail. Each entered the death chamber in a procession led by a Negro banjoist, a Negro minister, the condemned with guards, and another banjoist bringing up the rear.
Oct. 5—A seaplane of the N. Y. City Police Department alighted at the east end of the Cape Cod Canal in Mass., alongside the tug, Harry F. Keeler, arrested the Captain, and flew back with him to Astoria, whence he was taken by motor to Manhattan and charged with the death, on Oct. 4, of a barge skipper, near Ft. Schuyler, in a fist fight.
—A surgeon at Berlin removed her appendix from Mrs. James J. Tunney (Mary J. Lauder), wife of the ex-champion boxer.
Oct. 6—At N. Y. City, 2,000 market teamsters and truck drivers went on strike, paralyzing the delivery of $6,000,000 worth of fresh fruit and vegatables. The railroads, late on Oct. 7, embargoed all shipments of fresh vegetables and fruits to the city. The drivers got a raise of $5 a week and the strike ended on Oct. 8, with an agreement that farm produce brought into the city on private trucks would first have to be taken to a station on West Street and reloaded onto union trucks before delivery could be made.
—At Merida, Yucatan, Col. Charles A. Lindbergh and his wife were received by local authorities and officials when they flew from Belize, British Honduras, on an archeological expedition to study Maya ruins. The Colonel was accompanied by Drs. Alfred Kidder and Oliver Ricketson, Carnegie Institution scientists; Mrs. Lindbergh and a co-pilot.
Oct. 7—Secretary Mellon will remain at the head of the Treasury Department for the next three and one-half years, the White House announced.
—At Reno, Nev., on the ground of desertion, Mrs. Nathalie Sedgwick Colby, author, was granted a divorce from Bainbridge Colby, Secretary of State in President Wilson's Cabinet.
—France distributed prizes to growers and celebrated, nationally, its 319,000,000-bu. wheat crop.
—At Valparaiso, Ind., the charge of murdering Miss Cameola Soutar, her husband's housekeeper, was dismissed as against Mrs. Catherine Cassler, who once was sentenced at Chicago to be hanged, but got a new trial and later the charge was dropped.

FALL FOUND GUILTY.

—Albert B. Fall, former Secretary of the Interior, was put on trial in the Supreme Court of the District of Columbia, charged with accepting a bribe of $100,000 from Edward L. Doheny in the leasing of the Elks Hills naval oil reserve during the Harding Administration. Doheny, on Oct. 18, testified for Fall, saying the money was simply a loan to an old friend. The jury, Oct. 25, pronounced Fall guilty, and suggested mercy. He was sentenced, on Nov. 1, to $100,000 fine and a year in prison. Notice of appeal was given and Fall posted $5,000 bail.
—Alligators ate all seven of the passengers on a wrecked launch in the Grijalva River, Mexico.
Oct. 8—The Philadelphia Athletics beat the Cubs at Chicago, 3 to 1, and won the first game of the 1929 baseball World Series. They won the second game, 9 to 3, on Oct. 9. The Chicagos won, at Philadelphia, the third game, 3 to 1, on Oct. 11; the Athletics won the fourth game at Philadelphia, 10 to 8, on Oct. 12; they won the fifth game and the World Series, 3 to 2 on Oct. 14 at Philadelphia. President Hoover was a spectator at the final game.
Oct. 9—In a joint statement, President Hoover and Prime Minister MacDonald announced, at the end of their five days of private meetings, that Great Britain and the United States: (1) Resolve to accept the Kellogg peace pact "as a positive declaration to direct national policy in accordance with its pledge." (2) Declare that "war between them is unthinkable." (3) Have agreed to begin conversations to solve "old historical problems" which have "changed their meaning and character" in the light of the "assumption that war between us is banished," so that satisfactory solution has become possible. The United States,

Great Britain, France, Italy and Japan agreed later to a naval disarmament conference at London.

—The U. S. Senate, 45 to 36, defeated the King amendment to the tariff bill granting independence to the Philippines.

—The Court at Louvain, Belgium, upheld N. Y. Architect Whitney Warren's demand that the inscription originally selected for the balustrade should be placed thereon and ordered that the balustrade be replaced at the university's expense with Warren's inscription: "Destroyed by German fury; restored by American generosity." The tribunal ruled that the balustrade could be removed once it had been completed and officially accepted.

President Hoover, on Oct. 18, in a public statement, opposed the inscription. He was Chairman of the committee that raised 70 per cent. of the reconstruction fund.

—At N. Y. City, General Sessions Judge Francis X. Mancuso, Chairman of the failed City Trust Co., resigned from the bench.

—Habibullah Khan, the brigand chieftain who was known as Bacha-I-Sakao, "son of the water-carrier," before he took up arms early this year in revolt against King Amanulla and drove him from his throne of Afghanistan, has been defeated and driven from Kabul, the capital. Nadir Khan was proclaimed Amir, or King, on Oct. 15.

Oct. 10—Charles Delos Waggoner, former president of the Bank of Telluride, Col., who had admitted that he defrauded six New York banks out of $500,000 credit, threw himself on the mercy of the Court at N. Y. City, and received a fifteen-year term at Atlanta Penitentiary. The sentence was the heaviest known to have been imposed in any United States tribunal for use of the mails to defraud. It was reduced later to ten years. Waggoner disposed of $270,000 deposited in the Central Hanover Bank and Trust Company, by liquidating an indebtedness of $215,000, by depositing $45,000 in the credit of the Bank of Telluride and by withdrawing $10,000 for himself. The First National Bank of Pueblo, Colo., received the remaining $225,000 as a deposit, but this money, on Waggoner's order, has been withdrawn and transferred to other banks and individuals in driblets of $20,000 to $50,000.

—At Paris, Doris Stevens, feminist leader, was granted a divorce from Dudley Field Malone, N. Y. lawyer, on the ground of abandonment.

Oct. 11—The official delegation of Poland sent to the United States to honor General Casimir Pulaski, the Polish hero of the American Revolution, was presented to President Hoover at a White House ceremony on the occasion of the 150th anniversary of Count Pulaski's death.

ENGLAND'S LARGEST DIRIGIBLE.

Oct. 12—The R-101, the world's largest dirigible balloon, was "launched" by the British Government at Cardington, England. On Oct. 14 it carried a crew of 38 and 14 passengers on a 300-mile trial flight. The craft cost $5,000,000.

—The Australian general Parliamentary elections swept out of power Prime Minister Stanley Bruce. The Labor Party got control of the House; the Nationalists held control of the Senate.

—At Atlanta, Ga., James Rae Clarke, 52, former head of the New York banking house of Clarke Brothers, died in his cell at the Federal Prison. He was received at the prison on Aug. 25 to serve a term of eight years for violation of the banking laws.

Oct. 13—The Canadian Pacific trans-Atlantic liner, Empress of Canada, enroute to Vancouver, B. C., piled on the rocks at Homer Bay, near Albert Head, in the Straits of Juan de Fuca during a dense fog. The passengers were landed safely. The ship was refloated on Oct. 15.

—At Seattle, Wash., the Russian aviators, flying their plane Land of the Soviets from Moscow to New York, arrived from Waterfall, Alaska. It reached Vancouver, Wash., on Oct. 17; on Oct. 19 it landed at Oakland, Calif.; Salt Lake City was reached on Oct. 22; North Platte, Nebr. Oct. 23; at Chicago on Oct. 24; at Detroit, Oct. 28; and landed, on Nov. 1, at Valley Stream (Curtis Airport), L. I., N. Y.

—At Beacon, N. Y., three demented criminals escaped from Matteawan State Hospital for Criminal Insane by using a ladder and tools left by electricians, cutting a hole through a metal ceiling and sliding to the ground along a stretch of electric cable.

Oct. 14—At New Rochelle, N. Y., Isidor Atlas upbraided Samuel Malakoff, realtor, for foreclosing a mortgage on Atlas' meat shop. Then Atlas killed Malakoff and himself.

Oct. 15—British Premier MacDonald, daughter and party, ended their U. S. visit and went from Niagara Falls to Toronto; they reached Ottawa on Oct. 17, and Montreal on Oct. 21. They left for Europe on Oct. 25, by way of the St. Lawrence River.

SENATE INVESTIGATING LOBBYISTS.

—The U. S. Senate's investigation of lobbying in Washington opened with testimony that pottery interests had attempted to overthrow F. L. Koch, an expert of the Federal Tariff Commission on the grounds that he was prejudiced.

—Rudy Cimino, 23, a "human fly," climbed on the outside to the top of the 44-story Civic Opera Building at Chicago, then tried to slide down a rope head-first to the sidewalk, but lost his grip and fell 20 stories, killing himself and a passing pedestrian.

—At Wallingford, Conn., Mrs. Anna Bryan Ayers, 41, and W. H. Gaylord, 46, were found shot to death in a hotel room. She earned $100,000 a year writing "ads," was a divorcee, with 3 sons; Gaylord was a bookkeeper, married, with children.

Oct. 16—35 prohibition raids at various points from Atlantic City to the eastern end of Long Island resulted in the exposure of a bootlegging syndicate with nominal headquarters in a room on W. 43rd Street, N. Y. City; 32 men were placed under arrest, and a fully equipped unlicensed radio broadcasting station six miles from Highlands, N. J., was taken over by the prohibition agents.

—A bureaucracy at Washington, which "has a strangle hold on Congress is the most immediate, imminent and insidious danger to our form of government," F. Dupont Smith, Hutchinson, Kan., chairman of the Standing Committee on American Citizenship, charges in his report to the American Bar Association, the first section of which is in session at Memphis, Tenn. The report is signed by all members of Smith's committee.

—After 127 years of publication, The Edinburgh Review has ceased to exist, because, its editors assert, "Modern readers are not willing to wait a quarter of a year for observations on life, letters history and society."

—At Washington, the expenditure of more than $500,000 since 1921, or an average of $70,000 a year, by the U. S. Beet Sugar Assn., in representing its members before government departments and in impressing upon members of Congress the need for higher tariff rates to "adequately protect the domestic industry" was revealed in testimony before the Senate lobby investigating committee.

Oct. 17—U. S. Senator Hiram Bingham, Republican, of Connecticut, appeared before the lobby investigating committee and defended his employment of C. L. Eyanson, an official of the Connecticut Manufacturers' Association, to advise him during the tariff hearings before the Senate Finance Committee.

—At N. Y. City, the guard of an armored money car drove off with $63,000 of payroll money, abandoned the car, and vanished with the cash.

—At Seattle, Wash., fire in the Portland Hotel killed 8 and hurt 14.

OHIO WATERWAY CELEBRATION.

—At Pittsburgh was begun the Ohio Valley's celebration of the completion of the thousand-mile, 9-ft. deep waterway from Pittsburgh to the Mississippi; opened with five members of the President's Cabinet, the Governor of Pennsylvania and the presidents of six railways as the chief guests of honor. President Hoover made the trip down the canalized Ohio River, Oct. 22-23, on the U. S. Govt. stern-wheel steamboat, Greenbrier, which started at Cincinnati, went 82 miles, moored to the bank, and continued the next day to Louisville.

Oct. 18—At Toronto, the American Federation of Labor, at the concluding sessions of its annual convention, instructed its executive council, "in view of the existence of the Catholic Union movement in the Province of Quebec," to take such action as may serve to bring about conditions under which Quebec workers will have the right freely to join unions affiliated with the American Federation of Labor.

Oct. 19—The U. S. Senate, 42 to 34, attached the Norris export debenture "rider" to the Hawley-Smoot tariff bill.

—Christian Rakovsky, former Soviet Ambassador to Paris, and former President of the Ukraine Republic, has been arrested by the Soviet secret police and deported to Barnaul, Siberia.

Oct. 20—A malady communicated by parrots has killed several actors and other persons in Santa Fe Province, Brazil.

EDISON'S GOLDEN JUBILEE.

Oct. 21—Thomas A. Edison, at Dearborn, Mich., reenacted his discovery of the electric light in

the same laboratory in which he worked in Melno Park, N. J., fifty years ago. Step by step he repeated the scene of his invention in the presence of President Hoover, Mrs. Hoover and Mr. and Mrs. Henry Ford. Noted inventors and outstanding leaders of industry gathered at a dinner of 500 guests in honor of Edison in a replica of Independence Hall, in Henry Ford's reconstructed early American Greenfield Village to honor the inventor. He spoke over the radio, but grew weak. The President and Owen D. Young, toastmaster, spoke in his praise.

The exercises at Dearborn followed a motor trip by the President through Detroit.

The President, the Edisons and Fords rode from the River Rouge auto plant, Dearborn, on an ancient train of 3 cars drawn by Sam Hill, an ancient engine. Edison played the role of "news butcher" on the ancient train from which he was tossed by an irate conductor in his youth. One of his customers was President Herbert Hoover, who took a peach.

Prof. Albert Einstein, at Berlin, and Commander Byrd, in the Antarctic, radioed greetings.

—Carrying 169 persons, the new German hydroplane, DO-X, rose near Friedrichshafen, from the water at Altenrhein, on the Swiss side of Lake Constance, at 11:15 a.m., flew at an average height of 600 feet, reaching 1,200 feet at times, and crossed over parts of Switzerland, Germany and Austria before making a smooth landing in its harbor at 12:07 o'clock. The total load carried is estimted at exceeding fifty tons.

SENTENCES IN TEXTILE KILLINGS.

—At Charlotte, N. C., a jury convicted of manslaughter those on trial for the shooting to death of Police Chief O. F. Aderholt on June 7 last, in connection with the cotton mill strike at Gastonia. Jail terms of 17 to 20 years were imposed on Fred Erwin Beal of Mass., Clarence Miller of N. Y., George Carter of New Jersey, and Joseph Harrison, another outsider; 12 to 14 year terms went to Louis McLaughlin and William McGinnis of Gastonia; and a 5-year term to K. Y. Hendricks of Gastonia. Beal, Miller, Carter and Harrison received second sentences of ten years for shooting Patrolman Tom Gilbert, but these are nominal sentences, as they will run concurrently with the heavier ones. The other defendants received lighter sentences to run concurrently. Beal got out on bail on Nov. 5, pending appeal.

Oct. 22—Urban F. Diteman, Jr., of Billings, Mont., left Harbor Grace, N. F., in a light, low-wing, open cockpit monoplane, the Golden Hind, with 165 gallons of gasoline, bound for London. He was not heard from.

—Beaten in the French Chamber of Deputies, 288 to 277, the Cabinet of Aristide Briand resigned.

—A ragged Chilean youth pointed a pistol at President Carlos Ibanez, near Santiago, but the trigger failed to map.

—At Tampa, Fla., Walter Gramm, Chicago coal dealer, was fined $1,000 and costs in Federal Court after he had assumed responsibility for liquor found in trunks brought into this country last May from Cuba by his brother-in-law, Representative Alfred Michaelson, Republican, of Illinois. Gramm pleaded guilty to violating the prohibition law.

Oct. 23—President Hoover, speaking from Louisville's memorial to the World War dead, announced a plan to turn millions of dollars now used for the construction of battleships to the completion of a vast network of inland waterways. He said the Mississippi and its tributaries should be modernized within five years. He declared in favor of the St. Lawrence deep-water route to the Atlantic. He returned to Washington on Oct. 24.

—The U. S. Senate lobby investigating committee heard Herbert C. Lakin of New York, president of the $165,000,000 Cuba Company, testify that the interests of large corporations and the business world would be unsafe unless they maintained lobbies in Washington.

STOCK EXCHANGE PRICES SMASHED

—The Wall Street Stock Market was smashed down $5,000,000,000 in an avalanche of selling, one stock declined 96 points.

—The car ferry-boat, Milwaukee, sank in Lake Michigan, off Racine; 52 persons lost.

—One athlete out of every seven engaged in intercollegiate competition is "subsidized" to a point bordering upon professionalism, says a report on "American College Athletics," made public by the Carnegie Foundation for the Advancement of Teaching after a survey which has consumed more than three and a half years and entailed visits of 130 colleges and secondary schools.

Oct. 24—Total sales on the New York Stock Exchange were 12,894,650 shares, as compared with the 8,246,000-share record set on March 26; and on the Curb were 6,337,415 shares, as compared with the 3,715,400 record established Oct. 21. A total of 974 separate issues were dealt in on the Exchange, this figure establishing a new record. Bonds, which were strong, reached a volume of $23,233,000, the biggest day in that market since April 23, 1926.

Bankers conferred at J. P. Morgan & Co.'s office and issued a reassuring statement, saying business is fundamentally sound. The Federal Reserve Board held two meetings at Washington. Demoralization prevailed in the grain markets on the Chicago Board of Trade coincident with the smash in the Stock Market.

—Joseph R. Grundy, President of the Pennsylvania Manufacturers' Association, told the U. S. Senate Lobby Investigating Committee he had lobbied for higher rates in every tariff bill since the Dingley act of 1897 because he believes the prosperity of the United States is bound up with the protective tariff. He added that he has assisted in raising Republican campaign funds in Pennsylvania, including $800,000 in 1924 and about $700,000 from the Eastern part of the State alone in 1928, and that he is now spending $2,000 a month out of his own pocket to maintain an office in Washington to influence the Hawley-Smoot bill.

HUMBERT ESCAPES ASSASSINATION.

—At Brussels, Crown Prince Humbert of Italy laying a wreath on the tomb of Belgium's Unknown Soldier, just after the official gazette had appeared with announcement of his betrothal to Princess Marie Jose of Belgium, escaped a bullet fired by Fernando Rosa, 21, an Italian anti-Fascist, who had come from Paris on a forged passport.

—Fire at Hollywood, Calif., destroyed part of the plant of the Consolidated Film Laboratories, Inc.

—A sentence of two years' imprisonment and the payment of a fine of £50 ($242), plus the costs of the trial, was pronounced on Sheik Taleb Markah, on trial in the Jerusalem District Court as one of the instigators of the Hebron disorders, in which sixty-six Jews were killed and scores injured.

—The Mt. Hope Bridge over Narragansett Bay, between Bristol, R. I., and Portsmouth, R. I., was opened, and the ferry (operated since 1680) was closed.

Oct. 25—Total sales on the N. Y. Stock Exchange were 5,923,220 shares; on the Curb Exchange, 2,731,900 shares. President Hoover said at the White House: "The fundamental business of the country, that is, the production and distribution of commodities, is on a sound and prosperous basis."

—At N. Y. City, Marcia Estardus, night club entertainer, won an award of $75,000 from a jury in Supreme Court in an action against Harry K. Thaw to recover $100,000 for injuries she said he inflicted on her when she attended a New Year's Eve party at his home in 1926. A previous trial had resulted in a disagreement. The Court recuced the verlict to $25,000.

—17 distilleries, 12 of them the old plants of famous brands of whiskies and five new ones, were incorporated at Baltimore under Maryland law to make whisky, wine and gin, "in so far as is now or hereafter may be, permitted by law."

Oct. 26—A daughter was born to Mrs. T. W. Evans, aboard a cabin airplane as it circled 1,200 feet above Miami, Fla.

—Governor Morgan F. Larson, of New Jersey, officially opened the 250th anniversary of the founding of the City of Trenton, when he addressed 20,000 persons at the dedication of the new Mercer Airport.

—The seaplane, City of Rome, bound from London to India, with 4 passengers and a crew of 3, was lost in the Gulf of Genoa, Italy.

—"Beneath the dignity of the Senate and tending to shake the confidence of the American people in the integrity of legislation," was the statement of the Senate lobby committee in submitting to the U. S. Senate a report dealing with the circumstances attending the "loan" of Charles L. Eyanson, high official and tariff expert of the Connecticut Manufacturers' Association, to Senator Hiram Bingham, Republican, of Connecticut, during the tariff hearings.

Bingham, on Oct. 28, in a speech in the Senate; accused the committee of "dirty politics."

Oct. 27—At Los Angeles, Alexander Pantages, theatre owner, was convicted on a charge of assault on Eunice Pringle, seventeen-year-old dancer, by a Superior Court jury, which recommended that Pantages be sentenced to the state penitentiary for the term prescribed by law, but urged that clemency be extended.

—In the Czechoslovak Parliament election, the various groups of Socialists won and the Communists lost. The Cabinet resigned.

Oct. 28—Sales on the N. Y. Stock Exchange totaled 9,212,800 shares; on the Curb Exchange, 4,152,900 shares. Losses in quoted values exceeded $10,000,000,000. European and out-of-town American security exchanges also were affected. On the over-the-counter market bank and investment trust stocks fell, losses of 3 to 25 points occurring in investment trust shares, and leading bank and trust company stocks dropping from 10 to 60 points in the lower-priced issues. In the high-priced bank stocks prices fell from 100 to 500 points. As on the Stock Exchange, wide breaks in high-priced stocks featured trading on the Curb.

—At Mexico City, Miss Elizabeth Morrow, eldest daughter of Ambassador and Mrs. Dwight W. Morrow, began her career as a teacher, holding her first English class at one of the primary schools. Miss Morrow devoted her half-hour period to teaching three phrases: "Good morning, boys," "This is my dog," and "This is a dog."

—On the Capitoline Hill, where ancient Rome used to crown her poets, Premier Mussoline inaugurated the Academy of Italy, the members of which have been chosen by him.

—The execution of two prominent Moscow diamond merchants after their conviction of smuggling diamonds out of the Soviet Union brought the total of reported executions to 63 in the last four days. Most of the alleged offenses were political and were particularly concerned with opposition to the government policies of grain collection and formation of agricultural co-operatives.

STOCKS CRASH ON HEAVY SALES.

Oct. 29—Sales on the N. Y. Stock Exchange totaled 16,410,030 shares; on the Curb Exchange, 7,096,300 shares. Sales since Jan. 1, 1929 on the N. Y. Stock Exchange have been 950,797,190 shares; on the Curb Exchange, 411,311,035 shares. During the day the stock prices virtually collapsed, swept downward with gigantic losses in the most disastrous trading day in the stock market's history. Billions of dollars in open market values were wiped out as prices crumbled under the pressure of liquidation of securities which had to be sold at any price. There was a rally just at the close, which brought many leading stocks back from 4 to 14 points from their lowest points of the day. One Curb house suspended. 1,000,000 persons, it is said, have been speculating in stocks.

—The U. S. Senate Lobby Investigation Committee listened while Joseph R. Grundy declared that "backwaid" States such as those represented by several committee members should not meddle with tariff problems, but should leave that issue to the determination of States like Pennsylvania, which, he said, assist in paying the upkeep of the States first mentioned.

—The Goodrich passenger and freight steamship Wisconsin went to its doom in Lake Michigan, off Kenosha. Nine men, including Captain H. Dougal Morrison, of Chicago, veteran Great Lakes skipper, are known to be dead.

—The $20,000,000 Farmers' National Grain Corporation was set into motion by the Federal Farm Board with a program which involves the handling of 500,000,000 bushels of grain annually. It will be the central marketing agency for hundreds of grain co-operatives of the country and is the first of a chain of such organizations to be sponsored by the board for agricultural commodities.

Oct. 30—Sales on the N. Y. Stock Exchange were 10,727,320 shares; on the Curb Exchange, 3,809,200 shares. The two Rockefellers announced they were buying "sound, common stocks" for investment. The rally in prices that began late on Oct. 29, continued. Another Curb Exchange house suspended, a brokerage firm at Worcester, Mass., suspended, one at Madison, Wis., and one at Amsterdam, Holland. The break in prices in Wall Street and the consequent stock market losses are sending home in a hurry many Americans who have been enjoying themselves in Europe on paper profits.

WARDER GIVEN PRISON SENTENCE.

—At N. Y. City, Frank H. Warder, former State Banking Superintendent, on trial for bribery in relation to the affairs of the wrecked City Trust Company, took the witness stand in his own defense. The jury, on Nov. 5, found him guilty of taking a $10,000 bribe from F. M. Ferrari, President of the concern, now dead. He was sentenced Nov. 8, to 5 to 10 years in prison. Notice of appeal was given.

—With continuance of the liquor control system as the main issue, the voters of Ontario Province, Can., in the general election, indorsed the Conservative government, headed by Premier G. Howard Ferguson, returning it to power for a third term and increasing its majority in the Legislature.

—Before a gathering of scientists, government officials and members of the diplomatic corps, President Hoover handed to Mme. Marie Curie co-discoverer of radium, a draft for $50,000, to purchase a gram of the mineral as a gift from her American friends and admirers.

Oct. 31—Sales on the N. Y. Stock Exchange totaled 7,149,390 shares; on the Curb Exchange, 2,288,000 shares. They opened at noon and closed at 3 p.m. There were declines in quotations on many securities, but buying of "sound" standard stocks by powerful interests buoyed the market. The Federal Reserve Bank of New York reduced its rediscount rate from 6 to 5 per cent. and announced that the total of loans to brokers and dealers for the week ended Oct. 30 had decreased $1,096,000,000 to $5,538,000,000. The Bank of England lowered its discount rate from 6½ to 6 per cent. The Stock Exchanges in N. Y. City and other large cities closed at 3 p.m. for the rest of the week—Friday and Saturday.

—President Hoover publicly bade the U. S. Senate hasten to passage within 2 weeks the tariff bill it had been considered since June. He said: "he could not believe and therefore would not admit that the United States Senate was unable to legislate;" and he added that the interests of the country required that legislation should be completed during the special session.

NOVA SCOTIA ENDS PROHIBITION.

—The Province of Nova Scotia ended 13 years of prohibition by voting for the sale of liquor under government control.

—Collision of the lake freighters, Senator and Marquette, sunk the former off Port Washington, Wis., and 7 were drowned.

—At Warsaw, Marshal Joseph Pilsudski and 90 army officers invaded the Polish Parliament and postponed its opening session, which later was adjourned to Dec. 5.

NOVEMBER.

Nov. 1—Bainbridge Colby, 59, ex-U. S. Secretary of State, married, at Brooklyn, Mrs. Joseph N. Ely, 39, a widow. Her maiden name was Anne Von Ahlstrand. The groom's first wife divorced him Oct. 7 at Reno, Nev.

—At Minneapolis, properties valued at $20,000,000, owned and managed by Wilbur B. Foshay and the W. B. Foshay Co. were thrown into receivership.

Nov. 2—A wireless report from Kabul, Afghanistan, announced the execution of Bacha Sakao, usurper of Amanullah's throne and known as "The Water Boy of the North." Eleven of his allies were executed at the same time.

—In France, a new Cabinet was formed, with Andre Tardieu as Premier. Briand is Minister of Foreign Affairs.

—The skeleton of Dorothy Rogers, 4, daughter of Allen Rogers, insurance agent, of Woodbury, N. J., was found at National Park, N. J. The skeleton of her brother, Timothy, 2, had been found near Absecon, N. J.

Nov. 3—American-born sons of Italian parents, American citizens of Italian birth, and citizens of Italy living in the United States may return to Italy without fear of compulsory conscription or of incurring any responsibility for military service duties in time of peace, according to a statement issued by the Italian Embassy at Washington, D. C.

—At Roosevelt Field, L. I., Baron Friedrich Karl von Koenig Warthausen, 23, amateur pilot, carrying as passengers two horned toads from Texas and a white Siamese cat presented to him by the Crown Prince of Siam, arrived in his tiny monoplane from Albany, completing, except for the Pacific Ocean and two short gaps in Asia, an 18,000-mile flight from Berlin to New York.

—400 were killed in Guatemala by an eruption of the volcano, Santa Maria, 70 miles northwest of the Capital.

BINGHAM CENSURED BY SENATE.

Nov. 4—The U. S. Senate, 54 to 22, passed the following: "Resolved, that the action of the Senator from Connecticut, Mr. Bingham, in placing Mr. Charles L. Eyanson upon the official rolls of the Senate and his use by Senator Bingham at the time and in the manner set forth in the report of the subcommittee of the Committee of the Judiciary (report No. 43, Seventy-first Congress, first session), while not the result of corrupt motives on the part of the Senator from Connecticut, is con-

trary to good morals and Senatorial ethics and tends to bring the Senate into dishonor and disrepute, and such conduct is hereby condemned."

—At Draguignan, France, a jury freed Richard Corbett, who said he shot and killed his mother last May to relieve her sufferings from cancer.

—Sales on the N. Y. Stock Exchange totaled 6,202,930 shares; on the Curb, 3,001,400 shares. Prices kept on going down.

Nov. 5—The British House of Commons approved, 324 to 199, resumption of diplomatic relations between Great Britain and Soviet Russia, as negotiated by Arthur Henderson, Foreign Secretary.

Nov. 6—Sales on the N. Y. Stock Exchange were 5,914,760 shares; on the Curb, 2,131,000 shares. The exchanges closed for the day at 1 p.m. Prices kept on going down.

—Six men were killed and two seriously burned when a German air liner bound from London to Berlin crashed in flames on a wooded hillside in Surrey after taking off from Croydon Airdrome.

—At Weatherford, Tex., R. H. Hamilton was acquitted of murder for slaying his son-in-law, Tom Walton, Jr., in Hamilton's Amarillo law office last May 4..

—U. S. Senator Brookhart, of Iowa, told the Dist. of Col. grand jury what he saw at the dinner which, it is alleged, Walter J. Fahy, of N. Y. City, gave to old and new Republican Senators, at Washington in Dec. 1926..

Nov. 7—A parrot which kept crying "More margin!" was found by a New York City policeman at 5th Ave. and 81st St. Sales on the Stock Exchange totaled 7,184,060 shares, and on the Curb, 2,380,100 shares. Prices went on down, but rallied some at the close of the trading, at 1 p.m.

—Mrs. Hulda Browaski, chief clerk in the bond department of a stock broker, at N. Y. City, plunged 37 stories from the roof of the building to the pavement of Cedar St.

Nov. 8—Sales on the N. Y. Stock Exchange were 3,214,660 shares; on the Curb, 1,274,100 shares. The exchanges closed at 1 p.m. Prices flattened a bit toward the end. A bank officr at Camden, N. J., confessed he had lost $70,000 of the funds in Wall St.

—John J. Riordan, 48, President of the County Trust Co., shot himself to death at his home, W. 12th St., N. Y. City. His death was kept secret by the authorities until Nov. 9, when the banks and stock exchange were closed.

—The New Zealand government has concluded an agreement with the Salvation Army whereby conscientious objectors will have the alternative of social service in the Salvation Army or service in the military ranks.

—At Los Angeles, the court granted 10 years probation to Mrs. Alexander Pantages, whose car had killed a Japanese, and ordered her to pay $66,500 to the victim's family, and $12,000 to others in his car.

Nov. 9—At Baden-Baden, Germany, Basle, city of northwest Switzerland, was chosen as the site for the new bank for International Settlements by the organizing committee set up under the Young reparations plan.

—The court at Los Angeles passed prison sentence of 1 to 50 years on Alexander Pantages, convicted of assaulting criminally Eunice Pringle, 17, a dancer. Notice of appeal was filed by the defense.

MIRACLES REPORTED AT MALDEN.

Nov. 10—At Malden, Mass., after 150,000 pilgrims had crowded all day into Holy Cross Cemetery to reach the tomb of a young priest where miraculous cures have been reported by visitors for the last ten days, police and cemetery officials removed the stone temporarily as the only method of clearing the graveyard. The pilgrimages continued for days, and many cures were claimed. Offerings were left on the tomb. Cardinal O'Connell went there several times and watched the throngs.

—Five men invaded the home in Champaign, Ill., of Henry M. Harris, and obtained $1,000 in cash and jewels valued at $50,000. Jewels valued at $58,000 and $1,000 in cash were obtained by four St. Louis bandits who held up Andrew W. Johnson, shoe manufacturer, and his wife, and Mr. and Mrs. J. Fred Byers, of Pittsburgh.

—The West Coast Limited, Southern Pacific passenger train, was wrecked near Saugus, Calif., by two robbers who entered four coaches and held up passengers.

—In Brazil, the City of Mendoza has been under martial law since the assassination of former Governor Carlos Washington Lencinas of Mendoza Province, who was shot and killed. Jese Caceres, who is alleged to have fired the fatal shot, died of wounds.

Nov. 11—Miss Ruth Rockwell, 18, of Philadelphia, committed suicide by leaping from a plane in which she was the sole passenger 2,000 feet in the air over Valley Stream, L. I.

HOOVER WANTS FREE GOOD SHIPS.

—In his Armistice Day address to the American Legion, at Washington, President Hoover said: "For many years, and born of a poignant personal experience, I have held that food ships should be made free of any interference in times of war. I would place all vessels laden solely with food supplies on the same footing as hospital ships. The time has come when we should remove starvation of women and children from the weapons of warfare."

—Sales on the N. Y. Stock Exchange totaled 3,367,150 shares; on the Curb, 1,895,185 shares. Stocks kept on going down. The exchanges closed at 1 p.m.

—Eight or ten employees of the Union Industrial Bank at Flint, Mich., stole, and lost in stock speculation, $3,592,000 of the bank's cash and securities, according to the president, Charles S. Mott, who is Vice-President of General Motors Co.

His wife was sentenced to four years in prison and was fined $2,500.

—Lieut. Carl Ben Eielson, famous pilot of the North, was wrecked on the ice-bound Siberian coast while making a second flight to rescue passengers on the frozen-in fur trading ship Nanuk.

—Rain and wind destroyed hundreds of miners' homes in Rhondda Valley, South Wales.

AMBASSADOR BRIDGE DEDICATED.

—The Ambassador Bridge over the Detroit River, between the U. S. and Canada, was dedicated. It cost $20,000,000. The river span is 1,850 ft. long. The roadway is 47 feet wide. Work was begun in 1927.

Nov. 12—Sales on the N. Y. Stock Exchange (10 a.m. -1 p.m.) were 6,452,770 shares; on the Curb, 2,204,700 shares. Stocks kept on going down.

—George Small, who escaped from Auburn prison during the convicts' revolt last July, turned up in Brooklyn with three pistols and was captured, with a bullet wound in his head, after a running fight with the police, in which Mrs. Irene Sumner, of Johnson Street, Brooklyn, who was wheeling her child to a hospital, was killed.

—Bishop William T. Manning of the Episcopal diocese of New York made public a letter to the Rev. Dr. Karl Reiland and the wardens and vestrymen of St. George's Church, Stuyvesant Square, "officially admonishing" them not to permit a communion service to be held in St. George's Church "at which the officiant is to be a minister who has not received Episcopal ordination."

Nov. 13—Sales on the N. Y. Stock Exchange (10 a.m. -1 p.m.) were 7,761,450; on the Curb, 2,779,550 shares. Prices kept on going down. A brokerage firm put in, near the close, a standing bid for 1,000,000 shares of Standard Oil of N. J., at $50 a share. That stock had fluctuated between 50 and 55, closing at 50¾ for a net loss of 3¼ points. Transactions in it amounted to 108,700 shares. As far as is known the bid is the largest ever made.

—At Rochester, N. Y., Robert M. Searle, who rose from office boy for Thomas A. Edison to an outstanding figure in public utilities circles, committed suicide at his home after worrying over stock market losses.

—A platoon of burglars captured the U. S. Naval Supply Base in Brooklyn and, taking prisoner a naval officer, an engineer and five armed guards, held it for five hours while they tried in vain to force a paymaster's safe containing $84,500.

—U. S. Secretary of War, James W. Good, 63, was operated on at Washington, D. C., for appendicitis. He died on Nov. 18. His body lay in state at the White House, and then was buried at Cedar Rapids, Iowa.

—At Bagdad, Sir Abdul Muhsin, Premier of Iraq, was found dead from bullet wounds.

Nov. 14—Sales on the N. Y. Stock Exchange were 5,569,360 shares; on the Curb, 2,287,500. The N. Y. Fed. Reserve Bank cut the rediscount rate to 4½ per cent. Stock prices rallied some. At Philadelphia, a broker's clerk who had lost $209,000 of his employer's money, was held in $100,000 bail for trial. Also at that city, W. P. Brown, 35, a broker, shot himself to death. At N. Y. City the Bankers' Capital Corp. has been petitioned into bankruptcy. At London, J. Horstman & Co., bankers, of Bishopsgate, suspended payment. The company had an authorized capital of £1,000,000 ($4,860,000).

—Seven robbers invaded a house party near Buffalo, and got $286,000 of jewels from Mrs. J. L. Carson, Jr., Mrs. R. A. Van Cleaf and other women. Rewards of $10,000 for each dead robber identified and $5,000 for each one taken alive were offered. They were caught alive.

Nov. 15—Wall St. prices kept on rallying. Sales on the N. Y. Stock Exchange were 4,339,980; on the Curb, 1,874,200.

—At Herington, Kan., Sheriff Sidney C. Dederick was exonerated by a coroner's jury inquiring into the killing of Mrs. Louise Horton, of Kansas City, an alleged whiskey runner.

Nov. 16—At Helsingfors, Finland, proposal by Justice Nordgren, of the Supreme Court, that the prohibition law which has been in effect for ten years be terminated has been rejected by his colleagues on the bench.

MEXICO ELECTS RUBIO PRESIDENT.

—The Mexico-U. S. border was closed against Americans and 50,000 troops were called out in anticipation of the Mexican presidential election, on Nov. 17, which resulted in favor of Pascual Ortiz Rubio, 52, civil engineer. More than 30 persons were slain in election riots at Mexico City and elsewhere. The defeated candidate was Jose Vasconcelos Ortiz, lawyer. Rubio takes office Feb. 5, 1930, and serves until Nov. 30, 1934, filling out the remainder of the six-year term for which former President Alvaro Obregon was elected in June, 1928, only to be assassinated three weeks later. The Chamber of Deputies ratified his election, on Nov. 28, and declared him president.

—Charles Joseph Leicester Stanhope, tenth Earl of Harrington, was killed while hunting with his own pack of hounds at Holbrook, Derbyshire.

Nov. 17—At Champaign, Ill., with several thousand fathers of University of Illinois students on the campus attending the annual Dad's Day festivities, Sheriff Elmer Shoaff and his deputies at 2 a.m. raided the Gamma Eta Gamma fraternity house, arrested three students and obtained about ten gallons of alcohol and other liquor. The University then dismissed 8 student members of that fraternity.

EARTHQUAKE OFF NEWFOUNDLAND.

Nov. 18—The Atlantic coast, from N. Y. City northward to Newfoundland and Nova Scotia was shaken by an earthquake for an hour in the afternoon while rain and snow pelted, and tidal waves, augmented by gales, swept up on the shore. At least 9 ocean telegraph cable wires were broken by the rise and fall of the ocean floor off Nova Scotia. The Olympic and other big steamers were shaken in that part of the sea. A tidal wave swept the south coast of the Burin Peninsula, Newfoundland, dragging homes back into the sea, destroying fishing boats and nets, and drowning over 40 persons.

—Sales declined in volume on the N. Y. Stock and Curb Exchanges. Prices sagged. At Providence, R. I., the brokerage house of Mandeville, Brooks & Chaffee went into voluntary receivership. At Two Harbors, Minn., John A. Barton, 54, killed his crippled mute daughter and himself. Harry K. Hopkins ended his life, at Newark, N. J.

—Marshall Ratcliff, who figured in the Cisco bank robbery in 1927, fatally wounded Deputy Sheriff Thomas Jones in trying to escape from the jail at Eastland, Tex., was lynched on Nov. 19 by men who made a grass rope and hanged him from a phone cable wire.

—At Alamogordo, N. M., in a special master's sale, Edward L. Doheny, oil operator, purchased the property of Albert B. Fall, former Secretary of the Interior, for $132,491.81.

Nov. 19—At the White House, heads of twelve of the country's leading railroads pledged to President Hoover their aid in maintaining full employment and business progress by proceeding with maximum programs of new construction and betterments "without any reference to Stock Exchange fluctuations."

—The stock market continued to rally, some.

—The N. Y. State Court of Appeals held that not only does the constitution prohibit the legislative chairmen from sitting in on the approval of lump-sum appropriations but the prohibition extends to the Governor as well, and such segregation must be left entirely to the head of the department receiving the appropriation.

Nov. 20—Charles I. Reid, amateur pilot, was killed when his plane crashed down on the roof of the new Y. M. C. A. building in 64th St., just west of Central Park, N. Y. City. Robert J. Baillc jumped with a parachute and saved his life. He landed on a roof across the way.

—The jail term of Harry F. Sinclair, oil refiner, for contempt of court, ended at midnight, at Washington, D. C., and 7 minutes later he left the premises, denouncing his imprisonment as unfair. He went to his stock farm, Rancocas, N. J.

—At Jerusalem, the first death sentence to be imposed upon a Jew in connection with the rioting in Palestine last August was pronounced against Joseph Urfall by Chief Justice McDonnell. The condemned man was convicted of having killed two Arabs in the quarter between Jaffa and Telaviv.

—Dewey Richmond, 31, pleaded guilty, at Cincinnati, to 2nd degree murder and got a life sentence for his part in robbing and strangling Bishop J. C. Hartzell, 86, in June, 1928.

HOOVER CONFERS WITH BUSINESS MEN.

Nov. 21—After a conference at the White House with captains of industry and business, President Hoover announced plans for the formation of a definite organization representing industry, trade and commerce for the mobilization of these agencies and their cooperation with the government in order to carry out his policy of stabilizing the business of the country and preventing such disturbances as have followed in the wake of the stock market dislocation.

—Henry Ford, one of those present, said he would boost wages. The stock slump, he said, was not the cause but the effect of the decline in business.

—The U. S. Court jury, at N. Y. City, in the alleged $300,000,000 poultry trust case, found 66 of the 68 defendants guilty.

—At N. Y. City, the indictment against Francis X. Mancuso, former judge of General Sessions, and his six associates on the board of directors of the defunct City Trust Company, charging participation in the allegedly fraudulent insolvency of the institution, were dismissed by Justice Arthur S. Tompkins, of the Supreme Court.

—A London police court sentenced Jacobus Van Dyn, of N. Y. City, to 15 strokes from the cat-o'-nine-tails and 18 months of hard labor for robbery with a pistol. The crime netted him $100.

—At Washington, D. C., a boiler explosion in the basement of McCrory's 5 and 10 cent store on 7th St., N. W., killed 5 and injured a score.

Nov. 22—Appearing before the U. S. Senate Lobby Committee, Fred I. Kent, a director of the Bankers Trust Co. of N. Y., stood pat on his declaration, made in a speech on Nov. 11, that uncertainty in the business mind over the fate of the tariff bill in the Senate, due to the opposition of the Republican-Democratic coalition, was in part responsible for the recent decline in the stock market.

—Railway executives of 97 per cent. of the country's railroads, meeting at Chicago, notified the President they would go ahead at full speed with their $1,247,792,000 new construction program, an increase of 38 per cent. over last year, of which $673,972,000 remained to be spent. Leaders in the building trades met with the President, Secretary of Commerce Lamont and Secretary of Labor Davis in the fifth of the White House series of group conferences.

—Leaving the Smoot-Hawley tariff bill suspended in the air until the regular session of Congress on Dec. 2, the special session of Congress was adjourned sine die.

—Manufacture of whiskey for medicine, suspended by the U. S. Gov't. since Sept., 1917, was resumed, at licensed distilleries.

Nov. 23—A direct appeal to the states to help offset possible unemployment by lining up with the Federal government and private industry to carry on prudent construction and expansion programs was telegraphed to the forty-eight Governors by President Hoover.

—Having lost $400,000 in the Wall St. stock crash, John F. Betts, a St. Louis member of the N. Y. Stock Exchange, ended life by poison at St. Louis.

DEATH OF CLEMENCEAU.

Nov. 24—Georges Clemenceau, 88, Premier of France in the latter part of the World War, died in his home, at Paris. He was buried without pomp, by his wish, in a wood near Mouchamps, in the Vendee region.

—Francis E. Warren, 85, U. S. Senator from Wyoming and a former Governor of that state, died at Washington, D. C.

—At Jerusalem, Norman de Mattos Bentwich, Attorney General of Palestine, the only Jewish official who holds a high post in the Government, was shot and wounded by a young Arab, a messenger in the Department of Police and Prisons.

Nov. 25—In the British House of Commons, the First Lord of the Admiralty said the British naval stations at Bermuda and Jamaica will not be closed.

—President Hoover continued his series of business revival conferences at the White House when spokesmen of the four leading farm organizations assured him that easier money would aid the

farmers to buy equipment and supplies and recommended that Federal aid be extended for farm-to-market roads as a further stimulus to constructive work.

—The Belgian Cabinet resigned. Flemish extremists, allied with the Catholic parties, wanted to have all classes in Ghent University taught in the Flemish tongue, but Flemish Liberals wanted to retain certain courses delivered in French.

—Lieut. George T. Cuddihy, famous speed pilot of the navy, was killed at the Anacostia, D. C., naval air station when a fighting plane he was testing fell and was buried in the soft ground.

Nov. 26—At Washington, the Pan-American Trade Conference convention for the simplification and standardization of customs and port regulations, was signed at the last session of the Pan-American Commission on Customs Procedure and Port Formalities at the Pan-American Union. Representatives of all American republics except Argentina participated in the signing. The proposed convention will be submitted to the various Governments for approval.

Nov. 27—At Carle Place, near Mineola, N. Y., a four-motored monoplane, the F-32, largest land plane in America, wrought havoc by losing flying speed and coming down, wrecking a house and being destroyed with it in flames from its ruptured gasoline tanks. The pilot, M. S. Boggs, and mechanic, Harry McDonald, the only occupants of the ship, were thrown or jumped clear.

—A conference at the White House of 35 heads of electric light, heat, power and rail concerns resulted in an assurance of expenditure, in 1930 of more than $1,810,000,000 in construction and improvement.

—A dozen Oklahoma banks failed to open, following the death of H. A. McCauley, former Mayor of Sapulpa, and holder of the control of 13 banks in the State.

BYRD FLIES TO SOUTH POLE.

Nov. 28—Commander Richard E. Byrd started from his base, Little America, in the Antartic, at 3.29 (10.29 p.m. New York time) on a 1,600-mile flight to the South Pole and back, with Bernt Balchen as pilot, Harold I. June as radio operator, and Capt. Ashley C. McKinly as photographer, in the big trimotored airplane he took to the Antartic.

The party got back on Nov. 29, at 5.10 p.m. (N. Y. time), and reported that they reached the Pole on Nov. 29, about 8.55 a.m. (N. Y. time); dropped a U. S. flag there (it was 16° below zero); circled over the polar plateau, and, on the return journey, landed once in the mountains to refuel.

—James B. Pauley, Chairman of the Miami Coal Co., killed his wife and himself, at Chicago.

—Jemuel G. Marty, Jr., 23, of Kansas City, Mo., fell down stairs and broke his neck in a ballroom at Florence, Italy. His wife, 22, formerly Dorothy Easton, of N. Y. City, shocked by his death, died the next day from overdose of a sleep potion.

Nov. 29—The Carnegie Institution of Washington's non-magnetic exploration yacht, Carnegie, was destroyed by fire and explosion in the harbor of Apia, Samoa. The captain, J. P. Ault, and one other, were killed, and several vessels moored near-by were burned.

—The bodies of 75 American soldiers of the World War who fell in the Archangel campaign against the Reds of Russia, arrived at N. Y. City by ship; 56 were buried later at Detroit, 12 in other parts of the west, and the rest in the east and south.

Nov. 30—At Marion, N. C., Alfred Hoffman, United Textile Workers of America organizer, and Lawrence Hogan, Del Lewis and Wes Fowler, strikers from local cotton mills, were convicted by a jury in McDowell Suprior Court of rioting. They were acquitted of charges of resisting officers. Hoffman was fined $1,000 and sentenced to one month in jail, and Fowler, Hogan and Lewis were each given six months in the chain gang.

—12 were killed in the derailment of a northbound passenger train near Only, Va.

FRENCH EVACUATE COBLENZ ZONE.

—The French flag hauled down at Ehrenbreitstein, marked complete evacuation of the Second German Zone, as a similar ceremony took place at Aix-la-Chapelle (Aachen) where Belgian troops retired over the frontier into their own country. This leaves only the Third Zone, centering at the Mainz (Mayence) bridgehead, of the Rhineland under Allied control.

—12 were killed in the collapse of an apartment house at Marseilles, France.

DECEMBER.

Dec. 1—Paris paid homage to the late Georges Clemenceau by addresses of notables, and a procession under the Arch of Triumph.

—In the recreation yard at Sing Sing Prison, N. Y., Reuben Kaminetsky, 17, of Brooklyn, serving 7½ to 15 years for a hold-up in Oct. 1928, was stabbed to death by a negro convict with whom he had fought months ago.

—7 were killed in a coal mine explosion near W. Frankfort, Ill.

Dec. 2—The United States has appealed to Russia and China, in the name of the general pact for the renunciation of war, to avoid warlike measures in Manchuria and adjust their dispute over the Chinese Eastern Railway by pacific means, and has notified 53 other nations of its move.

Russia officially resented the appeal as "not taken as a friendly act." Japan holds aloof. The U. S. denied unfriendliness and said it had not known of the negotiations in Siberia.

Soviet and Mukden representatives, meeting at Nikolsk-Ussuriisk, Siberia, signed a protocol reorganizing the administration of the Chinese Eastern Railway in conformity to the 1924 treaty.

—The seventy-first Congress assembled in its first regular session, at Washington.

—The exodus, from Soviet Russia to Canada, of peasants of German birth or ancestry, has begun in force, more than 700 arriving in East Prussia and in Pomerania.

—Jewels stolen from St. Peter's in 1925, including the so-called fisherman's ring, rich with sapphires and diamonds, have been recovered by the Roman police. They were identified by Mgr. Bocchini, custodian of St. Peter's treasury.

—Thomas P. Nelson, air mail pilot, died of wounds and exposure after his plane fell in the snow near Chagrin Falls, O. Col. C. A. Lindbergh aided in the search from the air for the body.

—Ford Motor Company employees of every grade began working under an increased wage scale. The minimum wage was boosted from $6 a day to $7. All employees whose wage rate exceeded the minimum wage received an increase in their hourly rate.

Dec. 3—President Hoover presented his annual message to Congress—12,000 words; declaring business sound; urging speed on tariff legislation, pledging an income tax cut; asking for a stronger "dry" law and rail mergers; favoring the Root plan for World Court adherence. The stock market rallied.

—James Joseph (Gene) Tunney, retired heavyweight champion of the world and tourist in Europe since August 22, 1928, returned to New York with his wife, who was Mary Josephine Lauder, of Greenwich, Conn. They were married in Rome in October, 1928.

—Paul Stewart, 17, the youngest licensed airplane pilot in the United States, was killed when his plane nose-dived 200 feet at Randalia, Iowa.

—At West Orange, N. J., Thomas A. Edison received the congratulations of the State of New Jersey on his career. A committee named by Governor Larson waited on him in the library of his experimental plant and presented resolutions signed by the committee.

Dec. 4—President Hoover submitted to Congress a budget for the year ending June 30, 1931, amounting to $3,830,445,231; he recommended a cut of $160,000,000 in normal taxes on incomes.

—Ex-U. S. Representative William S. Vare, of Pennsylvania, who, on the face of the returns, was elected in Nov. 1926, to the U. S. Senate, appeared partly paralyzed before that body, and argued against the plan, embodied in the Norris resolution, to deny him a seat on the ground that fraud and corruption tainted his nomination on the Republican ticket. He said the 1926 Rep. Campaign in Pennsylvania cost only $1.30 a vote, as against $4.46 in Nev., and $2.59 in Mont. The Senate, on Dec. 6, by 58 to 22, excluded him, and by 66 to 15, declared William B. Wilson, Dem., not elected to Vare's seat.

—The Belgian Cabinet was reconstituted under Premier Henri Jaspar.

—At Detroit, James Fernando, convicted of kidnapping Jackie Thompson, 5, and holding the boy from Sep. 30 to Oct. 26, was sentenced to 30 to 60 years in prison. Notice of appeal was filed.

—The full-rigged ship, Benjamin F. Packard, built in 1883, and now anchored in Manhasset Bay, L. I., was sold at auction at N. Y. City for $1,000.

—The Appellate Division, in Brooklyn, gave a new trial to Jacob Bernoff, who on April 10 last was convicted of kidnapping Daniel Greenfield and was at that time sentenced to 50 years in prison.

—Following a strike at the Customs office, 'U. S. Marines declared martial law in Port-au-Prince, and at Cape Haytien, Hayti; '500 more marines were sent to Hayti; on Dec. 6, marines killed 5 and wounded 20 in a force of 1,500 peasants advancing on the city of Aux Cayes. President Hoover, on Dec. 7, reported the situation to Congress and asked for a commission to study the situation and make relations of the U. S. less vague.

Dec. 5—At Washington, leaders of American industry admonished by President Hoover that a formula for success is to be found in the word "work," discussed in detail their individual plans and then constituted a Committee on Ways and Means numbering sixty.

The House of Representatives, without a roll call, passed the Hawley joint resolution reducing income taxes $160,000,000. The vote was 282 to 17. Nine Republicans, seven Democrats and one Farmer-Labor member cast the 17 opposition votes.

—By spending 1 hour and 35 minutes within the Vatican precincts as guests of Pope Pius XI, the King and Queen of United Italy publicly placed the final seal of their approval on the Lateran Treaties, with the signing of which last Feb. 11 the sixty-year-old Roman question passed into history.

—The question of the guilt of purchasers of liquor has been settled for Alabama by a ruling by the State Supreme Court, which held sellers and buyers of intoxicants equally amenable under the state's "bone dry" liquor law.

—George A. McManus was acquitted in General Sessions, N. Y. City, by direction of Judge C. C. Nott, after a trial on an indictment charging the fatal shooting, on Nov. 4, 1928, of Arnold Rothstein.

—Storms sank the steamer Frances Duncan off Land's End, England; 16 were drowned.

—At Sutton Chapel, Monroe County, Tenn., a male school teacher whipped a girl pupil. Her father, Charles Young, went to the school with a club, and the teacher shot him to death.

Dec. 6—Patrick J. Hurley, 46, lawyer, Asst. Sec. of War, was appointed Secretary of War in place of James W. Good, deceased.

—The Nanking Nationalist Government has approved the protocol preliminary to settlement of the Chinese Eastern Railway dispute. The mutiny on Dec. 3, of Nationalist soldiers at Pukow has grown into a rebellion in several provinces of Central China. Other rebels continue to threaten Canton. Nanking, China's capital, was placed under martial law, also Shanghai, Canton, and Hankow.

—The Polish Parliament, 246 to 120, voted lack of confidence in Premier Switalsky and his Cabinet. The Cabinet quit.

—C. C. Cook, a bank messenger, was killed and robbed of $15,000, at 17th and French Sts., Philadelphia. Robbers got $50,000 in currency at the Layton Park (Wis.) State Bank.

—Edsel Ford's brand new $400,000 power boat, the Sialia, went on the rocks of Hen and Chickens Shoal, off Mass.

Dec. 7—The British steamer Radyr foundered in Biddeford Bay, Devonshire, with the loss of the crew of 21. The steamer Frances Duncan went down off Land's End with a loss of 16. The Italian freighter sank with loss of 30 men.

—At Aix-les-Bains, France, Aga Khan, former Indian ruler, married Miss Andree Carron, a Paris dressmaker.

—Crown Prince Humbert of Italy and his younger sisters, Princesses Giovanna and Maria were welcomed by Pope Pius XI. at the Vatican in their first visit to the Pontiff.

—Sidi Wirt Spreckels, of San Francisco, formerly Princess Chakir, was married, at Fairfax County Court House, Va., to Lieut. Roger A. Gardner of San Francisco.

Dec. 8—A bomb, wrapped like a Christmas present, killed 3 of Joseph Falzone's 5 children, in his home on DeKalb Ave., Ridgewood, Brooklyn.

—At Hong Kong, Chinese pirates boarded the British steamship, Haiching, and killed 12; 60 natives, passengers, jumped overboard and drowned.

—St. Ann's Church, on E. 12th St., N. Y. City has been designated by the Pope as "the American National Shrine of the Motherhood of St. Ann and the Primary Church in the United States for the Archconfraternity of the Motherhood of St. Ann."

Dec. 9—The American charge d'affaires ad interim in Switzerland, Mr. Jay Pierrepont Moffat, signed at Geneva, on authorization of the President and on behalf of the United States:

1. The Protocol of Signature of the Statute of the Permanent Court of International Justice.
2. The Protocol of Accession of the United States of America to the Protocol of Signature of the Statute of the Permanent Court of International Justice, and
3. The Protocol of Revision of the Statute of the Permanent Court of International Justice.

—The U. S. cruiser, Pittsburgh, and 11 destroyers, were ordered from Manila to Shanghai to protect American lives and property. All Americans have been removed from Nanking.

—Unification of telegraph, radio and cable companies under governmental regulation to meet competition from foreign countries was advocated before the U. S. Senate Committee on Interstate Commerce by Owen D. Young, chairman of the directors of the General Electric Co. and of the Radio Corp. of America.

—At Washington, Senator Smith W. Brookhart's charges relating to the so-called "Wall Street booze party" in the Willard Hotel three years ago for newly elected Senators were dismissed because of "lack of evidence, together with the extraordinary lapse of time between the alleged violation and the revelation of the facts relating to this affair."

Dec. 10—At New York City, 10 persons were killed and 21 injured in a fire in the two-story studio and office building of Pathe's Manhattan Studios, Inc., at 134th Street and Park Avenue. Four of those who lost their lives were young women engaged for the cast of "The Black and White Revue." The fire is believed to have been caused by a bit of incandescent carbon ejected from an arc lamp, which set a velvet drop-curtain ablaze. Many of the 126 in the place were crushed in the rush for one exit.

—At Athens, President Admiral Paul Kondouriotis, who was appointed Chief Executive of the Grecian Republic on Dec. 4, 1926, resigned.

—Pascual Ortiz Rubio, President-elect of Mexico, arrived in New York to "help develop the understanding between the two nations," and to rest after the campaign.

—Surgeons at Johns Hopkins Hospital, Baltimore, removed a kidney from Horatio Vasquez, Pres. of Dominican Republic.

—Harry Crew Crosby, poet, of Paris, and Mrs. Josephine R. Bigelow, of Boston, were found shot to death, at N. Y. City. The police said it was a case of murder and suicide—a suicide pact.

THE AUBURN PRISON RIOT.

Dec. 11—Long-term armed felons (robbers) in the State Prison at Auburn, N. Y., captured Warden Edgar S. Jennings and several guards, held them as hostages under threat of death, and demanded liberty. Acting Governor H. H. Lehman refused and ordered State troopers to go in and get them. The riot ended when six of the convicts were cornered in a cell block in the south wing and were shot down one by one after they had refused to surrender. George A. Durnford, principal keeper, was killed at the start of the mutiny. Warden Jennings, after being held captive with several guards for three hours, was knocked unconscious and gassed when three state troopers threw gas bombs in the room where the hostages were held and brought about their release.

The convicts killed were: Perry Johnson, of Binghamton; Alex. Tucholka, Steve Pawlak, Steve Sporning, Henry Sullivan, and James Biancrassi, all of Buffalo; Julius Stefanik and Ernest Pavesi, of Brooklyn. Several other convicts, and 9 guards were wounded.

—Governor John S. Fisher, of Pennsylvania, appointed Joseph R. Grundy, head of the Manufacturers Association, as U. S. Senator in place of W. S. Vare elected and rejected. Grundy was sworn in on Dec. 12 and took his seat.

—The U. S. Senate Lobby Committee heard from Herbert C. Lakin, President of the Cuba Co., of a plan of American capitalists interested in Cuban sugar to mobilize public opinion secretly throughout Latin America and to utilize the Masonic order and Rotary clubs in bringing pressure to bear upon the Government of the United States for a lower tariff on sugar.

—The Ambrose Channel lightship moved to the new anchorage, south of the shoal, and 1¼ miles southeast of the old anchorage.

Dec. 12—Prices on the N. Y. Stock Exchange dropped 2 to 22 points in the worst break since Nov. 13.

—The U. S. Senate heard documentary evidence that Cuba Co. officials engaged in propaganda in Latin America against high sugar import duties with the knowledge and consent of the Cuban Government.

—The National Commission on Law Observance and Enforcement, which President Hoover appointed to ponder upon the Prohibition problem and to see if anything could or should be done about it, will report that much of the blame for the apparent failure of the Volstead act must be charged against public officials.

—Fifty minutes before Frederick W. Edel was to have paid with his life in Sing Sing's electric chair for the murder of Mrs. Emeline Harrington in a New York apartment two years ago, Gov. Roosevelt granted a reprieve until Dec. 30.

—The British troops evacuated Wiesbaden and the Rhineland.

DEATH ROLL OF 1929

Adamson, W. C. (74), ex-Congressman from Ga., author of 8-hour (railway) day law; N. Y. City, Jan. 3.

Agramonte, Gen. H. M. (99), Mexico City, Mch. 15.

Aikins, Sir James (77), for 13 yrs. pres. Canadian Bar Assoc., fin.; Winnipeg, Mch. 1.

Aikin, Gen. W. A. (96), Civil War Vet., financier; Norwich, Conn., Nov. 7.

Aldrich, C. H. (78), ex-U. S. Solic. Gen.; Chicago, April 13.

Allen, Rev. J. K. (84), over 58 yrs. pastor First Ref. (Sleepy Hollow) Ch.; Tarrytown, N. Y., Mch. 18.

Almeida, A. J. (63), ex-Pres. of Portugal (1919-1923); Lisbon, Oct. 31.

Ames, E. A. (63), Pres. Dime Savings Bank of Brooklyn; that city, July 6.

Ames, Oliver (64), plow mnfr.; No. Easton, Mass., June 18.

Anderson, W. C., fin., art collector; Salt Lake, Feb. 18.

Andrassy, Count Julius (67), ex-Premier Austria-Hungary; Budapest, June 11.

Appell, G. C. (45), judge of Children's Court of Westchester County; Mt. Vernon, N. Y., Jan. 19.

Appleton, Col. Daniel (77), publisher; White Plains, N. Y., Mch. 16.

Appleton, F. R. (74), of N. Y. City, former Overseer of Harvard Univ.; Ipswich, Mass., Jan. 2.

Armstrong, B. A. (86), silk mnfr., banker; New London, Conn., Oct. 20.

Avebury, Lord (John B. Lubbock) (70), banker; in England, Mch. 26.

Ayres, S. B. (67), ex-Conressman 18th Dist., realtor; N. Y. City, June 1.

Baerman, A. E. (71), literary agent; N. Y. City, Mch. 22.

Bailey, J. W. (65), ex-U. S. Senator from Tex., Sherman, April 13.

Baker, Dr. G. F. (65), Phila. banker, pres. Acad. Music; Rosemont, Pa., June 3.

Ball, Miss Alice W., painter; Gloucester, Mass., July 22.

Ball, C. F. ("Buckskin Charley") (84), Indian scout, Burlington, Wis., Jan. 9.

Ballard, Miss Georgianna (81), a Y. W. C. A. founder; N. Y. C., April 26.

Ballou, G. W. (82), N. Y. and Boston banker; Brattleboro, Vt., April 30.

Bannard, O. T. (74), N. Y. City banker; at sea, Jan. 15.

Barnabas (McDonald), Brother F. S. C. (64), founder Lincoln Agric. Sch., N. Y.; Albuquerque, N. M., April 23.

Barnby, Lord (Francis Willy) (89), textile mnfr., owner of South Barre, Mass.; in England, Feb. 16.

Barnett, Samuel (57), N. Y. banker; Baltimore, April 17.

Barnsby, J. M. (68), painter; Montreal, Feb. 25.

Barrow, Prof. D. C. (77), Chancellor emeritus, Univ. of Ga.; Athens, Ga., Jan. 11.

Bates, Miss (Prof.) K. L. (69), author, educator; Wellesley, Mass., Mch. 28.

Bauer, Col. Max (60), German milit. adviser to Chinese Govt.; Gen. Ludendorff's aide in World War; Shanghai, May 6.

Beal, Prof. A. C. (57), rose culturist, 25 yrs. on Cornell Univ. faculty; Ithaca, N. Y., May 6.

Beer-Walbrunn, Anton (64), composer; Munich, Mch. 23.

Begbie, Harold (58), journalist; London, Oct. 8.

Bell, C. J. (71), Washington, D. C. capitalist; N. Y. City, Oct. 1.

Bell, Mrs. Lillian (62), novelist; Los Angeles, July 18.

Bellamy, F. P. (82), Brooklyn lawyer; Newagen, Me., Sept. 16.

Bello, A. M. Cardinal (93); Lisbon, Aug. 5.

Benkard, J. P. (56), broker; N. Y. City, April 6.

Bennett, R. A. (74), author, editor of London Truth; in England, Aug. 26.

Benson, E. S. (73), Controller of Chicago & Alton Ry., Phoenix Ariz., Dec. 31, 1928.

Benson, Rev. F. T. (67), editor Methodist Protestant; Baltimore, April 6.

Benson, G. J., owner of "The Tub," innkeeper; Albany, N. Y., Nov. 16.

Benson, R. H. (79), banker, art collector; London, April 7.

Benz, Carl (84), pioneer auto maker (1879, at Munich); in Germany, April 3.

Bergen, T. G. (81), ex-Pres. B'klyn B'd Educ., ex-Pres. St. Nicholas Soc.; N. Y. City, Mch. 13.

Berger, F. G. (77), N. Y. theatre manager; Warrenton, Va., May 17.

Berger, Victor (69), editor, ex-Conressman, socialist leader; Milwaukee, Aug. 7.

Berliner, Emile (78), inventor of phonograph discs and telephone transmitters; Washington, D. C., Aug. 3.

Bernhardt, Maurice (65), theatre director, son of Sarah; Paris, Dec. 21, 1928.

Bernhouse, William (95), realtor, oldest Odd Fellow (72 yrs. in that Order); Hammonton, N. J., July 27

Berry, Rear-Adm'l. R. M. (83), Commander 1881 Arctic Relief Expedition (Jeannette-De Long); Tryon, N. C., May 19.

Betts, C. H. (66), editor, Lyons, N. Y., Nov. 24.

Bey of Tunis (Sidi Mohammed Ben-el-Habib), Tunis, Feb. 11.

Bickerton, Prof. A. W. (87), astronomer; London, Jan. 23.

Bingham, W. T. (67), newspaper correspondent; Washington, D. C., Feb. 5.

Birch, Col. T. H. (54), ex-U. S. Minister to Portugal; N. Y. City, Feb. 1.

Birckhead, Rev. Hugh (52), Episc. leader; Newport, R. I., July 9.

Bishop, J. B. (81), journalist, ex-Sec. Isthmian Canal Commission; N. Y. City, Dec. 13, 1928.

Blake, M. F. (71), ex-Muncie, Ct. Justice, ex-Clk. B'd. Aldermen, vet. Tammany leader; Brooklyn, July 31.

Blendinger, F. L. (62), ex-Vice-Pres. Lehigh Valley R. R.; No. Plainfield, N. J., June 2.

Bloch, Maurice (39), minority State Assembly, lawyer; N. Y. City, Dec. 5.

Bloomingdale, I. I. (51), N. Y. City dept. store owner; London, Oct. 15.

Bobo, Rosalvo (56), Pres. of Haiti (1915-1918); Paris, Dec. 2.

Bode, Wilhelm von (83), art expert, ex-Director Gen'l. Public Museum of Germany; Berlin, Mch. 1.

Bond, E. A. (80), ex-N. Y. State Engineer and Surveyor; N. Y. City, Dec. 10.

Booth, Gen. Bramwell (73), former head Salvation Army, son of founder; in England, June 16.

Booth-Tucker, Commissioner Frederick (76), for 46 yrs. with the Salvation Army; in England, July 17.

Alexander Herman, by will, $100,000 each to Mount Sinai and Montefiore Hospitals; $50,000 to Hebrew Orphan Asylum and Home for Aged and Infirm Hebrews.

Mrs. Mary J. Hinman, $50,000 to Knox College, Galesburg, Ill.

Mrs. Christian R. Holmes, $265,000 to Univ. of Cincinnati, Ohio.

Charles W. Holtzen, Brookline, Mass., by will, $75,000 to Harvard Univ., Cambridge, Mass.

John E. Huiskamp, by will, $350,000 to Lifwynn Foundation for Laboratory Research in Analytic and Social Psychiatry, Inc., of Maryland.

Mrs. J. H. Hunt, Gainesville, Ga., land valued at $100,000 to Univ. of Georgia, Athens, Ga.

James Newbegin Jarvie, Montclair, N. J., by will, $3,000,000 to Board of National Missions of the Presbyterian Church and $250,000 to the Board of Foreign Missions; $100,000 for the maintenance of the Y. M. C. A. Bldg. at Jerusalem, Palestine; $50,000 to N. Y. Assoc. for Improving Conditions of Poor.

Mrs. Irene W. Johnson and two sons, $500,000 to Washington Univ., St. Louis, Mo.

Oscar Johnson (widow and children of), St. Louis, Mo., $500,000 to Washington Univ., St. Louis, Mo., for an institute for research and study of eye, ear and nose diseases.

Ralph Jonas, $53,000 to the Brooklyn Federation of Jewish Charities, N. Y.

Thomas D. Jones and his niece, Miss Gwethalyn Jones of Chicago, Ill., $500,000 to Princeton Univ., N. J.

Miss Mary Keckeissen, by will, $54,480 to Catholic Charities of the New York Diocese.

Chauncey Keep, by will, $50,000 to Field Museum of Natural History, Chicago, Ill.

Dr. Howard A. Kelly, Baltimore, Md., $100,000 to Univ. of Michigan, Ann Arbor, Mich.

C. F. Kettering, Dayton, Ohio, $325,000 to Antioch College, Yellow Springs, Ohio.

E. L. Kilhefner, Ashland, Ohio, $80,000 to Ashland College, Ashland, Ohio.

Miss Ellen King, by will, $123,906 to St. Mark's Hospital, N. Y. City; $91,125 each to Assoc. for Improving Condition of Poor, N. Y. City and the P. E. Missionary Dist. of So. Dak.; $74,344 to Children's Aid Soc., N. Y. City; approx. $50,000 each to Episcopal Diocese of Ohio; Diocesan Missions of Long Island; Woman's Hospital; N. Y. Eye and Ear Infirmary; N. Y. Historical Soc.; Babies' Hospital; Grace Church of Jamaica; Jamaica Hospital.

Fred Morgan Kirby, Wilkes Barre, Pa., $500,000 to Lafayette College, Easton, Pa.; $130,000 to Clarke School for the Deaf, Northampton, Mass.; $125,000 to Univ. of Pennsylvania, Philadelphia, Pa.; $100,000 toward building fund to Hobart College, Geneva, N. Y.

Louis J. Kolb, Philadelphia, Pa., $100,000 to Univ. of Pennsylvania, Philadelphia, Pa.

Ladies' Auxiliary of the Bronx Hospital, $100,000 to the Bronx Hospital, N. Y. City.

Albert D. Lasker, $125,000 to the Univ. of Chicago, Ill.

Rev. Marion Law, San Diego, Cal., $50,000 to Cornell College, Mount Vernon, Iowa.

George Albert Lawrence, N. Y. City, by will, $1,000,000 each to Leland Stanford Junior Univ., Calif.; The Ali University Club, N. Y. City.

John F. Lee Estate, $560,000 to Washington Univ., St. Louis, Mo.

Charles Lenning, estate of, $475,000 to Univ. of Pennsylvania, Philadelphia, Pa.

Adolph Lewisohn, $50,000 to Mount Sinai Hospital, N. Y. City.

Lucius N. Littauer, $50,000 to the Albany Medical College, to bring the Gloversville Hospital into contact with the Medical College.

Miss Alice M. Longfellow, daughter of the poet, Cambridge, Mass., $50,000 to Radcliffe College, Cambridge, Mass.

Clarence H. Mackay, N. Y. City, $500,000 to University of Nevada, Reno, Nev.

Mrs. Charles F. MacLean, N. Y. City, $50,000 to the College of the Ozarks, Clarksville, Ark.

Martin Maloney, deceased, $50,000 to Univ. of Pennsylvania, Philadelphia, Pa.

Mrs. Mary Mandell, Detroit, Mich., $500,000 to Smith College, Northampton, Mass.

Miss Minnie Mandelle, by will, $350,000 to Kalamazoo College, Kalamazoo, Mich.

Mrs. Mellie Manlove, Chicago, Ill., $50,000 to Northwestern Univ., Evanston, Ill.

Miss Anne Gerhard Maris, Philadelphia, Pa., $100,000 trust fund for the "relief of gentlewomen in reduced circumstances residing in Philadelphia and adjoining counties."

John Markel, N. Y. City, $500,000 to Lafayette College, Easton, Pa.

Arthur A. Maxwell, estate of, $50,000 to Dartmouth College, Hanover, N. H.

Mrs. Levy Mayer, Chicago, Ill., $301,169 to Northwestern Univ., Evanston, Ill.

Daniel J. McCarthy, Philadelphia, Pa, $75,000 to Univ. of Pennsylvania, Philadelphia, Pa.

Selina B. McIlhenny, Philadelphia, Pa., $99,886 to Univ. of Pennsylvania, Philadelphia, Pa.

Mr. & Mrs. George A. McKinlock, $53,134.62 to Harvard Univ., Cambridge, Mass.

John McMullen, estate of, $68,883 to Cornell Univ., Ithaca, N. Y.

Medical Staff of the Bronx Hospital, $55,000 to the Bronx Hospital, N. Y. City.

Andrew W. Mellon, $120,000 to Clarke School for the Deaf, Northampton, Mass.

Sir Vincent Meredith, by will, $50,000 to Univ. of Bishop's College, Lennoxville, P. W., Canada.

Mr. & Mrs. M. C. Migel, N. Y. City, $500,000 to Santiago College, Santiago, Chili, for new building.

Herbert E. Miles, Los Angeles, Cal., $100,000 to Lawrence College, Appleton, Wis., for promotion of research in social studies.

Mrs. Nathan J. Miller, $250,000 to Columbia Univ., N. Y. City, for the Miller Endowment Fund.

Ogden Mills, by will, $500,000 to Home for Incurables; $100,000 each to American Museum of Natural History, Metropolitan Museum of Art, N. Y. City, and Mills Memorial Hospital, San Mateo, Cal., and Harvard College; $50,000 each to Phillips Exeter Academy, Exeter, N. H. and N. Y. Zoological Society.

Henry Morgenthau, $50,000 to Hebrew Union College, Cincinnati, Ohio.

Isidore D. Morrison, $100,000 to the Hebrew Univ., Jerusalem.

Mr. & Mrs. C. H. Musselman, Biglerville, Pa., $100,000 to Bluffton College, Bluffton, Ohio.

Mrs. Aaron Naumburg, $50,000 to Girls' Home Club, N. Y. City.

F. C. and Susan Eastman Necombe Fellowship, $50,531 to Univ. of Michigan, Ann Arbor, Mich.

William H. Nichols, N. Y. City, $250,000 to New York Univ., N. Y. City.

Mrs. Dellora Angell Norris, St. Charles, Ill., $100,000 to the city for erection of a model community hospital.

Hugh M. North, Jr., by will, $500,000 for erection of museum to be known as Hugh McAllister and Elizabeth Cottman North Museum, Lancaster, Pa.

Northern Baptist Convention, New York City, $100,000 to Colorado Woman's College, Denver, Colo.

Mr. & Mrs. Adolph S. Ochs, N. Y. City, $200,000 to Hebrew Union College, Cincinnati, Ohio.

R. E. Olds, Lansing, Mich., $130,000 for science building to Kalamazoo College, Kalamazoo, Mich.

George W. Olmsted, Ludlow, Pa., $100,000 to the Broadway Temple, N. Y. City.

Charles Lathrop Pack, Washington, D. C., $200,000 to Yale Univ., New Haven, Conn.

William A. Paine, $50,000 to Clarke School for the Deaf, Northampton, Mass.

James A. Patten, estate of, $50,000 to Monmouth College, Monmouth, Ill.

Mrs. Alfred Duane Pell, N. Y. City, $50,000 to Dubose Memorial Church Training School, Monteagle, Tenn.

Ellis L. Phillips, $100,000 to the Leonard Wood Memorial for the Eradication of Leprosy, N. Y. City; $100,000 to Clarke School for the Deaf, Northampton, Mass.

Presser Foundation, Philadelphia, Pa., $75,000 toward new music building to Illinois Wesleyan Univ., Bloomington, Ill.; $50,000 to Baylor College, Belton, Tex.

Frederick F. Proctor, by will, $50,000 to Actors' Fund of America.

Mrs. William Cooper Procter, $50,000 to Univ. of Cincinnati, Ohio.

Chester D. Pugsley, Peekskill, N. Y., $400,000 to Harvard Law School.

James Henry Rand, Jr., $117,000 to Harvard Univ., Cambridge, Mass.

John J. Raskob, $50,000 to Clarke School for the Deaf, Northampton, Mass.

Dr. Robert G. Reese, by will, $500,000 to N. Y. Eye and Ear Infirmary, N. Y. City.

Lord Revelstoke, England, $500,000 to the King Edward Hospital Fund, London, England.

Craig D. Ritchie, estate of, $106,913 to Univ. of Pennsylvania, Philadelphia, Pa.

Edward B. Robinette, Philadelphia, Pa., $502,375 to Univ. of Pennsylvania, Philadelphia, Pa.

Rockefeller Foundation, $3,500,000 to Institute of Human Relations of Yale Univ., New Haven, Conn.; $1,015,750 to Harvard Univ., Cambridge, Mass.; $400,000 to St. Luke's Int'l. Hospital, Tokio; $85,000 to Univ. of Pennsylvania, Philadelphia, Pa.; $50,000 to Univ. of Upsala, Stockholm, Sweden.

Laura Spelman Rockefeller Memorial Fund, $2,500,000 endowment, the income to go to Salvation Army, Henry St. Settlement, Charity Organization Soc., N. Y. Assoc. for Improving Condition of the Poor. (This is the last act of the Memorial prior to consolidation with the Rockefeller Foundation.)

Laura Spelman Rockefeller Memorial, $2,000,000 to further Baptist missions (on Jan. 3, prior to consolidation with the Rockefeller Foundation).

Laura Spelman RockefellerMemorial Fund $59, 727 to Columbia Univ., N. Y. City.

Laura Spelman Rockefeller Memorial Fund, $818,000 to State Univ. of Iowa, Iowa City, Iowa, for Child Welfare Research Station.

John D. Rockefeller, Jr., $500,000 to League of Nations for development of new library; $350,000 to St. Luke's Int'l. Hospital, Tokio; $250,000 to Girl Scouts, Inc.; $85,000 to State Univ. of Iowa, Iowa City, Iowa.

Mrs. Isaac Lothrop Rogers, estate of, $60,008.51 to Harvard Univ., Cambridge, Mass.

Mr. & Mrs. George Roos, $100,000 to Univ. of California, Berkeley, Calif.

Mr. & Mrs. E. Rosenfeld, $50,000 to Mount Sinai Hospital, N. Y. City.

Julius Rosenwald, $500,000 to Jewish Theological Seminary of America, also to Hebrew Union College, Cincinnati; $250,000 to Univ. of Chicago, Ill.; $50,000 to Harvard Univ., Cambridge, Mass.

Julius Rosenwald Foundation, $150,000 to Massachusetts General Hospital, Boston, Mass.

Julius Rosenwald Fund, $100,000 to National Advisory Committee on Education to conduct survey toward education.

Mrs. Julius Rosenwald (deceased), $50,000 to National Girl Scouts organization.

Harold Russell Ryder, N. Y. City, $175,000 to Union College, Schenectady, N. Y.

Charles Sprague Sargent Memorial Fund, $215,238.87 to Harvard Univ., Cambridge, Mass.

Mrs. Julia B. Schauffler, by will, $50,000 each to N. Y. City Mission Society; Woman's Board of Foreign Missions of the Presbyterian Church.

F. Augustus Schermerhorn, estate of, $519,295.56, to Columbia Univ., N. Y. City.

Mrs. Jacob H. Schiff, $250,000 to Hebrew Union College, Cincinnati, Ohio.

Mrs. Jacob H. Schiff, Mortimer L. Schiff and Felix M. Warburg, $175,000 to the Montefiore Hospital for Chronic Diseases.

Edward F. Searles, estate of, $50,000 to Univ. of California, Berkeley, Calif.

Caroline B. Sellow, $100,000 to American Museum of Natural History, N. Y. City.

Frederick Cheever Shattuck, $100,000 to Harvard Univ., Cambridge, Mass.

Mrs. Ella F. Shoemaker, $50,000 to Washington Univ., St. Louis, Mo.

Arthur J. Silliman, Moodus, Conn., by will, $400,000 in trust for Nathan Hale School in East Haddam; $50,000 each to Middlesex Hospital and Wesleyan University.

Thomas F. Smallman, by will, $225,000 to Yale Medical School, New Haven, Conn., to be used to build a new wing.

Mrs. Johnson C. Smith, Pittsburgh, Pa., $125,000 to Johnson C. Smith Univ., Charlotte, No. Car.

Lloyd W. Smith, Madison, N. J., $100,000 to Princeton Univ., N. J.

James Speyer, N. Y. City, $150,000 to Mount Sinai Hospital, N. Y. City.

Mr. & Mrs. Percy S. Straus, N. Y. City, $1,000,000 to New York Univ., N. Y. City.

John W. Sterling, estate of, N. Y. City, $2,000,000 to Yale Univ., New Haven, Conn.

Henry Sterne, N. Y. City, $100,000 to the Salvation Army, N. Y. City.

Robert W. Stewart, $200,000 to Coe College Cedar Rapids, Iowa.

William Rhinelander Stewart, by will, $50,000 to Grace Episcopal Church, N. Y. City.

Olivia E. P. Stokes, estate of, $380,053 to Barnard College, New York City.

Mrs. Helen O. Storrow, Quincy, Mass., $1,000,000 to the City of Quincy for the Charles River Basin Park project.

Mr. & Mrs. Charles P. Taft, $150,000 each to Taft School, Watertown, Conn.; University of Cincinnati, Ohio.

Col. William Boyce Thompson, Yonkers, N. Y., $100,000 to Columbia University for the School of Engineering, N. Y. City.

Mr. & Mrs. William B. Thompson, $135,000 to Clarke School for the Deaf, Northampton, Mass.

Trinity Church Corporation, N. Y. City, $50,000 to St. Stephen's College, Annandale-on-Hudson, N. Y.

Mrs. Lucien Hamilton Tynd, $100,000 to Southampton Hospital, L. I.

Samuel Untermyer, $50,000 to Hebrew Union College, Cincinnati, Ohio.

William S. Vare, Philadelphia, Pa., $250,000 93-acre estate to the City of Philadelphia for a hospital for paralytics. It is located at Ambler, Pa.

Ludwig Vogelstein, $50,000 to Hebrew Union College, Cincinnati, Ohio.

James T. Walker, family of, St. Louis, Mo., $500,000 to Princeton Univ., N. J.

Mr. & Mrs. Felix M. Warburg, $250,000 to Hebrew Union College, Cincinnati, Ohio; $50,000 to Ort campaign for industrial reconstruction of the Jews of Eastern Europe.

Dan Everett Waid, New York City, $100,000 to Presbyterian Board of National Missions, N. Y. City.

Artemas Ward, $678,731 to Harvard Univ.' Cambridge, Mass.

Mrs. Justine B. Ward, of Dobbs Ferry, N. Y., $1,000,000 to the Catholic University of America, Washington, D. C.

Mrs. Gertrude Bass Warner, Eugene, Ore., $54,000 to Univ. of Oregon, Eugene, Ore.

Worcester Reed Warner, Tarrytown, N. Y., by will, $100,000 each to Cleveland School of Fine Arts and the Western Reserve Univ.; $50,000 each to Cleveland Associated Charities and the Syrian Protestant College, Beirut, Syria.

George Warren Estate, $470,250 to Washington Univ., St. Louis, Mo.

William J. Wharton, Brooklyn, N. Y., by will, $457,875 each to Society of St. Vincent de Paul, Brooklyn, N. Y. and Brooklyn Home for Blind, Crippled and Defective Children; about $150,000 in smaller legacies to 28 other charities.

Hill S. Warwick, estate of, $153,185 to Univ. of Pennsylvania, Philadelphia, Pa.

Mrs. Larz Whitcomb, Indianapolis, Ind., $100,000 to DePauw Univ., Greencastle, Ind.

Payne Whitney, estate of, $2,786,311 to Cornell Univ., Ithaca, N. Y.

Wilmer Foundation, N. Y. City, $125,000 to Johns Hopkins Univ., Baltimore, Md.

Hilton B. Wilson, by will, $8,000,000 to Northwestern Univ., Chicago, Ill., for use of College of Liberal Arts.

Charles A. Wimfheimer, N. Y. City, $100,000 to Mount Sinai Hospital, N. Y. City.

Mrs. Florence Holmes Woodruff, $50,000 to Washington Univ., St. Louis, Mo.

William Ziegler, Jr., $408,377 to Harvard Univ., Cambridge, Mass.; $100,000 to continue publication of magazine for the blind.

Sarah A. F. Zimmerman, $51,325 to Univ. of Pennsylvania, Philadelphia, Pa.

THE LIBRARY OF CONGRESS.

The Library of Congress was established in 1800, destroyed in 1814 by the burning of the Capitol, afterward replenished by the purchase by Congress of the library of ex-President Jefferson, 6,760 volumes (cost, $23,950); in 1851, 35,000 volumes destroyed by fire; in 1852, partially replenished by an appropriation of $75,000; increased (1) by regular appropriations by Congress; (2) by deposits under the Copyright Law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress with the stipulation that future accessions should follow it. Other special accessions have been: The Peter Force collection (22,529 volumes, 37,000 pamphlets), purchased 1867, cost $100,000; the Count de Rochambeau collection (manuscript), purchased 1883, cost $20,000; the Toner collection (24,484 volumes, numerous pamphlets) the gift, in 1882, of Dr. Joseph M. Toner; the Hubbard collection (engravings).

The collection is now the largest in the Western Hemisphere. It comprises over 3,900,000 printed books and pamphlets (including the law library, which, while a division of the Library of Congress, still remains at the Capitol), maps and charts, pieces of music, and photographs, prints, engravings and lithographs numbering 2,650,000.

The collection is rich in history, political science, in official documents, National, State, and foreign, and in Americana, including important files of American newspapers and original manuscripts (Colonial, Revolutionary, and formative periods).

Among the special book collections are the Yudin, of Russian literature (80,000 volumes); the Schiff, of Judaica (about 20,000); the Weber, of Indica; the Huttfeld-Kaas (Scandinavian); the John Boyd Thacher collections (incunabula, early Americana) autographs of the French Revolution, and of crowned heads of Europe. The Orientalia include some 13,000 volumes (fascicules) of Japanese books and about 133,000 volumes (fascicules) of Chinese. The Division of Prints includes certain collections given or lent, besides a large mass of material received by copyright and some by purchase. The manuscript collections are especially noteworthy for material on American history, some of the most distinguished of which has been received by transfer from the executive departments, the library being now regarded as the main custodian of the historical archive material in the possession of the Government. It has the papers of seventeen Presidents and of American statesmen, including Franklin Morris, and Hamilton.

The library is also the custodian of the originals of the Declaration of Independence and of the Constitution of the United States.

The library is copying documents in foreign archive offices and other institutions of concern to American history. It has already a large body of transcripts from such sources. This policy of transcribing and copying, where necessary by facsimile, is applied also to maps and to music.

In 1897 the main collection was removed from the Capitol to the building erected for it under the Acts of Congress approved April 15, 1886, October 2, 1888, and March 2, 1889, at a cost of $6,347,000 exclusive of the land, which cost $585,000.

The building was completed in February, 1897, and opened to the public November, 1897. It occupies three and three-quarter acres upon a site ten acres in extent at a distance of 1,270 feet east of the Capitol, and is the largest and most magnificent library building in the world. The floor space is 583,755 square feet, or 13.4 acres.

In 1925 an auditorium, the gift of Mrs. Frederic Shurtleff Coolidge of New York City and Pittsfield, Mass., was erected at a cost of $90,000, in the courtyard adjacent to the Music Division.

In 1927 a stack in the northeast courtyard was constructed at a cost of about $745,000.

The library is maintained by annual appropriations by Congress for various purposes, including the purchase of books and printing and binding.

Under Act of Congress of March 3, 1925, a Library of Congress Trust Fund Board was created, authorized to accept, receive, hold, and administer gifts or bequests of personal property.

Inter-Library Loans—While not a lending library but primarily a reference library, the Library of Congress maintains an inter-library loan system by which special service is rendered to scholarship by the loan to other libraries of books for the use of investigators engaged in serious research.

Copyright Office—The Copyright Office is a distinct division of the Library of Congress and is located on the ground floor, south side; open 9 to 4.30. It is under the immediate charge of the Register of Copyrights, who, by the acts of February 19, 1897, and March 4, 1909, is authorized "under the direction and supervision of the Librarian of Congress" to perform all the duties relating to copyrights. Copyright registration was transferred to the Librarian of Congress by the act of July 8, 1870. Of most articles copyrighted two copies, and of some one copy, must be deposited in the Library of Congress to perfect copyright.

Hours—The library building is open to the public all days in the year excepting 4th of July and Christmas. The hours are from 9 A. M. to 10 P. M. weekdays, from 2 P. M. to 10 P. M. Sundays and holidays, and 9 A. M. to 1 P. M. on Saturdays from June to September.

Librarians Since the Inception of the Library—1800-1815, the Clerk of the House of Representatives (for the time being); 1815-1829, George Watterston; 1829-1861, John S. Meehan; 1861-1864, John G. Stephenson; 1864-1897 (June 30), Ainsworth R. Spofford; 1897-January 17, 1899, John Russell Young; 1899 (April 5), Herbert Putnam.

Financial and Economic Review of 1929.

CRASH OF THE STOCK EXCHANGE BULL MARKET.

By S. S. Fontaine.

During the greater part of 1929 the elements of progress in business and trade were in the ascendent throughout the country. The purchasing power of the country measured up to consumption so that there was no piling up of inventories, such as laid the foundation for the silent panic developed in the post-war period when production had been expanded to meet the exigencies of the years of conflict. But the even balance of production and distribution developed a sense of security that expressed itself in adventures in many fields of speculation and reached extravagant lengths in the stock market. Normally a reliable barometer of business, it became instead the vehicle of imagination and recklessness, utterly unrestrained. Having reached an unwarranted peak far beyond the confines of reason and common sense it was bound, as it gained momentum on the downgrade, to develop a course even more wild, more uncontrolled and more irrational than marked its flight to the heights of dementia.

The result was a stock market panic that exceeded in violence any of the previous historic debacles in Wall Street history. Its wounds will doubtless prove less difficult to heal since the financial structure has been less impaired and its effect on enterprise will be less protracted. The crash was entirely free from the banking weakness that was the direct cause of the cataclysm of 1907, the war madness of 1914 or the over-production that was responsible for the post-war crash of 1919-1921. Nor did it bear close analogy to the speculative collapse of 1901 which was wholly the result of the titanic struggle of two great banking and railroad groups for the mastery of Burlington and Northern Pacific. Perhaps it can be best described as a sudden transformation of mob psychology—the overnight relapse of the fevered mind of the multitude from the false courage of intoxication to the mad fear of fantasies created by its own disordered brain. But beneath it all there lies the fixed and unescapable law of morals that over-indulgence in any form must inevitably lead to the mental and physical readjustment that the laws of economy and of nature exact from the body politic as well as from the system corporeal.

While the causes and effects are plain to what extent the forces that influenced them might be traced to policies of our money mentors, exercised perhaps in opposition to, rather than consonance with generally accepted interpretations of the economic law, is a question upon which there will continue to be great disagreement. The writer has personally adopted the view that these policies, while undoubtedly arising from the highest motives and exercised with the complete conviction that they would provide the proper remedy for speculative excesses, were diametrically opposite to those that would have cured the malady without such a violent shock to the nerves of the patient. The operation was undoubtedly successful in the long run although the subject narrowly escaped succumbing to the ether.

With this theory in mind it is well to recall the course of these financial policies. During the year 1927 the Federal Reserve Board reduced the rediscount rate to 3½%. Undoubtedly the motive was the desire to cooperate with Great Britain in the re-establishment of the gold standard. The result was the movement of over $500,000,000 in specie abroad and the relaxation of credits in this country to such an extent that an impulse was given to speculation in all fields of activity holding out the lure of profit but especially in that of the stock market where the foundations were laid for the great absorption of common stocks. The forward movement, with technical setbacks, progressed until the peak was reached in September, 1929. One of the greatest evils of this policy's influence was the enormous withdrawal of surplus funds by corporations and individuals from customary fields of employment to the call money market where they found greater and more attractive remuneration because of their liquidity as well as their yield. As a result the banks were deprived of their control of the money market and the banking function was completely over-mastered by these so-called outside lenders who came to be known as the bootleggers of Wall Street.

BROKERS' LOANS.

The volume of brokers' loans supplied by the banks as well as from these outside sources began to reach unprecedented volume. The peak, as reported by the New York Stock Exchange, was reached at the end of September which practically marked the culmination of the great rise in securities. In a carefully prepared summary of this loan situation, Walter H. Cunningham pointed out recently that at this period they had attained the unprecedented volume of $8,549,000,000 and he has been the first to carefully differentiate brokers' loans obtained from the banks and those from the so-called bootleg sources. This table prepared by this authority shows the growth of total brokers' loans:

September, 1926	$3,218,000,000
September, 1927	3,914,000,000
September, 1928	5,513,000,000
September, 1929	8,549,000,000

In sharp contrast with this stupendous growth of total brokers' loans is the following table of the volume of brokers' loans of the member banks of New York City for their own account for the same periods:

September, 1926	$1,010,000,000
September, 1927	1,092,000,000
September, 1928	850,000,000
September, 1929	1,024,000,000

Here is the revealing fact that the banks of New York City showed no expansion of brokers' loans over the four-year period; that they were not, therefore, in any way a party to the distortion of credit by that vast expansion of brokers' loans and that they were, therefore, cooperating whole heartedly with the Federal Reserve Board to the end of conserving the resources of Amercan banks for the requirements of industry rather than of speculation. Indeed, when the growth of capital and resources and deposits, and therefore of loonable money, is taken into consideration, the volume of loans of the New York banks when the peak wsa reached was materially less than it was four years previous.

The brokers' loans, through the New York banks, "for the account of out-of-town banks," is a somewhat different story. This volume for the same periods was as follows:

September, 1926	$1,112,000,000
September, 1927	1,296,000,000
September, 1928	1,674,000,00,0
September, 1929	1,876,000,000

Here we see that in four years the volume of money which went into brokers' loans "from out-of-town banks" was increased 68.7%. It should be borne in mind, however, that the custom of the out-of-town banks is to shift their funds to New York City when interest rates are higher here than at home, and draw them back when interest rates are higher at home. These out-of-town banks were, therefore, following the natural course of banking procedure. While the table does show that the high call money rates for stock market account drew to New York an increased volume of money from banks in other sections of the United States, they do not indicate that these banks over-extended themselves or placed a disproportionate amount of their available funds in that class of loans. Indeed, if the figures of the growth of capital, resources and deposits, and therefore of loanable money, were available, it would doubtless show that the total brokers' loans of these out-of-town banks were no greater proportionately than they were in 1926.

Now we come to the loans "for others." This represents the private capital of corporations and individuals. It is distinctive and apart from the funds of our depository banking system. It is money which the possessor has the right to do with as he will. The Federal Reserve Bank has no control whatever over this money—and, contrary to a prevalent opinion, the Reserve Board never assumed to dictate to any man or corporation what he or it should do with his own money.

The total volume of these loans "for others" as reported through the Federal Reserve Banks (not including loans reported direct to the Stock Exchange, not through banks) for the same periods were as follows:

September, 1926	$ 691,000,000
September, 1927	918,000,000
September, 1928	2,001,000,000
September, 1929	3,860,000,000

The total increase in this volume of loans "for others" for the four-year period was 458.6%. This volume of money went into brokers' loans for one reason alone—because the speculative market was continually bidding higher than the average earnings from other equally secured loans.

Mr. Cunningham concludes: "We thus find that the expansion of brokers' loans was not on the part of the depository banking system, but represented the funds of 'others,' and that the responsibility for the distortion of the credit situation of the nation, and

indeed, of the entire world, is, therefore, directly traceable to the continuous high bids for money for speculative account."

HIGH MONEY RATES.

As far back as last March, the writer took issue with the policy of the Federal Reserve Board in threatening to resort to high money rates as a punitive measure against the stock market inflation which some of its critics have declared partially resulted from its low money policy of 1927, saying:

"While we believe that the course of the stock market will be largely governed by the cost of credit we have found during the month a great deal of support to our theory repeatedly expressed, that the proper way to control or at least constrain reckless speculation is to reduce rediscounts and the rates for time and call money. As long as Wall Street money lenders, bootleg, or otherwise, continue to put an alluring premium on funds that are being used to finance the current operations in the stock market as well as the process of distribution which new wealth is seeking through the agency of the great mart which has become the modern cradle of industry, just so long will liquid funds be withdrawn from customary moods of employment and become competitors of the banks in this lucrative field.

"There, of course, arises the problem as to the dangers that might come from the possibility of a recall of the huge volume of foreign money which is now being placed on call in New York in order to profit by the high rates of recent months. The amount of these funds is variously estimated at between $600,000,000 and $1,000,000,000. A much less attractive rate for money in the call loan market would undoubtedly cause the withdrawal of a part of these funds which are payable on demand. At the same time we must remember that the high money rates abroad are very largely the result of the rates prevailing in New York and with a reduction in our rates for interest, we should find a corresponding contraction in the rates of rediscount in Europe, so that there should be a strong possibility of the retention here of a great part of these funds. It must be remembered that money seeks the center of the most remunerative employment when all other conditions are equal.

"Therefore, the problem that confronts our bankers is not a domestic one, it is international in scope. Our high credit cost which is aimed at what is termed an evil is increasing the cost of doing business the world over. It is forcing the banks of issue in Great Britain and the Continent to adopt measures of self-protection which are likely to become retaliatory if the evils persist."

Among those who speak with authority, the chief critics of the policies of the Federal Reserve Board were William C. Durant, one of the country's leading industrialists and Ex-Senator Robert L. Owen, father of the Federal Reserve Act. Both severely condemned the policy of the Board in fostering interest rates that invited an inflow of an enormous volume of bootleg money into the Street. Mr. Durant, in an address before the American Club of Paris, arraigned the policy of the banking mentors, predicting that if persisted in it would have sinister consequences.

Unfortunately this forecast was too abundantly fulfilled. In the attempt to maintain the international financial balance and to prevent the outflow of gold as a result of the high money policy adopted by American bankers the Bank of England rate was advanced to 6½%, with the result that the enormous sums which were being loaned in this country on call were suddenly withdrawn and this was accompanied by heavy selling of American securities for foreign account although the Hatry collapse in Great Britain was another impelling cause for the return home of these funds to meet the exigencies caused by this cataclysm. London interests more or less affected by the Hatry failure had been very heavy holders of Radio, United States Steel and other pivotal stocks in the American market.

LOSS OF THIRTY BILLIONS.

Almost immediately began the decline in stock market values in the United States which culminated in the crash of October and November. The real peak of the stock market, according to averages, was actually reached on September 3rd, the first business day of the month when the Dow Jones Averages for thirty industrials reached the high level of 381.17 while twenty representative rails were up to 189.11. In the paroxysm of November 13th they plunged to 198.69 for the industrials and 128.07 for the rails. It was then that the banking pool consisting of the National City, First National, Bankers Trust, Chase National, Guaranty Trust and J. P. Morgan & Co., and their associates, stepped in to prevent absolute chaos and their work was so successful that on the following day the averages for thirty industrials had risen to 217.28 and the rails to 135.75. Since that time they have progressed irregularly until at the close of business on December 5th they were 251.51 and 149.41 respectively.

The extent of the actual losses will probably never be computed. It is estimated that at the lows, securities had shown a loss of $30,000,000,000 which practically equalled the amount of the first German indemnity as determined by the Reparation Commission. In other words the theoretical losses in the short period between September 3rd and November 13th actually approached the appalling sum which the Reparation Commission fixed as representing the devastation wrought by Germany in the five years of the Great War.

The nearest approach to an accurate appraisal of the depreciation in stocks during the month of October is furnished by John T. Meeker, Economist of the New York Stock Exchange. The following figures supplied by him do not represent, however, the gross depreciation in securities but the net as of the month of October. They form, however, a very valuable statistical appraisal of the net losses that took place within the month of October.

As of Oct. 1, 1929, there were 1,279 stock issues aggregating 1,048,359,263 shares listed on the New York Stock Exchange, with a total market value of $87,073,630,423. (An average price of $83.06.) New York Stock Exchange member borrowings on security collateral amounted to $8,549,383,979. The ratio of security loans to market values of all listed stocks on this date was therefore 9.82%.

As of Nov. 1, 1929, there were 1,287 stock issues aggregating 1,110,419,105 shares listed on the New York Stock Exchange, with a total market value of $71,752,650,908. (An average price of $64.62.) New York Stock Exchange member borrowings on security collateral amounted to $6,108,824,868. The ratio of security loans to market values of all listed stocks on this date was therefore 8.51%.

It is illuminating to trace the expansion of brokers' loans from Jan. 4, 1928 up to and including those of Thursday, Dec. 5, 1929. The peak was reached on Oct. 2, immediately preceding the great cataclysm of that month and while Oct. 9 and Oct. 16 still showed them close to the peak, it was not until Oct. 23 that the contraction of loans began and steadily progressed These loans reached a new low for two years on Dec. 5, as this table shows:

1928.		1929.	
Jan. 4..	$3,810,023,000	Jan. 2..	$5,330,103,000

SUPPORT FOR THE MARKET.

Too much praise cannot be given to the remarkable work of the great banking pool and the splendid and patriotic cooperation of the captains of finance headed by John D. Rockefeller. It is commonly reported in Wall Street that the pool had pledged $1,000,000,000 of liquid funds to be used in correcting the dangerous tendencies that the market had developed and that individuals as well stood shoulder to shoulder with the pool in the work of a national defense. John D. Rockefeller is credited with having bid on the day following the great debacle, $50 a share for 1,000,000 shares of Standard Oil of New Jersey, while Mr. Richard Whitney, the courageous Morgan broker, bid 205 firm for 250,000 shares of United States Steel, an act of finacial heroism that has been appropriately recognized in a resolution of praise adopted by the Governors of the New York Stock Exchange.

Coincident with this work in Wall Street, the administration at Washington not only gave words of reassurance but adopted a constructive program designed to foster industry and to fortify it against the more or less temporary influence of the Wall Street panic. Perhaps the most concrete evidence of reassurance came from the announcement made by the wise and far seeing Secretary of the Treasury, that the influence of his administration would be pressed upon Congress to secure a reduction in the income tax, a proposal which has already been translated into action by the upper and lower houses, all parties and partisans concurring in the same constructive spirit.

The history of the great stock market panic would not be complete without emphasizing the words of reassurance to the country that were given in the darkest hour by President Hoover and the great financiers and industrial leaders of the country whom he called in conference.

The President said: "The fundamental business of the country, that is, the production and distribution of commodities, is on a sound and prosperous basis. The best evidence is that although production and consumption are at a high level, the average prices of commodities as a whole have not increased and there have been no appreciable increases in the stocks of manufactured goods. Moreover, there has been a tendency of wages to increase and the output per worker in many industries again shows an increase, all of which indicates a healthy condition.

"Construction and building industries have been to some extent affected by the high interest rates induced by stock speculation and there have been some seasonal decreases in one or two industries, but these movements are of secondary character when considered in the whole situation.

"A temporary drop in grain prices sympathetically with stock exchange prices usually happen, but, as the Department of Agriculture points out, the overriding fact in grain is that this year's world wheat harvest is estimated to be 500,000,000 bushels less than that of last year, which will result in a very low carry-over at the end of the harvest year."

The Governors of the Stock Exchange handled the situation with wisdom and sound judgment. For the first time since the war, the Stock Exchange curtailed its hours of trading in order to stem as far as possible the hysterical liquidation that was in progress. At the same time it addressed a series of questionnaires to all of its member houses requiring a complete daily report of the exact status of its books. While the explanation has never been officially given the purpose was undoubtedly to locate the source of the short selling and fix the identity of the powers that prey upon the distress of the country's investors.

EFFECT ON BUSINESS.

The question uppermost in the minds of everybody is the effect of the deflation of the stock market to the future course of business. The general opinion that business will suffer to an extent unheard of, is fallacious for the following reasons:

1. The cheapness of money will encourage its employment in building construction.

2. Surplus funds held by corporations and formerly put out on call money will now be used for plant improvement, expansion and experimentation in allied fields.

3. While many small speculators, traders and investors were wiped out, nevertheless the real and significant losses were sustained by those able to carry them.

4. Exports will now show further increases as Europe will be able to borrow in this country and use part of these funds in the purchase of goods here.

Business then, while showing a temporary recession, will march on.

In the meantime we shall doubtless witness the growth of an investment market along safe and sane lines. The stock market is the exact antithesis of that of early Fall when loans and prices by a freak economic anomaly were at the peak of the year. At that time money was lending at 10% and the "yellow chip" stocks were showing returns from a bare fraction to 2.50%. Now money is lending at 4½% and many good common stocks are returning from 6 to 8%. Measured by the old-fashioned yardstick of the dividend yield as compared with the return from liquid funds in the open market they are selling ex-imagination, ex-speculative potentials. They have solid book values now—not dream book values.

VACANT PUBLIC LANDS IN THE UNITED STATES.

The following figures, revised officially to July 1, 1929, show the acres of surveyed and unsurveyed public lands in the United States, the figures in parentheses being acreage of unsurveyed domain: Arizona, 9,065,367 (7,846,000); Arkansas, 205,933; California, 14,459,737 (5,749,684); Colorado, 7,082,-181 (1,136,694); Florida, 7,193 (6,662); Idaho, 8,851,615 (1,882,805); Minnesota, 197,996; Montana, 6,821,824 (78,320); Nebraska, 28,960; Nevada, 31,318,305 (22,092,633); New Mexico, 15,117,955 (1,164,627); North Dakota, 152,113; Oregon, 13,-134,730 (92,411); South Dakota, 402,670; 13,192,133 (11,955,734); Washington, 937,701 (14,-202); Wyoming, 16,218,036 (817,501). Grand total, 190,031,722.

The unappropriated lands in Alaska are not included therein. The total area of Alaska is 378,-165,760 acres, of which about 30,000,000 acres are reserved. Of the reserved area, 21,397,521 acres are within the boundaries of national forests.

Approximately 1,910,951 acres have been surveyed under the rectangular system and special surveys by metes and bounds.

Cash receipts of the General Land Office during the fiscal year ended June 30, 1929: from disposal of public lands, $312,144.45; sales of Indian lands, $539,531.33; power permits, $12,302.16; copies of records, $24,412.92; receipts from mineral leasing act of February 25, 1920, $3,926,150.83; sales of government property, etc., $1,379,424.64.

Total receipts for the year, $6,193,966.33.

Area of public and Indian lands originally entered during the fiscal year ended June 30, 1929, 4,612,722 acres; area of lands patented on original disposition, 2,494,647 acres.

The total number of entries, acres sold and amount received therefor under the Timber and Stone Acts of June 3, 1878, and August 4, 1892, were: from June 3, 1878 to June 30, 1929—entries, 107,673; acres 13,827,516; amount, $35,503,452.52.

REAPPORTIONMENT TO FOLLOW 1930 CENSUS.

Congress in the extra session of 1929 passed a census and reapportionment bill—the House on June 6 by a vote of 272 to 105, and the Senate on June 13 by a vote of 48 to 37—and it was approved by the President on June 15. The bill provides for reapportionment of the seats in the House, retaining the total number at 435 as at present, following the returns of the census of 1930, and sets up a permanent mechanism for census taking and for Presidential declaration of reapportionment if Congress fails as it has since 1911 to obey on its own initiative the constitutional mandate requiring reallocation of House seats after each decennial census.

The distribution of seats as shown in the table on page 919 of the Almanac will remain therefore unchanged from 1910 until after the election of 1930. The latest census estimate of the changes likely to be made following the census of 1930 vary somewhat from earlier estimates and now stand: Losses—Indiana, Iowa, Kentucky and Mississippi, 2 each; Alabama, Kansas, Louisiana, Maine, Massachusetts, Nebraska, New York, North Dakota, Pennsylvania, Tennessee, Vermont and Virginia, 1 each. Gains—California, 6; Michigan, 4; Ohio, 3; New Jersey and Texas, 2 each; Arizona, Connecticut, Florida, North Carolina, Oklahoma and Washington, 1 each.

OLD AGE PENSIONS IN 1929.

The bills presented in 1929 in California, Minnesota, Utah and Wyoming were enacted into laws. The states of Montana, Nevada, Wisconsin, Kentucky, Colorado, Maryland and the Territory of Alaska had previously enacted old age pension laws. In 1929 old age pension bills passed one branch of the legislature in the States of Delaware, Illinois, New Jersey, Nebraska, Texas and Washington. A Commission to study the subject was created in New York to report to the legislature in 1930. At the end of 1929 pensions were being paid in Montana, Utah, Wisconsin and the Territory of Alaska. Pension payments under the California law begin Jan. 1, 1930.

The standard bill as presented by the American Association for Old Age Security, 104 Fifth Ave., New York City (Pres. Bishop Francis J. McConnell, Executive Secretary Abraham Epstein), provides for the payment of a pension to men and women of the age of 70 and upwards, who have no income above $1 a day, no children able to support them and who have lived in the State for 15 years and have been citizens of the United States for 15 years. The maximum pension is limited to $1 per day.

Of the eleven States having old age pension laws, six (California, Colorado, Kentucky, Minnesota, Montana and Wisconsin) provide a 70 year age qualification. Maryland, Nevada, Utah and Wyoming fix the minimum age at 65 years, and Alaska at 65 for males and 60 for females.

A maximum pension at $1 a day is followed in six states (California, Colorado, Maryland, Minnesota, Nevada and Wisconsin). Wyoming fixes the maximum at $30 a month, Montana and Utah at $25 a month, and Alaska fixes the maximum at $25 a month for males and $45 a month for females. Kentucky fixes the maximum on a yearly basis of $250.

In Alaska the Territory provides the funds for the payment of the pension. In California the State provides one-half and the county or city and county provide the other half of the cost of the pension. In Wisconsin the act provides that one-third of the cost will be refunded to the county by the State. In all other States the funds are to be provided by the counties.

BOND MARKET REVIEW FOR 1929.

By John A. Crone.

High money rates and a preference for equity securities slowed bond sales and new bond offerings, and contributed to declining quotations throughouto the largest part of 1929. Resuming the decline of 1928, bonds dropped steadily until the middle of March, when Secretary Mellon expressed the belief that it was an opportune time to buy bonds. This rally, however, lasted only until April 24 when bonds started their steady decline to October 4. Between that date and October 23 they regained more than two points, only to react almost as much up to November 4, when an abrupt rally set in which—in twelve business days—caused bonds to recover more than 2½ points, or the largest advance within so short a period in several years.

The average price of corporation bonds as of Dec. 6, 1929 was more than three points higher than the extreme low of Oct. 4, 1929 but nearly two points under the level that prevailed Dec. 6, 1928. The stock market crash between Oct. 23 and Nov. 14 at times brought about a heavy liquidation of bonds to protect speculative accounts.

Between Jan. 1 and Dec. 2, 1929, time money ranged from 9¾% to 4¼ ¾% and call money from 20% on March 26, the highest since Feb. 5, 1920, to 3% in the early part of December.

The Reparations Plan caused wide fluctuations in foreign bonds. Low prices for sugar and the threat of a tariff broke sugar prices—Cuba Cane Sugar, the biggest Cuban producer, went into receivership. Local tractions nose-dived as a result of the Supreme Court's unfavorable 7-cent Fare decision. Real estate financing was adversely affected by high money, as were also municipals, equipments, and United States governments—the latter, in some instances, selling at the lowest prices since 1921.

The outstanding features of financing were the huge amount of investment trust securites and the small amount of foreign—excluding Canadian—and real estate financing.

High money rates here caused the United States Treasury to pay 5¼% for June financing—the highest rate since 1921 (the December 1929 financing carried only 3¼% due to the drop in money—the lowest since Nov. 15, 1927); withheld approximately $300,000,000 of municipal financing and made it possible for London to outbid New York for a Montreal Loan. It brought about a resumption in foreign financing in France, reduced the number of bonds called for payment in advance of maturity date and, at one time, left only one national distributor of miscellaneous bonds apart from banking houses in this country, as other firms, which had heretofore confined their efforts to bonds, turned to other forms of securities.

Some of the unusual features of the new bond financing during the year included: the sale of $219,000,000 of American Telephone & Telegraph convertible 4½s 1939, a record-size utility bond offering to shareholders; a $65,000,000 Southern Pacific Railroad bond offering of 4½s, the first railroad bond in this country to carry warrants; $30,000,000 of American I. G. Chemical 5½s, which was a rare instance of an American corporation bond being guaranteed by a foreign corporation, I. G. of Germany; $32,000,000 Railway Express Agency serial 5s, which organization is owned by all the American railroads; $100,000,000 Texas Corporation convertible 5s of 1944, the largest oil issue of the year; and a change in Treasury financing methods.

Of the $216,000,000 Foreign bonds (this total excludes Canadian issues, some of which now represent subsidiaries of United States corporations because a large percentage of Dominion companies are financing in Canada) sold in New York in the twelve months ended Nov. 30, 1929, Europe issued $104,100,000 or 48%; South America $95,750,000 or 44% and Cuba $16,250,000 or 8%.

The Far East, which in 1928 sold $97,550,000, and Australia which marketed $57,500,000 here in 1928, did not float an issue in New York in the twelve months ended Nov. 30, 1929.

Foreign Government loans were $40,000,000, of which $10,000,000 went to Europe (Roumania) and $30,000,000 to South America (Chile).

Foreign Cities, States and Provinces borrowed $76,250,000, of which $32,500,000 or 45% went to Europe; $33,750,000 or 44% to South America and $10,000,000 (13%) to Cuba.

Foreign Corporations borrowed $99,850,000, of which $61,600,000, 61%, originated in Europe; $32,000,000, 32%, in South America, and $6,250,000 or 7% in Cuba.

Canada sold in this country in the twelve-month period ended Nov. 30, 1929, $416,202,000 of bonds and notes, of which $183,000,000, 44%, were Government (all being Canadian National Railway issues) $85,996,000, 21% municipals, and $147,206,000 or 35% corporations.

SIXTEEN BILLION OUTSTANDING.

Foreign loans of the United States publicly offered at present outstanding approximate $16,000,000,000. This does not include war debt nor private investments of American corporations. Even this vast sum is $4,000,000,000 less than Great Britain's foreign investment before the World War. Foreign loans from this country in view of the fact that Paris, London and Amsterdam promise to compete for such business probably will be less proportionately to Europe and may show an increase proportionately to South America, Canada, Australia and the Far East.

The public's purchases of securities, especially the expanding investment trusts, caused a shrinkage in the nation's savings accounts in banks of more than $195,000,000 for the year ended June 29, 1929, against an increase of over $2,300,000,000, the largest ever recorded, for the similar period ended June 29, 1928. Savings accounts totaling $28,217,656,000 as of June 29, 1929, represent the first recession in twenty years. A great portion of the money withdrawn from savings accounts, or never deposited in banks, went into stocks. This movement hit bonds in that it curtailed the bond-purchasing power of savings bank.

New securities in the twelve months ended Nov. 30, 1929 totaled $13,375,029,344, against $10,544,628,177 in the twelve months ended Nov. 30, 1928. These totals do not include United States Government financing or any issues not publicly offered in New York City. This is a gain of $2,830,401,167. One group alone, under which is included investment trusts, investment companies, holding corporations, finance companies and trading companies, accounted for $3,673,509,100 for the twelve months ended Nov. 30, 1929 as against $584,291,800 for the same period of the previous year; in other words, the increase in this single group alone was greater by $258,-817,033 than the entire increase in new securities floated during 1929 as against 1928.

New bond offerings in the twelve months ended Nov. 30, 1929 total $2,812,145,000 as against $4,175,-888,000 in the same period of 1928. Only one group—Utilities—amounting to $1,016,882,000—crossed the billion mark. Industrials aggregated only $696,948,000 as against $1,918,056,000 in the same 1928 period. Railroads totaled $435,295,000, against $553,130,000 in the twelve months perido ended Nov. 30, 1928.

The $13,375,029,344 new issues floated here in the twelve months ended Nov. 30, 1929 compares with new offerings of $1,367,330,410 marketed in London during the same period.

Municipalities, because of high money rates, financed whenever possible with short-term notes or bank loans, yet state and municipal flotations for the eleven months ended Nov. 30, 1929 were $1,163,333,-344, according to the Daily Bond Buyer, against $1,276,678,177 and $1,359,876,596 in the same 1928 and 1927 periods. Unlike November, 1928, when $240,000,000 highway bonds were voted, not a single issue had to be approved in November, 1929. The South Carolina legislature, however, authorized $65,000,000 and other states various amounts. Since Massachusetts floated the first highway bond in 1894, about $996,266,100, including refunding issues up to Dec. 31, 1928, were issued.

Bonds listed on the New York Stock Exchange as of Sept. 1, 1929 numbered 1,553 issues with a par or face value of $49,026,704,855 and a market value of $46,741,171,208. This compares with 1,534 issues Jan. 1, 1929 with a par value of $48,588,549,554 and a market value of $47,379,028,502. It is not possible to classify bonds in groups because the Exchange considers its classification of foreign government, foreign corporation, domestic railway and non-railway issues as obsolete and late in 1930 will further classify its bond listings. Bonds on the New York Curb Exchange now number 455 bonds of which 355 are domestic and 100 foreign issues.

Defaulted bonds at the close of 1929 totaled $458,524,245 (par value) against $527,770,305 at the end of 1928 and $693,405,465 at the end of 1927. Rail defaults of $98,807,550 compare with $94,163,-050 in 1928 and $321,037,670 in 1927, the latter being occasioned by the carryover of the Chicago, Milwaukee and St. Paul receivership. The Chicago and Alton and the Minneapolis and St. Louis now form the bulk of rail defaults. Utility defaults at the end of 1929 were $248,654,400—readjustment of the Chicago traction situation would lift $150,638,-

275—compared with $279,408,475 in 1928 and $267,471,175 in 1927. Industrial defaults of $123,858,620—largely due to Southern real estate defaults—compared with $154,198,780 in 1928 and $104,966,620 in 1927.

Bonds called for payment in advance of maturity, reflecting the high money rates that prevailed most of the year which prevented considerable refunding, totaled $890,784,950, or $950,000,000 below 1928 and $610,000,000 less than in 1927. Bond calls in 1928 were $1,841,787,230 and in 1927 were $1,501,861,700, so those of 1929 were the third highest on record.

REFUNDING OPERATIONS.

The three outstanding refunding operations, in order of their importance were: retirement of all bonds of the United States Steel Corporation and some of its subsidiaries bonds, retirement of all Anaconda Copper bonds and the calling for redemption of considerable Bethlehem Steel Corporation bonds, including some subsidiary obligations, in 1930.

Corporate maturities in 1930 total $1,256,946,120, consisting of $701,949,310 rails, $248,554,400 public utilities and $306,342,410 industrials. Corporate maturities in 1929 of $953,597,961 consisted of $460,465,120 rails, $253,760,950 utilities and $239,371,891 industrials. Maturities in 1928 totaled $915,876,865, including $305,419,620 rails, $185,639,122 utilities and $274,818,123 industrials. Record amount, $1,562,142,000, fell due in 1919.

Total bond sales on the New York Stock Exchange for the ten months ended Oct. 1, 1929 were $2,476,754,000, against $2,533,363,000 and $3,011,020,000 respectively in the same periods of 1928 and 1927. Liberty and Treasury sales of $111,040,000 in the 1929 period comparing with $150,709,000. Record low for any month was reached by this group in Aug., 1929, with sales of $8,510,000. Foreign government sales were $367,744,000 against $490,730,000 in the 1928 period. September sales of $28,172,000 were the lowest total since Dec. 1923, and October sales of $49,385,000 were largest since June, 1928. Foreign and domestic corporation bond sales of $1,997,970,000 compare with $1,891,834,000 in the first ten months of 1928. October sales of $287,989,000 were the largest in the history of the exchange, comparing with the previous high record in this class of $270,963,000 in Nov., 1924. Curb bonds sales up to Dec. 7, 1929 were $514,026,000, which compares with $834,893,000 in 1928 and $25,510,000 in 1921, or the first year the Curb moved indoors.

Bond dealings became so heavy on the New York Stock Exchange in November that contracts in 19 of the leading convertibles were cleared through the Stock Clearing Corporation. This was the first time bond transactions were cleared through the Night Clearing Branch, with the exception of the period April, 1918, to December, 1925, when Liberty Bonds were the subject of special daily clearances, and from March to April, 1922, when certain foreign government bonds were cleared.

Amounts of bonds, notes and stock issues by railroads, industrials, public utilities and investment trusts and companies—the latter being included in "Miscellaneous"—for the twelve months ended Dec. 1, 1929, including foreign corporation loans but excluding foreign government loans, United States Government obligations and municipals follow (000 omitted):

Class.	Bonds.	Notes.	Stock.	Total.
	$000	*$000*	*$000*	*$000*
Railroads	$435,259	$174,427	$179,244	$788,930
Utilities	1,016,882	106,475	1,675,158	2,798,515
Industrials	696,948	90,480	3,018,428	3,805,856
Miscellaneous	663,056	119,123	3,503,764	4,285,943
Total	$2,812,145	$490,505	$8,376,594	$11,679,244

FOREIGN GOVERNMENT LOANS.

Following is a compilation of Foreign Government loans assumed by American bankers in order of their presentation from Dec. 1, 1928, in thousands of dollars:

Description.	
Government:	*$000*
Roumania 7s, 1959	$10,000

Chairman—Thomas O Marvin. *Vice Chairman*—Alfred P. Dennis; Commissioners, Edgar B. Brossard, Sherman J. Lowell, Lincoln Dixon, Frank Clark; *Secretary*—John F. Bethune.

SECRETARY MELLON ON THE ECONOMIC OUTLOOK.

Secretary of the Treasury, Andrew W. Mellon, discussing the economic and financial condition of the country, in his annual report for 1929, said in part:

"During the fiscal year 1929 the Federal revenues reflected the prosperity prevailing in the calendar year 1928, which not only increased the incomes of corporations taxable as such, but also increased the taxable income distributed to individuals. This prosperity was reflected in increased wages and profits from industry and commerce and in the rising prices of securities, particularly stocks, realized gains on the sales of which increased individual incomes and, to an even greater extent, the tax collections.

The fiscal year 1929 closed with a surplus of $184,787,035 of ordinary receipts over expenditures chargeable against ordinary receipts, of which $123,601,014 had been applied to retire the public debt during the year. Measured in terms of total receipts, the surplus amounted to 4.58%.

The physical volume of industrial production for both manufactures and minerals was slightly higher at the beginning of the fiscal year than at any time during the preceding year, and each succeeding month showed substantial gains over the corresponding month a year earlier. The usual seasonal decline expected during the late fall and early winter months was not realized. The total increase during the year was somewhat over 10%. This increase more than offset a decline of 3% between 1927 and 1928, but the net increase of 7% over the 2-year period represented an average annual increase which approximated the customary long time rates of growth.

Automobile production during the year set a new high record with an increase of approximately 53%. The production of steel ingots, for which the manufacture of automobiles constitutes one of the major sources of demand, increased. However, the demand for steel in other lines did not parallel that for automobiles and therefore the net increase was only 22%, or less than half the increase for automobiles. There was a 2.6% increase in factory employment and a 5.7% increase in payrolls, in contrast to the downward trend noticeable in earlier years. Freight-car loadings increased 4.3%.

Building construction was one of the few lines of industrial activity showing decreases. The net decrease as measured by contracts awarded was 5.2%. Residential construction decreased 15.3%.

There was no important change in the price of commodities.

The foreign trade of the United States approached $10,000,000,000. Exports were 5.4 billions and general imports 4.3 billions. This was an increase of 10.2% in exports and 3.5% in imports over the preceding fiscal year.

According to figures published by the Department of Agriculture, the gross income of agriculture increased during the fiscal year from 12.3 billions to 12.5 billions, or less than 2%. The income from cotton production remained constant, that from meat animals and from dairy and poultry products showed some gains which were in part offset by decreases from grains, fruits and vegetables. The net income available for the *total* capital invested in agricultural production, including rewards for management, increased from 2.72 billion to 2.75 billion. Of these amounts 1.17 and 1.19 billion represented returns to the operators as rewards for management and returns on their *net* capital invested. The average prices received by farmers and those paid by farmers for commodities bought were practically the same in the fiscal year 1929 as in 1928.

FINANCIAL CONDITIONS.

The outstanding financial events of the fiscal year affecting either Federal revenues or expenditures were the continuance of an active and rising stock market, declining bond prices, a change in the character of security flotations, and the emergence of relatively high interest rates.

The total value of domestic capital stock issues increased from $2,343,000,000 to $5,259,000,000, or 124.5%. The increase in the turnover of all stocks and in the issuance of new domestic capital stock accounts for a large increase in the collections from the stamp tax on capital stock transfers and issues. The gains realized from such turnover also account for a large part of the increased revenue from individual income taxes.

Securities offered solely by domestic business corporations amounted to $7,011,600,000, exclusive of refunding issues, an increase of $2,486,200,000, or 54.9% over the preceding year. Of the amount offered $3,224,200,000 was in the form of common stock, an increase of 280%, and $1,418,400,000 in the form of preferred stock, an increase of 46.8%. The balance, representing bonds and notes, decreased 12.6%. Issues of securities by domestic corporations for refunding purposes in the form of bonds, notes, and preferred stock decreased from $2,039,400,000 to $603,500,000, while refunding through the issue of common stock increased from $154,400,000 to $505,400,000. Foreign securities offered in the United States, exclusive of refunding issues and consisting chiefly of bonds, decreased from $1,505,600,000 to $871,000,000 or over 42%.

Under the pressure of demand for funds arising out of the extraordinary situation prevailing in the stock market, interest rates rose during the fiscal year and increased the interest cost to the Federal Government.

Interest rates were rising at the beginning of the year, declined somewhat during the fall months, and rose again, beginning in January. The discount rate was increased at seven Federal Reserve banks from 4½ to 5% in July, 1928, followed by advances at other banks, the 5% rate prevailing by May 20, 1929. The New York bank raised its rate to 6% on Aug. 9, 1929. Interest rates, measured by the yields of 60 high-grade bonds, rose from 4.50% in June, 1928, to 4.73% in June, 1929, and commercial paper rates during the same period rose from 4¾–5 to 6%.

Federal Government borrowing was effected at much higher costs than during the preceding fiscal year. The Federal Government floated issues of certificates of indebtedness with 3⅛ and 4% coupon rates in June, 1928, but had to offer 4⅛% in September, 1928, 4¾% in October, 1928, and March, 1929, and 5⅛% in June, 1929, there being but one recession in the advance in rates, thatof a 4¼% issue in December, 1928. These rates were distinctly higher than in the preceding fiscal year when the coupon rates varied from 3 to 4%, so that the average rate paid upon the entire Federal interest-bearing debt at the end of the year was 3.95% as compared with 3.88% one year earlier.

A review of the policy of the Federal Reserve Board during the past year shows that it has endeavored to guard against an undue extension of credit through speculative channels and to conserve the country's credit resources for the purpose of meeting future requirements of industry and trade. The gold that came into the country during the year ending June 30, 1929, was not added to member bank reserves and did not constitute the basis of expansion of the country's credit structure, but was used to liquidate reserve bank credit. Chiefly as a result of the inflow of gold, total reserves of all reserve banks increased by more than $300,000,000 during the year. Since the banks' total note and deposit liabilities showed relatively little growth, the reserve ratio for all banks combined increased from 68% to 74.5%, and the volume of reserves in excess of legal requirements increased by about $300,000,000. At the end of the period, therefore, the reserve banks were in a stronger position than a year earlier, and were better prepared to meet any emergency demands that might arise, as well as to provide the basis for meeting the increase in the country's credit requirements growing out of year-to-year growth in the volume of industrial, commercial, and financial activity.

BRANCH AND GROUP BANKING.

In banking, as in other enterprises of this country, there is increasing evidence of a movement toward larger operating units. The number of branches of banks in operation has increased and more recently there has been a growth also in the number of groups in which several independent banks are operated more or less as a single system. Both of these developments reflect changes in the underlying economic situation.

Branch banking has always existed in this country to a limited extent in one form or another. At the present time the Federal reserve act and the national bank act, as amended in 1927, authorize national member banks to establish branches in foreign countries, and in insular possessions of the United States, and all member banks to establish branches within the corporate limits of the center in which the head office of the parent bank is situated and in which State laws permit State banks to operate branches (with certain restrictions as to the size of centers in which branches may be established by national banks). At the end of June, 1929, state-wide branch banking was permitted in 9 States and in the District of Columbia; branch banking in more limited form was specifically permitted in 11 States; and in 23 States the operation of branch systems was specifically prohibited.

In June, 1929, out of a total of 8,707 member

banks in the Federal reserve system, 354 were operating 2,291 branches. This represents an increase of 130 branches during the year.. On the same date 818 banks, including both member and non-member, were operating a total of 3,440 branches, an increase of 210 fof the year. The development of branch banking which is permitted by existing legal arrangements has facilitated the adaptation of banking facilities to requirements of urban areas.

More recently there has been a rapid increase in the organization of group systems of banks. Such groups comprise one or more banks that are brought under unified control and some degree of centralized management through acquisition by an individual or corporation of a controlling interest in their stock issues. Although technically each bank in a group is a separate corporation operating with its own capital funds and under the direct supervision of a local board of directors, a certain degree of unity is achieved for the group as a whole. At the end of June, 1929, it was authoritatively reported that there were in existence at the time 230 group systems of banks in the United States, which embraced about 2,000 banks. Group banking is a means of accomplishing in a measure the objects of more extensive branch banking systems than are permitted under the Federal reserve act or under existing legal arrangements in most States. Although banking groups may be expected in most instances to strengthen the banks which they control, the organization of such groups places great responsibilities upon the controlling interests, and is a matter of vital interest to State and national supervisory agencies.

In view of the fundamental economic situation which has given impetus to the organization of group-banking systems and to the growth in branch banking, it is desirable that these developments be carefully studied. In the meantime it is hoped that any further extension of group and branch banking organizations will proceed with moderation, and that hasty legislation, either to liberalize or to constrict limitations now in effect, will be avoided. Our banking structure, the product of many years of experience, is part of an intricate economic fabric whose parts are closely adjusted to one another, and a too rapid reorganization would be likely to create serious and costly disturbances that would affect the entire country.

The time has come when it would seem to be wise to undertake a thorough study of the situation with a view to determining the soundness of the present-day tendencies, and more particularly the limits of the economic units within which branch banking may be advantageously permitted.

The Secretary said that the issue of the new small-sized currency which began on July 10, 1929, requires for the replacement of all paper currency outstanding a total of approximately $5,000,000,000 in nearly 900,000,000 pieces. He announced to Congress on January 21, 1929, that it was inadvisable to submit a plan for the early retirement of the 2% bonds on which the National bank circulation of our 6,000 saving banks is based. To replace the large-sized national bank-notes the printing of small-sized notes was completed November 1, which are to be typographically surcharged with the name of each individual bank as issued from the vaults of the Treasury to replace old notes turned in.

AMERICAN MILLIONAIRES.

In the details contained in the compilation of tax statistics for 1927, New York State, with 136, easily led all other States in the number of taxpayers who reported personal incomes of $1,000,000 or more Figures by States for the "millionaire" class for 1927 follow:

California—4 from $2,000,000 to $3,000,000; 2 from $1,500,000 to $2,000,000, and 2 from $1,000,000 to $1,500,000.

Connecticut—1 from $1,000,000 to $1,500,000.

Delaware—3 from $2,000,000 to $3,000,000, and 4 from $1,000,000 to $1,500,000.

Dist. of Columbia—1 from $3,000,000 to $4,000,000

Florida—1 from $2,000,000 to $3,000,000, and 1 from $1,500,000 to $2,000,000.

Georgia—1 from $1,000,000 to $1,500,000.

Illinois—1 from $5,000,000 and over; 2 from $4,000,000 to $5,000,000; 1 from $3,000,000 to $4,000,000; 5 from $2,000,000 to $3,000,000; 4 from $1,500,000 to $2,000,000, and 12 from $1,000,000 to $1,500,000.

Indiana—2 from $1,000,000 to $1,500,000.

Iowa—1 from $1,500,000 to $2,000,000.

Maine—1 from $1,000,000 to $1,500,000.

Maryland—5 from $2,000,000 to $3,000,000, and 2 from $1,500,000 to $2,000,000.

Massachusetts—1 from $2,000,000 to $3,000,000; 2 from $1,500,000 to $2,000,000, and 4 from $1,000,000 to $1,500,000.

Michigan—1 from $4,000,000 to $5,000,000; 2 from $3,000,000 to $4,000,000; 4 from $2,000,000 to $3,000,000; 6 from $1,500,000 to $2,000,000, and 2 from $1,000,000 to $1,500,000.

Missouri—1 from $2,000,000 to $3,000,000; 1 from $1,500,000 to $2,000,000 and 2 from $1,000,000 to $1,500,000.

New Jersey—1 of $5,000,000 and over; 1 from $4,000,000 to $5,000,000; 2 from $3,000,000 to $4,000,000; 1 from $2,000,000 to $3,000,000; 6 from $1,500,000 to $2,000,000, and 5 from $1,000,000 to $1,500,000.

New York—7 of $5,000,000 and over; 2 from $4,000,000 to $5,000,000; 14 from $3,000,000 to $4,000,000; 22 from $2,000,000 to $3,000,000; 26 from $1,500,000 to $2,000,000, and 65 from $1,000,000 to $1,500,000.

North Carolina—1 from $1,000,000 to $1,500,000.

Ohio—2 from $2,000,000 to $3,000,000; 1 from $1,500,000 to $2,000,000, and 6 from $1,000,000 to $1,500,000.

Oklahoma—1 from $1,000,000 to $1,500,000.

Pennsylvania—1 of $5,000,000 and over; 2 from $4,000,000 to $5,000,000; 2 from $3,000,000 to $4,000,000; 6 from $2,000,000 to $3,000,000; 3 from $1,500,000 to $2,000,000, and 20 from $1,000,000 to $1,500,000.

Rhode Island—1 from $1,000,000 to $1,500,000.

Texas—1 from $1,500,000 to $2,000,000, and 1 from $1,000,000 to $1,500,000.

Utah—1 from $1,000,000 to $1,500,000.

Washington—1 from $1,000,000 to $1,500,000.

Wisconsin—1 of $3,000,000 and over, and 2 from $1,000,000 to $1,500,000.

New York State, in 1926, had four of $5,000,000 or more, three from $4,000,000 to $5,000,000, nine from $2,000,000 to $3,000,000, fifteen from $1,500,000 to $2,000,000, forty-four from $1,000,000 to $1,500,000.

Michigan, in 1926, had two of $5,000,000 or more.

AMERICAN RAILROADS IN 1929.

By John A. Crone.

American railroads in 1929 earned a record net income despite a decline of $170,000,000 in passenger receipts, rising costs and wages, increasing competition from buses, trucks, inland waterways and airplanes, and larger capital expenditures. Their properties, reflecting expenditures of $800,000,000, or $125,000,000 over 1928, are in the best condition in history. Railroad shares reached record high levels and, in the face of the severe stock market crash, staged impressive recoveries.

The St. Louis & O'Fallon Railroad valuation decision, the California Fruit Growers Rate Case—brought about through the Hoch-Smith Resolution—and the consolidation plan to be submitted by Interstate Commerce Commissioner Porter, are likely to have a more profound influence on American railroading than record net income or record rail share prices.

Valuation rates and consolidations are all more or less tied together in the Transportation Act of 1920. Curiously enough, the Transportation Act thus far has not accomplished any of the three main objectives.

The recapture of excess earnings—except for the voluntary surrender of certain sums by a few roads—to be used as a fund for weak roads has been a "flop." The fair rate of return upon the aggregate value of railroad property has been reached in only one of the years since 1920, and it has never been approximately attained by western railroads. Consolidation of carriers into a limited number of systems, as proposed by Prof. Ripley, apart from unification by lease or purchase of stock control, is yet an unfulfilled dream.

Two previous cases bearing on the question of railroad valuation came to the United States Supreme Court before the O'Fallon case. The constitutional validity of that provision of the Transportation Act which requires a carrier earning more than 6% on the value of its properties to pay over to the Government one-half of the excess, was contested by the Dayton-Goose Creek Railway. The United States Supreme Court in January, 1924, upheld the Constitutionality of the recapture clause of the Transportation Act. Later, Feb. 21, 1927, the Los Angeles & Salt Lake Railway tried to test the validity of the recapture act by claiming that the valuation placed on its properties by the Interstate Commerce Commission would injure its credit. The United States Supreme Court held that the road's claim could not be entertained without proof.

The first clear-cut case involving recapture of earnings and valuation was presented to the United States Supreme Court by the St. Louis and O'Fallon Railway Company, a carrier with 9 miles of main track and 12 miles of yard and siding. It runs from the Illinois coal fields to a connection with the Terminal Railroads Association of St. Louis at East St. Louis. The O'Fallon case, termed by a member of the Interstate Commerce Commission as "the greatest lawsuit in history," involves billions of dollars because the Commission in its report said:

"We are dealing here with one small railroad. Nevertheless what we do in this case we must in principle do for all railroads in the United States."

The Supreme Court rendered its O'Fallon decision May 20, 1929. This decision annulled the I.C.C. order dated Feb. 15, 1927, which required the O'Fallon to pay to the United States $226,880.66, which the Commission determined to be recapturable excess earnings for the three year and ten months period ended Dec. 31, 1923. The case came to the Supreme Court on appeal and cross-appeal of the U. S. District Court for Eastern Missouri after the U. S. Statutory Court at Kansas City on Dec. 19, 1927 declined to interfere on the ground that no confiscation was apparent.

"Whether the Commission acted as directed by Congress was the fundamental question presented," the Supreme Court explained in its decision. "If it did not, the action taken, being beyond the authority granted, was invalid. The only power to make any recapture arose from the statute."

The Interstate Commerce Commission apparently acted in the O'Fallon case under a summary method provided in Section 15a of the Transportation Act, whereby the value of the aggregate railroad property was to be computed without waiting for the slower process of finding the values of individual carriers under the La Follette Valuation Act which dates back to March 1, 1913, the purpose of which was to furnish some standard by which to test the reasonableness of railroad rates.

"The elements of value recognized by the law of the land for rate making purposes," the Supreme Court said, "have been pointed out many times by this Court. . . . Among them is the present cost of construction or reproduction. . . . In the exercise of its proper function this Court has declared the law of the land concerning valuations for rate-making purposes. The Commission disregarded the approved rule and has thereby failed to discharge the definite duty imposed by Congress. . . ."

If the Supreme Court had upheld the I.C.C. on the O'Fallon case it might have collected $300,000,000 excess earnings for the years 1920 to 1928. The O'Fallon case, however, changes this recapture estimate and will require at least six years of additional valuation work under the present system before valuations will be brought approximately up to date. Payments under the recapture clause to date total $8,607,128.51.

The O'Fallon decision apparently removes somewhat the recapture shadow. It does not permit roads to raise rates; they fear competition too much to make such an attempt. It does not give much comfort to weak roads who intended to lean on recapturable earnings of strong carriers. The I.C.C. recognized the principles of cost and reproduction laid down in the O'Fallon decision for the first time, Oct. 15, 1929, in valuing the New York Connecting Railway which is owned jointly by the Pennsylvania and the New Haven.

The general investigation into the freight rate structure which the I.C.C. was directed to inaugurate by the Hoch-Smith Resolution (Jan. 1925) constitutes the most elaborate series of hearings conducted by the I.C.C. in its 42-year existence. Under the Hoch-Smith Resolution, industry's freight rates would rise in prosperity and drop in adversity. The resolution, which became an amendment to the Interstate Commerce Act, under its second paragraph orders the I.C.C. to investigate rate structure. A case—the California Fruit Growers—is now pending before the U. S. Supreme Court.

The I.C.C. for the first time acting under authority of section 11 of the Clayton Act, which forbids purchase by one road of a competing line, proceeded against the Kansas City Southern for acquiring stock of the St. Louis & Southwestern Railway, and the Missouri-Kansas-Texas Railroad was discontinued July 8, 1929 as the first named divested itself of such stocks. The I.C.C. March 11, 1929 ordered Baltimore & Ohio, New York Central and the New York, Chicago and St. Louis Railroad to divest themselves of stock of the Wheeling & Lake Erie Railway Company. This was done by vesting title to the stock, owned jointly by three roads, in an individual trustee who may vote it for all purposes, except for consolidation of Wheeling & Lake Erie with any of the three companies mentioned.

The Interstate Commerce Commission is proceeding with a general consolidation plan, which is under the direction of Commissioner Claude R. Porter. Meanwhile it urges Congress to consider new legislation to prevent possible defeat by setting up holding corporations of the government's plan for "orderly" consolidations of railroads.

The I.C.C. annual report pointed out that a further means of unifying carriers through common control or affiliation has been developed and cites the Alleghany Corporation and the Pennroad Corporation as examples. The I.C.C. then cites two paragraphs of section 7 of the Clayton Anti-trust Act commenting that the second paragraph "is designed to prevent a corporation which is wholly or in part a holding company from acquiring the stock of two or more corporations engaged in commerce, including railroad companies, where the effect of such acquisition may be, among other things, substantially to lessen competition with each other." The I.C.C. regarding Pennroad and Alleghany said: "We have no direct jurisdiction over either of these companies," and then proceeds to show how such corporations might gain control of chains of railroad companies.

Railroads continued to extend the length of their present lines and build into new territory. They add 1,005 miles during 1929, which compares with 717 miles in 1928, and abandoned 540 miles against 587 miles in 1928.

Carriers applied to the I.C.C. for the approval of the issuance of $1,160,383,991 of securities of which $314,133,446 was stock. During 1929 the roads paid the Goverament $12,433,312 on loans granted after the lifting of war-time control. Improvement in net income is shown by the fact that the roads paid $361,000,000 dividends in 1923 and $509,000,000 in 1928.

Rate of freight traffic growth on steam railroads, according to the I.C.C. for the 14 years ended 1928 grew at the rate of 2.89% against 4.98% in the preceding 14 years. Steam roads had 63,311 locomotives at the end of 1928 against 67,936 at the end of 1918, but tractive locomotive power per engine grew

25.27%. Employees on Class I roads at the end of 1928 averaged 1,656,411.

The express business of this country now is conducted by the Railway Express Agency, Inc., owned by all principal roads. It began to operate March 1, 1929 taking over the American Railway Express and the Southern Express.

The net operating income of the Class I railroads (the 175 carriers and 13 switching and terminal companies whose annual gross revenues exceed $1,000,000) for 1929 approximated $1,300,000,000, thereby exceeding the previous record of $1,231,028,559 established in 1926, and comparing with $1,191,524,737 in 1928. Non-recurring back-mail pay approximated $28,000,000. The year ended with a downward trend in earnings.

New financing by railroads in the 12 months ending Dec. 1, 1929, totaled $788,930,390, which compares with $820,410,000 for the same period ending Dec. 1, 1928. Railroad stock was $179,244,390, bonds $435,259,000 and notes $174,427,000, which compare with $187,369,000, $553,130,000 and $79,911,000 respectively in the 12 months ending Dec. 1, 1928.

Wage levels continued slightly upwards, but the number of employees decreased. The net wage bill of all roads in 1928 was $2,631,000,000. Taxes were a trifle lower than the $389,432,415 tax bill for 1928.

Car loadings of revenue freight aggregated 47,661,409 cars from Jan. 1 to Nov. 30, 1929, as compared with 47,162,953 in the same 1928 period and 47,460,529 and 48,608,428 during the same periods of 1927 and 1926 respectively.

Passenger receipts may prove to be the lowest of any year since 1909. Progressive carriers, in an attempt to increase passenger competition, added airplanes as well as motor buses. Air-passenger business, from a railroad revenue point of view, was not successful in 1929, but officials believe it will be increased. Revenue passenger-miles for the first nine months of 1929 amounted to 23,926,000 miles, or a decline of 1.6% from the 24,311,000 reported for the same 1928 period. Long-haul passengers gained, but commuters declined.

Gross revenues for 1929 approximated $6,385,000,000, or about $200,000,000 ahead of 1928, but less than the record-breaking 1926 gross of $6,451,418,163. These figures do not fully reflect the enormous freight traffic volume of 1929 because passenger receipts in that year were about $170,000,000 less than those in 1926.

Capital expenditures of $573,820,000 in the first nine months compare with $500,167,000 in the same three-quarters of 1928, an increase of $73,653,000. Unexpended authorizations brought over into 1929 were greater by $51,540,000 than those brought over into 1928. Additional programs laid out during the first nine months of the year were $293,945,000 greater in amount in 1929 than in 1928. It is expected that aggregate capital expenditure in 1929 will reach $800,000,000.

Equipment expenditures in the first nine months of 1929 totaled $210,689,000, a gain of $44,722,000 or 26.9% over the same period of the previous year. Total orders for freight cars to Oct. 1, 1929 were 91,581 or nearly twice as many as in 1928. Freight cars on order Dec. 1, 1929 for first-quarter 1930 delivery approximated 50,000 cars. Locomotive orders to Oct. 1 were 1,565 or 364 greater than n 1928. Passenger train orders to Oct. 1 were 2,701, as against 2,767 in the same period of 1928.

Equipment orders were registering gains as the year closed. Equipment manufacturers were reopening plants that had been shut down in the previous year, and it is possible that some corporations who omitted dividends in 1928 may resume them in 1930.

The huge capital expenditure since 1923—approximately $6,000,000,000—enabled the railroads to set up the following new records for operating efficiency in the first nine months:

Car miles per car-day, 32.4 or an improvement of 5.9% over the 1928 period.

Net-ton-miles per car-day, 549, a gain of 7%.

Gross tons per train, 1,868, an increase of 2.4%.

Net tons per train, 808, a rise of 2.8%.

Gross ton-miles per train-hour, 24,549, a betterment of 4.6%.

Net ton-miles per train-hour, 10,618, a 5% advance.

Freight locomotive-miles per locomotive-day, 64.8, a 7.5% jump.

Passenger locomotive-miles per locomotive day, 120, or 4.7% more than the same period of 1928.

Percentage serviceable freight locomotives, 83.5 %, which represents a .2% decrease.

Percentage serviceable passenger locomotives, 83.9, up .4%.

Percentage serviceable freight cars, 93.9%, an improvement of .2%.

Gross ton-miles per ton of fuel, 16,203, a 2% gain over the 1928 period.

Passenger train car-miles per ton of fuel, 136, a 1.5% rise.

The Director General of Railroads (the Secretary of the Treasury) reported that out of the total of $632,660,978 securities acquired by the United States Government for additions and improvements made during the period of Federal control of the railroads, and for loans made to them, all had been sold or redeemed except $5,521,100 remaining on hand Nov. 1, 1929.

The total cost to the government of Federal control of the railroads (during 32 months) amounted to $1,696,000,000.

PUBLIC UTILITIES IN 1929.

By John A. Crone.

Public utilities in 1929, in point of combinations, earnings, expenditures, expansions, production, stock financing, extra dividends, and increased efficiencies, established a series of records never approximated in the history of the industry. Along with such notable performances, in a year during which the Golden Jubilee of Light was celebrated and a grateful world bestowed some slight measure of honor on Thomas A. Edison, utility securities advanced to unprecedented heights and declined from such peaks with breath-taking speed.

Accompanying these record-breaking developments, resulting from a pooling of the most powerful financial reservoirs in the world and the assemblage of a large part of the best managerial ability now available were new inventions, financial as well as technical, a searching investigation into utility propaganda by the Federal Trade Commission which was of little credit to most parties concerned, the disclosure of an attempt of certain powerful power interests to muzzle the freedom of the American press by purchasing a chain of newspapers, vitrolic attacks on utilities by publicity seeking politicians, a series of unfavorable court and utility commission decisions and ill-timed comment by a fakers' committee on the buying of public utility securities.

Some outstanding financial developments were: the entrance into the public utility field by the house of J. P. Morgan through the formation of the United Corporation, Niagara-Hudson Power Corporation and to some extent Commonwealth and Southern Corporation; accumulation of utilities by holding companies, trading companies and investment trusts which brought about frantic bidding by the public; the great growth of natural gas financing—especially through the medium of shares; formation of a new type of utility holding corporation in the Public Utility Holding Corporation of America; recapitalization of Middle West Utilities; and the formation of Utilities Power and Light together with its joining the Greater London and Counties Trust to acquire and own British utility properties.

Among the outstanding mergers or financial creations were: the United Corporation—formed by J. P. Morgan & Co., Drexel and Bonbright—which bought large minorities in United Gas Improvement, Public Service Corporation of New Jersey and Mohawk-Hudson Power; Commonwealth and Southern formed by Bonbright & Co., to hold Commonwealth Power, Southeastern Power and Light, Penn.-Ohio Edison and other companies; the Niagara-Hudson Power Corporation formed—under Morgan auspices—consisting of the Buffalo, Niagara and Eastern Power Corporation, Mohawk Hudson Power Corporation and the North Eastern Power Corporation; Electric Bond and Share's merger with Electric Bond and Share Securities and later with Electric Investors as well as its expansion in South America, India and China through its subsidiary American and Foreign Power; the Kopper's purchase of Massachusetts Lighting; Associated Gas and Electric's acquisition of General Gas and Electric through purchase of and Associated's acquisition of Rochester ,Central and all E. L. Phillipp's New York properties outside of Long Island.

SOUTH'S TREMENDOUS GAIN.

Studying the power output figures, monthly published by the Geological Survey, a reader must be impressed by the South's tremendous gain in the use of power reflecting the rapid industrial strides of that section. Use of power in the South shows a 50% gain over other sections—and this despite the development of cheap natural gas in some sections of that region.

Outstanding for its national importance in that it may influence the regulative bodies of other states was the decision of the Massachusetts Department of Public Utilities. The five commissioners unanimously refused Edison Electric Illuminating Co. of Boston, Oct. 11, 1929, permission to reduce the par

value of its shares from $100 to $25. The decision, which in the opinion of public utility officials, some corporation lawyers and utility commissioners may have overstepped its legal bounds, asserted "no public interest will be served by the reduction of the par value of the stock at this time." The decision said the company distributed practically all of its earnings in dividends "with the result that it has made little provision for depreciation or surplus."

The decision, which resulted in ordering a state investigation into the company's rates declared the par reduction would not effect a wider distribution and "such as would occur would, in our opinion, be to the disadvantage of the investor," added, "We think it obvious that the stockholders of the Edison Illuminating Co. of Boston cannot and should not hope for any material increase in dividends on stock until its rates are brought into line with those of municipal plants, having regard for those factors which warrant a higher price to be charged by a private company."

Utility shares had reached unprecedented heights and were in a highly vulnerable or weak market position technically when this decision came out so they tobogganned with lightning-like speed. The path of their descent was greased by sound, but ill-timed comments of the Committee on Public Service Securities of the Investment Bankers Association at Quebec Oct. 17, 1929, which cautioned "against speculative and uninformed buying and to counsel the prudent buying of utility securities."

The United States Supreme Court in a 6 to 3 decision reversed a statutory court decree upholding a 7-cent fare for the Interborough Rapid Transit, April 9, 1929. The Court disposed of the case chiefly on the ground that it had no jurisdiction. The point of the whole case turned on the timeliness of the I. R. T. seeking Federal intervention. The Supreme Court decision left unanswered the major question whether the fare fixed by contract between the company and the city was made subject to regulation by state authority after the passage of the Public Service Commission. Contrary to certain politicians and "bears" the "sacredness of contracts" was not involved nor the justice of a 5-cent fare. The court refused to consider the elevated lines and the subway as a unit and ruled the losses of the former could not be presented as proof the I.R.T. suffered confiscation from its operation of the subways at the contractual fare. This case will be taken up in the Transit Commission again then through the various state courts, a proper proceeding, when, if relief is not granted, it may be brought again before the Supreme Court.

Governor Roosevelt of New York State seeking to make progress in the development, ownership and operation of the water powers of this state is now conducting negotiations (December, 1929) with up-state utility operators to bring about an economic development of the water sites. His chief concern is rates—the Governor insisting that the public shall not be charged exhorbitant rates for power developed from the waters of this state, which, as a natural resource, belong to the people.

ELECTRIC LIGHT INDUSTRY.

An outstanding characteristic of the electric light and power industry in 1929 was the continued extension of 24-hour service to smaller towns and villages, many of which previously had no service, or only part-time service. Within the last five years over 4,000 communities were reached with electric service for the first time.

The shortage of water-power in many sections of the United States, because of a marked deficiency in rainfall, together with increased power demands resulting from abnormal industrial activity, required a much heavier output from the steam generating plants. Although hydro-electric energy was less than in 1928 the output of steam-electric plants increased by nearly 20 per cent.

Electricity production for public use in 1929 was estimated by the National Electric Light Association at 97,500,000,000 kilowatt-hours or the equivalent of all of the rest of the world combined. The industry in the last seven years added 1,350,000 kilowatts to its generating capacity, constructed over 50,000 miles of transmission lines above 22,000 volts; doubled energy output and increased customers by more than eleven millions. Total generating capacity at the end of 1929 neared 40,000,000 horsepower.

Approximately 800,000 new consumers were added during 1929, making total 24,000,000 now served. Of these, nearly 19,800,000 are household users against 25 years ago when all consumers only totaled 700,000. Use of electricity in the home during 1929 increased 16% while factory use in the same year increased only 12%. About 68% of the population of this country now live in electrically-wired homes. Within seven years 9,600,000 households have been connected up to receive electric service for the first time.

Electric service now has been extended to every city of 5,000 population or over to 97% of all communities between 1,000 and 5,000 and to 50% of all communities between 250 and 1,000; and more than 25% of all hamlets of less than 250 population.

Farms connected with electric power lines in the last three years have increased more than 250,000, making a total of more than 500,000 farms now enjoying service.

In mining and manufacture, electricity has become the power medium of the nation and the central station power plant of conversion of fuel and water into energy. Although local installation of boilers and engines has come nearly to a standstill there has been added, between 1919 and 1927, a net increase of 9,700,000 horsepower in factory prime movers in the form of electrical motors using power bought from interconnected systems. Three-quarters of all industrial power now is electrical and of this two-thirds is bought from the lines of light and power enterprises. Each factory wage-earner today, on the average, has nearly five horsepower at his command or more than twice that of 1900. Electrification varies with specific industries—in some it is almost 100 against 66% in German and 48% in English factories.

Railroads, especially the Pennsylvania, Lackawanna and Reading, plan to hurry electrification programs. Electrification of the Illinois Central Terminal at Chicago has been completed and is in operation.

Value of plant and equipment at the end of 1929 was approximately $11,000,000,000 being exceeded in amount only by agriculture, steam railroads and the oil-producing and refining industry. Gross revenues from the sale of electricity during 1929 was estimated at approximately $2,050,000,000 out of which the light and power industry paid $185,000,000 in taxes.

Electric power costs to the public, including industrial, commercial and domestic uses, remains at pre-war levels despite the fact that living costs are 70% above pre-war levels. Average price for household electricity throughout the nation is 28% below pre-war levels, a drop of 3% taking place during the past year, according to Paul S. Clapp, of the National Electric Light Association. Based on the changed purchasing power of the dollar, household rates are only 42% of those in 1913. Advances in efficiences of steam turbines and high-pressure boilers, following concentration of generation in large plants, have reduced the average consumption of coal from 3.2 pounds per kilowatt-hour in 1919 to 1.65 pounds in 1929. Lowered costs of electricity generated by fuels bring such power into increasingly sharp competition with waterpower, which forms but 36% of all power generated by the electric light and power enterprises of this country.

ELECTRIC RAILWAYS.

The local transportation business in the United States, according to an official statement issued by the American Electric Railway Association, has been passing through a stage of transition in recent years, but it is gradually settling down to a firmer basis.

Competition of 25,000,000 automobiles and the coming of the motor bus have caused changes in the riding habits of people and have affected directly public transportation. Members of the American Electric Railway Association, who control more than 80% of the local transportation of the United States, now are operating about 70,000 electric rail cars and 12,000 buses. This represents a total mileage approximating 60,000, divided 40,000 electric railways and 20,000 bus routes. The industry carried about 16,000,000,000 passengers during 1929, 15,000,000,000 by rail cars and 1,000,000,000 by bus.

A ong with the change in riding habits has gone a change in transportation styles the old heavy type rail car giving way to new, bright, comfortably equipped cars, with aluminum bodies, well padded seats and almost noiseless motors. These new cars, none of which are to be seen in New York City or vicinity, have attractive features.

Contrary to popular impression electric railway tracks all over the country are not being torn up as they are around New York. Although electric railways have abandoned about 11% of their total track mileage, most of this abandoned rail has been in small communities. About 4,000 miles of rail has been vacated in 100 communities having an average population of 15,000. Less than 40% of it has been replaced with any other form of transportation, indicating that there no longer exists in these communities a demand for public transportation.

The average rate of cash fare charged by electric railways of the United States in cities of 25,000 and more population was 8.41 cents as of Nov. 1, 1929. This is the peak fare for all time. The fare at the close of the previous fiscal year was 8.23 cents.

RAIL COMMISSIONERS, NATIONAL AND STATE.

Interstate Commerce Commission—Washington, D. C. Ernest I. Zewis, of Indiana, Chairman; Balthasar H. Meyer, of Wis.; Clyde B. Aitchison, of Ore.; Joseph B. Eastman, of Mass.; Johnston B. Campbell, of Wash.; Frank McManamy, of D. C.; Thomas F. Woodlock, of N. Y.; Richard V. Taylor, of Ala.; Ezra Brainerd, Jr., of Okla.; Claude R. Porter, of Iowa; Patrick J. Farrell, of D. C.

George B. McGinty, Ga., Secretary; Thomas A. Gillis, Penna., Asst. Sec'y; James L. Murphy, La., Asst. to Sec'y; John B. Switzer, Md., Chief Clerk and Personnel Officer; Guy L. Seaman, Mo., Disbursing Clerk; A. H. Laird, Jr., N. J.; Purchasing Agent; Alexander Wylie, Ill., Director, Bureau of Accounts; Charles D. Mahaffie, Ore., Director, Bureau of Finance; Ulysses Butler, Penna., Chief Examiner; Arja Morgan, Penna., Chief Bureau of Informal Cases; Thomas P. Healy, N. Y., Director, Bureau of Inquiry; Daniel W. Knowlton, Conn., Chief Counsel; Alonzo G. Pack, Colo., Chief Inspector, Bureau of Locomotive Inspection; Wilfred P. Borland, Wash., Director, Bureau of Safety; W. P. Bartel, Wis., Director, Bureau of Service; Max O. Lorenz, Wis., Director, Bureau of Statistics; W. V. Hardie, Okla., Director, Bureau of Traffic; Charles F. Staples, Minn., Director, Bureau of Valuation.

STATE RAILROAD COMMISSIONERS.

Alabama—Public Service Commission—Montgomery: Hugh White, Pres.; H. F. Lee, Asso. Comr.; Frank P. Morgan, Asso. Comr.; Lamar Wiley, Sec'y; J. H. Alldredge, Chief Rate Expert.

Arizona—Corporation Commission—Phoenix: Loren Vaughn, Chairman; W. D. Claypool, Comr.; Amos A. Betts, Comr.; F. J. K. McBride, Sec'y; L. G. Reif, Rate Expert.

Arkansas—R. R. Commission—Little Rock: Reece Caudle, Chairman; C. S. Henderson, Comr.; Ed. Harper, Comr.; Grady Hays, Sec'y; A. D. Beals, Chief Rate Clerk.

California—R. R. Commission—San Francisco: Thomas S. Louttit, Pres., Com'r; Clyde L. Seavey, Ezra W. Decoto, Leon O. Whitsell, W. J. Carr, Com'rs; W. J. Handford, Wm. T. Satterwhite, W. R. Williams, Thos. M. Gannon, Examiners; Henry G. Mathewson, Sec'y; W. P. Geary, Rate Expert; W. C. Frankhauser, Financial Expert; Arthur T. George, Att'y; Ira H. Rowell, Asst. Att'y; E. T. McGettigan, Chief Auto Stage Dept.; Henry A. Frazier, Recorder; A. G. Mott, Chief Engineer.

Colorado—Pub. Util. Commiss.—Denver: Otto Bock, Chairman; Daniel S. Jones, Worth Allen, Com'rs; John W. Flintham, Sec'y.

Connecticut—Pub. Util. Commiss.—Hartford: Richard T. Higgins, Chairman, W. Hartford; C. C. Elwell, New Haven; Joseph W. Alsop, Avon; Henry F. Billings, Sec'y, Hartford.

Delaware—No railroad commission.

Florida—R. R. Commission—Tallahassee: A. S. Wells, Chairman; E. S. Matthews, Mrs. Mamie G. Eaton, Com'rs; Lewis G. Thompson, Sec'y; T. T. Turnbull, Counsel; J. H. Tench, Rate Expert; A. B. Green, Tel. Eng.; W. Linhart, Asst. Tel. Eng.; Fred Pettijohn, Accountant.

Georgia—Pub. Serv. Commiss.—Atlanta: Jas. A. Perry, Chairman, Atlanta; Albert J. Woodruff, Vice-Chairman, Decatur; Walter R. McDonald, Augusta, Calvin W. Parker, Waycross, Perry T. Knight, Atlanta, Com'rs; Robt. N. Springfield, Sec'y, Atlanta; E. M. Price, Rate Expert, Atlanta; S. J. Smith, Jr., Spec. Atty., Commerce; J. Houstoun Johnston, Consulting Eng., Atlanta.

Idaho—Pub. Util. Commiss.—Boise: Frank E. Smith, Pres.; J. M. Thompson, J. D. Rigney, Com'rs; M. A. Kiger, Sec'y.

Illinois—Commerce Commission—Springfield: Charles W. Hadley, Chairman, Wheaton; J. Paul Kuhn, Batavia; G. Gale Gilbert, Mt. Vernon, Walter H. Wilson, Chicago, William M. Brinckman, Chicago, Phil W. Collins, Com'rs; Julius Johnson, Sec'y, Springfield; Frank A. Heermans, Asst. Sec'y; C. N. Posegate, Chief Engineer; W. M. Hammond, Chief Accountant

Indiana—Pub. Serv. Commiss.—Indianapolis: J. W. McCardle, Chairman; F. T. Singleton, Howell Ellis, C. F. McIntosh, Jere West, Com'rs; Fred I. King, Secretary.

Iowa—Bd. of R. R. Commiss.—Des Moines: B. M. Richardson, Chairman; Fred P. Woodruff, Charles Webster, Com'rs; Geo. L. McCaughan, Sec'y; J. H. Henderson, Commerce Counsel.

Kansas—Pub. Serv. Commiss.—Topeka: Jesse W. Greenleaf, Chairman; Charles D. Shykers, Clinton H. Montgomery, Com'rs; C. H. Benson, Sec'y.

Kentucky—R. R. Commiss.—Frankfort: Moses R. Glenn, Chairman, Dawson Springs; Oscar Vest Carrollton, Tom H. Lauhon, Cattlettsburg, Com'rs; Lucile Tobin, Sec'y, Frankfort; John F. Dugan, Rate Clerk, Louisville; Murrell Glenn, Official Stenographer, Dawson Springs.

Louisiana — Pub. Serv. Commiss. — Baton Rouge: Francis Williams, Chairman, New Orleans; Dudley J. Le Blanc, Abbeville, Harvey G. Fields, Farmerville, Com'rs; Henry Jastremski, Sec'y, Baton Rouge.

Maine—Pub. Util. Commiss.—Augusta: Albert J. Stearns, Chairman, Norway, Herbert W. Trafton, Com'r, Fort Fairfield; Albert Greenlaw, Eastport; George F. Giddings, Clerk, John Goodwin, Chief Eng.; Elmer E. Parkman, Chief Insp.; F. J. McArdle, Ch. of Rates; Albert E. Lamb, Ch. Acct.; R. C. Hanks, Official Reporter, all of Augusta.

Maryland—Pub. Serv. Commiss.—Baltimore: Harold E. West, Chairman; J. Frank Harper, Steuart Purcell; Wm. Cabell Bruce, Gen. Coun.; John Henry Lewin, People's Coun.; Frank Harper, Exec. Sec'y and Ch. of Bur. of Rates and Accts.

Massachusetts—Dept. of Pub. Util.—State House, Boston: Henry C. Attwill, Chairman, Lynn; Everett E. Stone, Springfield; Leonard F. Hardy, Huntington, Lewis Goldberg, Brookline, Henry G. Wells, Haverhill, Com'rs; A. A. Highlands, Sec'y, 167 State House, Boston.

Michigan—Pub. Util. Commiss.—Lansing: James Bice, Chairman; Robert H. Dunn, Samuel Odell, Alva M. Cummins, Russell A. Gorman, Com'rs; Foster M. Wintermute, Ch. Rate Insp.; J. Carl Sheil, Sec'y; Jane Thompson, Asst. Sec'y.

Minnesota—R. R. and Warehouse Commiss.—St. Paul: O. P. B. Jacobson; Frank W. Matson; C. J. Laurisch; Thomas Yapp, Sec'y; G. G. Grant, Dir. of Personnel; A. L. Flinn, Rate Expert; D. F. Jurgensen, Eng.

THE UNITED STATES SHIPPING BOARD.

GENERAL ADMINISTRATION.

(As of Dec. 1, 1929.)

Chairman—T. V. O'Connor; *Vice Chairman*—E. C. Plummer; *Commissioners*—Jefferson Myers, R. K. Smith, H. I. Cone, S. S. Sandberg, A. H. Denton.

Assistant to the Chairman—M. G. Irvine; *Secretary*—Samuel Goodacre; *General Counsel*—Chauncey G. Parker; *Disbursing Officer*—Heber M. Wells; *Chief Clerk*—M. J. Pierce.

UNITED STATES SHIPPING BOARD MERCHANT FLEET CORPORATION.

(As of Dec. 1, 1929.)

Trustees—T. V. O'Connor; E. C. Plummer; Jefferson Myers; R. K. Smith; H. I. Cone; S. S. Sandberg; A. H. Denton.

President—T. V. O'Connor; *Vice President*—E. C. Plummer; *Vice President, Administration*—J. C. Jenkins; *Vice President, Operations*—E. A. Kelly; *Secretary*—Samuel Goodacre; *Treasurer*—Heber M. Wells; *General Comptroller*—Lewis D. Parmelee; *Director of Traffic*—F. G. Frieser; *Director of Supplies*—H. Y. Saint; *Director of Insurance*—B. K. Ogden.

Brig. Gen. A. C. Dalton, Vice President and General Manager, resigned Jan. 29, 1929. No successor was appointed and the duties of General Manager devolved on the President of the Board.

The total amount appropriated by Congress for the purposes of the United States Government owned merchant marine, created by Act of Congress, approved September 7, 1916, amended and enlarged by other acts, is shown in the following table. The appropriations to June 30, 1929, inclusive, as given below (cents omitted) are net, that is, the totals exclude amounts returned to the United States Treasury or reappropriated, totaling $74,646,000 to that date.

From Inception to June 30, 1928:

	Net Appropriations
U. S. Shipping Board	$4,735,275
U. S. S. B. Merchant Fleet Corporation	3,574,006,006
For Fiscal Year Ending June 30, 1929:	
U. S. Shipping Board	288,750
U. S. S. B. Merchant Fleet Corporation	13,400,000
For Fiscal Year Ending June 30, 1930:	
U. S. Shipping Board	359,750
U. S. S. B. Merchant Fleet Corporation	16,134,250
Grand Total	$3,608,924,031

VESSELS OF THE FLEET.

The list of U. S. Shipping Board cargo vessels in hands of operators as of Oct. 31, 1929, was as follows:

Northern Europe: United Kingdom and Ireland	No.	D.W.T.
American Hampton Roads Line	4	31,330
Dixie U. K. Line	15	129,652
Mobile Oceanic Line	8	69,390
Oriole Lines	18	154,857
Texas Ukay Line	17	160,691
Total	62	545,920
Bordeaux-Hamburg Range		
American France Line	9	78,141
American Diamond Lines	14	121,737
Mississippi Valley European Line	5	48,764
Mobile Oceanic Line	7	61,746
Southern States Line	21	187,590
Texas Star Line	14	129,713
Yankee Line	4	34,406
Total	74	662,097
Southern Europe; Spanish Atlantic and Portuguese Ports		
Gulf West Mediterranean Line	3	26,025
Spanish Mediterranean Ports		
Gulf West Mediterranean Line	7	56,991
French Mediterranean, West Coast of Italy and Adriatic Sea Ports		
Dixie Mediterranean Line	7	57,426
Export Steamship Corp.	7	59,737
Texas Mediterranean Line	3	25,785
Total	17	142,948
British India		
American Pioneer Line	6	54,766
Australia and New Zealand		
American Pioneer Line	12	108,613
Orient		
American Pioneer Line (Roosevelt)	9	94,301
American Gulf Orient Line (Tampa)	10	118,549
Total	19	212,850
East Coast South America		
American Brazil Line	6	45,650
American Republics Line	14	117,742
Gulf Brazil River Plate Line	1	7,840
Total	21	171,232
Grand Total	221	1,981,442

As of Oct. 31, 1929, the following vessels were also active:

Cargo ships with otherGov'tDepts.	1	7,840
Cargo (Bareboat Charter)	7	59,498
Total	8	67,338

The number, type, kind and deadweight tonnage of the vessels controlled by the U. S. Shipping Board Merhant Fleet Corporation on Oct. 31, 1929, were:

	No.	D.W.T.
Steel Vessels		
Passenger and Cargo	2	17,000
Cargo	523	4,369,839
Refrigerators	10	70,277
Tugs	4	.....
Unfinished Cargo	1	9,400
Total Steel	540	4,466,516
Concrete Vessels		
Tankers	1	7,500
Wood Vessels		
Tugs	7	.....
Total Vessels	548	4,474,016

319 vessels of 2,425,236 deadweight tons were tied up as of Oct. 31, 1929.

During the fiscal year 1929, 191 vessels were sold. Of this total 168 were cargo ships; of which 18 were sold for unrestricted operation, 10 with privilege of transfer to foreign registry, 15 with buyer obligated to recondition and improve them, 82 for dismantling and scrapping, 32 for restricted operation in the three trade routes with which they were sold, and 11 cargo ships were sold for restricted operation by the purchasers of trade routes sold in preceding years.

In addition, 6 passenger vessels and 5 combined passenger and cargo vessels were sold for restricted operation in the trade routes in which formerly operated by the U. S. Shipping Board. These ships were: Leviathan, America, George Washington, President Harding, President Roosevelt and Republic, of the United States Line; and American Banker, American Farmer, American Merchant, American Shipper and American Trader of the American Merchant Line.

Other sales included 3 refrigerator ships and 9 tankers.

From July 1, 1929, to Nov. 15, 1929, 83 vessels were sold. This total includes 82 cargo ships, of which 8 were sold as a line for restricted operation, 2 were sold to augment the services of a trade route purchased in a preceding year, 13 were for unrestricted operation, 3 subject to improvements, 34 with transfer of flag privileges and 22 for scrapping. The other vessel sold was a tanker.

From June, 1921 to Nov. 15, 1929, 1,456 ships of 6,333,000 deadweight tons have been sold and delivered. Twenty lines with provisions for restricted operation were sold and delivered during the same period.

The Merchant Marine Act of 1928 increases the construction loan fund from $125,000,000 to an amount not to exceed $250,000,000. The Board may set aside revenues from sales, and proceeds from securities covering deferred payments on sales. Appropriations are authorized in addition to amounts credited to the fund by the Board. The fund continues to be a revolving fund so that payments shall be credited to the fund but interest on loans shall be covered into the Treasury as miscellaneous receipts.

On Oct. 31, 1929, the construction loan fund totaled $99,594,801.33, of which $65,486,572.01 was the unexpended cash and appropriation balance, $24,608,229.32 was the outstanding balance of advances made to borrowers, and $9,500,000 was the amount transferred to the diesel conversion fund. As of the same date, the unexpended balance in the diesel fund was $488,024.41.

The operating losses of the Merchant Fleet Corporation during the fiscal year ended June 30, 1929, amounted to approximately $14,435,000. This compares with a loss of $16,279,000 in 1928; slightly less than $16,000,000 in 1927; nearly $20,000,000 in 1926; $30,000,000 in 1925 and $41,000,000 in 1924.

The U. S. Shipping Board controls and operates the Hoboken Terminal and also controls other terminals which are leased to private operators and are located in the following ports: Boston, Brooklyn, Philadelphia, Norfolk and Charleston, S. C. The U. S. Shipping Board also owns and operates five fuel oil bunker stations.

Big Problems of 1929-1930.

ENFORCEMENT OF THE NATIONAL PROHIBITION ACT.

The Eighteenth (Prohibition) Amendment to the Constitution was submitted to the States by Congress on Dec. 18, 1917. The first State (Mississippi) ratified it on Jan. 8, 1918, and on Jan. 16, 1919, the thirty-sixth State (Nebraska) ratified it, whereupon, by proclamation of the Secretary of State, Jan. 29, 1919, it became effective one year from that date, Jan. 16, 1920. By Feb. 25, 1919, the Legislatures of forty-five States had ratified it; the forty-sixth State, New Jersey, ratified in on March 9, 1922. It was not ratified by Connecticut and Rhode Island. In nearly all the ratifying States the vote was decisive and in the majority overwhelming. New York, Maryland, Montana, Nevada and Wisconsin have no State enforcement acts.

The Wartime Prohibition Law, designed as a measure to conserve grain during the war, was enacted in November, 1918, and became effective June 30, 1919.

The Volstead act (the National Prohibition Act) was drawn up to enforce the Eighteenth Amendment when it came into effect, Jan. 17, 1920, and was passed by Congress early in October, 1919. It was vetoed by President Wilson, and was immediately passed over his veto on Oct. 28—the vote in the House being 176 to 55, and in the Senate 65 to 20. The Willis-Campbell act strengthening the Prohibition act became a law on Nov. 23, 1921.

On the date the Eighteenth Amendment was declared ratified there were six States that were "bone dry" by popular vote. These were Washington, Oregon, Montana, Colorado, Utah and Arizona, with 4.2 per cent. of the total population of the United States. There were six States "bone dry" by legislative act—Idaho, South Dakota, Nebraska, Kansas, Georgia and Florida—with 7.6 per cent. of the total population. There were eighteen States with State-wide restrictions but affording some method for residents to obtain alcoholic beverages lawfully. There were Alabama, Arkansas, Indiana, Iowa, Maine, Michigan, Mississippi, Nevada, New Hampshire, New Mexico, North Carolina, North Dakota, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia, with 32.5 per cent. of the total population. The remaining eighteen States—Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Ohio, Kentucky, Illinois, Wisconsin, Minnesota, Missouri, Louisiana, Wyoming and California—with 55.7 per cent. of the total population were "wet," that is, without any State-wide "dry" law. All the States which had "bone dry" laws had acquired them after the World War began in 1914.

SUMMARY OF THE VOLSTEAD ACT.

The word "liquor" as used in the law includes alcohol, brandy, whiskey, rum, gin, beer, ale, porter, and wine, or other beverages containing one half of one per cent. or more of alcohol. All persons are forbidden to manufacture, sell, barter, transport, import, export, deliver, furnish or possess any intoxicating liquor except under the provisions of the act. The law permits under regulation denatured alcohol and denatured rum; medicinal preparations made according to regular formulas, patent medicines, toilet articles, antiseptic preparations, flavoring extracts and syrups, provided these are unfit for beverage uses; vinegar and sweet cider. In the manufacture of cereal beverages, the production of high-proof beer is permitted as a part of the process but it must be de-alcoholized before offered for sale. Liquor for non-beverage purposes and sacramental wine may be manufactured, &c., under certain regulations. Manufacturers of exempt articles may purchase and keep liquor for such purposes under certain conditions, but may not sell it or use it, except as ingredients of the articles manufactured. No more alcohol may be used in articles which may be used as beverages than the necessary amount for solution of certain elements and for preservation of the articles.

No one may manufacture, &c., liquor without a permit, but liquor prescribed by a physician may be bought without a permit. A person conducting a bona fide hospital or sanatorium for alcoholics may under certain regulations purchase and use liquor for the treatment of patients under physician's direction.

Any one having a permit to manufacture, &c., wine for sacramental purposes may sell it only to a rabbi, minister, priest, or officer authorized by congregation on special application.

Only licensed active physicians holding permits may prescribe liquor and then only if they believe that the use of liquor as medicine by the person is necessary.

Under the 1921 amendment physicians may prescribe only spirituous and vinous liquors but may not prescribe more than a pint of spirituous liquors or a quart of wine within ten days.

Various types of records are prescribed for manufacturers, wholesale and retail druggists, and common carriers.

It is unlawful for a person to ship liquor without notifying the carrier of the contents of the package; for the carrier to accept for shipment a package of liquor unless certain information appears on the label; to receive, ship or transport a package of liquor bearing false statements; to give carrier an order for delivery of liquor to a person who has no right to receive it; to advertise in any way liquor, its manufacture or sale or where it may be secured except that manufacturers or wholesale druggists holding permits may furnish price lists and advertise in trade journals and foreign newspapers mailed to this country; to advertise, manufacture, sell or possess any utensil, recipe, etc., for the unlawful manufacture of liquor; to solicit or permit one's employees to solicit orders for liquor or information how it may be secured.

Any one injured by an intoxicated person shall have right of action for damages against the person who sold the liquor unlawfully to the intoxicated person.

Possession of liquor in one's private dwelling only for the personal consumption of the owner, his family and bona fide guests is legal if obtained lawfully prior to the effective date of the 18th Amendment to the Constitution.

A good deal of misunderstanding has arisen over the exemptions made in the interest of home manufacture and consumption of liquor. "Non-intoxicating cider and fruit juices" may be manufactured, exclusively for use in the home; and here the Bureau of Prohibition interprets the word "non-intoxicating" to mean non-intoxicating in fact without reference to an exact percentage of alcoholic content. Fruit juices, except cider, thus manufactured are subject to tax if they exceed one-half of 1 per cent in alcoholic content under the revenue laws.

THE JONES LAW.

The Jones Law, an amendment making more drastic the National Prohibition Act was passed by the Senate, 65 to 1, on Feb. 19, 1929; by the House, 283 to 90 on Feb. 28, and approved by President Coolidge on March 2. It reads:

That wherever a penalty or penalties are prescribed in a criminal prosecution by the National Prohibition Act, as amended and supplemented, for the illegal manufacture, sale, transportation, importation, or exportation of intoxicating liquor, as defined by section 1, Title II, of the National Prohibition Act, the penalty imposed for each such offense shall be a fine not to exceed $10,000 or imprisonment not to exceed five years, or both; Provided, That it is the intent of Congress that the court, in imposing sentence hereunder, should discriminate between casual or slight violations and habitual sales of intoxicating liquor, or attempts to commercialize violations of the law.

Sec. 2. This Act shall not repeal nor eliminate any minimum penalty for the first or any subsequent offense now provided by the said National Prohibition Act.

In 1909 Congress decreed that "all offenders which may be punished by ..... imprisonment for more than one year shall be decreed felonies." (Section 335 of the Criminal Code). Section 146 of the Code provides that whoever, having knowledge of the commission of a felony "conceals and does not ..... disclose and make known the same to some one of the judges or other persons in civil or military authority under the United States shall be fined not more than $500 or imprisoned not more than three years, or both." Section 332 says that whoever "counsels, commands, induces or procures" a felony is equally guilty as a principal actor in the commission of the felony itself.

MEDICINAL PROVISIONS.

The medicinal provisions in the Act are:

Not more than a pint of spirituous liquor to be taken internally shall be prescribed for use by the same person in a period of 10 days. No physician shall prescribe, nor, shall any person sell or furnish on any prescription, any vinous liquor that contains more than 24 per cent of alcohol by volume, nor shall anyone prescribe or sell or furnish on any prescription more than one-fourth of 1 gallon of vinous liquor, or any such

vinous or spiritous liquor that contains separately or in the aggregate more than one-half pint of alcohol, for use by any person within any period of 10 days. Physicians are required to obtain a permit and keep a record of all prescriptions. Prescriptions must be written upon prescribed forms except in emergency cases. No physician shall be provided with more than 100 prescription blanks for use in any period of 90 days unless he shall make it clearly to appear to the commissioner that for some extraordinary reason a larger amount is necessary.

From the Congressional Record is taken this classification of the several states:

States in which no provision is made for prescribing of alcohol or intoxicating liquor are: Arizona, Idaho, Maine, New Mexico, North Dakota, Georgia (pure alcohol may be prescribed but required to be so medicated as to be unfit for beverage use), Kansas, Nebraska (may prescribe intoxicating liquor provided other ingredients are such as to prevent its use as a beverage), North Carolina, Utah, Washington, and West Virginia.

States in which pure alcohol only may be prescribed are: Alabama, Arkansas, Oklahoma, Delaware, Oregon, Florida, South Carolina, Indiana, Tennessee, and Mississippi.

States in which spirituous liquor only may be prescribed are: Illinois, Montana, New York, Ohio, and Wyoming.

States in which spirituous or vinous liquors may be prescribed are: South Dakota and Iowa.

States in which intoxicating liquor may be prescribed under limitations are: Colorado, Michigan, Minnesota, Missouri (save malt liquors), and New Hampshire.

There are no regulations under State law in Pennsylvania, Louisiana, and Massachusetts.

There is no state code in the matter in Maryland, Nevada and New York.

Dr. Doran reported in July 17 that the number of physicians who have obtained permits to issue prescriptions for liquor in 1928 was 111,864 (the 1920 census returned 144,977 physicians in the country).

The present stocks (June 30, 1929) of medicinal whiskey total about 9,549,017 gallons. The first permits to distill whiskey since 1920 were issued Oct. 10 for about 1,400,000 gallons of bourbon whiskey with 600,000 gallons of rye whiskey to be allotted later—the whiskey to be aged four years in the wood before being put into the trade.

MORE MONEY APPROPRIATED.

Senator Harris in January asked for an appropriation of $50,000,000 additional for the enforcement of the Prohibition Law. The Committee on Appropriations cut this to $25,000,000. In response to a letter of inquiry, Secretary Melion said such a sum could not be wisely and effectively spent until a thorough survey was made of the needs of the situation.

A total appropriation of $270,000,000 for prohibition enforcement put on the Treasury deficiency bill on an amendment by Senator Bruce, was rejected in the conference report which was then sustained by a margin of two votes by the Senate. President Coolidge then sent a supplementary estimate of $2,427,514 to Congress and $1,719,654 was voted.

Secretary Mellon in a report on Nov. 19 to the Senate called for by the Harris resolution said that since March 4, 1929, when $1,719,654 became available, the prohibition bureau had spent $1,319,536 for 275 additional agents and other workers.

The Association Against the Prohibition Amendment in a pamphlet published May 12, 1929, estimated that in 1928, the ninth year of Federal enforcement, the cost to the country (after deducting $5,500,000 in fines) was $36,000,000, with a loss to the people of $850,000,000 in Federal revenue, and $50,000,000 in State, county and city revenue. Commissioner James M. Doran answered this in a letter made public June 15, saying:

"In the nine-year period the government has collected $44,674,832 in fines and penalties assessed under the dry law, and in addition taxes on distilled spirits and fermented liquors have yielded an aggregate of $415,927,960.76, or a total of $460,502,892.76.

"Collections under laws having to do with the alcoholic liquor traffic, therefore, exceeded by $247,324,307.76 the amounts expended to enforce the Volstead act."

His figures for the fiscal year 1928 were:

Expenditures.

Prohibition	$11,610,669.91
Customs	450,000.00
Coast Guard	15,426,540.00
Dept. of Justice (estimated)	9,000,000.00
Total	$36,487,209.91
Collections	21,872,072.17
Net cost	$14,615,137.74

Collections.

Fines and penalties	$6,183,942,72
Proceeds from the sale of seizures and fines under customs laws	380,333.00
Taxes on distilled spirits and fermented liquors	15,307,796.45
Total	$21,872,072.17

KILLINGS IN NINE YEARS.

The Treasury Department on Apr. 5 gave out an official report which showed that since the Eighteenth Amendment became effective in 1920, nine years ago, 190 persons have been killed in the enforcement of the prohibition laws. Of these, 135 were citizens killed by prohibition agents and 55 were prohibition agents who met death in the line of duty. The figures for the nine years are:

In 1920, agents 6, citizens 5; 1921, agents 8, citizens 14; 1922, agents 12, citizens 13; 1923, agents 4, citizens 17; 1924, agents 2, citizens 22; 1925, agents 5, citizens 20; 1926, agents 6, citizens 17; 1927, agents 5, citizens 16; 1928, agents 7, citizens 10; 1929, agents none, citizens 1.

Notable killings during the year 1929 will be found recorded in the diary of Events of the Year, beginning on page 94.

JUDICIAL DIVISIONS.

Alfred E. Norris, of 55 East 72d St., New York City, a broker, was exonerated by the United States Court of Appeals in Philadelphia, Oct. 3, of complicity in the case of Joel D. Kerper, so-called "society bootlegger," reversing the verdict of the lower court, which held that a purchaser of liquor could be penalized as an abettor of illegal transportation. The majority opinion, written by Judge W. H. S. Thomson, said:

"It appears that while the legislative department of the government has deliberately and intentionally made the purchaser of liquor gulitless of any offense under the prohibition law, the executive department of the government seeks here, by indirection, to make of the same fact, namely the purchase, a crime subjecting the purchasers to a maximum fine of $10,000 and imprisonment for a term of two years.

"Such a condition is scarcely conceivable and yet it is the position of the Government."

Judge Charles I. Dawson, former Kentucky Attorney General, charging the United States Grand Jury at Louisville, Ky., Oct. 15, instructed them to indict, if the evidence warranted, the buyer as well as the seller of liquor, declaring that the widespread impression that it is not against the law to purchase liquor is erroneous.

Federal Judge J. W. Woodrough in dismissing an indictment at Omaha, Nebr., against two men charged with operating a still, said: "Although (Fereral) agents see, hear and smell violations of the liquor law in a residence, they must obtain a search warrant before making a raid, seizing the evidence and arresting the owner."

The United States Supreme Court in Washington on Oct. 21 refused to review the case of A. C. Bamsey, convicted on evidence obtained by officers in his home without a search warrant, thereby sustaining the decision of the Supreme Court of Iowa which held that a search warrant was not necessary under Iowa law.

The United States Circuit Court in New York on July 17, 1929, held that being a bootlegger involved no "moral turpitude" to justify deportation of an alien.

Repeal of the Eighteenth Amendment as an "unpopular and undesirable law," which might lead to conditions "approximating those of Russia under the Czaristic regime," was advocated by a Philadelphia grand jury in a presentment returned May 31 to Judge Raymond MacNeille.

George W. Wickersham, former Attorney-General and Chairman of the National Crime Commission, in a letter to Governor F. D. Roosevelt of New York read at the Conference of State Governors at Groton, Conn., July 16, said:

"The Eighteenth Amendment confers upon the States concurrent jurisdiction with the National Government for the enforcement of this measure. Thus far the Federal Government alone has borne the burnt of enforcement.

"It seems to me that the Governors' Conference might well consider approaching the Federal Government on some feasible proposal to share this burden. If the National Government were to attend to preventing importation, manufacture and shipment in interstate commerce of intoxicants, the State undertaking the internal police regulations to prevent sale, saloons, speakeasies and so forth, national and State laws might be modified so as to become reasonably enforceable and one great source of demoralizing and pecuniarily profitable crime removed."

PROHIBITION LAW FEDERAL COURT RECORD FOR 1927-1928 AND 1928-1929.

The Department of Justice reported on Oct. 20, 1929, the table printed below of the number of instituted cases, convictions and pleas, and fines in the Federal Courts in the fiscal years 1927-28 and. 1928-29. These cases represented 51.3% of the 110,655 of all kinds, civil and criminal, brought during the year 1928-29. For the fiscal years 1921 to 1929, inclusive, a grand total of 407,456 prohibition cases were brought. By years the cases brought numbered: 1921, 29,114; 1922, 34,984; 1923, 49,021; 1924, 45,878; 1925, 50,743; 1926, 44,492; 1927, 40,709; 1928, 55,729; and 1929, 56,786. The table follows:

STATE.	Cases Instituted.		Convictions and Pleas.		Fines Assessed *Dollars.*	
	1928.	1929.	1928.	1929.	1928.	1929.

ACTION IN STATES IN 1929.

Wisconsin held on Apr. 2, 1929, a state-wide referendum ordered by the Legislature on Feb. 6, that resulted as follows: Favoring the repeal of the State enforcement act, 350,337; against 196,402; favoring amendment of the law so as to repeal beer penalties, 321,688; against 200,545. Thereupon the House by a vote of 56 to 33, and the Senate by a vote of 21 to 9, passed a bill repealing the enforcement act, and Gov. Kohler signed the reapeal on May 29.

The **Maryland** House of Deputies by a vote of 64 to 45 on Feb. 5, 1929, killed a State prohibition enforcement bill.

The **Missouri** House of Representatives on Apr. 29 killed a bill to repeal the bone dry law of 1923.

The **Illinois** House of Representatives by a vote of 77 to 66 on Apr. 23 passed a bill calling for a State-wide referendum on the repeal of the State Liquor Enforcement Act. The Senate, however, defeated the bill by a vote of 28 to 21 on June 6.

The **New York** Assembly by a vote of 74 to 72 on March 13 killed the Jenks billl to restore a state prohibition enforcement bill. A bill to establish county local option in the enforcement of the Federal prohibition law failed in passage.

Senator Howell of Nebraska said on the floor of the Senate on Sept. 20, 1929, that "enforcement in the City of Washington can be made effective and placing the responsibility on the President who can dismiss any official. The President promptly asked him to lay definite facts before the Department of Justice promising vigorous inveestigation with intent to make Washington "a model in this country." The arrests for drunkenness in the City of Washington during the fiscal year 1928-29 numbered 14,198. A ruling of the Treasury on Mar. 22 recognized diplomatic immunity for the transportation of liquor properly imported, to the embassies for personal use.

At the request of President Hoover, John L. McNab, lawyer of San Francisco, on Oct. 1, undertook the task of formulating legislation to bring about better prohibition enforcement and relief of court congestion.

PROHIBITION BUREAU.

In the interest of more effective administration and enforcement of the National Prohibition Act, the Congress, on March 3, 1927, by statute created a Bureau of Prohibition in the Department of the Treasury, the effective date of the Act being April 1, 1927. The most important provision of the Act is to make the entire personnel of the Bureau, both in Washington and in the field, subject to the Civil Service Laws. Pursuant to the act the working organization of the Prohibition Unit of the Internal Revenue Bureau was transferred to the Bureau of Prohibition. Dr. James M. Doran was appointed Commissioner of Prohibition at the head of the Bureau of Prohibition.

Hon. Seymour Lowman was appointed to succeed Gen. L. C. Andrews as Assistant Secretary of the Treasury, in charge of the Customs, Coast Guard, and Prohibition Services.

A list of the Administrators together with headquarters and territory embraced in each district as of Dec. 1, 1929, is here given:

1.—Boston, 261 Franklin St. Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut.—Jonathan S. Lewis.

2.—New York, 641 Washington St. Southern and Eastern Judicial Districts of New York—Maj. Maurice Campbell.

3.—Buffalo, 268 Main St. Western and Northern Judicial Districts of New York—Capt. Edwin S. Ross, Actg.

4.—Newark, 1060 Broad St. New Jersey—Capt. Wm. J. Calhoun.

5.—Philadelphia, Earle Theatre Bldg. Eastern and Middle Judicial Districts of Pennsylvania—Col. Samuel O. Wynne.

6.—Pittsburgh, Plaza Bldg. Western Judicial District of Pennsylvania and West Virginia—Commander J. D. Pennington.

7.—Baltimore, Ft. Henry. District of Columbia, Maryland and Delaware—Thomas E. Stone.

8.—Richmond, Federal Bldg. Virginia, North Carolina and South Carolina—Capt. R. Q. Herrick.

9.—Savannah, American Bank Bldg. Southern Judicial District of Florida and Georgia—Robt. E. Tuttle.

10.—New Orleans, Custom House. Louisiana, Mississippi, Alabama and Northern Judicial District of Florida—O. D. Jackson.

11.—Louisville, Post Office Bldg. Kentucky and Tennessee—Ernest Rowe, Acting.

12.—Columbus, Columbian Bldg. Ohio and Indiana—W. N. Woodruff.

13.—Chicago, Transportation Bldg. Illinois, Iowa and Eastern Judicial Dist. of Wisconsin—E. C. Yellowley.

14.—St. Paul, Post Office Bldg. Minnesota, North Dakota, South Dakota and Western Judicial District of Wisconsin—Sigurdt B. Qvalel.

15.—Topeka, Aetna Bldg. Nebraska, Oklahoma and Kansas—George H. Wark.

16.—St. Louis, Title Guaranty Bldg. Missouri and Arkansas—Sam S. Haley.

17.—Fort Worth, Ft. Worth Nat'l Bank Bldg. Texas—Carl Jackson.

18.—Denver, Mercantile Bldg. Colorado, Wyoming and New Mexico—John F. Vivian.

19.—Helena, Montana Bldg. Montana, Idaho and Utah—O. D. John F. J. Herbert.

20.—Seattle, Thompson Bldg. Washington, Oregon, Alaska—Roy C. Lyle.

21.—San Francisco, Custom House. Northern Judicial District of California and Nevada—Wm. G. Walker.

22.—Los Angeles, Transportation Bldg. Southern Judicial District California and Arizona—Wm. R. Woods, Jr.

23.—Honolulu, Federal Bldg. Territory of Hawaii—Capt. W. P. King.

24.—San Juan, Post Office Bldg. Porto Rico—Col. A. J. Hanlon.

25.—Detroit, 1010 Barium Tower. Michigan—N. Boyd F. Miller (Acting).

26.—Albany, New York. Broadway Arcade Building. Wm. D. Moss, Administrator. Counties of Albany, Broome, Chenango, Clinton, Cortland, Delaware, Essex, Franklin, Fulton, Hamilton, Herkimer, Jefferson, Lewis, Madison, Montgomery, Oneida, Onondaga, Otsego, Rensselaer, St. Lawrence, Saratoga, Schenectady, Schoharie, Warren an Washington of the Northern Judicial District of New York, Counties of Ulster, Columbia, Dutchess, Greene, Orange, Putnam, Sullivan and Rockland of the Southern Judicial District of New York.

27.—Salt Lake City, Utah, Clift Building. German E. Ellsworth, Admr. Utah, Arizona and Nevada.

SECRETARY MELLON'S REPORT.

Secretary of the Treasury Mellon in his Annual Report said:

"During the past year the organization of the Bureau of Prohibition has been completed in accordance with the act of March 3, 1927. All field offices were surveyed and set up to operate with maximum efficiency. With the exception of a comparatively small number of agents, all positions of the bureau have been brought within the classified civil service. Employees in the Bureau on June 30, 1929, numbered 4,664, an increase of 68 in the year.

"The instruction of agents in the proper and lawful methods of operation was carried forward during the year by experts. About 750 agents, mostly new recruits, attended the lectures. All agents now have specific instructions regarding the rights of citizens as guaranteed by the fourth and fifth amendments of the Constitution, the proper method of securing search warrants and executing them, and the technique of making investigation of the larger and more important cases, and the proper form of writing a report.

"Prohibition agents made 66,878 arrests during the fiscal year and seized 7,299 automobiles, valued at $2,879,013, and 89 boats, valued at $260,845. Federal agents also made arrests, or assisted in obtaining evidence, in a large number of cases against individuals prosecuted in State courts.

"There has been a substantial increase during the past fiscal year in the quantity of completely and specially denatured alcohol manufactured, which can be readily accounted for on account of the following facts: An increase of several million automobiles registered in the United States has required additional millions of gallons of completely denatured alcohol for antifreezes purposes and a tremendous quantity of specially denatured alcohol to furnish lacquers, which are now used exclusively in finishing automobiles. There has been an expanding market for lacquers manufactured from specially denatured alcohol to finish furniture and the interior of residences. The tremendous expansion of the rayon industry has required additional millions of gallons of specially denatured alcohol. The growth and expansion of chemical industries has also required more alcohol, which is the basic raw material used in thousands of preparations and processes.

MRS. WILLEBRANDT'S REPORT

Mrs. Mabel Walker Willebrandt, who was appointed Assistant Attorney General in May, 1921, and has been since then in charge of Federal prohibition prosecutions, resigned on May 28, 1929, and G. Aaron Youngquist was appointed to succeed her. Mrs. Willebrandt in her report to the Attorney-General for the fiscal year 1928, said:

"There was a substantial increase in almost every important phase of prohibition enforcement under the national prohibition act during the year. The number of individual jail and prison sentences reported was 21,602, an increase of 1,989. The average sentence was 147 days. The number of criminal prohibition prosecutions instituted was 56,786; cases terminated, 56,455; cases pending at the close of the year, 18,690; cases terminated: Convictions, 47,100; nolle prossed or discontinued, 4,835; quashed, dismissed, demurrer, etc., 3,043; acquittals, 1,477. There were about 32 convictions to each acquittal.

The aggregate of fines, forfeitures, and penalties imposed was $7,476,300 and the total amount collected was $4,200,052.

The number of violators put on probation was 3,321, an increase of 949. The aggregate time covered by these probationary sentences was 8,067 years; total time covered by jail and prison sentences was more than 9,663 years, an increase of 963 years. There were 4,885 trials by jury and 43,183 pleas of guilty.

"One of the most noticeable gains in prohibition enforcement was in the matter of padlock or injunction proceedings. There were 7,455 petitions for injunctions, which was an increase of 1,949 over the preceding year, and the number of permanent injunctions increased to 6,303 compared with 3,999 the year before, a gain of more than 57 per cent.

"The number of civil cases terminated during the year was 10,961, compared with 8,617 the year before and an increase of 276 cases pending. The aggregate amount of judgments in favor of the United States was $465,480.89 as against $382,853.25 the preceding year. A total of $27,478.28 was collected by United States attorneys in cases where no civil suit was actually commenced.

THE "FLYING SQUADRON."

"Funds transferred last year from the Bureau of Prohibition to this department for employment of special assistants to the Attorney General for

assistance in grand jury and trial work in the more difficult liquor cases were subsequently increased by the second deficiency act of March 4, 1929. Under this provision this department has now appointed 10 men whose qualifications include experience in criminal trial work in the capacity of assistant United States attorneys and State's attorneys and on the State jurdiciary. They form the nucleus of an organization which will be of valuable assistance to the United States attorneys in clearing crowded dockets or in the trial of complicated and difficult cases. As these special prosecutors stand subject to call to any place in the country, the United States attorneys may feel free to advise with this department and to request their assistance whenever the situation in their districts may warrant doing so.

"Most of these special assistants are allotted to the trial of criminal and injunction cases arising under the liquor laws and of kindred offenses, as bribery, perjury, etc., when cisely allied to liquor, matters.

"In the celebrated New York night-club cases, contrary to the general belief ,considerable successs was obtained. Of 98 defendants in 22 clubs, 18 stood trial in 8 separate cases. Fifteen were convicted while only three were acquitted—a doorman and two women entertainers. The remaining 80 were sentenced on pleas of guilty. The total fines imposed aggregated $18,660; total actual jail time, 125 months and 10 days; total jail time suspended, 138 months; and total time on probation 59½ years. In addition to the criminal cases padlock actions brought closing orders aggregating 18 years, while 4 bars were destroyed pursuant to court orders.

LIQUOR SMUGGLING BY WATER CRAFT

"The control of liquor smuggling in our marginal territorial water and upon the high seas adjacent thereto continues to be a problem. This year we do not report the domestic vessels seized while engaged in this unlawful activity because we have not succeeded in obtaining complete data on such seizures. We believe, however, that the number continues about as heretofore. Small motor boats of less than 5 tons burden are still a source of trouble.

"The seizures of foreign liquor-running vessels this year were fewer in number, 17, than those occurring during the preceding year, 28. The larger vessels are gradually abandoning the trade. A greater proportion of the captured foreign vessels is made up of motor boats.

"The Government of the United States has been desirous of strengthening the liquor-smuggling treaty of June 6, 1924, now effective between Canada and the United States. (44 Stat. 2097.) The chief defect of this treaty lies in the fact that it permits the official clearance through Canadian customs of intoxicating liquor consigned to the United States and intended to be illegally introduced here. In January, 1929, a conference was held in Ottawa, the matter is still being considered by the Canadian Government.

"Liquor smuggling across our international boundary on the north is receiving special consideration by our Government. As indicated in the last annual report, the volume of contraband liquor smuggled in this locality was steadily increasing in volume. Most of the difficulty arises in the waterways of the Great Lakes system. Special effort is now being made to coordinate more effectively the preventive forces of the United States.

"THE 'I'M ALONE' INCIDENT

"The pursuit and sinking by the Coast Guard of the British schooner 'I'm Alone in the Gulf of Mexico in March, 1929, has developed into a matter of very considerable international importance. The vessel—an admitted rum runner—was detected by the Coast Guard off the Louisiana coast on March 20, 1929, with a load of liquor. It is claimed by the United States that the schooner was within boarding distance from the shore, as specified in the British-American extraterritorial seizure convention of 1924. The vessel refused to heave to upon the demand of the Coast Guard, and was thereafter pursued for two days and finally sunk. The Canadian Government has taken issue with the United States in this matter, and the case has been referred to international arbitralton, as provided in the treaty of 1924."

Following Mrs. Willebrandt's statement of the Government's position regarding the sinking of the 'I'm Alone" by the American Coast Guard 200 miles out in the Gulf of Mexico on March 22. it should be said that the two governments have agreed to submit the case to arbitration under the provisions of the Ship Liquor Treaty of 1924 between the United States and Great Britain. Canada, in the arbitration, seeks redress for the sinking of the ship. The Canadian position was that the convention "does not extend the territorial limits of the United States nor confer any general jurisdiction" within the so-called treaty waters beyond the internationally recognized three-mile limit.

Canada held that the schooner was outside treaty waters, and that even if she were within those waters when the pursuit was initiated, such pursuit could not legally have been continued beyond one-hour's steaming distance from the American shore. Canada maintained that the pursuit was not continuous, inasmuch as it was begun by the Coast Guard cutter Wolcott and two days later was completed by the cutter Dexter, which sank the schooner with the Wolcott in sight but with its gun out of commission. The United States asserted that the pursuit was continuous, inasmuch as both Coast Guard boats were operating conjointly as a unit of the same force and under one command.

Justice Willas Vandevanter of the United States Supreme Court and Eugene Lafleur, a Montreal lawyer, were named Aug. 7 as commissioners on the part of the United States and Canada, respectively, to artitrate the case.

ENFORCEMENT IN NEW YORK CITY.

Detailed figures of the Federal enforcement of the law in the Southern District of New York State, Charles H. Tuttle, United States Attorney, and the Eastern District, Howard W. Ameli, United States Attorney, which together covered the City of New York with its environs, for the last four fiscal years, are as follows:

Southern District, covering the Boroughs of Manhattan and the Bronx, in New York City and the counties up the river to and including Columbia.

	1926.	1927.	1928.	1929.
Prosecutions commenced...	2,517	5,076	8,607	6,033
Prosecutions terminated....	3,566	4,243	8,731	6,036
Pleas of guilty..	1,845	3,992	7,841	5,644
Trials by jury...	44	66	32	37
Convictions....	1,854	4,030	7,863	5,670
Acquittals or discontinued.....	23	28	9	14
Nolled.....	1,323	354	312	343
Quashed.....	366	156	556	595
Pending June 30	771	950	1,721	1,836
Total of fines..	$185,128	$156,256	$225,420	$235,956

Eastern District of New York State, covering Queens, Kings and Richmond Counties of Greater New York and Nassau and Suffolk Counties.

	1926.	1927.	1928.	1929.
Prosecutions commenced..	2,490	2,208	2,074	2,343
Prosecutions terminated....	2,246	2,214	2,714	2,485
Pleas of guilty..	1,996	1,881	2,208	1,886
Trials by jury..	99	99	94	176

Nolled or discontinued.....	0	0	38	0
Quashed.....	151	234	387	423
Pending June 30	1,541	1,532	892	1,098
Total of fines...	$230,092	$189,696	$182,424	$163,253

Outstanding prosecutions during this period in the Southern District of New York include the conviction of Rudolph Wylke and six other defendants for a large scale conspiracy to smuggle liquors from foreign countries into the United States by means of independently owned vessels. This group had a long history of violations of law and constituted one of the most completely organized criminal associations known to be smuggling liquors.

The conviction of "Tommy" Guinan represents one of a class of successful prosecutions against persons engaged in the operation of night clubs where liquors were sold at exorbitant prices and usually behind locked doors.

In the so-called Bernstein case, the Government convicted after trial fifteen defendants who had engaged in a closely knit organization for the purpose of diverting denatured alcohol from legitimate trade channels and thereafter operating large stills for its "cleaning" and subsequent sale for consumption.

A substantial number of liquor smuggling vessels have been forfeited, tremendous quantities of liquor aggregating millions in value at retail prices have been forfeited, and destroyed, and vigorous use has been made of the contempt powers of the Court against violators of personal injunctions. 775 padlock actions were begun and decrees secured in favor of the Government in 546. One case was decided against the Government.

Police Commissioner Whalen of New York City, in an address to the Rotary Club at the Waldorf on April 4, 1929, said that there were 32,000 "speakeasies" in New York City.

PRESIDENT HOOVER'S FIRST ANNUAL MESSAGE.

President Hoover in his annual message presented to Congress, Dec. 3, 1929, said in part:

"I wish to emphasize that during the past year the Nation has continued to grow in strength; our people have advanced in comfort; we have gained in knowledge; the education of youth has been more widely spread; moral and spiritual forces have been maintained; peace has become more assured. The problems with which we are confronted are the problems of growth and of progress.

FOREIGN RELATIONS.

"We are not only at peace with all the world, but the foundations for future peace are being substantially strengthened. Through the Kellogg-Briand pact a great moral standard has been raised in the world. By it fifty-four nations have covenanted to renounce war and to settle all disputes by pacific means.

"In January, 1926, the Senate gave its consent to adherence to The Court of International Justice with certain reservations. In September of this year the statute establishing the court has, by the action of the nations signatory, been amended to meet the Senate's reservations and to go even beyond those reservations to make clear that the court is a true international court of justice. I believe it will be clear to everyone that no controversy or question in which this country has or claims an interest can be passed on by the court without our consent at the time the question arises. The doubt about advisory opinions has been completely safeguarded. Our adherence to the International Court is, as now constituted, not the slightest step toward entry into the League of Nations. I shall direct that our signature be affixed to the protocol of adherence and shall submit it for the approval of the Senate with a special message at some time when it is convenient to deal with it.

"In the hope of reducing friction in the world, and with the desire that we may reduce the great economic burdens of naval armament, we have joined in conference with Great Britain, France, Italy, and Japan to be held in London in January to consider the further limitation and reduction of naval arms. We hold high hopes that success may attend this effort."

"We still have marines on foreign soil—in Nicaragua, Haiti, and China. In the large sense we do not wish to be represented abroad in such manner. About 1,600 marines remain in Nicaragua at the urgent request of that government and the leaders of all parties pending the training of a domestic constabulary capable of insuring tranquility. We have already reduced these forces materially and we are anxious to withdraw them further as the situation warrants. In Haiti we have about 700 marines, but it is a much more difficult problem, the solution of which is still obscure. If Congress approves, I shall dispatch a commission to Haiti to review and study the matter. Our forces in China constitute 2,605 men, which we hope also further to reduce to the normal legation guard.

"It is my desire to establish more firmly our understanding and relationships with the Latin American countries by strengthening the diplomatic missions to those countries. It is my hope to secure men long experienced in our Diplomatic Service, who speak the languages of the peoples to whom they are accredited, as chiefs of our diplomatic missions in these States.

NATIONAL DEFENSE.

Our Army and Navy are being maintained in a most efficient state under officers of high intelligence and zeal. The extent and expansion of their numbers and equipment as at present authorized are ample for this purpose.

"We can well be deeply concerned, however, at the growing expense. From a total expenditure for national defense purposes in 1914 of $267,000,000 it naturally rose with the Great War, but receded again to $612,000,000 in 1924, when again it began to rise until during the current fiscal year the expenditures will reach to over $730,000,000, excluding all civilian services of those departments. Programs now authorized will carry it to still larger fixtures in future years. The total of our expenditures is in excess of those of the most highly militarized nation of the world.

"Upon the conference shortly to be held in London will depend such moderation as we can make in naval expenditure. If we shall be compelled to undertake the naval construction implied in the Washington arms treaty as well as other construction which would appear to be necessary if no international agreement can be completed, we shall be committed during the next six years to a construction expenditure of upward of $1,200,000,000 besides the necessary further increase in costs for annual upkeep.

"In 1914 the officers and men in our regular forces, both Army and Navy, were about 164,000, in 1924 there were about 256,000, and in 1929 there were about 250,000. Our citizens' army, however, including the National Guard and other forms of reserves, increase these totals up to about 299,000 in 1914, about 672,000 in 1924, and about 728,000 in 1929.

"Under the Kellogg pact we have undertaken never to use war as an instrument of national policy. From a defense point of view our forces should be proportioned to national need and should, therefore, to some extent be modified by the prospects of peace, which were never brighter than to-day.

"In addition to the very large program of air forces which we are maintaining in the Army and Navy, there has been an enormous growth of commercial aviation. This has provided unanticipated reserves in manufacturing capacity and in industrial and air personnel, which again adds to our security.

GENERAL ECONOMIC SITUATION.

"The country has enjoyed a large degree of prosperity and sound progress during the past year with a steady improvement in methods of production and distribution and consequent advancement in standards of living. Progress has, of course, been unequal among industries, and some, such as coal, lumber, leather, and textiles, still lag behind. The long upward trend of fundamental progress, however, gave rise to over-optimism as to profits, which translated itself into a wave of uncontrolled speculation in securities, resulting in the diversion of capital from business to the stock market and the inevitable crash. The natural consequences have been a reduction in the consumption of luxuries and semi-necessities by those who have met with losses, and a number of persons thrown temporarily out of employment. Prices of agricultural products dealt in upon the great markets have been affected in sympathy with the stock crash.

"Fortunately, the Federal reserve system had taken measures to strengthen the position against the day when speculation would break, which together with the strong position of the banks has carried the whole credit system through the crisis without impairment. The capital which has been hitherto absorbed in stock market loans for speculative purposes is now returning to the normal channels of business. There has been no inflation in the prices of commodities; there has been no undue accumulation of goods, and foreign trade has expanded to a magnitude which exerts a steadying influence upon activity in industry and employment.

"The sudden threat of unemployment and especially the recollection of the economic consequences of previous crashes under a much less secured financial system created unwarranted pessimism and fear. It was recalled that past storms of similar character has resulted in retrenchment of construction, reduction of wages, and laying off of workers. The natural result was the tendency of business agencies throughout the country to pause in their plans and proposals for continuation and extension of their businesses, and this hesitation unchecked could in itself intensify into a depression with widespread unemployment and suffering.

"I have, therefore, instituted systematic, voluntary measures of cooperation with the business institutions and with State and municipal authorities to make certain that fundamental businesses of the country shall continue as usual, that wages and therefore consuming power shall not be reduced, and that a special effort shall be made to expand construction work in order to assist in equalizing other deficits in employment. Due to the enlarged sense of cooperation and responsibility which has grown in the business world during the past few years the response has been remarkable and satisfactory. We have canvassed the Federal Government and instituted measures of prudent expansion in such work that should be helpful, and upon which the different departments will make some early recommendations to Congress.

"I am convinced that through these measures we have reestablished confidence. Wages should remain stable. A very large degree of industrial unemployment and suffering which would otherwise have occurred has been prevented. Agricultural prices have reflected the returning confidence. The measures taken must be vigorously pursued until normal conditions are restored.

AGRICULTURE.

"The agricultural situation is improving. The gross farm income as estimated by the Department

of Agriculture for the crop season 1926-27 was $12,100,000,000; for 1927-28 it was $12,300,000 000; for 1928-29 it was $12,500,000,000; and estimated on the basis of prices since the last harvest the value of the 1929-30 crop would be over $12,650,000,000. The slight decline in general commodity prices during the past few years naturally assists the farmers' buying power.

"The number of farmer bankruptcies is very materially decreased below previous years. The decline in land values now seems to be arrested and rate of movement from the farm to the city has been reduced. Responsible farm leaders have assured me that a large measure of confidence is returning to agriculture and that a feeling of optimism pervades that industry.

"The most extensive action for strengthening the agricultural industry ever taken by any government was inaugurated through the Farm Marketing act of June 15 last. Under its provisions the Federal Farm Board has been established, comprised of men long and widely experienced in agriculture and sponsored by the farm organizations of the country. During its short period of existence the board has taken definite steps toward a more efficient organization of agriculture, toward the elimination of waste in marketing, and toward the upbuilding of farmers' marketing organizations on sounder and more efficient lines. Substantial headway has been made in the organization of four of the basic commodities—grain, cotton, livestock, and wool. Support by the board to cooperative marketing organizations and other board activities undoubtedly have served to steady the farmers' market during the recent crisis and have operated also as a great stimulus to the cooperative organization of agriculture. The problems of the industry are most complex, and the need for sound organization is imperative. Yet the board is moving rapidly along the lines laid out for it in the act, facilitating the creation by farmers of farmer-owned and farmer-controlled organizations and federating them into central institutions, with a view to increasing the bargaining power of agriculture, preventing and controlling surpluses, and mobilizing the economic power of agriculture.

THE TARIFF.

"The special session of Congress was called to expedite the fulfillment of party pledges of agricultural relief and the tariff. The pledge of farm relief has been carried out. At that time I stated the principles upon which I believed action should be taken in respect to the tariff:

" 'An effective tariff upon agricultural products, that will compensate the farmer's higher costs and higher standards of living, has a dual purpose. Such a tariff not only protects the farmer in our domestic market but it also stimulates him to diversify his crops and to grow products that he could not otherwise produce, and thus lessens his dependence upon exports to foreign markets. The great expansion of production abroad under the conditions I have mentioned renders foreign competition in our export markets increasingly serious. It seems but natural, therefore, that the American farmer, having been greatly handicapped in his foreign market by such competition from the younger expanding countries, should ask that foreign access to our domestic market should be regulated by taking into account the difference in our costs of production. * * *

" 'In considering the tariff for other industries than agriculture, we find that there have been economic shifts necessitating a readjustment of some of the tariff schedules. Seven years of experience under the tariff bill enacted in 1922 have demonstrated the wisdom of Congress in the enactment of that measure. On the whole it has worked well. In the main our wages have been maintained at high levels; our exports and imports have steadily increased; with some exceptions our manufacturing industries have been prosperous. Nevertheless, economic changes have taken place during that time which have placed certain domestic products at a disadvantage and new industries have come into being, all of which create the necessity for some limited changes in the schedules and in the administrative clauses of the laws as written in 1922.

" 'It would seem to me that the test of necessity for revision is, in the main, whether there has been a substantial slackening of activity in an industry during the past few years, and a consequent decrease of employment due to insurmountable competition in the products of that industry. It is not as if we were setting up a new basis of protective duties. We did that seven years ago. What we need to remedy now is whatever substantial loss of employment may have resulted from shifts since that time. * * *

" 'In determining changes in our tariff we must not fail to take into account the broad interests of the country as a whole, and such interests include our trade relations with other countries.'

"I am firmly of the opinion that their application to the pending revision will give the country the kind of a tariff law it both needs and wants. It would be most helpful if action should be taken at an early moment, more especially at a time when business and agriculture are both cooperating to minimize future uncertainties. It is just that they should know what the rates are to be.

"I have been most anxious that the broad principle of the flexible tariff as provided in the existing law should be preserved and its delays in action avoided by more expeditious methods of determining the costs of production at home and abroad, with executive authority to promulgate such changes upon recommendation of the Tariff Commission after exhaustive investigation.

"There is no fundamental conflict between the interests of the farmer and the worker. The prosperity of one rests upon the well-being of the other. Nor is there any real conflict between the East and the West or the North and the South in the United States. The complete interlocking of economic dependence, the common striving for social and spiritual progress, our common heritage as Americans, and the infinite web of national sentiment, have created a solidarity in a great people unparalleled in all human history. These invisible bonds should not and can not be shattered by differences of opinion growing out of discussion of a tariff."

The President's discussion of the finances of the Government and reduction of taxation will be found in his Budget Message. (See Index.) In repeating his suggestion regarding public buildings as given also in his Budget Message, he asked again that the Fine Arts Commission be required to pass upon private buildings proposed for sites facing on public buildings and parks in Washington.

The President said that it had been found advisable to review the proposed Atchafalaya River floodway before making recommendation to Congress on Mississippi flood control, but asks for an appropriation of $35,000,000.

RECOMMENDATIONS FOR COMMISSIONS.

He asked for legislation to expedite the consolidation of railway systems and to relieve the Interstate Railway Commission of much detail work

He asked for a full time Federal Power Commission with enlarged powers; for the reorganization of the Radio Commission on a permanent basis; and for a special commission to negotiate and complete contracts for the utilization of the power at Muscle Shoals.

He announced that he had appointed a Commission on Conservation of the Public Domain, with a membership representing the major public land States and at the same time the public at large; also a committee representative of the important educational associations and others to investigate and present recommendations on public education; and a voluntary committee to assist in a nation-wide movement for abolition of illiteracy.

He recommended that the purpose of the Sheppard-Towner Act should be continued through the Children's Bureau for a limited period of years; and that the Congress should consider the desirability of confining the use of Federal health and welfare funds by the States to the building up of such county or other local units, and that such outlay should be positively coordinated with the funds expended through the United States Public Health Service directed to other phases of the same county or other local unit organization.

He also recommended a new Federal prison and a reorganization of the probation and parole systems; and that appointments of third-class poastmasters be made under the Civil Service Law.

REORGANIZATION OF GOVERNMENT DEPARTMENTS.

Reorganization of the departments of government, the President declared, is a necessity of sound administration; of economy; of more effective governmental policies and of relief to the citizen from unnecessary harassment in his relations with a multitude of scattered governmental agencies.

All administrative activities of the same major purpose should be placed in groups under single-headed responsibility; and, all executive and administrative functions should be separated from boards and commissions and placed under individual responsibility, while quasilegislative and quasijudicial and broadly advisory functions should be removed from individual authority and assigned to boards and commissions.

But he sees no hope for the development of a sound reorganization of the Government unless

Congress be willing to delegate its authority over the problem (subject to defined principles) to the Executive, who should act upon approval of a joint committee of Congress or with the reservation of power of revision by Congress within some limited period adequate for its consideration.

MERCHANT MARINE.

"Under the impulse of the merchant marine act of 1928," said the President, "the transfer to private enterprise of the Government-owned steamship lines is going forward with increasing success. The Shipping Board now operates about 18 lines, which is less than half the number originally established, and the estimate of expenditures for the coming fiscal year is based upon reduction in losses on Government lines by approximately one-half. Construction loans have been made to the amount of approximately $75,000,000 out of the revolving fund authorized by Congress and have furnished an additional aid to American shipping and further stimulated the building of vessels in American yards. I appointed an interdepartmental committee, consisting of the Secretary of Commerce, as chairman, the Secretary of the Navy, the Postmaster General, and the chairman of the Shipping Board, to make a survey of the policies being pursued under the act of 1928 in respect of mail contracts; to inquire into its workings and to advise the Postmaster General in the administration of the act.

"In review of the mail contracts already awarded it was found that they aggregated 25 separate awards imposing a governmental obligation of a little over $12,000,000 per annum. Provision had been imposed in five of the contracts for construction of new vessels with which to replace and expand services. These requirements come to a total of 12 vessels in the 10-year period, aggregating 122,000 tons. That study has now been substantially completed and the committee has advised the desirability and the necessity of securing much larger undertakings as to service and new construction in future contracts. The committee at this time is recommending the advertising of 14 additional routes, making substantial requirements for the construction of new vessels during the life of each contract recommended. A total of 40 new vessels will be required under the contracts proposed, about half of which will be required to be built during the next three years. The capital cost of this new construction will be approximately $250,000,000, involving approximately 460,000 gross tons. Should bidders be found who will make these undertakings, it will be necessary to recommend to Congress an increase in the authorized expenditure by the Post Office of about $5,500,000 annually. It will be most advantageous to grant such an authority.

THE BANKING SYSTEM.

"It is desirable that Congress should consider the revision of some portions of the banking law.

"The development of 'group' and 'chain' banking presents many new problems. The question naturally arises as to whether if allowed to expand without restraint these methods would dangerously concentrate control of credit, and whether they would not in any event seriously threaten one of the fundamentals of the American credit system—which is that credit which is based upon banking deposits should be controlled by persons within those areas which furnish these deposits and thus be subject to the restraints of local interest and public opinion in those areas. To some degree, however, this movement of chain or group banking is a groping for stronger support to the banks and a more secure basis for these institutions.

"The relinquishment of charters of national banks in great commercial centers in favor of State charters indicates that some conditions surround the national banks which render them unable to compete with State banks; and their withdrawal results in weakening our national banking system.

"It has been proposed that permission should be granted to national banks to engage in branch banking of a nature that would preserve within limited regions the local responsibility and the control of such credit institutions. It might be found advantageous to create a joint commission embracing Members of the Congress and other appropriate Federal officials for subsequent report.

VETERANS.

"The doors of the Government's hospitals have been opened to all veterans, even though their diseases or injuries were not the result of their war service. In addition adjusted service certificates have been issued to 3,433,300 veterans. This in itself will mean an expenditure of nearly $3,500,000,000 before 1945, in addition to the $600,000,000 which we are now appropriating anually for our veterans' relief. While some inequalities have arisen, substantial and adequate care has been given and justice administered.

"I am conviced that we will gain in efficiency, economy, and more uniform administration and better definition of national policies if the Pension Bureau, the National Home for Volunteer Soldiers, and the Veterans' Bureau are brought together under a single agency. The total appropriations to these agencies now exceed $800,000,000 per annum.

PROHIBITION.

"The enforcement of the laws enacted to give effect to the eighteenth amendment is far from satisfactory and this is in part due to the inadequate organization of the administrative agencies of the Federal Government. With the hope of expediting such reorganization, I requested on June 6 last that Congress should appoint a joint committee to collaborate with executive agencies in preparation of legislation. It would be helpful if it could be so appointed. The subject has been earnestly considered by the Law Enforcement Commission and the administrative officials of the Government. Our joint conclusions are that certain steps should be taken at once. First, there should be an immediate concentration of responsibility and strengthening of enforcement agencies of the Federal Government by transfer to the Department of Justice of the Federal functions of detection and to a considerable degree of prosecution, which are now lodged in the Prohibition Bureau in the Treasury; and at the same time the control of the distribution of industrial alcohol and legalized beverages should remain in the Treasury. Second, provision should be made for relief of congestion in the Federal courts by modifying and simplifying the procedure for dealing with the large volume of petty prosecutions under various Federal acts. Third, there should be a codification of the laws relating to prohibition to avoid the necessity which now exists of resorting to more than 25 statutes enacted at various times over 40 years. Technical defects in these statutes that have been disclosed should be cured. I would add to these recommendations the desirability of reorganizing the various services engaged in the prevention of smuggling into one border patrol under the Coast Guard.

"The District of Columbia should be the model of city law enforcement in the Nation. While conditions here are much better than in many other cities, they are far from perfect, and this is due in part to the congestion of criminal cases in the Supreme Court of the District, resulting in long delays. Furthermore, there is need for legislation in the District supplementing the national prohibition act, more sharply defining and enlarging the duties and powers of the District Commissioners and the police of the District, and opening the way for better cooperation in the enforcement of prohibition between the District officials and the prohibition officers of the Federal Government. It is urgent that these conditions be remedied.

LAW ENFORCEMENT AND OBSERVANCE.

"No one will look with satisfaction upon the volume of crime of all kinds and the growth of organized crime in our country. We have pressing need so to organize our system of administering criminal justice as to establish full vigor and effectiveness. It is the most serious issue before our people.

"Under the authority of Congress I have appointed a National Commission on Law Observance and Enforcement, for an exhaustive study of the entire problem of the enforcement of our laws and the improvement of our judicial system, including the special problems and abuses growing out of the prohibition laws. The commission has organized its work under subcommittees dealing with the many contributory causes of our situation and has enlisted the aid of investigators in fields requiring special consideration.

"Pending further legislation, the Department of Justice has been striving to weed out inefficiency wherever it exists, to stimulate activity on the part of its prosecuting officers, and to use increasing care in examining into the qualifications of those appointed to serve as prosecutors. Increases in appropriations are necessary.

"However much we may perfect the mechanism, still if the citizen who is himself dependent upon some laws for the protection of all that he has and all that he holds dear, shall insist on selecting the particular laws which he will obey, he undermines his own safety and that of his country. His attitude may obscure, but it can not conceal, the ugly truth that the lawbreaker, whoever he may be, is the enemy of society. Our laws are made by the people themselves; theirs is the right to work for their repeal; but until repeal it is an equal duty to observe them and demand their enforcement."

PRESIDENT HOOVER'S BUDGET MESSAGE.

President Hoover in his message to Congress, Dec. 4, 1929, presenting the budget for 1930-31 noted that by deducting the revolving loan fund of $150,000,000 for the Federal Farm Board appropriated in the 1930 budget and for which no corresponding figure for the 1931 budget could at present be fixed, the total estimates of appropriations in 1931 exceeds those of 1930 by $4,304,000.

Notable increases are: $8,800,000 for enlarging the Capitol grounds, House and Senate office buildings and new Supreme Court building; $2,800,000 for the Interstate Commerce Commission; $3,300,000 for forest service; $1,100,000 for plant quarantine; $2,500,000 for public roads; $3,100,000 for Indian educational, health and industrial service; $2,500,000 for aeronautics in the Department of Commerce; $1,100,000 for Federal Court expenses; $2,250,000 for Federal prisons; $15,600,000 for the Navy; $8,550,000 for military expenses in the War Department; $1,275,000 for the Bureau of Prohibition; $2,450,000 for the Coast Guard; $3,300,000 for the District of Columbia; $5,000,000 for flood control and $5,000,000 for rivers and harbors.

The President, speaking of the public building program, said:

"Many of the difficulties have been overcome and it is expected that the work will now proceed expeditiously, resulting in the completion of 34 new or enlarged buildings in the fiscal year 1930 and 40 in the fiscal year 1931. The program calls for a total expenditure of approximately $300,000,000 in addition to the proceeds of sale of abandoned property. Individual projects have already been authorized by the Congress at limits of cost in excess of $260,000,000. There were brought forward into the fiscal year 1930 appropriation balances aggregating $41,481,099. This is increased by appropriations made at the last session of the Congress, amounting to $39,475,500, making the total amount available for expenditure $80,956,599. Of this amount the Treasury Department contemplates spending about $59,500,000 in the fiscal year 1930. The Budget for 1931 carries estimates for public buildings, including the purchase of additional land in Washington, amounting to $30,000,000. Supplemental thereto an estimate of about $5,000,000 will be submitted at a later date when the Treasury Department has concluded its survey of new projects. The appropriation of these amounts will provide the Treasury with ample funds to continue the work during the fiscal year 1931.

"The War Department is also carrying forward a building program, involving an ultimate expenditure of about $118,000,000, for the housing of military personnel, made necessary by the need for the replacement of World War temporary construction and to provide for the increase in the pre-war strength of the Regular Army. There has already been appropriated for this purpose $37,193,899, and $16,062,860 is carried in the estimates for 1931 with authority to make contracts for $3,000,000 additional. The estimates for 1931 also carry $3,311,000 for technical buildings for the air services of the Army and Navy, and $3,176,000 for other buildings for various purposes for the Army, Navy, and Panama Canal.

"For completing the $15,000,000 program for additional hospital facilities for the Veterans' Bureau, $2,000,000 is provided for liquidating contracts previously authorized by the Congress.

"In furtherance of the $10,000,000 program for houses and offices for our foreign representatives, $1,700,000 is included in these estimates.

NATIONAL DEFENSE AND AIR SERVICE.

"The estimates for direct appropriations for the War and Navy Departments for 1931 provide a total of $719,089,000 for national defense. This is exclusive of all items of a non-military character. Provision is made for carrying forward the Air Service programs of the two services, the housing program of the Army, and the requirements of the Navy with regard to the modernization of old battleships and the construction of new ships authorized by the act of February 13, 1929, as well as the light cruisers and submarines authorized by prior law. With regard to the 15 new cruisers authorized by the act of last February, provision is made for continuing work on the two cruisers already laid down and on the aircraft carrier and three cruisers to be laid down late in the fiscal year 1930 and for the commencement of the construction of the second and third blocks of five cruisers each, late in the fiscal year 1931.

"Under the Air Service programs for the Army and Navy, the budget calls for a total of $33,000,000 for the procurement of airplanes, their engines, etc., and for the same purposes for the Coast Guard, Department of Commerce, and the National Advisory Committee for Aeronautics a total of $460,000. With regard to the Army, provision is made for the procurement of the 443 airplanes pertaining to the fourth increment of the 5-year program authorized by the Congress. This program calls for 1,515 planes to be on hand and on order on June 30, 1931, and this goal will be reached or closely approached by the funds already appropriated and the amounts estimated in this Budget. The present shortage in the program is about 40 planes pertaining to prior increments. Concerning the Navy Air Service, the last, or fifth, increment of the 5-year program authorized by the Congress will be reached in 1931. This program contemplates about 1,000 planes and 2 ighter-than-air ships to be on hand and on order at the close of that fiscal year. To accomplish this, provision is made for the procurement of 269 airplanes and their equipment, and for continuing the work on the 2 lighter-than-air ships now under contract. For airways, the inspection and licensing of commercial planes and pilots, and furnishing weather reports, there is included in the estimates of the Department of Commerce $8,925,830 and in those for the Weather Bureau $1,400,000. By June 30, 1931, there will be about 18,400 miles of airways lighted and equipped.

"The estimates for 1931 provide for 84,500 enlisted men for the Navy and 18,000 enlisted men for the Marine Corps, the same as for 1930, and for the same number of ships in commission; and for the Army an average strength of 12,000 officers, 998 warrant officers and 118,750 enlisted men, exclusive of the 6,500 Philippine scouts; also the annual two weeks training of 20,000 reserve officers and longer periods of 840 reserve officers for the attendance of 37,500 men at the Citizen Military Training Camps in the United States and 3,000 in the Philippines, for an enrollment of 127,500 students in the Reserve Officers' Training Corps units, and for the maintenance of the National Guard at an aggregate strength of 190,000."

The President gave the following summary of estimated receipts and expenditures (exclusive of postal revenues and postal expenditures paid from postal revenues):

	Est., 1931.	Est., 1930.	Act., 1929.
	Dollars.	*Dollars.*	*Dollars.*
Receipts:			
Customs..	602,000,000	602,000,000	602,262,786
Income tax	2,460,000,000	2,480,000,000	2,330,711,823
Int. rev...	640,000,000	635,000,000	607,307,549
Misc.rec'ts	523,727,666	532,263,434	492,968,067
	4,225,727,666	4,249,263,434	4,033,250,225
Exp'd't'rs.	4,102,938,700	4,023,681,900	3,848,463,190
Surplus...	122,788,966	225,581,534	184,787,035

"The increase in actual receipts for 1929 over the estimate is due," the President said, "mainly to an unforeseen increase in receipts from the individual income tax. On the expenditure side, the total excess over the estimate, $54,000,000, is but slightly in excess of the amount paid to the railroads on account of back mail pay, an expenditure which could not have been anticipated in the estimate.

"For 1930 there is a marked improvement over the financial situation as estimated in the Budget for 1930 transmitted to the Congress in December, 1928. Receipts show an increase of about $408,000,000 and the expenditures about $243,000,000. On the receipt side the increase in the estimate is reflected generally in the income tax, $305,000,000, due to an abnormal increase in the incomes reported by individuals for 1928 and to this exceedingly prosperous business year; miscellaneous internal revenue, $76,000,000, derived in the main from a steady expansion of the tobacco tax and increased stamp-tax receipts; customs, $20,000,000; and miscellaneous receipts, about $7,000,000. On the expenditure side the principal items making up the increase in the estimate are $75,000,000 for the net expenditures from the revolving loan fund of the Federal Farm Board, $77,000,000 for public-debt retirements, $12,790,000 for the postal deficiency, $23,000,000 for the construction and modernization of naval ships, $42,000,000 for the Treasury Department, mainly to the settlement of war claims and the public building program, and $11,800,000 for the Veterans' Bureau.

TAX REDUCTION.

"With an estimated surplus of over $225,000,000 this year and $122,000,000 next year it is felt," the President said, "that some measure of reduction in taxes is justified. Since the fiscal year 1921 four

PRESIDENT HOOVER'S BUDGET AT A GLANCE.

President Hoover gave out on Dec. 5 his Federal "budget at a glance"—a rearrangement of the budget as presented to Congress.

The statement shows that approximately 72 cents of every dollar to be spent by the Federal government during the next fiscal year must go to pay for past wars and preparedness for any that may occur in the future.

Only eight cents of every dollar will be spent to keep the actual machinery of the government functioning; 13 cents will be devoted to the social aids and subsidies, and the remaining 7 cents to maintaining the government's fiscal affairs.

Of the $3,830,445,231 which Congress has been asked to appropriate for the fiscal year beginning next July 1, the sum of $2,733,213,283 must be provided for payment of principal and interest on the public debt, incurred to prosecute war, outlays for pensions, hospitalization and other expenses incurred on behalf of veterans of former wars and for national defense—the Army, Navy, Marine Corps and National Guard.

The statement showing in detail how the government's money has been apportioned is as follows:

	Appropriations.	
	Estimates, 1931.	Actual, 1930.
GROUP I.		
Public Debt:		
Principal	$635,324,000	$623,894,100
Interest	619,000,000	656,000,000
	$1,254,324,000	$1,279,894,100
Veterans of former wars	759,799,895	757,044,485
National defense	719,089,388	692,399,804
Total Group I	$2,733,213,283	$2,729,338,389
GROUP II.		
Legislative	$11,568,208	$10,698,973
Executive	422,320	447,220
Judicial, law enforcement and regulatory commissions	88,310,150	76,922,014
Fiscal administration and control of currency and banking	76,507,067	76,193,434
Foreign relations	16,735,902	14,257,626
Administration of territories and dependencies	1,918,693	872,785
Service agencies to the departments and independent establishments	33,599,520	33,406,455
Civil pensions and allowances	21,148,000	20,797,000
Balance of postal deficiency after deducting losses due to contract air-mail routes, foreign air-mail routes and to transportation of foreign mail in American vessels	50,098,000	57,514,000
Total Group II	$300,307,860	$291,109,507
GROUP III.		
Public health	$20,804,072	$19,774,123
Education	14,491,938	14,410,563
Indian affairs	20,508,330	17,523,516
Conservation of national resources	47,796,767	43,801,966
Agricultural marketing revolving fund	*	150,000,000
Other aids to agriculture	51,755,016	48,818,044
Aids to labor	6,510,170	6,033,286
Aids to aviation, including losses on air-mail routes	22,517,630	20,362,620
Aids to industry and trade	14,922,044	13,800,242
Aids to merchant marine, including losses on transportation of foreign mail in American vessels	57,286,042	58,928,750
Public buildings and public works	246,012,061	245,786,830
Bureau of the Census	8,497,000	19,000,000
Total Group III	$511,193,070	$658,239,940
GROUP IV.		
Refunds (taxes, customs, etc.)	$162,582,500	$153,009,000
Trust funds (veterans' insurance, Indian funds, etc.)	74,617,240	95,318,650
District of Columbia	47,880,228	44,540,115
Miscellaneous	705,050	4,586,050
Total Group IV	$285,731,018	$297,453,815
Total exclusive of postal service payable from postal revenues	$3,830,445,231	$3,976,141,651

Note—The figures are exclusive of postal revenues and postal expenditures paid from postal revenues, and the expenditures include reduction of the public debt required to be made from ordinary receipts. The budget estimate for 1930 presented last year was revised when the 1931 estimate was sent in.

reductions in taxes have been made. Experience has shown that each reduction in taxes has resulted in revenue in excess of the mathematically computed return under the reduced rates. Undoubtedly an increase in the prosperity of business brought forth by tax reduction is partly responsible for this experience. Such reduction gives the taxpayer correspondingly more for his own use and thus increases the capital available for general business. Under the present circumstances I am in favor of a reduction in income taxes to be effective on returns for the calendar year 1929, which will be due March 15, 1930.

"Our finances are in sound condition. The public debt which at its peak in August, 1919, amounted to $26,596,000,000, stood at $16,931,000,000 on June 30, 1929. We are wisely committed to a policy which insures the further progressive reduction of the debt. We will reach in 1931 for the first time the period when the annual reduction required by law in the principal of the debt will be greater than the annual interest charges on the debt. We are also committed to the annual amortization of our other long term commitments—such as the adjusted service certificate of the veterans of the World War and our liability under the retirement laws affecting civilian personnel. Our estimated expenditures for this and the next year are well within our expected receipts."

THE UNITED STATES BUDGET FOR 1930-1931.

The Budget of the United States for the fiscal year ending June 30, 1931, as presented to Congress Dec. 1, 1929 by President Hoover, is given herewith, with the corresponding figures for 1928, 1929 and 1930 (cents omitted):

(*a*) Exclusive of additional amounts required to meet the provisions of the act approved May 28, 1928, amending the Classification Act of 1923, approximately $20,000,000.

(*b*) $150,000,000 included in appropriations for 1930 for Federal Farm Board revolving loan fund. No corresponding figure included for 1931.

(*c*) Contains an item of $600,000 appropriation for Alien Property Custodian.

THE PUBLIC DEBT OF THE UNITED STATES.

The total gross debt of the United States on Nov. 30, 1929, on the basis of the daily Treasury statements (cents omitted) was:

Bonds:	
2% Consols of 1930	$599,724,050
2% Panama's of 1916-36	48,954,180
2% Panama's of 1918-38	25,947,400
3% Panama's of 1961	49,800,000
3% Conversion bonds	28,394,500
2½% Postal Savings bonds	18,053,360
	$771,373,490
First Liberty Loan of 1932-1947	$1,938,788,250
4¼% Fourth Liberty Loan of 1933-38	6,268,269,050
	$8,207,057,300
4¼% Treasury Bonds of 1947-52	$758,984,300
4% Treasury Bonds of 1944-1954	1,036,834,500
3¾% Treasury Bonds of 1946-1956	489,087,100
3¾% Treasury Bonds of 1943-1947	493,037,750
3½% Treasury Bonds of 1940-1943	359,042,950
	$3,136,986,600
Total bonds	$12,115,417,390
Treasury Notes	$2,648,600,550
Treasury Certificates	1,658,283,000
Total interest-bearing debt	$16,422,300,940
Matured Debt on Which Interest Has Ceased	$33,104,730
Debt Bearing No Interest:	
United States notes	$346,681,016
Less gold reserve	156,039,088
	$190,641,928
Deposits for retirement of national-bank and Federal reserve bank notes	39,993,824
Old demand notes and fractional currency	2,054,151
Thrift and Treasury savings stamps, unclassified sales, etc.	3,465,183
	$236,145,086
Total gross debt	$16,951,550,756
Net balance in general fund	$123,894,244
Gross debt less net balance	$16,567,656,512

POST WAR DEBT REDUCTION FOR 1929.

In his report for 1929 Secretary of the Treasury, Andrew W. Mellon, said:

"The war debt reached its highest point on Aug. 31, 1919. In the full decade hereafter ending on Aug. 31, 1929, the gross debt outstanding had been reduced from $26,594,267,878 to $16,805,433,171, a decrease of $9,788,834,707, which was accomplished (1) through expenditures aggregating $4,451,698,144 chargeable to ordinary receipts under the established program for the liquidation of the debt; (2) through the application of $4,367,624,775 surplus of ordinary receipts; and (3) through net reduction of $969,511,788, in the general fund balance. The annual interest charge on Aug. 31, 1919, was $1,105,690,254, and on Aug. 31, 1929, $652,471,596. The gross debt outstanding was reduced 36.8% during this 10-year period, and the interest-bearing debt was reduced 37.3%. The annual interest charge was reduced 41%.

The gross debt was reduced in the fiscal year 1929 from $17,604,290,562.93 to $16,931,197,747.40. The reduction of $673,092,815.33 was brought about through expenditures aggregating $549,603,703.75 for sinking fund and other accounts chargeable to ordinary receipts and through the application of $123,489,111.58 surplus receipts.

The refunding of the third Liberty Loan, which matured on Sept. 15, 1928, was completed through an issue on July 16, 1928, of 3⅜% Treasury bonds of 1940-1943, in amount $359,042,950, and through two issues of Treasury certificates of indebtedness, 4½% on Sept. 15, 1928, in amount $549,310,700, and 4¾% on Oct. 15, 1928, in amount $308,806,000. On Oct. 31, 1929, a balance of $14,757,450 third Liberty Loan bonds had not been presented for payment.

Other financing during the year was restricted to the usual quarterly issues of Treasury certificates of indebtedness at the maturities of other certificates. On Dec. 15, 1928, three series became due, in total amount about $530,000,000, and the Treasury offered for that date two series of 4¼% Treasury certificates, one in amount $209,918,000, with nine months' maturity, and the other in amount $310,245,500, with maturity of one year. Two series matured on March 15, 1929, in total amount $506,000,000, and one series on June 15, 1929, in amount $470,000,000. To meet the Treasury's requirements one series was issued on March 15, 1929, at 4¼%, with nine months' maturity, in amount $475,998,500, and another on June 15, 1929, at 5⅛%, likewise with nine months' maturity, in amount $404,209,500.

In the first quarter of the fiscal year 1930 there was offered for subscription on Sept. 6 an issue of 4⅞% Treasury certificates of indebtedness, dated Sept. 16, with a nine months' maturity, to meet the Treasury requirements, and in particular to provide for about $510,000,000 maturing certificates on Sept. 15, 1929. In connection with this issue the Treasury offered to purchase up to $100,000,000 face amount 3½% Treasury notes, through the optional tender of such notes at 98, in part payment of subscriptions for the new certificates. For this issue subscriptions aggregating $1,480,696,500 were received, and a total of $549,707,500 was allotted and issued.

This issue of 4⅞% Treasury certificates of indebtedness is the first under the act of June 17, 1929, which authorized issues exempt, both as to principal and interest, from all taxation except estate and inheritance taxes. The exceptionally large oversubscription is attributed in part to the tax-exempt feature, as it constitutes an inducement to purchase for individual investors desirous of obtaining more complete exemption from the surtaxes as well as from the normal rates levied on incomes. There was no additional inducement given for corporations to subscribe, as they have enjoyed exemption from income tax on such issues under earlier statues.

On July 15, 1929, one of the most interesting features of the war financing was brought to a close, when a small amount of the series of 1924 Treasury savings certificates matured. Through the sale of these securities, which extended from Dec. 3, 1917, to July 15, 1924, cash aggregating $1,623,126,447 was received into the Treasury. To June 30, 1929, accrued discount aggregating $227,488,697 had been paid or placed to the credit of outstanding certificates, making the total redemption value to that date $1,850,615,144, all of which has been paid except $25,809,656 outstanding on that date, including a balance of $13,028,019.35 maturing on July 15, 1929.

For the fiscal year 1929 an appropriation of $370,241,327 was available for debt retirement through the cumulative sinking fund. Through this fund in the nine years, 1921-1929, inclusive, the total par value of debt retired amounts to $2,799,099,350.

REDUCTION IN INCOME TAXES.

Secretary of the Treasury Mellon after a conference with President Hoover and leaders of the Senate and House at the White House on Nov. 13, 1929, made public the Treasury's recommendations for a reduction in the income tax estimated to amount to $160,000,000. The announcement of this projected relief was welcomed by a public that had suffered from the Wall Street crash.

The recommendations made by the Secretary in his Report to Congress were:

The enactment by the Congress of a joint resolution declaring:

(1) That the normal tax rate on the income of individuals for the calendar year 1929, payable in 1930, shall be ½ per cent, 2 per cent, and 4 per cent, instead of the existing rates of 1½ per cent, 3 per cent, and 5 per cent.

(2) That the tax rate on the income of corporations for the calendar year 1929, payable in 1930, shall be 11 per cent instead of the existing 12 per cent.

This should result in a decrease of income tax collections during the calendar year 1930 of approximately $160,000,000, about equally divided between the fiscal years 1930 and 1931.

The Secretary urged that if this were done by a joint resolution it could be done quickly without attempting to revise the existing law, and would permit Congress with equal facility next year to make the proposed rates permanent, fix other rates for 1930 income, or by failure to take any action automatically restore existing rates.

Chairman Hawley of the Ways and Means introduced in the House the joint resolution suggested on the opening of the session on Dec. 2, and it passed on the 5th. The Finance Committee of the Senate reported out the resolution by unanimous vote, but it was passed 63 to 14, on Dec. 14, and approved on the 16th.

FOREIGN DEBT FUNDING AGREEMENTS.

Country.	Date of Agreement.	Original Principal (Net).	Funded Interest.	Funded Debt.
		Dollars.	*Dollars.*	*Dollars.*
Belgium	Aug. 18, 1925	377,029,570.06	40,750,429.94	417,780,000
Czechoslovakia	Oct. 13, 1925	91,879,671.03	23,120,328.97	115,000,000
Estonia	Oct. 28, 1925	12,066,222.15	1,763,777.85	13,830,000
Finland	May 1, 1923	8,281,926.17	718,073.83	9,000,000
France	April 29, 1926	3,340,516,043.72	684,483,956.28	4,025,000,000
Great Britain	June 19, 1923	4,074,818,358.44	525,181,641.56	4,600,000,000
Hungary	April 25, 1924	1,685,835.61	253,164.39	1,939,000
Italy	Nov. 14, 1925	1,647,869,197.96	394,130,802.04	2,042,000,000
Latvia	Sept. 24, 1925	5,132,287.14	642,712.86	5,775,000
Lithuania	Sept. 22, 1924	4,981,628.03	1,048,371.97	6,030,000
Poland	Nov. 14, 1924	159,666,972.39	18,893,027.61	178,560,000
Roumania	Dec. 4, 1925	36,128,494.94	8,461,505.06	44,590,000
Yugo-Slavia	May 3, 1926	51,037,886.39	11,812,113.61	62,850,000
Total		9,811,094,094.03	1,711,259,905.97	11,522,354,000

The Treasury received during the fiscal year 1929, on account of indebtedness of foreign governments to the United States, the sum of $199,131,569, of which $38,790,661 represented principal and $160,340,908 represented interest. Total payments received up to the end of the fiscal year on account of the principal of the funded indebtedness amounted to $191,339,786; on account of interest to $904,966,431.

The agreement with France providing for the funding of its indebtedness to the United States, concluded April 29, 1926, was ratified by the French Government July 27, 1929. It was ratified by the Senate on Dec. 16, 1929.

The Austrian Relief debt agreement, on a principal ndebtedness of $24,055,709, awaits the assent of Italy to the joint agreement of the nine creditor governments, but Austria, exercising her option, began payments to the United States of annual installments on Jan. 1, 1929. The schedule calls for the payment of 5 annual installments of $287,556, then 10 of $460,093; and then 25 of $743,041.

Czecho-Slovakia has not ratified its funding agreement, but is making payments regularly under it.

The Greece Relief and Refuge debt agreement, executed May 10, 1929, under Act of Congress, approved Feb. 14, 1929, covered a principal indebtedness of $48,236,629 (against which $15,000,000 had been advanced in cash), to be refunded over a period of 62 years. The schedule of payments is $40,000 the first year, $50,000 the second, $60,000, the third, $220,000 the fourth, $260,000 the fifth, then $300,000 for five years, and then $350,000 for 52 years.

GOVERNMENT LIQUOR CONTROL IN CANADA.

Under the Canadian Constitution the sale of liquor is regulated by provincial, not Federal, authority.

Under the **Quebec** law any adult can buy a single bottle of any liquor, or a gallon of wine, government guaranteed, at a fixed price, from a government commission store between 9 A. M. and 6 P. M. any week day. In any licensed tavern he may buy and consume on the premises beer by the glass until 10 P. M. There are no bars. He may buy, from a grocer, beer by the half-dozen bottles or have it delivered by the case. A hotel may serve wines and beers with meals under permit. There are ninety government stores in the province but none in a town that does not wish one. In rural communities an individual may order by mail from the nearest vender and receive his purchase by mail. All transactions with the commission stores are for cash, no loitering is allowed, and the authorities will refuse to sell to any one obviously intoxicated or boisterous.

The revenue derived for the province under the Alcoholic Liquor Act for the fiscal year ending June 30, 1926, was $1,839,395; for 1927, $5,700,000; and for 1928, $7,000,000.

Ontario in 1924 gave a majority of 30,000 against government control of the sale of liquor. In 1925 the provincial parliament passed a law permitting on and after May 21 the sale of beer with an alcoholic content of 4.4 per cent. which, under the Canadian system of reckoning alcoholic strength, was much nearer the American 2.75 per cent. beer. It also allowed native wines and permitted the manufacture of home brew on filing of notification, 17,000 being filed. Whiskey could be had only on physicians' prescriptions from government venders; $5,000,000 annually was paid for liquor under prescriptions (which cost from $2 to $3 each). Premier G. Howard Ferguson, Conservative, with a following of two-thirds of the last legislature which had eighteen months to run, went to the people in a general election, Dec. 1, 1926, on the liquor question as the main issue, announcing his intention of enacting, if returned to power, a bill authorizing the sale of liquor in government stores, subject to local option; every person over twenty-one years of age to be entitled under certain restrictions to a permit by which he or she can procure liquor or beer at reasonable cost from government venders. His victory was overwhelming; the Conservatives carried seventy-five seats out of 112 with some members of the minority parties also pledged to the government control plan. All the fifteen Toronto seats went to the government by large majorities.

Premier Ferguson won 92 seats in the election of October, 1929, which was regarded as a great endorsement of his policy.

Premier Ferguson introduced in the Provincial Legislature on March 9, 1927, the Liquor Control Act which was passed and went into effect on June 1, 1927. It provided that liquors, wines and beer would be sold only in stores operated by the Government and sales made only by permits: (1) individual permit (a) for residents of Ontario, and (b) for tourists and temporary residents not exceeding one month; (2) special permit (a) for physicians, etc., and those engagd in mechanical and scientific pursuits; (b) for ministers for sacramental purposes and (c) for any special purpose named in the permit. Druggists are not allowed to sell liquors. Distilleries and breweries may sell only to the Government.

A commission headed by D. B. Hanna, formerly general manager of the old Canadian Northern Railway administers the law. The penalties for violations are severe.

In the fiscal year ending Oct. 31, 1928, from profit on the actual sale of liquor, revenue was derived to the extent of $7,225,000; and from liquor permits, $893,390.

Nova Scotia, for years a stronghold of prohibition, in a referendum on Oct. 31, 1929, voted on two propositions: For the existing temperance act, 20,862, against 30,442; for government control, 36,563 against 9,682. Practically every town in the Province gave a majority for government control.

Prince Edward Island gave a large majority for the existing prohibition law on July 18, 1929, repeating the result of a similar plebiscite held June 25, 1928. This, the smallest province, is the only one now under a prohibition law.

The **New Brunswick** legislature on April 19, 1927, put the sale of liquor under Government control by an act modeled after the Ontario act. Profits in the fiscal year 1927-28 were $335,027.

Manitoba went dry in 1916 after a referendum, but the act did not prohibit the importation of liquor for personal use. Four years later another referendum made the law invalid. In the summer of 1923 there was a double referendum, the first providing for the Government sale of liquor under the Moderation League's bill was carried by a vote of 107,609 to 68,879; the second to allow sale in hotels and restaurants was defeated by a majority of 36,907 That law has been in force since Aug. 7, 1923. The gross revenues in the fiscal year ending April 30, 1928 were $1,493,707; net revenues, $1,345,117; sales tctaled $3,985,006.

Saskatchewan abolished bars in 1915, went "bone-dry" in 1917, and turned to government control in 1924. Sales in the fiscal year 1928-29 totaled $14,607,805, profits $3,083,947.

Alberta voted dry in 1915, and for government control in 1923. The revenue in 1928 was $2,761,009.

British Columbia went dry in 1916, but wet and for government control in 1920. The revenue for 1928 was $2,752,229.

THE FEDERAL FARM BOARD.

The Seventy-first Congress, called in extra session, April 15, 1929, by President Hoover, by a practically unanimous vote after a clash over the export farm debenture proposals, enacted a Farm Relief bill (Agricultural Marketing Act) which was approved Jun. 15, 1929. It is entitled "An Act to establish a Federal Farm Board to promote the effective merchandising of agricultural commodities in interstate and foreign commerce and to place agriculture on a basis of economic equality with other industries." It proposes to "protect, control and stabilize" such commerce "by minimizing speculation; by preventing inefficient and wasteful methods of distribution; by encouraging the organization of producers into effective associations or corporations under their own control for greater unity of effort in marketing and by promoting the establishment and financing of a farm marketing system of producer-owned and producer-controlled cooperative associations and other agencies; and by aiding in preventing and controlling surpluses in any agricultural commodity, through orderly production and distribution, so as to maintain advantageous domestic markets and prevent such surpluses from causing undue and excessive fluctuations or depressions in prices for the commodity."

The Act creates a Federal Farm Board appointed by the President of 9 members, including the Secretary of Agriculture ex-officio, appointed two for one-year terms, two for two, one for three, one for four, one for five and one for six and subsequent appointments to be for six-year terms, each at a salary of $12,000 a year and necessary expenses. Advisory committees appointed by the cooperative associations are provided for.

The Board is given broad powers for investigation, and $1,500,000 was appropriated for administrative expenses.

A revolving fund of $500,000,000 was authorized, of which $150,000,000 was appropriated for the fiscal year 1929-1930. The Board is authorized upon application by any cooperative association to make loans to assist in effective merchandising of agricultural commodities and food products thereof; the construction, purchase or lease of marketing facilities when suitable facilities are not available; the formation of clearing house associations; and extending the membership of the cooperative association by educational methods. The rate of interest on loans shall not exceed 4 per cent, and payments of principal and interest shall be covered into the revolving fund.

The Board may recognize under certain limitations a stabilizing corporation for any commodity, duly organized, all the voting stock of which (or membership interest) is owned only by cooperative associations handling the commodity, and which may act as a marketing agency for its members; and it may also assist in forming producer-controlled clearing house associations to effect economic distribution and minimize waste and loss.

The Board is specifically authorized upon application of cooperative associations to enter into agreements subject to certain limitations for the insurance of the cooperative associations against loss through price decline.

Members, officers and employees of the Board are forbidden to speculate directly or indirectly in any agricultural commodity or product thereof, or in contracts relating to, or in stock or membership interests in cooperative associations; and such associations, their officers, employees and members are forbidden to disclose confidential information; and the inclusion of any prediction with respect to cotton prices in any government report or bulletin is expressly prohibited.

The term "Cooperative Association" is expressly defined as meaning any association qualified under the "Act to Authorize the Association of Producers of Agricultural Products," approved Feb. 18, 1922. One-third of the 6,000,000 farmers are members of such cooperatives.

PERSONNEL OF THE FARM BOARD.

The Federal Farm Board as appointed by President Hoover is made up as follows:

Alexander Legge, chairman, of Chicago. President of the International Harvester Company. Born on a Wisconsin farm sixty-three years ago. A personal friend of the President and a former member of the War Industries Board. He will serve for one year.

James C. Stone, vice-chairman, of Lexington, Ky., President of the Burley Tobacco Growers' Cooperative Association, owner of livestock farms, and a bank director.

Carl Williams, of Oklahoma City, editor of the Oklahoma Farmer-Stockman and an active force in many cooperative organizations, such as the Oklahoma Cotton Growers' Association and the Farmers' Cooperative Marketing Association.

C. B. Denman, of Missouri, President of the National Livestock Producers' Association, which operates in twelve states, with an annual business of $150,000,000.

Charles C. Teague, of California. President of the California Fruit Growers' Cooperative and of the Walnut Growers' Cooperative Association, which together market more than $150,000,000 of agricultural products annually.

William F. Schilling, of Minnesota, President of the Twin Cities Milk Producers' Association and former President of the State Dairymen's Association.

Charles S. Wilson, former New York State Commissioner of Agriculture, an active farmer, and Secretary of the Western Fruit Growers' Cooperative Packing Association.

Samuel R. McKelvie, Governor of Nebraska, 1919-1923, editor of *The Nebraska Farmer*, who represents the wheat growers. Appointed for one year.

Arthur M. Hyde, Secretary of Agriculture, ex-officio.

The Board (with the exception of Mr. McKelvie, whose appointment was not announced until July 30) met on call of President Hoover on July 15, who told them they were invested "with responsibility, authority and resources such as have never before been conferred by our government in assistance to any industry."

The Board was overwhelmed at the start by requests for loans from individual farmers who misunderstood the terms of the act.

LARGE COOPERATIVES ORGANIZED.

Farmer cooperative groups representing 650,000 grain growers, after a two-days' conference, July 26 and 27, at Chicago, with members of the Board, 52 officials of wheat pools, cooperative elevators and farmer controlled sales agencies, selected a committee of 16, William H. Settle, chairman, to organize the Farmers' National Grain Corporation with a capital of $10,000,000, to be increased ultimately to $20,000,000, to be owned and controlled by the farmer agencies, farmer-owned grain elevators, farmers' grain sales agencies, and farmers' grain pools.

Announcement was made on Aug. 11 of the formation of a $50,000,000 cooperative marketing association, the United Growers of America, as a national agency to effect unity between national and local cooperatives and growers' organizations dealing in fruit and vegetables. The chairman of the board is Julius H. Barnes, Chairman of the Board of the United States Chamber of Commerce, and at one time president of the United States Food Administration grain corporation. Another member is William M. Jardine, Secretary of Agriculture in the Coolidge administration. It will in its initial work serve sixty subsidiary corporations in twenty-five states covering all parts of the country. Other directors are: Robert W. Bingham of Louisville, Ky.; Arthur R. Rule of New York; Henry W. Jeffers of New York; John Burgess of Minneapolis; and Gray Silver of Martinsburg, W. Va., organizer of the farm bloc in Congress.

Plans for the National Livestock Marketing Agency, with a capital of $1,000,000, were unanimously agreed upon by sixty-six representatives of twenty-nine cooperative livestock marketing associations, having 700,000 members in conference with members of the Board in Chicago, Oct. 23 and 24. Last year, these agencies transacted $300,000,000 worth of business represented by 12,461,000 head of livestock.

At the Baton Rouge Conference in July, attended by members of the Farm Board, the National Chamber of Agricultural Cooperatives was launched, starting with a membership of more than 2,000,000 farmers, including producers of cotton, wheat, corn, sugar, and tobacco, and representatives of the livestock industry, to coordinate and strengthen the work of the cooperatives.

LOANS GRANTED.

The Federal Farm Board has, among others, granted loans of $2,500,000 to the North Dakota-Montana Wheat Growers Association; $6,000,000 to the Staple Cotton Cooperative Association of Greenwood, Miss.; $2,500,000 to the North Carolina Cotton Growers Cooperative Association, mostly supplemental to loans obtained from banks.

Chairman Legge announced on Oct 26 that in order to assist wheat farmers to hold back their crops and at the same time have money with which to pay their obligations, the Board proposes to loan to wheat cooperatives sums sufficient to bring the total amount borrowed from all sources by such associations to the amount shown in a schedule that rates the wheat price at eight cities from $1.12 to $1.25 a bushel. These

loans will be carried until the close of the marketing season.

There is a grain cooperative in every wheat state. It is open to the membership of every wheat farmer. The farmer may join, ship his wheat to a designated concentration point where it will be graded and classed, and draw his advance. The cooperative will market the wheat in orderly fashion through the year, and will settle with the farmer on the basis of the final price obtained.

The Board is confident that, considering the soundness of underlying conditions which affect the price of wheat, the plan described above furnishes a completely safe basis for making loans from the Board's revolving fund. The Board places no limit on the amount of Government money to be so loaned. Nearly $100,000,000 is available for the purpose and, if necessary, the Board will also ask Congress to appropriate more.

Farmers' Cooperative associations transacted business to the amount of $2,300,000,000 in the 1927 marketing season, according to a preliminary report in February by the Division of Cooperative Marketing of the Department of Agriculture for the 11,400 active associations listed by the Department.

The largest amount of business credited to any one group was $680,000,000, this being the sum of the transactions by the associations handling grain. The associations marketing dairy products had a total business of $620,000,000; the livestock associations, $320,000,000; the fruit and vegetable associations, $300,000,000; the associations marketing cotton, $97,000,000; the poultry and egg associations, $40,000,000; the nut marketing associations, $14,600,000; tobacco associations, $22,000,000; and the associations handling wool, $7,000,000. The business of the associations selling miscellaneous products and buying farm supplies amounted to nearly $200,000,000.

The associations handling dairy products and shipping livestock have made enormous strides since 1915, while the associations handling grain, fruits and vegetables have made gains of about 100 per cent and 50 per cent respectively.

FARM RELIEF AND THE TARIFF FIGHT.

The Seventy-first Congress met on Apr. 15, 1929, being called in extra session by President Hoover to pass measures for agricultural relief and to revise the tariff to furnish additional relief to the farmers.

The Agricultural Marketing Act creating the Federal Farm Board (see that article) was passed and was approved by the President June 15. A bill appropriating $150,000,000 as a first installment of the revolving fund, and $1,500,000 for administrative expenses of the Farm Board was passed and approved June 18. The House went on record against both export farm debentures and the equalization fee. The Senate voted in the export debenture clauses, but retreated from its position when the bill went to conference.

After hearings before the Ways and Means Committee the House passed a tariff revision bill on May 28. The bill materially increased many rates. The House again went on record against incorporating the export farm debenture features offered, and for the inclusion of the flexible tariff provisions, in principle substantially like the existing law by which the President under certain limitations may raise or lower rates to meet discriminations by foreign governments.

The Senate after protracted hearings in Committee, battled over the rates on the floor. Congress adjourned on Nov. 22, leaving about half of the rates to be acted on in the regular session which convened Dec. 2. The debate brought out what was practically a coalition of Democratic and Western Republicans (facetiously dubbed "Sons of the Wild Jackass" by Senator Moses), against the eastern and "Old Guard" Republicans, the latter supporting the increased rates of the House bill. The former, having control, voted in the export farm debenture features, and threw out the flexible tariff provision. Nine of the 15 rate schedules were completed for committee amendments which numbers 298 in all. Of these, 163 amendments were adopted which eliminated proposed increases in the tariff rates and restored present duties or reduced the levies below the existing law. The other 135 amendments increased rates over the existing law; sixty of these were on agricultural or related products including raw materials. Few of the industrial rate increases involved important products. All but 25 of the increases approved were recommended by the finance committee dominated by the "Old Guard" and the majority of the 25, championed by the coalition, were for higher duties on the agricultural products.

For the Tariff law of 1922, see the World Almanac for 1929, pages 249-254.

PRESIDENT HOOVER'S WATERWAY PROGRAM.

President Hoover, defying a three-days downpour of rain, participated at Cincinnati, Oct. 22, 1929, in the ceremonies signalizing the deepening of the Ohio river, from Pittsburgh to Cairo, Ill., at a cost of $125,000,000. Fifty-four locks and dams have been constructed to ensure a year-round nine-foot channel. The uncompleted Ohio River System carried 21,000,000 tons on the main river and 26,000,000 additional tons on its tributaries from July 1, 1927 to June 30, 1928.

President Hoover at Louisville, Ky., on Oct. 23, outlined his waterways program entailing the expenditure of about $20,000,000 a year as follows:

"1. As a general and broad policy I favor modernizing of every part of our waterways which will show economic justification in aid of our farmers and industries.

"2. The Mississippi system comprises over 9,000 miles of navigable streams. I find that about 2,200 miles have now been modernized to nine feet in depth, and about 1,400 miles have been modernized to at least six feet in depth. Therefore some 5,000 miles are yet to be connected or completed so as to be of purpose to modern commerce. We should establish a nine-foot depth in the trunk system. . . .

"3. We must design our policies so as to establish private enterprise in substitution for government operation of the barges and craft upon these waterways.

"4. We should complete the entire Mississippi system within the next five years. We shall then have built a great North and South trunk waterway entirely across our country from the Gulf to the Northern boundaries, and a great East and West route half-way across the United States. Through the tributaries we shall have created a network of transportation. We shall then have brought a dozen great cities into direct communication by water, we shall have opened cheaper transportation of primary goods to the farmers and manufacturers of over a score of States.

"5. At the present time we have completed 746 miles of intracoastal canals. We still have approximately 1,000 miles to build. We should complete this program over a period of less than ten years.

"6. We should continue improvement of the channels in the Great Lakes; we should determine and construct those works necessary for stabilizing the lake levels.

"7. One of the most vital improvements to transportation on the North American Continent is the removal of the obstacles in the St. Lawrence River to ocean-going vessels inward to the Great Lakes. Our nation should undertake to do its part whenever our Canadian friends have overcome those difficulties which lie in the path of their making similar undertakings.

"8. We shall expedite the work of flood-control on the lower Mississippi in every manner possible.

"9. With the constantly expanding volume of our commerce, we must maintain unceasing development of our harbors and the littoral waterways which extend inland from them.

"At the present time we are expending approximately $85,000,000 per annum on new construction and maintenance of these works. To complete these programs within the periods I have mentioned will require an increase in the government outlay by about $10,000,000 per annum, not including the St. Lawrence, at most, including that item, an increase in our expenditures of say $20,000,000 a year. A considerable proportion of this will end in five years' time. It is of the nature of a capital investment.

"This annual increase is equal to the cost of one-half of one battleship. If we are so fortunate as to save this annual outlay on naval construction as the result of the forthcoming naval conference in London, nothing could be a finer or more vivid conversion of swords to plowshares."

NATIONAL COMMISSION OF FINE ARTS.

(Interior Department Building, Washington, D. C.)

Chairman—Charles Moore; other members, Abram Garfield, Benjamin W. Morris, Ferruccio Vitale, Ezra Winter, John W. Cross, and Adolph A. Weinman. *Secretary and Executive Officer*, H. P. Caemmerer.

THE NAVAL DISARMAMENT CONFERENCE.

The problem of Naval Disarmament and reduction on the part of the great powers was partially solved by the adoption of the 5-5-3-1.75-1.75 battleships ratio for the United States, Great Britain, Japan, France and Italy at the Washington Conference of 1921-22 (see The World Almanac for 1923, pages 675-685). A further conference of the five powers called by President Coolidge to consider the other classes of warships was attended by Great Britain, Japan and the United States, France and Italy declining the invitation. It met at Geneva June 20, 1927, but having reached a deadlock, adjourned without action Aug. 3 (see The World Almanac for 1928, pages 34, 35). An agreement reached between Great Britain and France in July, 1928, came to naught, because the United States found itself unable to accept it (see The World Almanac for 1929, pages 154, 155).

The subject was brought up anew at Geneva, April 22, 1929, before the Reparatory Disarmament Conference of the League of Nations by Hugh S. Gibson, United States Ambassador to Belgium and Chairman of the American delegation to that Conference. He outlined a new approach to the naval armament part of the problem. "My government believes," he said, "that there can be no complete and effective limitation of naval armaments unless all classes of war vessels, including cruisers, destroyers and submarines, are limited. My government cannot find any justification for the building and maintenance of large naval establishments save on the ground that no power can reduce except as a result of general reduction. The principal naval powers have nothing to fear from the naval strength of the countries non-signatory to the Washington treaty. The cruiser strength of all the non-signatory countries in the world does not attain to one-half the cruiser tonnage of the greatest single fleet. My country is convinced that expenditure for disproportionate naval establishments is indefensible in that it can be avoided by a sensible agreement among the naval powers."

Mr. Gibson declared that the Kellogg-Briand Pact of Paris had radically altered conditions.

"The American Government," he continued, "has found no reason for modifying its view that the simplest, fairest and most practical method is that of limitation of tonnage by categories," and suggested that "it might be desirable in arriving at a formula for estimating equivalent tonnage to consider certain factors which produce variations such as age, unit, displacement and calibre of guns."

The United States, he said, is now as in 1927 ready to agree to any reduction, however drastic, of naval tonnage which leaves no type of vessels unrestricted and which maintains the relative status of existing treaties with respect to the powers represented at the conference.

His speech made a profound impression and the reaction in all the capitals was highly favorable.

Prime Minister MacDonald soon after taking over the British Government held long conferences on the subject with Charles G. Dawes, the newly arrived American Ambassador to Great Britain. On July 24, the day the Kellogg-Briand Pact of Paris was promulgated in Washington, Mr. MacDonald in the House of Commons announced that the United States and Great Britain had been carrying on conversations which, based on the principal of parity, had marked an advance toward mutual agreement; that he would personally discuss any differences in direct communications in October with President Hoover at the White House in October, that after two nations were in agreement the other naval powers would be invited into a conference which he hoped would forward the cause of general disarmament; and that Great Britain herewith announced suspension of work on two cruisers (the Surrey and the Northumberland), one submarine depot ship and two contract submarines.

On that same day President Hoover, responsive to Mr. MacDonald's statement, announced that he had held up the construction of three of the five cruisers authorized for this year's naval program, the contracts for the other two having already been awarded to private shipyards.

HOOVER-MACDONALD JOINT STATEMENT.

At the close of the British Prime Minister's visit to Washington, Mr. MacDonald and Mr. Hoover on Oct. 9 gave out a joint statement in which they said:

"The exchange of views on naval reduction has brought the two nations so close to agreement that the obstacles in previous conferences arising out of Anglo-American disagreements seem now substantially removed. We have kept the nations which took part in the Washington naval conference of 1922 informed of the progress of our conversations, and we have now proposed to them that we should all meet together and try to come to a common agreement which would justify each in making substantial naval reductions. An agreement on naval armaments cannot be completed without the cooperation of other naval powers, and both of us feel sure that, by the same free and candid discussion of needs which has characterized our conversations, such mutual understandings will be reached as will make naval agreement next January possible.

"In view of the security afforded by the peace pact, we have been able to end, we trust forever, all competitive building between ourselves with the risk of war and the waste of public money involved, by agreeing to a parity of fleets, category by category.

"Success at the coming conference will result in a large decrease in the naval equipment of the world and, what is equally important, the reduction of prospective programs of construction which would otherwise produce competitive building.

"We hope and believe that the steps we have taken will be warmly welcomed by the people whom we represent as a substantial contribution to the efforts universally made by all nations to gain security for peace—not by military organization—but by peaceful means rooted in public opinion as enforced by a sense of justice in the civilized world."

On Oct. 7 the British Secretary of State for Foreign Affairs, Arthur Henderson, sent identical notes to the American, French, Italian and Japanese Ambassadors in London for transmission to their governments, inviting them to join in a conference of the five naval powers in London on Jan. 21, 1930 to deal with the question of naval disarmament. In it he said that conversations with the American Ambassador had left "no point outstanding of sufficient importance to prevent an agreement"; that "it has been agreed to adopt the principle of parity in each of the several categories and that such parity shall be reached by Dec. 31, 1936"; that "subject to the assent of other signatory powers it would be desirable to reconsider the battleship replacement programs provided for in the Washington treaty of 1922 with the view of diminishing the amount of replacement construction implied under that treaty"; and that while both the British and American governments had publicly favored the total abolition of the submarine "they recognize that no final settlement of this subject can be reached except in conference with the other naval powers."

All the governments promptly and cordially accepted the invitations. The replies, the preparatory consultations and the various interviews given out later indicated that Japan would present a new ratio of 10-10-7 for the cruiser class, that Italy, whose merchant marine of 3,200,000 tons is very nearly as great as France's, would insist on parity with France, that France might insist on parity in the Mediterranean, and that Japan, France and Italy strongly favored retention of the submarine.

The **British** delegation to the Conference will consist of Prime Minister J. Ramsay MacDonald, Foreign Secretary Arthur Henderson, First Lord of the Admiralty A. V. Alexander, and the Secretary for India, Wedgewood Benn. **Australia** will be represented by J. E. Fenton, Minister of Customs.

The **Japanese** delegation will consist of Reijiro Watasuki, former Premier, Adm. Hyo Takarabe, Minister of Marine, and Tsuneo Matsudaira, Ambassador to Great Britain.

The **French** delegation will consist of Premier Andre Tardieu, Foreign Minister Aristide Briand, Minister of Marine Georges Leugues and Vice-Adm. Violette.

The **Italian** delegation consists of Foreign Minister Dino Grandi, Adm. Giuseppi Sirianni, Minister of Marine, Adm. Acton, and Antonio Chiaramonte Bordonaro, Ambassador to Great Britain.

The **American** delegation will consist of Secretary of State Henry A. Stimson, Senator David A. Reed, Senator Joseph T. Robinson, Secretary of the Navy Charles Francis Adams, Ambassador Charles G. Dawes, Ambassador Dwight W. Morrow, and Ambassador Hugh S. Gibson.

With all the delegations will be naval advisers. The American ones headed jointly by Admiral W. V. Pratt, Commander-in-Chief of the United States fleet, and Rear Admiral Hilary P. Jones, retired, will include: Rear Adm. William A. Moffett, Chief of the Bureau of Aeronautics; Rear Adm. Joel R. P. Pringle, President of the Naval War College; Rear Adm. Harry E. Yarnell, Chief of the Bureau of Engineering; Rear Adm. Arthur R. Hepburn, Chief of Staff, Commander-in-Chief, United States Fleet; Capt. Alexander H. Van Beuren, Bureau of Construction and Repair; Capt. W. W. Smyth, Bureau of Ordnance; Commander Harold C. Train, on duty with the general board; and Lieut. Com. Charles W. A. Campbell, Flag Lieutenant to Commander-in-Chief, United States Fleet.

THE WORLD COURT.

The Permanent Court of International Justice (usually referred to in the United States as the World Court) owes its existence to the initiative of the League of Nations acting under Article 14 of the Covenant which provided that:

> The Council shall formulate and submit to the Members of the League for adoption plans for the establishment of a Permanent Court of International Justice. The Court shall be competent to hear and determine any dispute of an international character which the parties thereto submit to it. The Court may also give an advisory opinion upon any dispute or question referred to it by the Council or by the Assembly.

The Council of the League on Feb. 13, 1920 appointed an advisory committee of ten to draft a plan for the Court. All were citizens of nations in the League except one, Elihu Root, formerly Secretary of State of the United States. The Statute or law which they drafted with some changes was adopted unanimously at the First Assembly of the League at Geneva on Dec. 13, 1920 and submitted to the member nations for ratification, with a protocol declaring acceptance of the Statute and of the jurisdiction of the Court, the nations acting independently and separately. By Sept. 14, 1921 it had been ratified by 26 nations, four more than the necessary majority. The protocol was subsequently ratified by 50 of the 54 nations now in the League, and by Brazil and Costa Rica which have resigned from the League. Eleven of these 52 nations had not by Nov. 15, 1929 ratified their signatures.

The 54 nations now in the World Court are:

Albania, Australia, Austria, Belgium, Bolivia, British Empire, Bulgaria, Canada, Chile, China, Colombia, Cuba, Czechoslovakia, Denmark, the Dominican Republic, Esthonia, Ethiopia, Finland, France, Germany, Greece, Guatemala, Haiti, Hungary, India, Irish Free State, Italy, Japan, Latvia, Liberia, Lithuania, Luxemburg, Netherlands, New Zealand, Nicaragua (joined in Sept., 1929), Norway, Panama, Paraguay, Persia, Peru (joined in September, 1929), Poland, Portugal, Roumania, El Salvador Serb-Croat-Slovene State (now Yugo-Slavia), Siam, Union of South Africa, Spain, Sweden, Switzerland, Uruguay and Venezuela, all members of the League; and Costa Rica and Brazil, both of which resigned from the League, but are still in the Court. Twelve of the 54 have not yet ratified their signatures; these are: Bolivia, Colombia, Costa Rica, the Dominican Republic, Guatemala, Liberia, Luxemburg, Nicaragua, Paraguay, Persia, Peru and Slavador.

Nine nations of the world are outside the Court. They consist of two nations that are members of the League but not of the Court, viz., Argentina and Honduras, and of the 7 nations in the world that are not members of the League, viz., Afghanistan, Ecuador, Egypt, Mexico, the Russian Union of Soviet Socialist Republics, Turkey, and the United States of America. This does not include 3 very small states, Andorra, Lichtenstein and Monaco.

The Court is open to every nation of the world, under conditions laid down by the Council of the League in May, 1922, which require a declaration accepting the Court's jurisdiction in accordance with the terms of the Covenant and with the Statute and Rules of the Court and engaging to carry out the Court's decision in good faith and not to have recourse to war against another nation that obeys it.

The first body of eleven judges and four deputy judges, were elected at the September, 1921, meeting of the Assembly and Council, and held its preliminary session on Jan. 30, 1922. It is expected that in 1930 the distinction of deputy judges will be abolished making a bench of 15 judges. The annual sessions begin on June 15 and the Court may hold as many extraordinary sessions as it deems necessary. The Court has to date, Nov. 15, 1929, delivered 14 judgments and 16 advisory opinions. The judges serve a term of 9 years and are eligible for reelection. The salary of each is 15,000 Dutch florins (a little over $6,000) with a duty allowance for expenses. If there is on the Bench no judge of the nationality of a contesting party, such a judge may be selected by that party for that case only. The present judges are:

Rafael Altamira y Crevea, Spain; Dionisio Anzilotti, Italy; Antonio Sanchez de Bustamante, Cuba; Sir Cecil Hurst, Great Britain (elected in September, 1929); Max Huber, Switzerland; Charles Evans Hughes, the United States of America (elected in September, 1928); B. C. J. Loder, The Netherlands; D. G. Nyholm, Denmark; Yorozu Oda, Japan; Epitacio da Silva Pessoa, Brazil; Henri Fromageot, France (elected in September, 1929).

The four Deputy-Judges are:

F. V. N. Beichmann, Norway; Demetre Negulesco, Roumania; Wang Chung-hui, China; and Milhailo Yovanovitch, Yugo-Slavia.

The Registrar of the Court (since 1922) is M. Ake Hammarskjold, Counsellor of Legations of H. M. the King of Sweden; the post of Deputy Registrar, provided for in 1926, is now held by M. Olivan, of Spain.

The judges are elected according to a plan devised by Elihu Root when on the Advisory Committee in 1920. Each nation in the Hague Permanent Court of Arbitration (established in 1899) appoints four members of it as a national group; these national groups make the nominations (only two of which may be of its own nationality) for judges of the World Court. From these nominees the Council of the League and the Assembly, acting concurrently but independently, elect the judges by majority vote. Only one judge of any nationality may be elected.

By article 38 of the Statute the Court is empowered to apply:

1. International conventions, whether general or particular, establishing rules expressly recognized by the contesting states;
2. International custom, as evidence of a general practice accepted as law;
3. The general principles of international law recognized by civilized nations;
4. Subject to the provisions of Article 59 (which provides that "the decision of the Court has no binding force except between the parties and in respect of that particular case") judicial decisions and the teachings of the most highly qualified publicists of the various nations, as subsidiary means for the determination of rules of law.

This provision shall not prejudice the power of the Court to decide a case *ex aequo et bono*, if the parties agree thereto.

The Statute of the Court provides that "the jurisdiction of the Court comprises all cases which the parties refer to it and all matters specifically provided for in treaties and conventions in force."

The second provision refers to cases coming up under the Treaty of Versailles, disputes arising under the mandate system or in connection with the work of the International Labor Organization, cases arising under conventions, and the recent treaties of arbitration and conciliation, including the Locarno treaties.

Twenty-two nations have made 250 arbitration and conciliation treaties since the war, wherein jurisdiction is given the Court fir resort to the Permanent Court of International Justice. The treaties vary in terms; some provide for the exclusive and compulsory intervention of the Court in all disputes or in certain classes of disputes; others provide for the possible intervention of a tribunal other than the Court, the latter being given compulsory competence if the parties disagree; and one provides for the intervention of the Permanent Court of International Justice, but the wish of one of the parties is sufficient to cause another tribunal to be substituted for it.

A so-called "Optional Clause" was inserted in the Statute by which a nation might also declare that it accepted the jurisdiction of the Court as compulsory *ipso facto* and without special agreement, in any legal dispute in the first four of the five classes of disputes in which the Advisory Committee had given it compulsory jurisdiction.

Forty-two states have accepted (Nov. 15, 1929) the optional clause, some with conditions or for fixed periods of years and nearly all on condition of reciprocity. Fifteen states, including France, Italy, and the United Kingdom, with all the British dominions, signed this clause in September, 1929. The eighteen states at present bound by the clause are: Austria, Belgium, Bulgaria, Denmark, Estonia, Ethiopia, Finland, Germany, Greece, Haiti, The Netherlands, Norway, Panama, Portugal, Spain, Sweden, Switzerland and Uruguay.

The expenses of the Court for 1928 were approximately $386,000; and the estimate for 1930 is about $437,615. These are borne by the members of the Court on a pro rata basis similar to that obtaining in the League.

President Harding submitted the Protocol and accompanying Statute of the World Court to the Senate on Feb. 24, 1923 with the request that the Senate should give its assent to American adhesion to the Court on the basis of four "conditions and understandings" set forth in a letter from Secretary of State Hughes. President Coolidge added a fifth. Acceptance of the proposal was further recommended by President Coolidge in his annual messages of 1923 and 1924, in his inaugural address of March 4, 1925, and in his annual message on Dec. 8 following. It was not until Jan. 27, 1926, however, that the

Senate, after prolonged consideration of various resolutions and amendments, adopted by a vote of 76 to 17 the Swanson resolution embodying the conditions under which the United States declared its adherence to the Court and its approval of the protocol and statute.

The first Senate reservation repudiated any legal relation on the part of the United States to the League of Nations, or the assumption of any responsibilities under the Treaty of Versailles. The second stipulated that the United States should participate, upon an equality with other states, in any proceedings of the Council or Assembly of the League for the election of judges of the Court. By the third reservation the United States undertook to pay such fair share of the expenses of the Court as Congress should determine.

The fourth reservation declared that the United States might at any time withdraw its adherence to the protocol, and that the statute of the Court should not be amended without its consent; while by the fifth reservation which was rewritten by the Senate, it was stipulated "that the Court shall not render any advisory opinion except publicly after due notice to all States adhering to the Court and to all interested States and after public hearing or opportunity for hearing given to any State concerned; nor shall it without the consent of the United States, entertain any request for an advisory opinion touching any dispute or question in which the United States has or claims an interest."

To these five numbered reservations the Senate resolution added the further "understanding" that recourse to the World Court "for the settlement of differences between the United States and any other State or States can be had only by agreement thereto through general or special treaties concluded between the parties in dispute"; together with the stipulation that the adherence to the protocol and statute "shall not be so construed as to require the United States to depart from its traditional policy of not intruding upon, interfering with, or entangling itself in the political questions of policy or internal administration of any foreign State' nor be construed "to imply a relinquishment by the United States of its traditional attitude toward purely American questions."

The Conference of Signatory States met in Geneva in September, 1926. The United States declined an invitation to be represented. Ready and unconditional acceptance was given to all the United States reservations except the first part of the fourth, and the fifth, which proved stumbling blocks. These also were accepted, but with the condition that if the situation produced by the acceptance did not work out well, it could be denounced at any time, by a two-thirds vote of the signatories.

The Conference was willing that the United States should have the right to prevent the Court from giving an advisory opinion, without its consent, in any case in which we were a party.

Negotiations were renewed by President Coolidge in 1928. To reconcile the differences the Advisory Committee of Jurists adopted on March 18, 1929 a protocol, superseding the original protocol, which placed the United States on an equality with the signatory States for the election of judges; provided that no amendment of the Statute may be made without consent of all contracting States; provided that the Court shall render advisory opinions in public session after due notice and opportunity to be heard; provided for informing the United States of any proposal for obtaining an advisory opinion, and for a speedy exchange of views thereon; provided for attributing to an objection of the United States the same force and effect as is attached to the vote of any member of the League; and provided for the withdrawal of the United States, if no agreement can be reached, "without any impution of unfriendliness or unwillingness to cooperate generally for peace and good will."

A revision of the Statute including modifications which would give further satisfaction to the Senate reservations, was adopted by the League Assembly unanimous vote in Sept. 14, 1929. To this new protocol immediately 48 signatories of the World Court Statute attached their signatures.

Secretary of State Stimson, on Sept. 5, 1929, announced that having carefully examined the draft protocol that it, "if ratified by the other signatory powers, would meet the objections raised by the Senate and fully protect the United States against dangers anticipated by the Senate . . . and if it was accepted by the other States I would recommend to the President that it be signed and submitted to the Senate for its consent to ratification."

President Hoover, in his annual message, expressed complete approval and said he would submit the protocols to the Senate in due course.

By authorization of the president, Jay Pierrepont Moffat, Charge d'Affaires at Berne, signed, on Dec. 9, the three protocols on behalf of the United States.

THE LEAGUE OF NATIONS.

The League of Nations now has a membership of fifty-four states. Germany entered the League Sept. 10, 1926. Nations not in the League are: Afghanistan, Brazil, Costa Rica, Ecuador, Egypt, the Hedjaz and Nejd, Mexico, Soviet Russia (U. S. S. R.), Turkey, and the United States of America. The role of member states is:

Albania	France	Nicaragua
Argentine	Germany	Norway
Australia	Great Britain	Panama
Austria	Greece	Paraguay
Belgium	Guatemala	Persia
Bolivia	Haiti	Peru
Bulgaria	Honduras	Poland
Canada	Hungary	Portugal
Chile	India	Rumania
China	Irish Free State	El Salvador
Colombia	Italy	Siam
Cuba	Japan	South Africa
Czechoslovakia	Latvia	Spain
Denmark	Liberia	Sweden
Dominican Rep.	Lithuania	Switzerland
Estonia	Luxemburg	Uruguay
Ethiopia	Netherlands	Venezuela
Finland	New Zealand	Yugo-Slavia

The five permanent members of the Council are: France, Germany, Great Britain, Italy and Japan. The non-permanent members have been increased to nine, to have three-year terms by classes. Those elected Sept. 1927, are: Cuba, Finland and Canada; elected Sept. 10, 1928, Spain, Venezuela and Persia; and elected Sept., 1929, Peru, Poland and Yugo-Slavia. A retiring member may not be re-elected unless the Assembly so decides by two-thirds vote, though an exception is made in the case of Poland.

The election of Germany to the League with assurance of a permanent seat on the Council was informally agreed upon at the Locarno Conference. At the session March 8–17, 1926, Brazil, Poland and Spain claimed permanent seats also and blocked the plan temporarily. Brazil, defeated in her aspirations, withdrew in June from the Council and after the June meeting announced her resignation from the League. Spain also filed her resignation. Though requested to withdraw her resignation in 1928 Brazil on May 8 refused to do so and it became effective in June. Spain on a like request reconsidered her resignation on March 22, remains a member, and was elected to a non-permanent seat on the council.

Argentina, which withdrew its delegation from Geneva during the first Assembly in 1920, took steps in its Chamber of Deputies in September, 1926, favoring re-entry. However, in 1928 the Chamber cut out of the budget the appropriation for her quota of the League expenses which had hitherto been made annually.

Costa Rica, when asked to reconsider its resignation, requested an opinion on the Monroe Doctrine from the League. The request was referred to the several states. Costa Rica made no decision.

The Assembly meets annually in September, at Geneva, where the Secretariat, Sir Eric Drummond, Secretary General, with a staff of 500 has its permanent headquarters. As these have been entirely outgrown in September, 1929, the foundation stone was laid for new and permanent buildings to include an Assembly Hall, an office building and a library for which John D. Rockefeller, Jr., gave $1,000,000. The Council meets three times a year holding its June meeting in 1929 in Madrid. The Council meeting held at Lugano, in December, 1928, was suddenly faced by the Bolivia-Paraguay clash. Prompt action urging a settlement by peaceful means was taken. Within a few days both countries accepted the good offices of the Pan-American conference of Conciliation and Arbitration then in session in Washington. The League commission of inquiry kept at work with other countries using their offices and on Sept. 28, 1929, the two countries signed a conciliation agreement but leaving the fixed boundare dispute unsettled.

The Preparatory Commission for the Disarmament Conference appointed by the Sixth Assembly in 1925, has been studying the matter without advancing far due largely to the deadlock reached in the conference looking to a reduction of naval armament.

Model treaties were adopted in 1928 and in 1929 after the ratification, July 19, of the Pact of Paris, a committee was given the work to prepare a report on necessary amendments to bring the Covenant of the League into harmony with it.

The Tenth Assembly which met Sept. 2-25, 1929.

without one member absent, also set its Economic Organization the task of convening a conference for the conclusion of a customs truce, whereby nations would agree not to increase their protective tariffs above the present levels for a period of two or three years, and not to relax any efforts being made to reduce their tariffs.

For the work of the League on the World Court and the International Labor Bureau, see those articles.

The annual budget of the League for 1929-30 is 28,650,000 Swiss francs ($5,650,000), and is prorated among the members.

The American agent for all League of Nations year books and other documentations is The World Peace Foundation, 40 Mt. Vernon St., Boston, Mass., of which the Rev. Dr. W. H. P. Faunes is President of the Board of Trustees, Raymond T. Rich, Secretary, Denys P. Myers, Director of Research, and Marie J. Carroll, Librarian.

THE PACT OF PARIS RATIFIED AND IN FORCE.

The Pact of Paris renouncing war as an instrument of national policy was signed in Paris Aug. 27, 1928, by the plenipotentiaries of 15 nations. Notes were sent on the same day through the American missions abroad to 48 nations inviting their adherence to the Pact, and through the French government to the Soviet government of the U. S. S. R. (Russia).

The preamble of the treaty reads:

"The President of the German Reich, the President of the United States of America, his Majesty the King of the Belgians, the President of the French Republic, his Majesty the King of Great Britain, Ireland, the British Dominions Beyond the Seas, Emperor of India, his Majesty the King of Italy, his Majesty the Emperor of Japan, the President of the Republic of Poland, the President of the Czechoslovak Republic:

"Deeply sensible of their solemn duty to promote the welfare of mankind:

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated:

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process; and that any signatory power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this treaty:

"Hopeful that, encouraged by their example, all the other nations of the world will join in this humane endeavor and by adhering to the present treaty as soon as it comes into force bring their peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy;

"Have decided to conclude a treaty, and for that purpose have appointed as their respective plenipotentiaries: (Names follow)

Article 1 reads: "The High Contracting Parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another."

Article 2 reads: "The High Contracting Parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which, may arise among them, shall never be sought except by pacific means."

Article 3 prescribes methods of ratification and that the treaty shall take effect as soon as all their several instruments of ratification shall have been deposited at Washington.

Russia (U. S. S. R.) promptly announced to the French Government her adherence to the Pact of Paris. The 48 nations to which notes inviting adherence were sent by the United States Government were:

Albania	Estonia	Norway
Afghanistan	Ethiopia	Panama
Argentina	Finland	Paraguay
Austria	Greece	Persia
Bolivia	Guatemala	Peru
Brazil	Haiti	Portugal
Bulgaria	Honduras	Roumania
Chile	Hungary	Salvador
China	Iceland	Serbs, Croats, Slovenes
Colombia	Latvia	Siam
Costa Rica	Liberia	Spain
Cuba	Lithuania	Sweden
Denmark	Luxemburg	Switzerland
Dominican Rep.	Mexico	Turkey
Ecuador	Netherlands	Uruguay
Egypt	Nicaragua	Venezuela

In the covering note Secretary Kellogg set forth that there was nothing in the treaty which restricts or impairs the right of self-defense, a right inherent in every sovereign state and implicit in every treaty. Every nation is free at all times and regardless of treaty provisions to defend its territory from attack and invasion and it alone is competent to decide whether circumstances require recourse to war in self-defense. If it has a good case the world will applaud and not condemn its action. He further pointed out that the League of Nations Covenant imposes no primary obligation to go to war; that, if the parties to the Treaty of Locarno are under any positive obligation to go to war, such obligation certainly would not attach until one of the parties has resorted to war in violation of its solemn pledges thereunder; that a violation of a multilateral anti-war treaty through resort to war by one party thereto would automatically release the other parties from their obligations to the treaty-breaking state.

The British note of May 19 said: "There are certain regions of the world, the welfare and integrity of which constitute a special and vital interest for our peace and safety. His Majesty's Government has been at pains to make it clear in the past that interference with these regions cannot be suffered."

It may be noted that in the treaty there is no stipulation to disarm; there is no direct reference to arbitration; and there are no reservations as to the nature of disputes.

The Japanese Emperor ratified the treaty June 27 1929, and the ratification by Japan, the last of the fifteen signers, was received by the State Department and formal announcement made with impressive ceremony at the White House on July 24. The treaty was then declared in force. President Hoover, in his annual message, Dec. 3, announced that 52 nations had signed the Peace Pact.

Secretary of State Stimson, acting under the treaty, on Dec. 2, 1929, sent notes to China and Soviet Russia (both signatories) urging that peaceful steps be taken to adjust their difficulties in Manchuria China made a sympathetic response. Russia replied that it was not a friendly act.

TACNA-ARICA TREATY SIGNED BY CHILE AND PERU.

Chile and Peru reached by direct negotiations in Lima a settlement of the Tacna-Arica problem which had troubled South America for 46 years. President Hoover, exercising his good offices at the request of both parties formally presented the proposal for a joint basis of settlement to the two countries on May 15, 1929, received their immediate acceptances and formally announced the agreement in Washington on May 17. The treaty embodying that agreement was signed in Lima June 3 and was ratified by the Congresses of both countries July 2 and 4, and ratifications were exchanged in Santiago, Chile, on July 28, the 108th anniversary of Peruvian independence.

The War of the Pacific which Chile fought against Peru and Bolivia grew out of the complaints of Chilean Nationals in the Peruvian provinces Tacna, Arica and Antofagasta on the northern boundary of Chile. It began in 1879 and ended with the fall of Lima in 1880 and was concluded by the Treaty of Ancon, Oct. 20, 1883. By this treaty Chile annexed Antofagasta and retained possession of the provinces of Tacna and Arica for 10 years when a plebiscite was to be held to determine the sovereignty. No agreement subsequently could be reached, diplomatic relations were severed 17 years ago and the dispute remained a sore spot in Latin-American relations.

Brought into conference in Washington the two countries in 1922 agreed to submit the issue to the good offices of the President of the United States as arbitrator. President Harding accepted the responsibility on Jan. 29, 1923. Two years were taken up in presenting the evidence and arguments. It fell to President Coolidge to hand down, March 5, 1925, an award specifying that the plebiscite should be first held. A mixed commission headed by Gen. John J. Pershing, and on his resignation by Maj. Gen. Wm. Lassiter, undertook this in 1925 and 1926 but the negotiations collapsed.

Secretary Kellogg, undaunted by this failure continued his efforts and induced the two countries in

July, 1928, to reestablish diplomatic relations. The ambassadors exchanged were each of unusual distinction and capacity and the direct negotiations then urged were begun in September, facilitated so far as possible by the American ambassadors, Moore and Culbertson, and brought to a successful issue in 1929.

Tacna and Arica lie to the north of the Chilean nitrate beds and being mostly arid are of no great economic value. The area of the territory is about 9,500 square miles with approximately 45,000 population. The city of Tacna has about 12,000. The seaport Arica has about 10,000 but is important as having the only harbor for many miles and being the western terminus of the Arica-La Paz railroad that furnishes Bolivia an outlet to the Pacific.

By the treaty the province of Tacna was alloted to Peru and Arica to Chile. The boundary begins at Concordia, ten kilometers (6.41 miles) north of the bridge over the Lluta River and runs at that distance north of and parallel to the Arica La-Paz railroad to the Bolivian frontier. The sulphur deposits of Tacora remain in Chilean territory and the irrigation canals in Peruvian subject to certain water rights. Peru received a wharf, custom house and station for the railroad from Tacna to Arica as a free port on the Bay of Arica with absolute freedom of transit. The works are to be constructed by Chile. Chile delivered without cost all public works and government-owned property in Tacna. Children born in the provinces can at 21 elect their nationality. The Arica fort is to be dismantled. The two countries agreed to erect on the Morro de Arica, a towering headland of the bay, a peace monument commemorative of the renewal of friendly relations, and of the valor of their soldiers who fought there the last great battle in the War of the Pacific. Chile paid over to Peru $6,000,000 as the difference in cost between the construction of a free port in Arica and the development of a new port for Peru at Las Yaradas north of Arica which had first been agreed to; Peru used the money as capital for a National Savings Bank, created by government decree in August. Tacna was turned over to Peru on Aug. 29, 1929.

On the exchange of ratifications at Santiago, a protocol was made public in which both countries declared that no part of the territory concerned could be ceded to a third power thus blocking the Bolivian desire to regain an outlet to the Pacific which Bolivia lost in the War of the Pacific when Chile annexed the Province of Antofagasta.

PAN-AMERICAN RELATIONS AND BOUNDARY DISPUTES.

At the conclusion on Jan. 5, 1929 of the International Conference of American States on Conciliation and Arbitration which met in Washington Dec. 10, 1928, pursuant to a resolution adopted by the 1928 Pan-American Conference in Havana, the 20 republics signed a general treaty of inter-American arbitration, Peru, Haiti, Brazil, Panama, Nicaragua Cuba and the United States, without reservations, and the 13 others with certain reservations. A generaal Convention of Inter-American Conciliation was signed by 19 republics without reservations and by Chile with a reservation making exception of "questions which may rise from situations or acts prior thereto."

The dispute over the boundary between Bolivia and Paraguay in the Grand Chaco, a vast wilderness 100,000 to 150,000 square miles in extent lying between the Paraguay and Pilcamayo Rivers which resulted in an armed clash between their frontier forces on Dec. 5, 1928, remained unsettled throughout 1929. Immediate action by the International Conference of American States on Conciliation and Arbitration in session at that time in Washington, and by the Council of the League of Nations in session at Lugano, in urging peaceful settlement of the trouble that had caused a severence of diplomatic relations and threatened war, fortunately secured from both countries assurances that war would be avoided and a peaceful settlement sought. The situation remained strained and dubious.

The International Conference appointed a commission of neutral American nations, the members representing the United States, Mexico, Colombia, Uruguay and Cuba, Mr. Gen. Frank R. McCoy, Chairman, who visited South America and succeeded in partially restoring diplomatic relations between the two countries, but were obliged to leave unsettled the broad question of the ownership of the Chaco as plans drawn up for submitted the matter to arbitration did not prove acceptable to the disputant governments.

Secretary Stimson, on Oct. 2, 1929, made public identic notes that had been sent to each country of the five nations represented on the Commission of Neutrals, urging them to enter into direct negotiations for a settlement of the basic question of the boundary line and of all others dependent on that and offering their good offices with a view to overcoming obstacles that may arise, and of bringing the negotiations to a successful conclusion. Efforts were made to persuade Argentina, Brazil and Chile to join this move of neutral nations but all declined to join the commission. The outcome was unsettled on Dec. 1, 1929. Paraguay desired an unlimited arbitration of the Chaco, and Bolivia desired that the zone to be submitted to arbitration be limited in advance.

Brazil and Paraguay signed a treaty, ratified Oct. 19, 1929, settling all disputed boundaries. By it Brazil recognized the Paraguayan title to territory on the west bank of the Paraguay River between Bahia Negra and the mouth of the Apa River.

Brazil and Colombia ratified on Nov. 15, 1929 a treaty signed at Rio de Janeiro Nov. 15, 1928, which settled their only remaining boundary question through reciprocal perpetual free navigation of the Amazon. The boundary is a straight line running to the Brazilian town of Tabitienga on the Amazon from the outlet of the Appaoris River into the Caqueta.

Brazil and Great Britain, on June 29, 1929, exchanged ratification of the demarkation of the boundary between Brazil and British Guiana. Brazil is negotiating for the demarkation of the boundaries with French and Dutch Guiana.

Bolivia and Argentina ratified the treaty signed at La Paz July 9, 1925, settling a dispute of 100 years' standing and definitely fixing their boundaries.

Brazil and Uruguay, who have just finished the Jaguaro international bridge, have renewed work on the demarkation of their boundaries.

The British Government has sent a friendly note to Argentina protesting against the establishment of an Argentine wireless station in the South Orkney Islands as an invasion of its possessions. Argentina has replied that it is merely enjoying its rights of dominion over these islands.

THE BUSINESS PRESS OF THE UNITED STATES.

The business press of the United States is now made up of approximately 1,800 individual publications and there is virtually no industry, trade, profession or specialized service that does not have one or more business papers devoted to it. Broadly speaking, business papers are divided into three groups. These are industrial and technical, merchandising and trade, and professional and specialized services.

The first publication in the United States of the character of a business paper was the *New York Prices Current*, started in 1795. By 1840 there were a number of flourishing specialized journals in the fields of industry and trade. The post Civil War period and the ten years ending with 1879 saw the establishment of 58 different business papers which are still existent. Since then the growth of this class of periodicals, either as weeklies, semi-monthlies or monthlies, has been much more rapid and extensive as to field.

Some of the business publications of the United States and Canada, in 1905, established a trade associations based upon definite standards of practice in the editorial, advertising and circulation branches of their business. This is The Associated Business Papers, Inc., a non-profit organization with offices at 52 Vanderbilt Ave., New York City. Its present officers are: C. A. Musselman, Chilton Class Journal Co., Philadelphia, Pres.; Warren C. Platt, National Petroleum New, Cleveland, Vice-Pres.; Edward H. Ahrens, Ahrens Publishing Company, New York, Treasurer; and F. M. Feiker, Managing Director, New York.

Working in close co-operation with this assocaition is the National Conference o. Business Paper Editors, the professional organization of the editors of these papers. Its objective is to advance business paper editing as a profession and the men working in it. This Conference meets in Washington with various government officials several times a year and also holds periodic meetings in various sections of the country. An office is maintained in New York with The Associated Business Papers. The officers are:

G. D. Crain, Jr., Class and Industrial Marketing, Chicago, Pres.; Norman G. Shidle, Chilton Class Journal Company, Philadelphia, Vice-Pres.; E. L. Shaner, Iron Trade Review, Cleveland, Treas.; and Thomas H. Ormsbee, New York City, Sec'y.

By action of President Hoover the Washington business paper correspondents now attend the regular press conferences at the White House Executive Offices. These correspondents have their own organization with the following officers:

Paul Wooton, Chairman; Harold Lane, Vice-Chairman; and Henry Ralph, Secretary.

Antarctic Exploration—Byrd, Wilkins, Mawson.

Compiled by National Geographic Society, Washington, D. C., Gilbert Grosvenor, LL.D., Litt. D., Pres.

Commander Richard E. Byrd, accompanied by Bernt Balchen, pilot, Captain Ashley McKinley, aerial surveyor, and Harold I. June, radio operator, reached the South Pole Nov. 29, 1929, on a flight which began at Little America, the base of the expedition, at 3:29 p.m. Nov. 28. When his dead reckoning and observations combined to tell him that he was over the Pole, he sent a radio announcing that "My calculations indicate that we have reached the vicinity of the South Pole." Balchen then turned to the right, flew at right angles to Grosvenor Trail for some six miles and then turned left, flying parallel to that Trail extended for an equal distance. Then he circled around until he struck the extension of the Grosvenor Trail, along which he flew until he reached the point where the original right turn was made. Here all hands stood and saluted the memory of Floyd Bennett, who accompanied Commander Byrd to the North Pole and would have gone with him to the South Pole but for his untimely death. At the same time a trap-door in the bottom of the fuselage was opened and through it was dropped a silk American flag weighted with a stone carried from Floyd Bennett's grave. Also there were dropped a British flag in memory of Captain Robert F. Scott, a Norwegian flag in memory of Captain Roald Amundsen and a French flag in tribute to the people who had been so kind at the end of Byrd's transatlantic flight.

The trip to the Pole and back was one of the most amazing feats in the history of aviation. The *Floyd Bennett*, a big trimotored cabin monoplane built by Edsel Ford, took off with a total weight of 15,000 pounds. Carrying Captain McKinley, with his surveying camera and three month's food supply, added 600 pounds and reduced the ceiling 1,000 feet.

About 304 miles due south of Little America, the trail party under Lawrence Gould was sighted and messages and photographs were dropped, the latter being so marked as to indicate the site of the mountain base depot, where the overland party would find supplies.

Reaching the base of the mountain it was decided to fly through the pass marked by the Liv's Glacier instead of the one marked by the Axel Heiberg. After tremendous efforts to gain elevation, hard battles with eddies and gusts, and hairbreadth escapes from icy side walls, the summit finally was crossed but not until two 125-pound bags of concentrated food were thrown overboard and many tins of gasoline emptied into the tanks and their containers heaved overboard. Meanwhile, McKinley never missed a shot with his big surveying camera.

After passing the crest of the mountains the way was open to the Pole. The Plateau ranges from 7,000 to 11,000 feet. To the west a great new mountain range was sighted.

As in the flight to the North Pole, Commander Byrd found the Bumstead sun compass of inestimable assistance. In the high winds that blow in the polar regions a plane is too unsteady for the most accurate sextant observations, but so long as the sun shines the sun compass is a perfect guide alike in directing the route and determining when the Pole is reached. This compass was invented by Albert H. Bumstead, cartographer of the National Geographic Society, and was one piece of physical equipment that reached both Poles.

On the flight back a somewhat different route was taken from the Pole to permit Captain McKinley with his big aerial survey camera, to map a wider area of the Polar Plateau. The course led to the Axel Heiberg Glacier. After descending the mountains over that great ice river a successful landing was made at Depot No. 8, where gas and food were deposited for the Lawrence Guild sled party engaged in geological reconnaissance. The plane took off safely after an hour spent in caching these materials, and at 10:10 a.m. landed at its home base at Little America, just 18 hours and 59 minutes after starting on its great adventure. The flyers had seen an area of the Antarctic Continent larger than that comprised in the States of New York, Pennsylvania, Virginia, and North Carolina.

No expedition ever reached the polar regions either north or south as completely equipped, or so adequately staffed as the Byrd Expedition to the South Pole. It carried a complement of 55 men, 75 dogs, and 3 airplanes. Four ships were required to move its personnel and equipment to New Zealand—the *City of New York*, the *Eleanor Bolling*, the *C. A. Larsen*, and the *Str James Clark Ross*. Two Eskimos were taken along. Four radio transmitters were carried.

A radiogram from Commander Byrd describes in part the role of the National Geographic Society in the expedition. "At a crucial period of our preparations for this expedition, the National Geographic Society came to our assistance with encouragement and a substantial grant and so helped in a big way to make our expedition possible. Now in the midst of the more difficult operations and when there still is a financial deficit back home the National Geographic comes again to our assistance by duplicating its original grant of $25,000, and so encouraging greatly every man in camp." The news of this second grant reached Commander Byrd just before he started upon his flight to the South Pole.

A YEAR IN THE ANTARCTIC.

The outstanding events in the chronology of the expedition were as follows:

Dec. 2, 1928—The *City of New York* and the *Eleanor Bolling* sailed from Dunedin, New Zealand, for the Barrier, the *Eleanor Bolling* towing the *City of New York*.

Dec. 11—The *C. A. Larsen* joined them near Scott Islands. The *Eleanor Bolling* transferred 87 tons of coal to the *City of New York* and returned to Dunedin. The *C. A. Larsen* took the *City of New York*, in tow.

Dec. 14—On this seventeenth anniversary of Amundsen's discovery of the South Pole, the *C. A. Larsen* and the *City of New York* entered the ice pack.

Dec. 25—The ships sighted the Barrier.

Jan. 6, 1929—The expedition base, Little America, 2,300 miles from the nearest human habitation, was established.

Jan. 16—The first flights of the expedition were made, seven in all. The Fairchild ship, *Stars and Stripes* was used.

Jan. 18—Commander Byrd, with the *Stars and Stripes* and the *Virginian*, the latter a Fokker plane, took off, discovering Marie Byrd Land and charting the Rockefeller Mountain Range.

Jan. 25—The world's two-way code conversation between an airplane and land was established when Commander Byrd held a two-way conversation with the New York Times radio station.

Jan. 27—Commander Byrd flew over King Edward VII Land, saw 14 mountain peaks, discovered a new island, and returned safely after a 5-hour flight.

Jan. 28—The *Eleanor Bolling* arrived at the Barrier, the first steel ship that ever touched the Antarctic Continent.

Jan. 31—A breaking off of huge blocks of ice from the top of the Barrier almost swamped the *City of New York* and the *Eleanor Bolling*. Commander Byrd jumped into the freezing water to help rescue a man carried into the sea by the collapsing ice.

Feb. 2—The *Eleanor Bolling* departed for Dunedin.

Feb. 14—Commander Byrd returned with the *City of New York* from an attempt to reach King Edward VII Land by sea.

Feb. 18—Commander Byrd took off for a flight over King Edward VII Land. He discovered a 10,000-foot peak and two mountain ranges, and explored a 40,000-square mile zone, which he claimed for the United States.

Feb. 22—The *City of New York* left the port of Little America for Dunedin.

Mar. 7—Lawrence Gould, Bernt Balchen, and Harold I. June flew to the Rockefeller Mountains on a geological reconnaissance.

Mar. 18—Commander Byrd flew to the rescue of Gould, Balchen, and June, stranded in the Rockefeller Range. The Fokker plane in which they had come to the mountains on the 7th was totally wrecked in a storm which blew it from its moorings on the 10th.

Mar. 22—Commander Byrd returned to his base after rescuing the Gould party stranded in the mountains.

Oct. 15—The supporting party of the Byrd Expedition started south with its dog teams.

Nov. 4—The Geological party started south to explore the Queen Maud Mountains. It was headed by Lawrence Gould.

Nov. 19—Commander Byrd flew the *Floyd Bennett* to the depot at the base of the Queen Maud Mountains, left supplies there, and then flew back. Gasoline shortage forced a landing 95 miles from Little America on the return. But the *Stars and Stripes* carried out a fresh supply and all hands returned safely.

Nov. 28—Commander Byrd set out for the South Pole.

Nov. 29—The Pole was reached and the flyers returned safely to Little America.

SIR HUBERT WILKINS' EXPEDITION.

Captain Sir Hubert Wilkins sailed from New York on a second expedition September 28, going to Monte-

video on the *Northern Prince*, where he arrived Oct. 15, 1929. He spent a fortnight there and then sailed for Deception Island aboard the whaler *Melville*. He took with him Orval Porter, Victor Olsen, and Parker Cramer, who were with him on his previous expedition, and Al Cheeseman, instead of Lieutenant Carl Ben Eielson, who went to the rescue of the stranded flyers in the Canadian Northwest. He left his planes of the previous expedition at Deception Island, and expected to find them in shape for the 1929-30 work. It was his plan on this expedition to attempt to make a 2,000-mile flight along the rim of the Antarctic Continent west of the so-called Graham Land, and if this proved successful to then fly 2,500 miles to the Bay of Whales, on Ross Sea where he would visit Commander Byrd at the latter's base. Sir Hubert further planned to try to locate a suitable spot on the Antarctic Continent for a meteorological station which he hopes to build as one of a chain of twelve for studying Antarctic weather and its relation to that of temperate lands. The expedition expected to make several additional short flights, but did not plan to attempt to reach the South Pole. Sir Hubert did sterling work in the region he covered last year, and both expeditions have been sponsored by the American Geographical Society.

Captain Sir Hubert Wilkins with his staff consisting of Lieutenant Carl Ben Eielson, Pilot Joe Crosson, Engineer Orval Porter, and Radio Operator Victor Olsen, arrived at Deception Island, November 6, 1928, to undertake the exploration of the sector of the Antarctic Continent immediately south of South America. He carried with him two Lockheed-Vega monoplanes, one of which he used in his Arctic flight. It was not until Dec. 20th that they were able to take the air for anything more than tuning-up flights around the Deception Island base. On that date they took off and were in the air at 8:20 a.m., heading south at a speed of 125 miles an hour. They flew across the Bransfield and De Gerlache Straits to Brialmont Bay and then over the Palmer Coast of what has come to be known as Graham Land. Once across this they followed the coast until they reached a point 71° 20' South Latitude, and 64° 15' West Longitude. Here they found that nearly one-half of their gas supply was gone, and saw that several storm areas were developing. They thereupon made a direct flight back to their base. They had proved that the so-called Graham Land is not a peninsula of the Antarctic Continent as most maps had shown, but a long series of rather narrow islands, separated by narrow channels. Their flight took them across the Antarctic Circle and gave them the honor of being the first aviators to fly into the South Frigid Zone.

On Jan. 10 another flight of 250 miles on more or less the same course was made. It was decided then to end their undertakings for that season and to return again in the autumn of 1929.

SIR DOUGLAS MAWSON'S WORK.

Sir Douglas Mawson sailed from Cape Town in mid-October, 1929, aboard the *Discovery*, for a two-season cruise of that sector of the Antarctic Ocean which stretches westward toward Ross Sea from Enderby Land. The area he will explore includes the coast line discovered, traced, and charted by Admiral Charles Wilkes in 1840. His expedition headed first for Kerguelen Island, reached Hog Island, of the Crozet group, Nov. 9. Thence the *Discovery* sailed to Possession Island, where it anchored off American Beach, while the leaders of the expedition went ashore to observe the flora and fauna. Later it sailed for Kerguelen Island. By Nov. 25 its coaling was completed and the *Discovery* was ready to turn its prow southeastward to work its way to the continental shores within the Antarctic Circle.

The expedition carried with it a small scout plane, fitted with pontoons, with which it hoped to aid the navigator in finding open water and free lanes while sailing the *Discovery* through ice floes. It also was planned to use the plane in scouting work along the coast and over islands, if and when these were reached.

The expedition planned to establish no base on land, but to move out ahead of the closing ice at the approach of the Antarctic winter, sailing back to Australia to await the opportunities of the following summer season. In the event that the *Discovery* should be unable to make its way out of the floes at the close of the season, the expedition carried a supply of food, clothing, fuel, sledges, and emergency gear sufficient to meet any situation a winter frozen in the ice might involve.

GRAF ZEPPELIN'S TRIP AROUND THE WORLD.

The great event in aviation in 1929 was the trip around the world made by the German dirigible, Graf Zeppelin, under command of Dr. Hugo Eckener. The great airship, which flew to America and back in 1928 (see The World Almanac for 1929, pages 122 and 123), left Friedrichshafen at 9:29 p.m. Wednesday, July 31, 1929, passing over Lyons, France, 5:10 a.m. Thursday and Gibraltar at 10 p.m., dropped mail at Santa Marta, the Azores, 3 p.m. Friday, was 330 miles northeast of Bermuda 10 p.m. Saturday and turning south to avoid storm; passed over New York at 7:35 p.m. Sunday and landed at Lakehurst, N. J., at 8:52 p.m. Twenty passengers were carried. The times are Eastern Standard time. The elapsed time was exactly 93 hours and estimated mileage 5,331 land miles.

The Graf Zeppelin, returning, left Lakehurst 12:39 a.m. ThursdayAug. 8, and reached Friedrichshafen 8:33 a.m. Saturday, Aug. 10, completing the trip of 4,200 miles in 55 hours and 24 minutes. The great dirigible carrying 16 passengers and crew left Friedrichshafen 11:34 a.m. Wednesday Aug. 14, flew over Berlin and Danzig for Tokio, crossing Russia and Siberia without incident and landed at Kasumigaura airport at 5:27 a.m. Wednesday completing 6,800 miles in 101 hours 53 minutes. The welcome in Japan was wonderfully enthusiastic.

The Graf Zeppelin left the Japanese airport at 2:18 a.m. Friday, Aug. 23, for Los Angeles where it arrived at 9:11 a.m. Monday, Aug. 26—5,500 miles from Tokio in 78 hours 58 minutes. Leaving at 4:14 a.m. Tuesday, Aug. 27, the great airship passed in continuous flight over El Paso, Kansas City, Chicago, Akron, Cleveland, Newcastle, Bellefonte, New York, and landed at Lakehurst at 8:13 a.m. on Thursday, Aug. 29. The elapsed time was 21 days 7 hours 34 minutes, and the mileage approximately 19,300.

The continuation of the trip to the home hangar at Friedrichshafen was made without Dr. Eckener, Captain Ernest Lehmann, second in command, in charge. The dirigible, flying by way of the Azores, arrived there the morning of Sept. 4 in 67 hours from Lakehurst. The total mileage from Friedrichshafen to Friedrichshafen was 21,238.

On March 28, the Graf Zeppelin returned from a cruise to the Near East, covering 5,040 miles in 31 hours and 30 minutes.

The Graf Zeppelin has made fifty trips during which it has covered a total distance of 72,648 miles. Seven trips have been of more than 3,000 miles each.

The Graf Zeppelin has consumed 307,465 cubic yards of fuel gas, 80,507 quarts of benzine and 14,933 quarts of oil, an average of 359 quarts for every 62.1 miles. Besides the crew the airship has carried a total of 1,574 passengers, $20,000 worth of letters and postcards and a total useful load of 876,434 pounds.

REFUELING ENDURANCE RECORDS IN 1929.

Endurance flights by planes refueling in the air were aviation features of 1929. From Jan. 1 to Jan. 7 the attention of the air-minded of the world was fixed upon the United States Army Fokker monoplane, with three Army Wright Whirlwind motors of 225 h.p. each, Question Mark in charge of Major Carl Spatz with a crew of four, Capt. Ira Eaker, Lieut. Elwood Quesada, Lieut. H. A. Halverson, and Sergt. Roy Hooe, who flew above Los Angeles, Cal., staying aloft for 150 hours 40 minutes and 15 seconds.

The distance traveled was estimated at more than 11,000 miles; the speed averaged 70 miles an hour. The plane consumed 5,205 gallons of gasoline and 202 gallons of oil.

Then R. G. Robbins and James Kelly flew the monoplane Fort Worth in a refueling flight, May 20-26, over Fort Worth, Texas, for 172 hours 31 minutes.

Thorwald Johnson and Owen Houghland sought the record in a monoplane over Minneapolis, Minn., July 23-29, but were forced down after a flight of 149 hours 32 minutes.

Byron K. Newcomb and Roy L. Mitchell took up the task with their plane City of Cleveland above Cleveland and on July 6 placed the record at 174 hours and 59 seconds.

R. B Reinhart and L. W. Mendell were then still in the air and they raised the record with the biplane Angelus over California near Culver City to 246 hours 43 minutes 32 seconds, flying on July 2-12.

Then for the fifth time in the year the record fell. Dale Jackson and Forest O'Brine flying over St. Louis for near 17 days—July 13-30—set the refueling endurance mark at 420 hours 21 minutes 30 seconds in the St. Louis Robin, a Curtiss-Robertson small cabin monoplane with a Curtiss Challenger air-cooled radial motor developing 170 h.p. The plane was refueled 47 times and consumed 3,590 gallons of gas. The joint earnings of the pilots exceeded $31,250.

They landed in excellent physical condition; Jackson had lost no weight and O'Brine had gained 1½ pounds. The motor was working smoothly.

Joe Glass and Glenn Loomis attempted to better the record over Houston, Tex., in their monoplane Billion Dollar City, but were forced down by an accident to their motor July 27 after being aloft 233 hours 12 seconds.

The record in 1928 was 53 hours 36 minutes 41 seconds made by Haldeman and Stimson at Jacksonville, Fla.

SOLO ENDURANCE FLIGHTS.

Notable solo endurance airplane flights reported in the press in 1929 were: Martin Jensen at Roosevelt Field, L. I., on March 28, stayed up 35 hours, 33 minutes, 30 seconds; Herbert J. Fahy at Los Angeles, Cal., on May 29 was aloft 36 hours, 56 minutes and 36 seconds; while Vern Speich at Long Beach, Cal., on Oct. 3 made the record 38 hours and 48 seconds.

For the women, Miss Evelyn Trout at Los Angeles on Feb. 11 made a flight of 17 hours, 5 minutes and 37 seconds; Miss Louise McPhetridge at Oakland, Cal., stayed up 22 hours, 3 minutes and 12 seconds; and Miss Elinor Smith at Roosevelt Field, L. I. on April 24 made the record 26 hours, 21 minutes and 32 seconds.

Mlle. Maryse Bastie, a French girl, taking off from Le Bourget, Paris, July 28 at 5:17 a.m., remained aloft 26 hours, 21 minutes, 32 seconds. She flew a 40 h.p. Caudron monoplane.

TRANSOCEANIC FLIGHTS OF 1929.

Three French aviators, **Jean Assollant, Rene Lefevre, Armendo Lotti** and a stowaway made a non-stop flight in the Yellow Bird from Old Orchard, Me., U. S. A., to near Comillas, Spain, June 13-14, 1929, an estimated distance of 3,128miles, in 29 hours 52 minutes, an average of 105 miles per hour. Later the flight was continued to Paris.

The French aviators, **Capt. Diendonne Costa** and **Maurice Bellonte** attempted a westward trans-Atlantic flight from Paris to New York, starting on July 13, 1929 in the plane Question Mark. They flew to within 150 miles of the Azores where they encountered high head wind and fog. The plane was turned toward Europe again and a landing made near Villa Coublay, France, after a non-stop flight of approximately 3,180 miles in 28 hours.

Four Spanish aviators, **Maj. Ramon Franco, Com. Eduardo Gonzajes Gallarza, Capt. J. Ruiz de Alda** and **Serg. Pedro Madariaga**, rose from Cartagena in a Spanish hydroplane on June 21 in a westbound Atlantic Ocean flight. For almost eight days no word was received regarding the plane or crew, although planes and ships scouted the coast and the Azores. On June 29 the plane and crew were picked up 100 miles southeast of Santa Maria Island of the Azores by the British aircraft carrier Eagle. Fuel had given out on June 22 and the plane drifted for seven days without injury to the aviators.

The Spanish aviators, **Capt. Ignacio Jimenez** and **Capt. Francisco Iglesias** in the monoplane Jesus Del Gran Poder made a non-stop flight of the Atlantic Ocean westward from Seville, Spain to Bahia, Brazil, Mar. 24-26, 1929. The distance is estimated as 4,100 miles. The time was 43 hours, 48 minutes.

Roger Q. Williams and **Lewis H. Yancey**, American aviators, made a non-stop flight of the Atlantic Ocean in the plane Pathfinder from Old Orchard, Me., to Santander, Spain, July 8-9, 1929. The aviators had planned to make Rome in one flight but headwinds and fog held them back and lack of gasoline forced a descent at Santander after a flight of 3,400 miles in 31 hours 32 minutes. Later the plane was flown to Rome where a great reception was given them.

Two Polish fliers, **Maj. Casimir Kubala** and **Maj. Ludwik Idzikowski** attempted a westward Atlantic Ocean flight in the plane Marshal Pilsudski, taking off from Le Bourget, France, July 13, 1929, less than an hour ahead of the French plane Question Mark. Some 200 miles from the Azores motor trouble developed and a forced landing was made near Horta, the plane being wrecked. Maj. Idzikowski was killed in the subsequent explosion and Maj. Kubala severely injured.

Two Swiss aviators, **Oscar Kaesar** and **Kurt Luescher** flew from Le Bourget, France, in the monoplane Young Switzerland on Aug. 18, 1929, in an attempt to make the westbound Atlantic Ocean flight. They were reported over the Azores the following day but were not heard from again.

Urban F. Diteman, of Billings, Mont., started alone in the monoplane Golden Hind from Grace Harbor, Newfoundland to make a trans-Atlantic flight, on Oct. 22, 1929. He was never heard from.

SCHNEIDER TROPHY RACE.

The elventh race for the Schneider international hydroplane trophy was held on the Solent, off Cowes, Eng., Sept. 7, 1929. Two teams of three fliers each raced, representing Great Britain and Italy. Flying-Officer H. R. D. Waghorn won the trophy for Great Britain. He flew the thirty-one mile course at the rate of 328 miles per hour; T. Dal Molin (Italy) was second with a record of 284 miles per hour; Flight Lt. D'Arcy Greig (Britain) third, 282 miles; Flying Officer Atcherley (Britain) was disqualified though he made 325 miles per hour. The other two Italians were forced down.

The results and speed per hour of series of races are:

Place.	Winner and Nation.	M.P.H.
1913 Monaco	Prevost (France)	45.75
1914 Monaco	C. H. Pixton (G. B.)	86.8
1919 Bournemouth	Race annulled.	
1920 Venice	Luigi Bologna (Italy)	107
1921 Venice	G. de Briganti (Italy)	111
1922 Naples	H. C. Biard (G. B.)	145.7
1923 Cowes	Lt. Rittenhouse (U.S.A.)	177.38
1925 Baltimore	Lt. J. Doolittle (U.S.A.)	232.5
1926 Hampton Rods.	Maj. de Bernhardi (It.)	264.496
1927 Venice	Flt.-Lt. Webster (G. B.)	281.54
1929 Cowes	F.-O. Waghorn (G. B.)	328.63

New World Speed Records were set up following the Schneider Cup Race by the fliers of Great Britain's team. On September 10, 1929, Major A. H. Orlebar flew the Supermarine S6 over a three kilometre course on the Solent off Calshot twice in each direction at an average speed of 355.80 miles per hour. His fastest single flight was at the rate of 368.80 miles per hour. On September 12, 1929, in the same plane Major Orlebar raised the record to 357.70 miles per hour. All of these records are subject to homologation by the International Aviation Federation.

The Seventh Around-England Air Race was flown, starting at London, Eng., July 5, 1929, and finishing there on the 6th. Three hundred and forty-one planes competed in this 1,100 mile race. The King's Cup was won by Flight-Lieut. Atcherley in a Gloster-Grebe plane with an average speed of 150.30 miles per hour.

NOTABLE CROSS-COUNTRY FLIGHTS.

Capt. Frank M. Hawks, flying a Lockheed Vega monoplane, left Roosevelt Field, L. I., at 5:21:51 a.m. on Thursday, June 27, 1929, landed at Los Angeles at 12:23:23 a.m. on Friday the 28th, stayed there for a rest and service and refueling of his plane seven hours and 14 minutes, took off again at 7:37:47 a.m. and landed back at Roosevelt Field at 1:16 Saturday morning the 29th. He made the trip from New York to Los Angeles in 19 hours and 10 minutes, the old record being 24 hours, 51 minutes, made by Capt. Charles B. Collyer and Harry I. Tucker; and that from Los Angeles to New York in 17 hours, 43 minutes, breaking the old record (his own made on Feb. 5) of 18 hours, 22 minutes. His elapsed time from coast to coast and back was 43 hours, 59 minutes.

George Holdeman flew from Windsor, Can., to Havana, Cuba, on Feb. 23, 1929, a distance of 1,404 miles, in 12 hours, 53 minutes.

Arthur Walker and Nicholas Mamer established a refueling transcontinental non-stop round trip, Spokane to New York to Spokane, ending August 20, 1929. The plane, Sun God, left Spokane on Aug. 16, and during its flight covered 7,200 lineal miles and was in the air 120 hours, 2 minutes.

The Russian aviators, Dmitry Fugayet, Simon Shestakof, Boris Stergilof and Phillip Bolotof, in the plane Land of the Soviets, flew from Moscow east by way of Siberia and Alaska to New York with a number of stops between Aug. 23 and Nov. 1, 1929. The distance was estimated as 12,500 miles.

Squadron Leader A. G. Jones-Williams and Lieut. N. H. Jenkins established a non-stop flight record from England to India on April 24 26, 1929, when they flew a Fairey-Napier monoplane from Lincolnshire, Eng., to Karachi, India, an estimated distance of 4,130 miles in 50 hours, 48 minutes. The flight as about 287 miles short of the world's record.

Capt. Dieudonne Coste and Maurice Bellonte, French aviators, established an unofficial world's distance record flight by flying from Paris to Tsitsihar in northern Manchuria, where they landed Sept. 29, 1929, a distance variously estimated as from 4,900 to 5,500 miles. The flight was non-stop, non-refueling and if recognized by the International Aviation Federation will supplant the record of Rome to Natal, Brazil, in 1928, by the Italian fliers Ferrarin and Del Prete.

NEW ALTITUDE RECORDS.

Dressed in only a leather flying suit lined with soft fur, sheep-skin boots, a face helmet and mask and two pairs of mittens, Lieut. Apollo Soucek, U. S. N., piloted a Wright Apache land airplane, powered with a Wasp motor and supercharger, to an altitude of 39,140 feet (11,930 meters), nearly eight miles, above

the Naval Air Station at Washington on May 8. He broke the world record of 38,418 feet held by Lieut. C. C. Champion, also a naval aviator.

Lt. Soucek, on June 4, set up an altitude mark for seaplanes, 38,560 feet (11,753 meters) in a Wright Apache with Pratt and Whitney 425 h.p. supercharged engines at Washington, D. C. The old record was 37,995 feet (11,581 meters) made by Lt. C. C. Champion, U. S. N., in a sister plane on July 4, 1927.

Lt. Soucek's land plane record stood as a world record for about a fortnight for on May 25, Willi Neuenhofen, flying a Junders H34 monoplane with a Bristol-Jupiter 420 h.p. engine, at Dessau, Germany, reached 41,704 feet (12,739 meters).

On Feb. 12, Lieut. H. Johnston and Capt. A. W. Stevens reached nearly 39,000 feet at Dayton, Ohio

OTHER AVIATION FEATURES.

The world's largest airship, and the first rigid lighter-than-air craft to be put into the air by Great Britain since the war, is the R-101, with two decks of luxurious two-berth staterooms, a glass enclosed promenade and dining room, a smoking room and a dance floor, having accommodations for 100 passengers. The ship with its five engines is expected to do at least 70-80 miles an hour. It was launched at dawn on Oct. 12 at Cardington, in Bedfordshire, Eng., and on Oct. 14 made its first flight, over London for four hours, at a height of 2,000 feet and covering 200 miles, at a speed not exceeding fifty-eight miles an hour. The ship carried fifty-two persons.

The R-101, built for service on the England-India air route by British Government engineers, is 732 feet long and 131 feet in diameter. Its height, including the control car, is 140 feet, and its lifting gas displacement 5,000,000 cubic feet. The principal frames are made of stainless steel tubing. Aluminum alloy is used for minor structural members. Hydrogen is the lifting gas used as America has a monopoly on the non-inflammable helium gas.

The ship is propelled by five Beardmore engines, each developing 600 h.p., using heavy oil which reduced the cost one-fifth and practically eliminates the danger of fire.

LARGEST OF ALL AIRPLANES.

The huge German passenger seaplane, DO-X, on Oct. 21 took off from Lake Constance with 159 passengers and a crew of ten. It carried fuel for 750 hours and weighed altogether fifty-two long tons It left the surface in fifty seconds, and reached a speed of 110 miles an hour during its hour. Dr. Dornier is making plans for a transatlantic crossing in the spring.

An airplane powered with a Diesel engine flew from Detroit to Langley Field, Va., 650 miles, on May 14, 1929, in about 6 hours, 50 minutes, for its first public demonstration. The cost of fuel was said to be $4.68 for the 54 gallons consumed.

Glyer Kronfield, of Vienna, set an altitude mark of 2,225 meters (7.231 feet) above Newstady, Bavaria, April 22, 1929. Lieut. Dinart set a new duration mark for gliders of 14 hours, 45 minutes, over Rosellen Field in East Prussia, Oct. 20.

HONORS IN AVIATION.

Daniel Guggenheim received June 11, 1929 the first "Spirit of St. Louis" medal for exceptional services to aeronautics awarded by the American Society of Mechanical Engineers.

Mr. Guggenheim's contributions to flying include his gift of $500,000 to New York University for the founding of a school of aeronautics in 1925, the establishment of the Daniel Guggenheim Fund for the Promotion of Aeronautics with $2,500,000 in 1926, and a gift of $500,000 to Chile to advance civil and commercial aviation there.

The title of "Best Aviator in the World in 1928" was awarded by the International League of Aviators, Jan. 25, 1929, to the Italian, Col. Arturo Ferrarin, who flew from Rome to Natal, Brazil. Dr. Hugo Eckener, commander of the Graf Zeppelin, was awarded the lighter-than-air trophy.

Nine women pilots finished in the Women's Derby flight from Los Angeles, Cal. to Cleveland, Ohio, a feature of the National Air Race meet held in Cleveland Aug. 25 to Sept. 2, 1929. Louise Thaden won, time: 20 hours, 2 minutes, 2 seconds elapsed time; Gladys O'Donnell was second, 21 hours, 21 minutes, 43 seconds; and Amelia Earhart third, 22 hours, 12 minutes, 42 seconds.

Lt. James H. Doolittle on Sept. 25, 1929, took off flew and landed his plane at Mitchell Field, L. I., absolutely "blind"; his instruments were his only guide.

CIVIL AERONAUTICS IN THE UNITED STATES.

The annual report of Clarence M. Young, Director of Aeronautics, filed with the Secretary of Commerce, Nov. 25, 1929, for the fiscal year 1928-29, gives the number of licensed flyers as 28,153, and flying schools as about 600; 32 air lines carrying express, 47 carrying mail, and 61 carrying passengers, with 29,227 miles of established airways, 10,183 of which are lighted for night flying, with 2,065 miles of lighted airways under construction. Scheduled operations are 69,029 miles a day.

A condensed comparative summary for the last three calendar years, prepared from the Department of Commerce Reports, is here given:

	1926.	1927.	1928.
Airplane miles flown, all operators	4,318,087	5,870,489	9,888,307
Airplane miles flown daily, average	11,830	16,083	27,091
Passengers carried for hire	5,782	8,679	33,414
Express and freight carried—pounds	1,733,090	2,263,580	1,847,836
Airplane miles flown with mail	4,240,407	5,543,578	7,846,296
Airplane miles with contract mail	1,948,144	4,223,143	7,846,296
Total mail carried—pounds	810,855	1,654,165	4,061,210
Mail carried by contract—pounds	377,206	1,270,299	4,061,210
Mail income to contractors	$765,549	$2,643,454	$7,433,166
Miles of all airways in operation Dec. 31	8,404	9,122	16,667
Average mail income per scheduled trip	$590	$1,307	$1,979
Average mail load per scheduled trip—pounds	182	545	973
Average mail income per contract mile flown	$0.39	$0.625	$0.94
Airways in operation Dec. 31—number	16	22	47
Lines in operation Dec. 31—number	16	23	63
Mail operators Dec. 31	12	16	21
All operators Dec. 31	14	19	37
Total revenues, all operators	$765,549	$2,643,454	$7,996,978
Average passenger-mile rate	$0.12	$0.106	$0.11
Airplanes in service and reserve—number	....	128	268
Value of such airplanes	....	$1,838,462	$5,226,570
Pilots employed—number	....	107	275
Total personnel employed	....	462	1,036
Capital invested	$5,000,000	$7,053,650	
Passenger and express income	....	....	$519,238
Miles lighted airways, Dec. 31	2,041	4,668	6,988
Appropriations, Dept. of Commerce, air navigation aids	$300,000	$4,091,500	$3,659,850
Pilots licensed or pending—number	....	3,242	5,605
Student permits, issued or pending—number	....	545	10,528
Airplanes licensed or pending—member	....	2,299	4,156
Airplanes identified or pending—number	....	851	2,164
Municipal airports, Dec. 31—number	....	240	412
Private and commercial airports, Dec. 31—number	....	263	391
Navy and Marine Corp. airports, Dec. 31—number	....	17	17
Army, Nat. Gd., and Reserve airports, Dec. 31—number	....	62	64
Marked auxiliary fields, Dec. 31—number	....	320	340
Production of airplanes—number	1,186	1,995	4,346
Value of airplanes	$8,871,027	$14,504,999	$43,812,318
Total value of all air products	$17,694,905	$21,161,853	$64,662,491
Exports (airplanes, engines, and parts)	$1,027,210	$1,903,583	$3,664,723
Exported airplanes—number	50	63	162
Concerns engaged in air industry—number	600	900	1,400
Gov't. consumption, airplanes—number	532	621	857

GORDON BENNETT INTERNATIONAL BALLOON RACE, 1929.

The Gordon Bennett International Balloon Race for 1929 started from St. Louis, Mo., September 28. The distance achieved have been scaled by the United States Geological Survey, and the barographs were calibrated by the Bureau of Standards. The official standing of contestants was:

Balloon	Country	Pilot and Aide.	Landing Place	Distance Miles
Goodyear VIII	U. S.	W. T. Van Orman, Alan MacCracken	3 mi. SE Troy	341
Army	U. S.	Capt. W. E. Kepner, Capt. J. F. Powell	2 mi. N. Neptune	338
"Navy"	U. S.	Lt. T. G. W. Settle, Ensign W. Bushnell	10 mi. SW. Eaton	304
"Belgica"	Belgium	Ernest Demuyter, Franz Lecharlier	Corydon, Ind.	226
"Danmark"	Denmark	George Schenstrom, S. A. U. Rasmussen	5 mi. SE. Bedford	209
"Lafayette"	France	Georges Blanchet, Howard A. Scholle	Stinesville, Ind.	200
"Barmen"	Germany	Hugo Kaulen, Jr., Fritz Ebener	4 mi. SE. Melvin, Ill.	171
"Essen Stadt"	Germany	Eric Lelmkugel, George Froebel	Catlin, Ill.	169
"Argentina"	Argentina	D. Eduardo Bradley, Francisco J. Cadaval	Fairbanks, Ind.	155

The National Balloon Race to select the United States team for the Gordon Bennett race started from Pitt Stadium, Pittsburgh, Pa., May 4, 1929.

It resulted in the choice of these:

First—Navy Balloon No. 1, Lieut. T. G. W. Settle, Ensign W. Bushnell, to Savage Harbor, Prince Edward Island, Canada, 952 miles, in 43 hours and 20 minutes, a new record for both distance and duration; second—Detroit Times, E. J. Hill, A. G. Schlosser, Harkness, N. Y., 465 miles; third—Goodyear VII, W. T. Van Orman, approximately same distance.

RADIO TELEGRAPHY AND TELEPHONY.

(Prepared for The World Almanac by the Information Department of the American Telephone and Telegraph Company).

Radio traces its descent directly to the theoretical work of James Clerk Maxwell, who in 1865, as a result of his profound researches in mathematical physics, made the declaration that visible light consists of electrical waves in the ether and that electromagnetic waves of other wavelengths not visible as light also existed. In 1887 Heinrich Hertz of Germany gave an experimental proof of the existence of these latter electrical waves.

EARLY WORK OF MARCONI.

Between the years 1894 and 1896 Guglielmo Marconi of Italy initiated his experiments on the coherer, a device invented by Branley. At about the same time, Marconi modified the original radiating system of Hertz by connecting one terminal of the spark gap to the earth and the other to a large aerial conductor. This was the first use of an elevated conductor for transmitting and receiving as a radio antenna.

Marconi, by 1898, had succeeded in sending telegraph messages a distance of 14½ miles. By 1901 he had telegraphed from Cornwall to the Isle of Wight, a distance of 200 miles. In this year he also first succeeded in sending signals across the Atlantic Ocean, and in 1903 sent a complete message.

The first worker to use inductive coupling was Sir Oliver Lodge.

The crystal detector was introduced in 1906 as a result of the work of Dunwoody and Pickard in America.

In 1903 Poulsen of Denmark developed a form of electric arc operating in a hydrogen atmosphere and in a magnetic field in such a way that sustained electrical oscillations of frequencies up to 20,000 to 30,000 cycles were generated. Those arcs provided a source of continuous waves, in contrast with damped waves, with various resulting advantages. The Poulsen arc subsequently played an important part in the development of long distance radiotelegraphy.

About 1910 another form of continuous wave generator was perfected, namely, the high-frequency alternator. The names best known in this connection are those of Fessenden, Alexanderson and Goldschmidt. This device was quite extensively used in the subsequent development of high power radiotelegraphy.

VACUUM TUBE.

One of the outstanding inventions in the entire history of the radio art is the thermionic vacuum tube. In the most common form this contains a heated filament which gives off electrons. These are attracted to a plate in the tube, passing through a grid interposed between the filament and the plate. A small amount of electrical energy employed to vary the potential of the grid has a marked effect on the current flowing between the plate and filament; whence the tube has large amplifying properties.

The vacuum tube as we now know it was invented in 1906 by Lee De Forest an American, who introduced the grid into the previously used two-element tube of Fleming, an Englishman. The vacuum tube or "audion" of this period contained an appreciable amount of residual gas which proved to be largely responsible for its irregular behavior. Since it gave promise as an electric amplifier, the Bell Telephone System became interested in developing it, beginning in 1912, as a means of accomplishing transcontinental telephony. The telephone research workers and also those of the General Electric Co., interested in electron physics and X-rays undertook a thorough study of its electrical characteristics and applied means for thoroughly exhausting the gas from the tube. Remarkable developments resulted in the realm of X-rays and current rectification. In the field of telephony a tube resulted which was so satisfactory as a telephone repeater that the development of much larger tubes was immediately undertaken, with the object of applying them to radio telephony.

Tubes capable of producing 25 watts of high frequency energy were perfected by 1915 and were used in the successful transoceanic radio telephone experiments of that year. The tubes were also used as modulators for so modifying the high frequency current that it embodied the characteristic of speech, thus making radio telephony practical.

In recent years there have been important further increases in the power of vacuum tubes, brought about by water cooling. Tubes of this type of 10 and 20-kilowatt ratings are standard equipment and tubes of larger capacity have been used successfully in experimental tests.

Even earlier than its use in transmitting, the vacuum tube had proved of the greatest importance in the reception of radio signals. For this purpose it may be used as amplifier, detector or oscillator. This makes it possible to receive signals so faint that the limiting factor is interfering noise, due to atmospheric and other electrical disturbances, and has led to important developments in directive antennas for reducing the effects of such disturbances. There have been important improvements in recent years in the filaments of small and moderate sized vacuum tubes, resulting in a reduction of amount of power required for heating the filament and also in increased life of the tube.

ANTENNA DEVELOPMENT.

During the World War the loop or frame antenna, having the directional properties of transmitting and receiving most efficiently in its own plane, came into use. This antenna is the basis of the radiocompass now widely used in navigation for determining the position of ships at sea. It is also used in recently developed systems of directing airplanes so as to enable them to fly directly toward their destinaton.

Another antenna development, suitable for transmission, is the multiple tuned antenna having several parallel paths to ground, thereby lowering the resistance offered to the ground currents and raising the radiating efficiency of the antenna. This type of antenna has been used at large radiotelegraph transmitting stations.

Another antenna of special interest is the so-called "wave antenna" used for reception, which is a long wire on poles like a telephone line, of a length about equal to the wavelength of the signals to be received. This antenna has the desirable property of great directional discrimination, being sensitive for signals coming head-on, and greatly attenuating signals from all other directions including that opposite to the head-on direction. By using this antenna, and especially by suitably combining two or more such antennas to form an array, substantial progress has been made in overcoming the effects of static.

Important antenna developments have accompanied the study and use of very high frequencies, often called "short waves," for radio transmission. Antennas for this purpose have been designed in entirely different types from those above. These antennas have excellent directional properties and some types have been called "beam" antennas since the purpose in using them at the transmitting station is to send out electrical waves in more or less of a beam, as in the case of a beam of light from a search light. An antenna of this type consists of an array of wires, arranged to be excited in some definite phase relation and usually including a second set of wires acting as a reflector. Such antennas are also used for receiving, a function in which their directional properties are of great value in increasing the strength of the signals with respect to interfering disturbances.

RADIOTELEPHONY.

The development of radiotelephony was largely built up around the vacuum tube. This device, when properly connected with other electrical facilities, made available a means of modulating high-frequency currents, so that they might embody the variations of the voice. It also provided a highly satisfactory means of generating high frequency oscillations, and of amplifying and detecting them.

By 1915 the development of the vacuum tube had progressed to such a point that engineers of the Bell System transmitted speech successfully from Arlington, Va., to Paris, the Canal Zone, California and Hawaii, the last distance being nearly 5,000 miles.

During the war, radiotelephony was successfully developed between airplanes and stations on the ground and between airplanes in flight. Within the last few years the remarkable growth of interest in aviation has brought aircraft radio again into the foreground and further developments are now in progress, including telephone, telegraph and direction-finding.

Between the years 1920 and 1922, following earlier sporadic radiotelephone broadcasts radio became definitely established as a regular means of public entertainment in the United States. The increase of the power of broadcast transmitters brought about by the employment of water-cooled tubes has substantially extended the reliable service area of broadcasting stations, and the use of quartz crystals to give accurate control of frequency has reduced interference between stations and improved the

stability of operation with a resulting increase in the fidelity of transmission.

Improvements in the fidelity of receiving apparatus have steadily taken place. There has been within the last year or two a marked trend toward sets deriving their entire power supply from the lighting circuit in the home. There has also been a simplification in the controls of the set, these having now been reduced usually to the absolute minimum of a station selector, a volume control and a switch for turning the set on and off. The "dynamic" type of loudspeaker, giving faithful reproduction for the very low pitches, has come into quite extensive use. The use of larger tubes in the last stages of amplification of receivers during the last two or three years has increased the available output and improved the quality so that high-grade loudspeakers may be adequately operated.

An important development in radio broadcasting began in 1922 with the effective extension of radio studios to outside points such as concert halls, the scenes of athletic events, etc., by means of suitable connecting telephone lines. By a more elaborate use of this method, several stations were enabled to transmit the same program. Special engineering attention has been given to the telephone lines used to supply program material to radio stations. These provide for the faithful transmission of a wide range of low, medium, and high pitches, the present limits being, roughly, 100 to 5,000 cycles per second. These circuits have mostly been furnished by open-wire lines, but increased use of circuits in cable, with their greater reliability, is in prospect.

During 1921 to 1924, announcements were made of successful experiments in extending the land telephone system by radio to ships at sea so that two-way telephone conversations could be carried on between any person on land and any passenger on a ship. Following further development work during 1929, a commercial ship-to-shore telephone service is now being initiated, beginning with service between the land lines of the Bell System, and the S.S. Leviathan.

The development of water-cooled vacuum tubes, in conjunction with some of the improved antennas which have been described, and also an improved method of modulation known as "single sideband transmission," and the discovery that in the region of 60 kilocycles atmospheric electric disturbances are much less for receiving stations when located in northern latitudes, made possible the opening of commercial transatlantic radiotelephony in 1927. The 60-kilocycle facilities as now employed consist of an eastbound channel from Rocky Point, Long Island, to Cupar, Scotland, and a westbound channel from Rugby, England, to Houlton, Maine.

On December 1, 1929, in addition to the low frequency channel, three high frequency systems were in commercial service, transmission taking place from Lawrenceville, N. J., to Baldock, England, and from Rugby, England, to Netcong, N. J. Terminal control points are provided at New York and London where connections are made to the land line telephone systems of North America and Europe.

Radiotelephone circuits which have been reported as open for commercial service in other parts of the world include connections between Madrid and Buenos Aires, Amsterdam and Java, Paris and Algiers, Berlin and Buenos Aires, and between Berlin and Bangkok.

USE OF "SHORT WAVES."

Experiments on high-frequency transmission, recorded in previous issues of The World Almanac, have been actively continued. In general, it may be said that the use of high frequencies as compared to low frequencies has the advantage of requiring a more moderate sized transmitting and receiving antenna and somewhat less power, and of having greater freedom from atmospheric electric disturbances. However, they have the disadvantage of great variability, the received intensity often fluctuating at a rapid rate. The studies of high frequencies have brought out an interesting phenomenon known as the "skip distance" effect. Instead of the signal strength decreasing steadily with distance from the transmitting station signals at great distances may, under the same conditions, be strong, while at intermediate distances they are faint or even inaudible. Another interesting characteristic of high frequencies is that their properties vary markedly with the time of day, it being generally necessary to change the frequency at certain times of the day in order to maintain uninterrupted communication. There are times, however, as during magnetic disturbances; when all high frequencies are useless so that high frequencies in common with other frequencies in the radio spectrum cannot, it appears, be expected to give as continuous service as is afforded by wire communication.

High frequencies have been used chiefly for long distance radiotelegraphy between fixed points by radio companies, governments and amateurs. They have been used to some extent by ships and aircraft and this use is rapidly being extended. The accurate control of high frequencies has necessitated the use of quartz crystals. These crystals have the piezoelectric property of slightly altering their shape upon the application of an electric field, and conversely producing an electric potential difference when a mechanical strain is applied. As a result of these characteristics, one of the mechanical natural frequencies of the crystal can be reproduced electrically by proper association with a vacuum tube. This current furnishes an accurate means for maintaining the frequency of transmission.

PICTURE TRANSMISSION AND TELEVISION.

Since signals for the transmission of pictures or of television may be sent by either radio or wire, these matters are not restricted to the radio field. In this account of the development of the radio art, it therefore seems appropriate to describe chiefly those systems which have been demonstrated or are now in use employing radio channels.

The "photoradio" process used by the Radio Corporation of America for the facsimile transmission of material employs at the transmitting station a scanning process which effectively transforms the picture from a half-tone into a back and white dotted picture. In this way signals are transmitted at frequent intervals instead of continuously and the effects of the variable ether path are partially overcome. At the receiving end chemically treated paper is darkened by the action of a jet of hot air under the control of the incoming signals. This process requires about half an hour for the transmission of a 9 in. x 7 in. picture, and during 1929 continued in operation across the Atlantic between New York and London, and across the Pacific between San Francisco and Honolulu. During 1929 a transcontinental "photoradio" service was also inaugurated between New York and San Francisco.

A striking development in electrical communication within the last two years has been television. This was accomplished by wire over a distance of some 200 miles between New York and Washington, D. C., at a demonstration by the Bell System on April 7, 1927. The speakers and performers at Washington were readily recognized on the receiving screens at New York. The voices were also transmitted and reproduced by means of a loud speaker. A radio demonstration at the same time consisted of the transmission of television and speech signals from Whippany, N. J., 22 miles from New York, to the Bell Telephone Laboratories building in New York City.

At demonstrations during 1928 and 1929 the Bell Telephone Laboratories showed improvements in the television apparatus. One of these improvements consisted of the use of crystals for controlling the frequency of the transmitting and receiving apparatus, thus eliminating the necessity for the transmission of synchronizing current. Other improvements made possible the transmission of a scene in the open air, illuminated by ordinary sunlight, and the transmission and reproduction of television in color.

The General Electric Company has also been active in this field and has demonstrated television upon a screen such as one would use for a home motion picture projector. Other parties, notably C. Francis Jenkins of Washington, have been active in television or the related field of picture transmission.

Various workers in Europe have also been engaged in the study of optical transmissions by electricity. Baird in England has used both visible and infra-red light and is also reported to have demonstrated the reproduction of television images in color. In Germany, Karolus has perfected a cell through which light passes in variable amounts under the control of an electric field. This furnishes a rapid method of varying an intense beam of light. In France, Belin has also conducted investigations on optical transmissions, using the cathode ray oscillograph. During the past year, Zworykin of the Westinghouse Electric Company made important contributions to television reception, using a cathode ray oscillograph.

On account of the great popular interest in television, it should be explained that the apparatus required is rather elaborate and that even under laboratory conditions the art has not yet come near the stage of development required to reproduce scenes with the fineness of detail of the regular motion picture.

RADIO BROADCASTING.

The outstanding popular development in radio is the broadcasting of music, news and other material from radio-telephone stations. The fact that radio waves normally spread out in all directions from a

transmitting station makes radio a peculiarly appropriate means for the conduct of a one-way communication service intended to reach large numbers of listeners. Radiotelephone broadcasting in the way in which we now know it began in 1920 when station KDKA of the Westinghouse Electric and Manufacturing Company, Pittsburgh, Pa., began the transmission of programs on regularly published schedules. It was not long after that time before large numbers of broadcasting stations came into operation, accompanied by a rapid increase in the number of receiving sets through which this service is made available to the listeners.

The interconnection of broadcasting stations puts a given program before an audience which is much greater than any otherwise available. In consequence, it is economically feasible to expend a much greater effort in the preparation of material and programs of high excellence and to employ artists of the greatest ability. These systems are supported through the sale of program time or the lease of facilities to national advertisers who desire to bring their names or the names of their products before the public in a favorable way.

Extensive connections are operated on a regular daily basis covering large portions of the country, the National Broadcasting Company having three networks with permanent connections to about 67 stations, and the Columbia System having permanent connections to about 58 broadcasting stations. Additional connections are frequently made to both systems and other groups of stations are also frequently connected together for the simultaneous transmission of program features. Over 150 stations are thus served and the length of the permanent program circuits used by all systems totals about 34,000 miles.

It has been estimated that approximately 10,000,000 radio receivers are now in use in the United States, giving service to something between 30,000,000 and 60,000,000 listeners. It is estimated that the radio receiving equipment sold in the United States during the year 1929 had a market value of approximately $600,000,000.

FINANCIAL SUPPORT.

The organization of programs supported or "sponsored" by national advertisers now appears quite definitely to be the major element in the answer to the question, "Who will pay for the broadcasting?" Most stations engaged in this service recognize however, that the quality of the program material must always be maintained at a high standard and that either the sponsored programs or the normal programs—known as "sustaining" programs—furnished by the stations must be of such a nature as to maintain the interest and good-will of the listeners. Otherwise, the value of the station's service to those employing its facilities would largely be lost.

In addition to the stations which either regularly or from time to time form part of a general distribution system for broadcast programs, there are large numbers of stations which are engaged in a purely local broadcasting service. These stations are for the most part of lower power than the former, ranging from 100 to 500 or 1,000 watts. The programs which they provide are ordinarily of interest primarily to the residents of their own communities, and the basis of support of such stations seldom warrants the investment of large amounts of money, either in high power equipment or in a permanent, extensive program staff.

BROADCASTING ABROAD.

Broadcasting service in other countries has, in general, followed the technical lead of the United States. The basis of organization, however, is in many instances quite different. In the United States no governmental restriction is placed upon the use of radio receiving apparatus by broadcast listeners. In many other countries, however, a listener's fee is required, this being ordinarily payable at any post office. Part or all of the money collected from these fees is then used to support the broadcasting service. In some countries the organizations preparing the radio programs are under more or less government control.

The total number of broadcasting stations in the world outside the United States is about 500, compared with 614 in the United States on November 1, 1929.

TRANSOCEANIC RADIOTELEGRAPHY.

In the United States the Radio Corporation of America now has transmitting stations in the east at Rocky Point, L. I., Marion, Mass., New Brunswick, N. J., and Tuckerton, N. J., and receiving stations at Riverhead, L. I., for the exchange of radiotelegraph messages with about 15 countries in Europe, Africa, North and South America. In addition to these, Australia is reached via Montreal. These transmitting and receiving stations are connected to "Radio Central" in New York City where the keying of all transmitters is done by machine and where the received signals from all receiving stations are read. This affords accurate and fast transmission to and from the business center of New York without relaying.

For Pacific business the Radio Corporation has transmitting stations at Bolinas, Cal., Kahuku, Hawaii, and Manila, and receiving stations at Marshall, Cal., Koko Head, Hawaii, and Manila. These stations transact business with Hawaii and four points in Asia and the Philippine Islands.

The Tropical Radiotelegraph Company transmits from Miami or New Orleans to 13 points in Central and South America. Increasing use, for long-distance telegraph transmission, of the very high and very low frequencies existing on both sides has been made. With the high frequencies, very rapid speed of transmission have been realized.

During the year 1929, a merger of the British radio and cable interests was consummated. Such coordination of radio and cable services, rather than continued competition, has also been under discussion in the United States.

TRANSATLANTIC RADIO TELEPHONY.

In the realm of radio telephony the outstanding development of recent years is the commercial transatlantic telephone service, the technical aspects of which have already been described. This service was established on January 7, 1927, between the New York zone and the London zone, and was rapidly extended to include all of the United States and most of the telephones in Canada, Cuba and Mexico in the New World and one after another of the nations of the European continent. A telephone subscriber in the United States can now reach any one of more than 28,500,000 telephones in the United States, Canada, Cuba and Mexico, in twenty European countries and in Ceuta, Africa. In September, 1929, transatlantic service was placed on a twenty-four hour basis.

In June, 1929, a transoceanic radio telephone transmitting center was opened at Lawrenceville, N. J. At that point are short wave transmitters for service to Europe, supplementing the long wave transmitting circuit from Rocky Point, L. I. The radio receivers for the three transatlantic circuits now operating are located at Netcong, N. J. Some time early in 1930 a short wave transmitter and receiver at Lawrenceville and Netcong respectively will establish radio telephone service with Argentina, in South America.

SHIP-TO-SHORE RADIO TELEPHONY.

Early in December, 1929, commercial telephone service between the Steamship Leviathan and the land telephone system was inaugurated. The first instance of two-way radio telephony through the telephone wire network to a vessel at sea took place in 1916. Following this first test, extensive experimental investigation was undertaken during the years 1919-1922. The present commercial service is available when the steamship is within 500 miles of New York. The land radio transmitter is at Deal Beach, N. J., and the receiver at Forked River, N. J.

In ship-to-shore telephone service there are a number of difficult technical problems arising, principally due to the fact that on shipboard the radio transmitter and receiver must be located in close proximity. However, a powerful land transmitter and special types of directive antennas on land for transmission and reception help to offset the limitations of a ship as a site for radio telephone equipment.

MARINE RADIO SERVICE.

An extensive marine service is operated by the Radiomarine Corporation of America, by the Mackay Radio and Telegraph Company and others, by which telegraph messages are transmitted to and from persons on board ship. This service is furnished by transmitting stations along the Atlantic, Pacific and Gulf Coasts and on the Great Lakes. The station at Chatham, Mass., is the most powerful marine station in the world, capable of communicating with vessels all the way across the Atlantic. About 12,000 ships in all parts of the world are now equipped with radio.

During 1929 continued progress has been made looking toward the complete elimination of spark transmitters. The substitution of vacuum tube transmitters removes interference with broadcast reception, gives greater distance range and allows more simultaneous transmissions for the transaction of ship business.

Radio systems, based on the directional properties of the loop antenna, whereby ships within a few hundred miles of shore may obtain their location in fog or at other times, have continued to prove their value. The U. S. Navy system, with compass sta-

tions on shore. furnishes locations to ships as requested, but can handle only one vessel at a time along a given section of the coast. The Lighthouse Bureau system with radio beacon transmitters on land, and requiring radio-compasses aboard ships has unlimited traffic capacity, and the amount of equipment ashore and on board ships has increased greatly. The number of beacons on the Atlantic, Pacific and Great Lake Coasts of the United States had increased to 65 on June 30, 1929. Throughout the rest of the world there were 57 additional beacons, according to the latest information of the Radio Division of the Department of Commerce. The number of American vessels equipped with radio-compasses was 1,903 on June 30, 1929, and continued to increase during the following years Since the installation of a radio-compass is not required by law, this large employment indicates its value. Such radio-compasses are also useful for locating a vessel in distress and some notable rescues have been effected in this way.

An international conference on the Safety of Life at Sea was held at London in Aprill and May, 1929 At this conference important rules were adopted requiring the installation of radio equipment on practically all ocean-going vessels of 1600 tons or more and calling for the installation, after a period of years, of radio-compasses on all ocean-going passenger vessels of 5,000 tons or more.

AIRCRAFT RADIO.

The growth of aviation leading to the establishment of regular commercial service will, more and more, require operation of aircraft on schedule time under varying weather conditions. For overcoming fog and other conditions of poor visibility, radio is of invaluable assistance.

Under a recent law, the Department of Commerce is charged with the development of aids to aerial navigation. The Department has especially devoted itself to the development of a directive type of radio beacon and installations of beacon apparatus have been made on a number of important airways. Radio telephone transmitting stations have also been erected at many of the fields on these airways for the broadcasting of weather reports and other information of general benefit to aircraft. Moderately low frequencies are employed for both of these services (285-350 kc).

Many air transport lines have decided that their responsibility for the safety of life and property necessitates the operation of private, ground-to-plane, two-way radio telephone systems for the dispatch of their planes. Numerous experimenta, installations have been employed during the past year and several large operators plan the complete equipment of their systems. Radio telephony is to be employed for the domestic overland routes using moderately high frequencies (1500-6000 kc). Continuous wave radio telegraphy is being employed for communication on long distance, over-water routes.

NUMBER OF STATIONS.

The increase in the number of American radio transmitting stations is shown by this table. The figures are for June 30 of the year indicated.

	1912	1928	1929
Commercial ships equipped with radio	485	2,166	2,113
Government ship stations	..	1,216	1,211
Radiotelephone broadcasting	0	691	614
Amateur stations	1,224	16,928	16,829
Commercial and government land stations, special and geophysical stations	..	872	1,149
Commercial aircraft stations	..	5	97

AMATEUR RADIO.

The amateurs of the United States, organized into the American Radio Relay League, have been on service in a number of catastrophes including the devastating storm which struck Porto Rico and Florida during 1928. At such times, regular communication facilities may be seriously disrupted, and the services of amateurs prove to be of considerble value for the transmission of emergency messages.

GOVERNMENTAL REGULATION.

A law passed by Congress in 1910 and amended in 1912 requires suitable radio equipment on certain classes of steamers clearing ports of the United States when these ships carry 50 or more persons, including passengers and crew.

The first law, covering in a general way the regulation of wavelengths used and interference produced by radio transmitting stations, was enacted by Congress in 1912. Under the provisions of this law, the Secretary of Commerce was authorized to issue licenses to radio stations and operators and to make the necessary inspections and give appropriate examinations. The extension of the uses of radio for broadcasting and other purposes made it necessary for the Secretary of Commerce to place certain limitations on the operation of transmitting stations n order to avoid undue interference. This resulted in the carrying of a number of cases to the courts for determination of the authority of the Secretary of Commerce under the 1912 law. By 1926 it became evident that, under the decisions rendered, the Secretary of Commerce did not have athority too refuse to grant a license or to specify the frequency or wavelength to be used by the applicant. As a result, many additional broadcasting stations began operation, some of them on frequencies which resulted in serious interference with the service previously rendered by other stations.

FEDERAL RADIO COMMISSION.

In order to remedy this situation, Congress passed what is known as the "Radio Act of 1927." This Act called for the establishment of a Federal Radio Commission, one member to be chosen from each of the five zones into which the country was divided.

The Commission was given broad regulatory powers over all classes of radio transmitting stations and was authorized to specify the frequency, power, location and other conditions of their operation.

The law authorized the Commission to grant or revoke any license when it deemed that "public convenience, interest or necessity" would be served thereby. It is under the authority of this law that the Commission has been making certain changes in the frequencies which broadcasting and other classes of stations are authorized to use.

In the spring of 1928, an amendment to the Radio Act of 1927 was passed by Congress under the terms of which the Federal Radio Commission was directed to apportion broadcasting assignments equally to the five zones, into which the country is divided, and in each zone to allot these assignments for use in the several states in proportion to their population. Under the terms of this amendment, the Commission put into effect on November 11, 1928, a reallocation of the broadcasting stations of the country.

In effect, the Commission in this reallocation recognized three principal classes of broadcasting stations, and specified the channels which are to be used for stations of each class. The existing broadcasting stations were then assigned to channels in accordance with this plan, time divisions being required where necessary in order to minimize interference and to make the apportionment of full time assignments as required by the law. The classes of full time assignments are:

1. Stations to which full use of a clear channel is granted (5 kw. or more in power).
2. Stations which are assigned to a channel for simultaneous operation with from one to four other stations (power ordinarily 250 to 1000 watts).
3. Stations which are assigned to a channel jointly with about 25 other stations distributed throughout the country (up to 100 watts in power).

In addition a number of other stations are authorized to operate during the daytime or at such other times (as early evening or late at night) as will not cause interference with the operation of the station or stations which are assigned for the primary use of these channels.

The Commission has announced certain regulations which must be met by broadcasting stations. Some of these are aimed at the reduction of interference and include, among others, the provision that no station shall deviate more than one-half kilocycle (500 cycles) from its assigned frequencies. Others are related more directly to the interest shown by the listeners in the various types of program material and include, for example, a requirement that suitable announcement be made when a program consists of phonograph records or other mechanically produced material.

"SHORT-WAVE" STATIONS.

In addition to broadcasting, one of the regulatory problems which is assuming increasing importance is that of assignment of high frequencies or short waves for use by various radio services. It has already developed that the number of applications for short-wave assignment is far greater than the number of available channels and the granting of licenses, therefore, involves the question of determining the relative extent to which public interest would be served by the various proposed services.

The **Federal Radio Commission** (as of Nov. 25, 1929) is composed of Ira E. Robinson, Chairman; Eugene O. Sykes; Charles McK. Saltzman; and Harold A. Lafound (one vacancy); Carl H. Butman, Secretary. The office is Dept. of the Interior Bldg., 18th and F Streets, Washington, D. C.

MOTION PICTURES.

The Department of Commerce announces that, according to data collected at the biennial census taken in 1928, the establishments engaged primarily in the production of motion picture films in 1927 reported a total production cost amounting to $134,343,360, an increase of 43.5 per cent as compared with $93,636,348 for 1925, the last preceding census year.

The "Motion Pictures" industry, as constituted for census purposes, embraces all processes and activities connected with the *production* of motion pictures, such as the photography of scenes, the development of exposed films, the printing of projecting films, and other studio and laboratory work necessary in connection with the preparation of projection films for use. It does not, however, include distribution and projection in theatres.

Of the 142 establishments reporting for 1927, 78 operated in California, 21 in New York; 6 in New Jersey; 6 in Ohio; 5 in Illinois; 4 in Pennsylvania, 3 in Massachusetts; 3 in Michigan and 16 in 10 other States.

The statistics for 1927 and 1925 are summarized in the following table.

	1927.	1925.
No. of estab. (studios and laboratories)	142	132
Salaried offic. and empl.	7,598	5,945
Wage earners (aver. no.)	8,415	5,573
Salaries	$56,298,560	$35,950,778
Wages	18,637,005	13,065,756
Cost of mater., suppl., fuel, and purch. power	34,867,472	33,258,368
Materials and supplies	$34,320,696	
Fuel and power	546,776	
Paid for contract work	15,476,548	$5,368,593
Total cost of production	$134,343,360	$93,636,348

	1927.	1925.
Negative films:		
Theatrical—		
Number	1,347	
Cost of production	$92,593,732	
Educational	337,159	
News	2,499,660	$64,036,805
Advertising	617,466	
Other	615,262	
Unfinished productions	13,267,338	7,451,652
Laboratory work:		
Positive films	12,491,088	
Receipts for laboratory work done for others	11,921,655	22,147,891
Horsepower	32,160	29,472

The difference of $9,063,775 between the total cost of production and the sum of the items for salaries, wages, cost of materials, and amount paid for contract work is made up of miscellaneous items such as story costs, home-office overhead, stars' expenses, insurance, etc., and profit from laboratory work done for others.

Many studios are rented, together with the necessary electric power, stage settings, labor, and minor-role actors, to the producing companies. The rentals paid for such studios are included in the item "Paid for contract work."

WHEN SPEECH PLAYS TRUANT ON THE WIRE.

(From a Statement to The Almanac by the Bell Telephone Laboratories.)

Briefly, the situation which makes necessary the use of delay networks in transatlantic and long-wire telephony is this:

There are various places in all telephone circuits where a portion of the speech current is necessarily reflected, or otherwise caused to return, back toward its point of origin.

Due to the high speed of electric waves, the time between speaking a word into the transmitter and hearing its reflection in one's own receiver is very small when the telephone circuit is of short or medium length.

When, however, the line is long, the lag between speaking a word and hearing it in the receiver is a sufficiently large fraction of a second to be embarrassing and confusing to the speaker if the feeding-back is not prevented.

Furthermore, under certain circumstances, the feeding-back effect would cause voice-currents to pass back and forth in the line an indefinite number of times, and thus to set up a singing condition under which conversation would be impossible.

To avoid these difficulties, switches are introduced into the telephone circuit which allow the voice currents to proceed in one direction only and not to return.

Obviously, to permit two-way conversations over a single pair of wires, these switches must be operated, to reverse their effect, each time the speaker at one end of the line finishes saying something and the speaker at the other end begins to reply.

To accomplish these switchings, a highly sensitive relay is placed in the circuit—so sensitive that it is operated by the tiny voice currents. This relay resets the switches each time the conversation changes direction. Although the relay is very fast-operating, it does take an appreciable time to accomplish the switching.

Were the voice currents permitted to pass to the line immediately after energizing the relay, the switches would not quite be turned when the first syllable reached them, and a fraction of a second's worth of talk would be chopped off at the beginning of each remark.

To avoid this the voice currents are permitted to activate the relay, then are led to a delay network (a complicated electric circuit of condensers and inductance coils) where they are delayed slightly longer than the switching time.

Thus, by the time they reach the point where the switches are located, the voice currents find the circuit completely established, and proceed without meeting violence.

These voice-operated relays and their associated delay-networks have been in use for several years on long distance lines and the transatlantic wire-and-radio circuit.

HARDENING THE CRIME LAWS IN NEW YORK.

The Legislature in 1927 and 1928 hardened the Baumes Laws. A Central Bureau of Criminal Records was created on and after July 1, 1927, and is a Division of the State Department of Correction.

The District Attorney representing the people, may now appeal the same as the defendant, except in case of acquittal.

In case of acquittal the police must, on demand, return to the defendant all *finger prints*, as well as photographs of the defendant, and copies thereof.

It is no longer necessary to prove previous convictions. A report from the State or local Bureaus of criminal identification is sufficient.

Trial courts have no discretion to permit a convicted second offender under the Baumes laws to escape the special penalties for such classes of criminals provided by these statutes, according to a unanimous decision of the Court of Appeals in 1928.

The minimum punishment for murder in the second degree is now 20 years.

A person who has been admitted to bail in connection with a charge of felony and who wilfully fails to appear as required and thereby incurs a forfeiture of his bail is guilty of a felony if he does not appear or surrender himself within thirty days.

Persons who flee the State to evade testifying in proceedings like the Queens County sewer investigation, conducted under the Public Officers' act, disregarding subpoenas, may be held in contempt of court.

If such a witness should be held in contempt a Supreme Court Justice could issue an order directing that his property be seized so as to secure the payment of a fine running as high as $100,000, which could be imposed.

The bill also provides that subpoenas may be served on witnesses who have left the State. If such witnesses cannot be located the subpoenas may be served through publication.

A person who being a dealer in or collector of any merchandise or property, or the agent, employee or representative of such dealer or collector, fails to make reasonable inquiry that the person selling or delivering any stolen or misappropriated property to him has a legal right to do so, shall be presumed to have bought or received such property knowing it to have been stolen or misappropriated. This presumption may however be rebutted by proof.

Scientific Progress in 1929.

(Covering period from Oct. 1, 1928, to Oct. 1, 1929.)

Compiled by the National Geographic Society, Washington, D. C. Gilbert Grosvenor, LL.D., Litt.D., President.

ARCHAEOLOGY.

Through the work of eleven expeditions of the National Geographic Society in the Southwest of the United States, a chronology for that region has been established, going back to A. D. 700. The dates of the rise, golden age, and decline of nearly forty prehistoric Indian settlements have been fixed; and a weather chart 1229 years long has been worked out. Eight of these expeditions, under the leadership of Neil M. Judd, excavated and restored Pueblo Bonito, the great pre-Columbian Indian communal center of Chaco Canyon, New Mexico. This work has brought a flood of light on the ways, customs, and manners of the people who lived in that region more than five centuries before the discovery of America by Columbus. Three other expeditions collected ancient beams, timbers, and fragments of charcoal for the purpose of building up an unbroken succession of tree-rings back from living trees to the remotest period possible. This work was under the supervision of Dr. A. E. Douglass, of the University of Arizona. By a careful matching together of the fat and lean year cycles in the lives of trees as revealed in the ring records of beams and timbers derived from them, Dr. Douglass was able to piece together the stories of trees running back to A. D. 700. The joint result of these two lines of research constitutes one of the outstanding triumphs of American archaeology and of prehistoric geography. In its revelation of new horizons of history in America it has played a role comparable to that played by the translation of the Rosetta Stone in opening up new vistas of Egyptian history. Through the work of Dr. Douglass the Society was able to announce that Pueblo Bonito had its beginnings in A. D. 919; reached its golden age in A. D. 1067, and was still occupied in A. D. 1127.

University of California anthropologists announced the discovery of evidences of a prehistoric tribe of Indians, dating back almost 3,000 years, in a cavern in Nevada.

An American Museum of Natural History expedition, under Charles L. Bernheimer, found graves in southern Utah, which disclosed a culture dating back from 3,000 to 10,000 years.

Highway builders near Santa Fe, New Mexico, discovered the ruins of an ancient pueblo, with a fine series of pictographs.

J. L. Nusbaum, Department of the Interior, in cooperation with C. C. Smith and M. R. Harrington, investigated the "lost city of the Moapa Valley," the Pueblo Grande de Nevada.

Dr. E. L. Hewett, University of New Mexico, found at Ungshshe, New Mexico, a burial place in which the dead had been interred more in keeping with the practices of ancient Roman tribes than according to the customs of the Pueblo Indians of the Southwest.

F. M. Setzler, Indiana Historical Bureau, opened an Indian mound near Winchester, Indiana, eighty feet in diameter and eight feet high, surrounded by a 31-acre earthwork. A skeleton of a middle-aged man lay three feet beneath a sacrificial pit, resting on partially decomposed bark.

Dr. E. B. Delabarre, Brown University, found beneath the childish pictures and signs of Dighton Rock traces of the name Miguel Corte-Real and the date, 1511.

Dr. H J. Spinden, Harvard University, announced the conclusion that the Indian population of the New world in the twelfth century A. D. was probably 50,000,000.

Dr. S. G. Morley, Carnegie Institution of Washington, excavated a spiral-shaped tower at Chichen Itza, Yucatan.

Six pyramids smaller than those of the Sun and Moon were found at San Juan Tootihuacan, near Mexico City.

The pyramid of Tenayuca, near Mexico City, was opened up, disclosing many striking relics of the Aztec age.

A British Museum expedition studied Maya ruins near Punta Gorda, British Honduras.

A German expedition making observations at the Inca Temple of the Sun on the shores of Lake Titicaca, concluded that it was built with knowledge of the angle of ecliptic obliquity, about 13,000 years ago.

An Inca cemetery at Copiapo, Chile, yielded nearly 300 pottery vessels, tools of copper, bronze, and stone, gold earrings, and a gold headband an inch and a half wide.

Drainage operations in Lake Nemi near Rome revealed part of one of Caligula's ships. Copper nails, which had lost none of their brightness through the nineteen centuries of their submergence, and leaden sheets were found.

The American School of Classical Studies is to excavate the business center of ancient Athens. To lay bare the streets and buildings which were the familiar haunts of Pericles, Plato, Socrates, and Demosthenes, more than thirty blocks must be razed, and the debris of four succeeding civilizations must be removed.

Excavations near Palazzolo Acreide, Sicily, revealed the ruins of Acrilae. A temple, believed to antedate that of Zeus at Syracuse, massive city walls, and ancient dwellings were unearthed.

Dr. D. M. Robinson, Johns Hopkins University, announced that excavations of Olynthus reveal once palatial homes, fine material culture, and art objects of exquisite workmanship.

The Durham University Excavation Committee discovered at Birdoswald, in the Roman Wall, a garrison for a thousand men of the First Cohort of Hadrian's Dacians.

A group of Druidical monoliths older than those at Stonehenge were discovered at Woodhenge, south Britain.

Prof. V. G. Childe, University of Edinburgh, announced evidences of gruesome human sacrifices found during the reconstruction of the village of Skara Brae, Orkney Islands.

Excavations at the Swedish Stone Age village in the swamps of Dag, Ostergotland, revealed a settlement surrounded by a stockade and a street paved with flat stones.

Excavations in the Taman Peninsula, opposite the Crimea, disclosed the remains of an old Greek theater.

Excavations were continued at the site of the ancient Roman city of Aquincum, near Budapest.

Excavations near Szeged, Hungary, produced many relics of the bronze age.

Dr. J. H. Breasted, University of Chicago, announced plans for a new building for the Oriental Institute, an annual grant for the carrying forward of a ten-year program of research, and an endowment for teaching.

Alan Rowe, University of Pennsylvania, reported the discovery of a great slab altar at which the Canaanites in biblical Beth-Shan worshipped their deity 3,500 years ago.

A Toledo Museum of Art-University of Michigan expedition reported the discovery of three ancient cities buried at Tel Omar—Selukia, one of the provincial capitals of Alexander the Great; Opis, its predecessor, a trade post of the Sumerians; and Akshak, the oldest, a contemporary of Ur.

Yale University excavations at Doura-Europos, on the Euphrates, reveal it as a frontier outpost of Hellenistic and Roman civilization after the reign of Alexander the Great.

Dr. Edward Chiera, University of Chicago, announced the discovery of the palace of Sennacherib and the excavation of the palace of Sargon II, the latter at Khorsabad, Assyria, and the former ten miles away. Fragments of frieze work from Sargon's courtyard, slabs depicting foreign emissaries bearing presents to Sargon, a sculpture of Sargon and his "prime minister," and a great stone bull weighing forty tons, were among the finds.

Sir Flinders Petrie reported Tell Faras, Palestine, a link in Israel's traditional history. Beneath a Roman fort of the time of Vespasian he found a Greek city, and below that a town which may have been Beth-palet, mentioned in Joshua XV.

Prof. William Bade, Pacific School of Religion, reported the discovery of houses dating between 1100 and 1200 B. C., in the ruins at Tel el Nasbeh, which he believed to be the Biblical city of Mizpah.

C. Leonard Woolley, University of Pennsylvania-British Museum expedition to Ur, reported the finding of a royal tomb of unhewn limestone, containing four chambers; also deposits of silt and clay eight feet thick, which may be the remains of the flood described in Genesis. The Sumerians of Ur used the arch, apse, column, and dome. Panels unearthed show mules standing on their hind feet, drinking from goblets, and monkeys in upright position, serving as bartenders. The skull of a queen of an early Dynasty, who had a straight nose, regular features, and intelligence, was found. Fragments of walls, dating about 3000 B. C., tell of a temple of the Moon god lying at the foot of a smaller and older Ziggurat than Ur's, and an old cemetery yielded relics and data on the people of Ur 5,000 years ago.

J. W. Crowfoot, British School of Archaeology, identified Ophel, a burial place for Jewish kings.

P. L. O. Guy, University of Chicago expedition at Megiddo, announced plans to excavate beneath King Solomon's stables, in the hope of finding more remote communities in the lower strata.

The Danish Museum excavated Sellun, believed to be the site of Shiloh.

Miss Dorothy Garrod, British School of Archaeology, found in a cave on Mt. Ephraim bones and implements of the race represented by the Galilee skull. In another cave on Mt Carmel, she found tools of Old Stone Age times, though of a more recent culture than the finds at Mt. Ephraim.

Prof. Stephen Langdon, Field Museum-Oxford University joint expedition to Mesopotamia, announced that painted pottery and plate tablets, covered with picture writing, unearthed at Kish, show that it was founded by the Elamites.

Dr. David G. Lyon reported the excavation of the ruins of a dwelling of 400 rooms at Nuzi, near Bagdad. It contained a temple, baking rooms, lavatories, and a suit of bronze plate armor.

The University of Pennsylvania expedition at Beisan discovered a large basalt bas-relief, figuring lions and dogs in Babylonian style, and an iron chariot such as described in Joshua XVII.

The Museum at Stamboul undertook the excavation of the Church of St. John of the Studium.

An Italian expedition excavating the site of Philadelphia found Byzantine and Arab relics below the Roman stratum.

The Museum of Berlin excavated an old citadel and a series of temples at Pergamum, Asia Minor.

The Austrian Archaeological Society excavated the Basilica of St. John at Ephesus, built by the Emperor Justinian. It also unearthed a large swimming bath with mosaic floors, marble statues, and a central heating system. Remains of a church of the time of the Emperor Constantine were found in a still lower stratum.

The New York Metropolitan Museum announced the recovery of the statues of Queen Hatshepsut from the quarry into which they were thrown by Thotmes III. The work of putting together the remains of two granite sphinxes, two Kdeling statues, and fragments of three other pieces of sculpture was continued.

The Vienna Academy of Science reported the discovery of tombs and graves near Gizeh, in which were buried rulers and members of the aristocracy of a period antedating the Pyramid of Cheops.

Excavations at Djemila, Algeria, revealed a temple dedicated to the family of the Emperor Septimius Severus, together with a forum, an altar of the gods, and a market place.

Excavations of the cities of Oea, Sabratha and Leptis Magna, Phoenician trading centers, were continued by the Italian National Museum.

Alonzo W. Pond, Logan Museum, Beloit, Wisconsin, brought back from Algeria two human skeletons believed to be 20,000 years old.

An expedition of the University of Florence discovered a rock painting in the Marandellas district of Rhodesia, depicting a Bushman fighting Bantus. Beneath it is an older picture showing an Arab typically dressed.

Miss G. Caton-Thompson undertook the excavation of the ruins of Zimbabwe, Rhodesia.

Excavations at Chitaldroog, Mysore, revealed temples and inscriptions of the 11th and 12th centuries A. D., and fragments mentioning the founder of the Kadamba dynasty, 5000 B. C.

Anu Ghose, a Bengal geologist, discovered in Madras Presidency, India, a series of rock edicts of Asoka, Buddhist Emperor, from 264 to 228 B. C.

Excavations in Sind revealed a civilization contemporaneous with that of Ur.

ASTRONOMY.

The work of charting variations of solar radiation continued through the year at the National Geographic Society's Mount Brukkaros Solar Observatory, Southwest Africa, under the auspices of the Smithsonian Institution. The Society made a grant of $10,000 for the continuation of the work, bringing its total grants for the construction and operation of the Observatory up to $65,000. The work at Mount Brukkaros is synchronized with that of the Smithsonian Institution's other solar observatories in California and Chile. These researches now have progressed to the stage where Dr. Charles G. Abbot, Secretary of the Smithsonian Institution, is enabled to announce periodicity in the rise and fall of the amount of radiation in cycles of 11 and 15 months and of 2.15 and 11 years. The 2.15-year cycle has been recognized in the meteorology and crops of Europe for a century, and in the advance and retreat of glaciers. Dovetailing with these periodicity records are the results of the tree-ring researches of Dr. Andrew E. Douglass, referred to in the notes on Archaeology. Under the auspices of the National Geographic Society Dr. Douglass undertook to build up a chronology from tree-rings that would link up the civilization of Pueblo Bonito with the modern calendar, and found at the end that his records were equally valuable in making a weather chart for correlating weather changes with solar radiation changes as revealed at Mount Brukkaros and other stations. Basing his conclusions upon the results of the two lines of investigation, Dr. Abbot announced: "It now seems probable that, with the aid of these periodicities, the principal variation of the sun and the behavior of all that hangs upon it can be predicted for several seasons in advance."

Drs. Humason and Pease, Mount Wilson Observatory, reported the study of three nebulae at the bounds of the universe fifty million light years, or 300,000,000,000,000,000,000 miles away. Spectroscopic analysis of their light indicates that they are traveling at the rate of 4,900 miles, 4,600 miles and 3,100 miles respectively. Their velocity as interpreted by the spectroscope is in proportion to their distances from the earth. Since it is not believed possible that matter moves at such velocity, the conviction is growing among astronomers that the apparent velocities are illusionary, perhaps caused by distortions of light waves that might be accounted for through such a curvature of space as that predicted by Einstein.

Dr. Harlow Shapley, Harvard College Observatory, announced that the nucleus of our universe centers in the constellation of Sagittarius. It is 29,000 light years in diameter and 16,000 light years in thickness.

Dr. Adrian Van Maanen, Mount Wilson Observatory, announced that measurement of the parallax of 99 Hercules tends to confirm the conclusion of Mrs. Maud Makemson, University of California, that it is a triple instead of a double star.

Dr. Harlow Shapley, Harvard University, announced that the space between the various island universes is virtually clear of celestial bodies. He reported the location of several thousand of these new island universes; the discovery of approximately 1,000 faint and distant variable stars whose positions in the heavens do not remain fixed; the conclusion that our own galaxy is apparently whirling in space around a common center 300,000,000,000,000,000 miles from the earth.

Prof. A. S. Eddington, Cambridge University, announced that some regions of the sky are occupied by great clouds of calcium and sodium.

Drs. Pettit and Nicholson, Mount Wilson Observatory, developed a thermo-couple, weighing only one-thousandth of a gram, which they used in measuring the heat of distant stars. They found that the giant Betelgeuse, 27,000 times as large as the Sun, is the greatest heat-producing star.

Dr. Harlan T. Stetson, Harvard University, announced that the variations of latitude observed by astronomers seem to be due to the moon. Miss Margaret Olmstead calculated thousands of United States Naval Observatory latitude observations, taking into account the moon's position in each. The results showed that these latitude changes are not only a daily proposition, but a systematic one.

Dr. Ernest W. Brown, Yale University, announced, on the basis of 340 observations of the moon's obscurations of stars, that the earth apparently often abruptly increases or decreases its speed of rotation as much as 1-300th of a second a day. An effort is being made to correlate these changes in rotation periods with the frequency of earthquakes.

Dr. Seth B. Nicholson, Mount Wilson Observatory, announced that the temperature of the moon reaches 265° F. at high noon and falls to 196° below zero F. at the time of a total eclipse.

Dr. Paul S. Epstein, California Institute of Technology, announced that temperature measurements during a lunar eclipse indicate that the moon has a surface of some coarse material resembling volcanic ash.

Dr. C. G. Abbot, Secretary of the Smithsonian Institution, succeeded in observing, with a new type of radiometer of his own invention, the spectrum of the planets, Jupiter and Mars. He also reported a remapping of the solar spectrum, beyond the visible red. The new map gives 2,000 lines; the old one gave 550. The results are already being used, notably in the identification of the chemical elements in the sun.

Dr. Charles E. St. John, Mount Wilson Observatory, reported the existence of 58 elements in the sun out of 90 known in the earth, and 4,207 additional spectra lines in the sun due to other elements in the earth. The sun spectrum shows a total of 21,835 lines, of which 12,502 have been identified.

Dr. F. E. Fowle, Smithsonian Institution, announced that one of the two layers of ozone in the earth's atmosphere is due probably to ultra-violet

light from the sun, while the other shows a close relationship to sun spots.

The U. S. Naval Observatory party observing the eclipse of the sun on May 9, made 13 exposures of different lengths with its 62-foot camera, 46 exposures with smaller cameras, and motion pictures of the eclipse.

Yerkes Observatory reported the Schwassman-Wachmann comet to be a periodic one with an interval of 82 months between visits.

Forbes' comet was first observed by a South African astronomer on Wednesday, November 21.

Dr. Albert Einstein announced an extension of his theory of relativity in a way to unite the laws of the field of gravitation and those of electro-magnetism. He abandons the classical, physical conception that each body through its mass, causes everywhere in space a certain effect known as gravity, supplanting it with the view that gravity manifests itself only in the immediate surroundings of the body in what he calls its gravity field or area. Each body with its gravity area acts upon space in such a manner as to shape or reshape it. Accordingly, bodies derive their movements from the peculiarities of their gravity areas rather than from a general intereffect of gravity of all bodies upon each other. Similarly, each body in an electric condition is surrounded by an electric field or area, from whose peculiarities and permutations the laws of electric manifestations are derived.

A Flagstaff, Arizona, operator discovered an egg-shaped meteorite of stony type and containing over five per cent of sulphur in the form of iron sulphide.

BIOLOGY.

Ernest G. Holt, who headed a National Geographic Society expedition to Venezuela for the study of the migratory birds which spend their winters there and their summers in North America, joined the Brazilian-Venezuelan Boundary Commission party as a biologist representing the National Geographic Society in the international boundary survey. This new field of work is one of the most interesting and least known of the zoological zones of the New World. It lies beyond the territories of hostile tribes both in Venezuela and Brazil.

Mr. and Mrs. J. E. Williamson, Field Museum of Natural History, made studies of the undersea life off the Bahama Islands, using marine apparatus, including a flexible metallic tube, at the end of which is a steel chamber with a large glass window of special design. They secured photographs, motion pictures, and color sketches for ten undersea habitat groups at the Field Museum.

James A. G. Rehn, Philadelphia Academy of Natural Science, studying the migration of animal and insect life between North and South America, gathered much data upon the flow of life between the two continents across the Panama land bridge, and found numerous species of "stranded relics of these great and gradual movements," which aid in the study of the tremendous response of living creatures to climatic and other changes.

An Oxford University Exploration Club expedition went to British Guiana to investigate the wild life of the rain forest.

Dr. Waldo L. Schmitt, Smithsonian Institution, brought from Juan Fernandez Island a rare species of crab, and a spider never before found except in South Africa, New Zealand, and Australia. These, with botanical evidence heretofore gathered, indicate that this Chilean island belongs to Australasian land masses rather than South American.

An American Museum of Natural History expedition explored the valleys of the Negro, Cassiquiare, and Orinoco rivers, collecting 6,000 birds and 1,000 specimens of other fauna and flora.

The American Museum of Natural History sent out an expedition to search for the long-haired tiger in Siberia, and to collect a group of saiga antelope in Russian Turkestan.

Dr. F. B. H. Brown, Bishop Museum, Honolulu, announced that studies of plants of the dogwood family in South Sea islands indicate that in Cretaceous times seeds of the North American ancestors of these plants floated out over the ocean that covered much of our continent and were carried to these antipodean islands by currents which long have ceased to exist.

The Crane Pacific expedition, Field Museum of Natural History, started on a circumnavigating voyage of the Pacific.

William K. Vanderbilt began a world cruise to collect rare specimens of marine life.

The Gifford Pinchot South Seas expedition brought back a large collection of biological specimens, including a huge sea bat of the genus *Manta*, and many species of birds desired by the National Museum.

Dr. Lee S. Crandall returned from the wilds of Papua to the New York Zoological Park with a collection of 250 birds, including some rare species of birds of paradise.

Dr. Robert Broom, Victoria College, South Africa, announced a striking likeness between the skull measurement of the present-day Korannas and those of the "Bushveldt skull" found north of Pretoria with the bones of an extinct species of buffalo.

G. Proctor Cooper, Yale University, obtained logs of 130 species of trees, ranging from corkwood to ironbark, on the Firestone Rubber Plantations in Liberia, to be tested for strength and other properties in the Yale Forest School laboratory.

Henry C. Raven headed a joint Columbia University-American Museum of Natural History expedition to study the gorilla in its native habitat.

The Straus African Ornithological expedition brought back from Africa 300 species of birds, some new to science.

Dr. Alexander Wetmore, Smithsonian Institution, reported that the collections in the National Museum are appraised at $115,000,000, but could not be duplicated for twice that amount. One of the latest accessions is a collection of 300,000 insects willed to the Museum by Dr. Charles F. Baker, who collected them in the Philippines and Malayan countries.

Prof. W. G. McDougall, Duke University, announced that the behavior of rats and their descendants in a tank of water leads to the conclusion that a trait acquired in one generation seems to be transmitted to descendants. In the tank he placed a platform connected to dry land by two gangways, one brilliantly lighted but electrically wired so as to administer a slight electric shock to rats using it. On the platform he placed his rats and allowed them to choose between the two routes to shore. Rats of each succeeding generation seemed to learn more quickly than their predecessors the avoidance of the brightly lighted, electrically charged gangplank.

Dr. Sara E. Branham, U. S. Public Health Service, announced that disease carriers exist among mice just as among humans. Guinea pigs and wild grey rats gave no indication of such disease carriers.

Dr. Herman Eidmann, University of Munich, by putting paint on ants attending aphids and dabs of a similar color on the twigs where each ant was first seen, proved that each individual ant herder looks after its own particular herd of aphids from day to day during the season.

Dr. D. M. Whitaker, Stanford University, measured the temperature inside a single cell of a living organism, using a thermocouple, with wires less than 1-25,000 of an inch in diameter.

Prof. W. A. Kepner and J. W. Nuttycombe demonstrated that an almost microscopic animal, the *Microstomum*, remembers the habits of its ancestors 22 generations removed. Its normal food is the hydra. Kept therefrom for 22 generations it went through the same process in swallowing hydra and manipulating the latter's stinging cells that characterized its remote ancestors. A *Microstomum* of the 16th generation that knew no hydra, had the upper and lower ends cut off. The middle third of the body regenerated new ends and the resultant animal went through the same process as its remote ancestors.

Dr. W. R. Coe, Yale University, described experiments on the *Lineus*, a common sea-worm. Slices cut clear across the body at any place back of the creature's brain produced replicas of the original worm. Each of these slices split in two, or even into four pieces, develops into a perfect worm. One of these slices, taken from the forward end of the worm will, if partly split lengthwise, leaving the pieces attached to each other by one edge, develop two new heads, but will keep the same tail. On the other hand, if it be taken from toward the tail, it will grow only one head but two tails.

Dr. R. T. Renwald, Omaha, Nebraska, announced the development of a new race of chickens without wings or toenails. Their freedom from molting enables him to overcome the slack egg-laying periods in normal hens.

Dr. Oscar Riddle, by causing doves to lay an unusual number of eggs, produced females only. By crossing distantly related forms or species, he obtained males exclusively.

Dr. A. M. Banta, Carnegie Institution of Washington, in laboratory tests paralleling early spring conditions, produced 840 generations of water fleas, all females. Females alone in bottles produced only female young; where crowded together they produced both males and females, the proportion of the former increasing as the crowding became intensified.

Drs. Charles Sheard and G. M. Higgins, Mayo Foundation, announced that under ultra-violet rays eggs hatched from one to two days earlier than those incubated the normal way.

Dr. A F. Shull, University of Michigan, by the control of the amount of light received, produced winged or wingless aphids at will. Long periods of light alternated with short ones of darkness, increased the number of winged offspring, while short

light and long dark periods brought a predominance of wingless ones.

The U. S. Department of Agriculture announced that angle worms put through a process of "scouring" are taken much quicker by game fishes than untreated ones. The worms, placed in a container filled with moistened sphagnum moss for three or four days, become pink and transparent.

J. A. B. Nolla, Porto Rican phytopathologist, developed an anti-aphid spray loaded with the spores of a parasitic fungus.

The U. S. Department of Agriculture installed traps on a number of airplanes in order to discover the flight habits of destructive insects, including the pink boll worm.

Dr. F. H. Herrick, Western Reserve University, continued his study of the family life of the American eagle. From a tower 96 feet high he kept constant watch of the habits of the eagle. These eagles mate for life; one pair or its successors have occupied the same nest without break for 35 years.

Harvard University awarded $58,000 to 41 professors to carry on research projects. These projects include: color changes in the skin of semi-tropical fishes; the behavior of variable stars; city planning and zoning progress in the United States; the physics of the air; the nature of acidity; the properties of matter under high pressure; the ancient flora of Newfoundland

Miss Jane Goldschmidt, Smith College, demonstrated the primacy of sight over touch by wearing prism glasses for several days. Straight surfaces which through the glasses appeared curved, felt curved as well.

Dr. Robert Hegner, Johns Hopkins University, announced a high degree of similarity between the protozoa inhabiting the intestinal tracts of men and monkeys. The more distantly related animal species are the less similar are their intestinal protozoa.

Nutrition investigators at Cornell University announced that milk contains a vitamin essential to growth. The discovery resulted from studies in the feeding of young chicks with rations low in calcium and phosphorus.

Dr. Frederick S. Hammett announced that a compound of one atom of sulphur and one of hydrogen is responsible for the cell division which produces growth in plants and animals.

Sir A. D. Hall reported that the late William Bateson had found a method of preventing sugar beets and other root crops from going to seed too early. Prospective seed beets were exposed to ideal conditions for setting seed. Those that yielded to the temptation were rejected. Those that resisted were selected. When the latter finally bore seeds a dependable strain was ultimately developed from them.

Drs. T. H. Goodspeed and A. R. Olson, University of California, demonstrated that X-ray treatments of plants to produce new varieties and to hasten evolutionary processes can be given to the seeds, growing points, pollen grains, and egg cells, as well as to the germ cells themselves.

Scientists at the Boyce Thompson Institute have discovered that aster yellows, a destructive plant disease, is insect borne just as is malaria, yellow fever, and other human diseases. The virus is carried by leafhoppers.

A 1½% solution of ethyl-mercury-chloride was found efficient in treating seeds for smuts and other diseases.

Dr. Edward C. Jeffrey, Harvard University, announced that the Boston fern is a hybrid rather than a mutation or a "sport" of a non-hardy tropical fern.

E. F. Davis, Virginia Agricultural Experiment Station, announced the discovery of the plant poison in the walnut tree which prevents other vegetation from growing on the ground beneath it.

CHEMISTRY.

University of Illinois chemists produced from ordinary sewage and cornstalks large quantities of methane gas, useful in heating and as a substitute for gasoline. Household wastes were placed in a tank and three weeks later shredded cornstalks, boiled and soaked in water and lime, were added. In another week, this mixture began to produce gas in quantities sufficient for farm purposes.

Dr. George M. Rommel published a book, "Farm Products in Industry," printed on paper made entirely from cornstalk pulp, with the binding fabricated from cotton-seed hulls. He forecasts the day when the utilization of farm wastes may develop as remarkably as has the chemical processing of coal tar. A 100-page issue of the Danville, Illinois, Commercial News, and a 260,000 edition of the Prairie Farmer were published on cornstalk paper.

W. R. Brown, Berlin, New Hampshire, developed a method of staining woods by introducing diluted solutions of dyes into the sap flow. The coloring matter reacting with oxidizing ferments in the cell sap, stains the wood so that it resembles walnut, mahogany, or any other wood prized for the beauty of its grain, and renders the wood relatively immune to decay and insect damage.

Iowa State College chemists succeeded in producing a sugar 300 times as sweet as cane sugar from corncobs. They also developed many perfumes and food flavors from the same source, and extracted from cobs an anaesthetic approximately as effective as novocaine.

A process of ripening green fruits and vegetables in a few hours by passing ethylene gas over them was demonstrated.

Agnes Morgan and Anna Field, University of California, announced that dried fruits treated with sulphur dioxide retain their ability to prevent scurvy, while similar dried fruits not thus treated lose their vitamin value.

Adolph Hawerlander, German chemist, developed a process for converting cornstalks, excelsior, wood chips, and crushed sugar cane into a substitute for wood which is more fireproof and waterproof than lumber and its equal in tensile strength.

Dr. Horace Terhune Herrick and O. E. May, U. S. Department of Agriculture, searching for tartaric acid molds, discovered one that produces gluconic acid. With it they can make calcium gluconate, the only calcium salt which can be injected between the muscles in the treatment of tuberculosis and rickets without producing abscesses, at fifty cents a pound, as against $150.00 a pound under chemical methods.

New methods of making acetic acid and its compounds from alcohol, resulting in a lower cost for acetate photographic films, is expected to bring about their substitution for cellulose nitrate film.

Dr. J. F. Norris, Massachusetts Institute of Technology, described a new alcohol made under the name of isopropyl. In humans it produces none of the exhilarating effects of grain or ethyl alcohol.

A plant at Lehigh, N. D., employing the Lurgi process for briquetting low grades of bituminous coal, expects to solve the problem of the utilization of lignite, by low-temperature carbonization. The process yields by-products which largely offset the cost of preparing the fuel.

A process was developed for the conversion of shale oil into rubber more resistant to abrasion than natural rubber.

Dr. H. I. Jones developed a poison gas, cacodyl isocyanide, which is so deadly that small amounts of it will destroy whole armies. He also demonstrated a new metal called beryllium which has twice the tensile strength of steel, yet weighs only a little more than one-third as much as aluminum. It is so hard that it will cut glass and resists scratching with a sharp file.

Dr. A. O. Jaeger announced two new and cheap processes for the purification of anthracene. Despite the immense production of coke and coal tar in America our anthracene had to be imported, which made this country dependent upon Europe for alizarin, from which Turkey red, orange, violet, and other colors are made. The introduction of a new catalyst is the key to the two processes.

The du Pont Company fitted out a lake type steamer capable of extracting the bromine from 7,000 gallons of sea water in a minute.

A new alloy which cuts steel, glass, and porcelain was demonstrated at Bridgeport, Conn. It is a combination of tungsten, carbon, and cobalt.

Fluorine produced electrolytically at Cornell University by Profs. Bancroft and Jones was found to react explosively with benzine.

Leon McCulloch announced that aluminum boiled in milk of lime to which a little calcium sulphate is added acquires a dead-white finish.

Harvard University chemists demonstrated that even when stored in pyrex glass helium gas seeps through at the rate of about one per cent a year.

Lyman Chalkley, Jr., announced the development of luminous fly paper.

EARTHQUAKES AND VOLCANOES.

The Carnegie Institution of Washington announced a program of world research on the origin of earthquakes, headed by Dr. Bailey Willis and Dr. N. L. Bowen.

Harvard University installed two new seismographs. Its observatory will cooperate with the Canadian government stations at Ottawa, Toronto, and Halifax.

Dr. William Bowie, U. S. Coast and Geodetic Survey, announced that the growing number of seismological observatories encourage the hope that the forecasting of earthquakes may become possible.

Maxwell W. Allen, studying more than 1,200 earthquakes occurring in California since 1812, found that most of those which occur on a fault line running northwest take place when the moon is in the western sky, or in the same position on the opposite side of the earth. Shocks in the east-west faults cluster in the opposite quadrants.

Dr. Thomas A. Jaggar, Hawaiian Volcano Observatory, successfully predicted that either Kilauea or Mauna Loa, Hawaii's largest volcanoes, would become active in 1929, and that Hualalai, one of the quietest of all known volcanoes, would show eruptive activity. He announced also that the 485 known volcanoes discharged 100,000,000 tons of hydrochloric acid annually.

Stanford University built a massive shaking table upon which to demonstrate the factors of destructiveness in earthquakes.

Chronology—October, 1928: 3—The steamer Carisso reported large fields of volcanic ash and pumice 350 miles southwest of the Fiji Islands. 9—Mexico City was shaken by a strong shock whose epicenter was in the State of Oaxaca. 12—Corinth, Greece, was baldy shaken. 22—The region of Corinth was shaken again. At Thalero 42 houses were destroyed and 35 at Melissa. 31—El Paso, Texas, was visited by the first earthquake in five years. Houses collapsed at Santa Rosalia and Chihuahua.

November: 4—More than 100 explosions were recorded in submarine eruptions near the island of Krakatau. 20—Sebastopol, Crimea, was visited by a fairly severe earthquake. Antofagasta, Chile, reported a quake on the same date. 23—Buildings collapsed at Jassy, Rumania, during an earthquake.

December: 1—The S. S. *Magalda*, en route from Talcahuano to Tocopilla, Chile, felt three heavy bumps as if it had struck bottom, while passing over the center of an earthquake. The towns of Talca, Constitucion, and Chillan were badly shaken by this quake. Their toll was—dead, 218; seriously injured, 257; slightly injured, more than 2,000; homeless, 20,000. 19—Mindanao Island in the Philippines was visited by a violent earthquake. The estimated damage was $100,000. Cotabato, swept by a resulting tidal wave, was practically destroyed.

January, 1929: 2—In the province of Kyushu, Japan, a severe earthquake destroyed a number of houses and opened cracks in many roads Asosan Volcano had been showing signs of activity. 7—The volcano Calbuco, Chile, spouting torrents of burning lava, set fire to nearby forests. 12—An earthquake, centered in the Sea of Okhotsk, off northeastern Siberia and west of the Kamchatka peninsula, was one of the severest of recent years. 13—Two persons were killed, several injured, and a number of buildings were destroyed in the province of Shansi, China. 17—Lecce, Italy, felt a slight earthquake, the town of Cumana, Venezuela, was destroyed, and Puerto Barrios, Guatemala, was shaken. 19—Many buildings of Huaethuas, Peru, disappeared in an enormous crack in the earth. 20—Many people were killed in Shansi province, by an earthquake which caused buildings to collapse and destroyed railroads. 21—Fairbanks, Alaska, was visited by the longest and severest quake in its history.

February: 1—Several villages around Samarkand, Asia, were partially destroyed by an earthquake. 11—Many persons were killed and injured in the department of Junin, Peru, when an earthquake, accompanied by a torrential rainfall, caused a river to overflow. 15—The ocean floor west of Central America was shaken. An earthquake of slight intensity was felt over a zone 300 miles wide in Montana. 20—Kilauea Volcano was in active eruption. Fountains of lava spurted to the height of 200 feet. Three tremors were reported in Salvador and Guatemala.

March: 1—A series of shocks occurred around Prince Rupert and southern Alaska. Tidal waves deluged the coast of Choshi, Isle of Nippon, destroyed entire villages, caved in the coast line for many miles, and buried many villages to a depth of 12 feet. 10—A severe earthquake damaged railway tracks at Canterbury, New Zealand, and was felt at Christchurch. 13—The town of Chirpan, southern Bulgaria, was visited by an earthquake which caused a building to collapse and injured a number of people.

April: 28—Kalavryta, in the Peleponnesus, was shaken by a series of 11 earthquakes which damaged houses and caused panic.

May: 2—The Khorasan district of northeastern Persia was shaken by a series of earthquakes lasting 3 days. Several villages were destroyed and unofficial estimates reported 2,000 dead and many injured. In the cities of Shirwan and Bujnurd, 700 buildings were demolished. The same quakes reached to Ashkabad, in Russian Turkestand. 19—The region of Cuschak, Adana, Sivas, and Trebizond sustained earthquake shocks of severe intensity. Thirty-nine persons were killed and many injured at Soucherri, and 1,000 homes were destroyed or badly damaged. Northern Anatolia was also shaken, while 14 were killed and 6 injured in the region of Shebin-Karahissar. 23—Mendoza, Argentina, reported 8 persons injured and the walls of many buildings cracked as a result of a series of strong earthshocks. 26—The wreck of the S. S. *Aleutian* was attributed to bottom changes resulting from a submarine earthwuake in the floor of Uyak Bay, Kodiak Island, Alaska. Masset, Queen Charlotte Islands, B. C., reported a violent earth tremor. Its epicenter was believed to be about 100 miles southwest of Sitka. The disturbance continued on the 27th and 28th, at Lockport. The peak of a high mountain was shaken down near Sanspit. Some 500 feet of sandy beach slid into the sea. 29—An active volcano was discovered near Cruz De Piedra Canyon, department of Carlos, Argentina. 30—During an earthquake, whose center was about 600 miles west of Buenos Aires, 15 persons were killed and 60 injured at Villa Atuel, and 18 were killed and 40 injured at Las Malvinas. Both towns were badly damaged.

June: 4—The volcano Nevado, near Mendoza, Argentina, was in eruption and Vesuvius was renewing its activity. Violent earthquakes shook Russian Turkestan and the northern part of Afghanistan, centering between Tarnez and Shirabad. 13—An earthquake of unusual duration shook the central and southern Philippine Islands. The volcano Komagatake, Japan, became active after two years of quiescence. Earth tremors in the region followed. 17—New Zealand was visited by a series of earthquakes, which continued to the 20th. Fifteen persons were killed and much property damaged. A section of the ocean bed at the White Cliffs of Karamea rose 100 feet. 28—Ambrym Island, New Hebrides, sustained a severe quake. The volcano on the island later became very active, forcing some 400 natives to take refuge on Malekula Island.

July: 5—Six heavy earthquakes were reported in three days beginning July 5 Five occurred in the north Pacific, near the Aleutian Islands, and the sixth off the Azores, in the Atlantic. 8—Los Angeles, Calif., and its suburbs were shaken by a series of shocks. Property damage at East Whittier amounted to $50,000. Four persons were injured at Santa Fe Springs. 15—The Khorasan district in Persia was revisited by a severe tremblor. A number of villages were destroyed. 18—Florence and Bologna, Italy, reported damage from an earthquake. Melilla, Morocco, was also shaken. 19—Belgrade, Jugolavia, reported a somewhat severe earthquake. The volcano Komagatake, Japan, began a new eruption on the same date. 22—It was announced that earthquakes in Anatolia, with their resultant landslides, caused 1,000 deaths and made 10,000 people homeless. 26—Sixty persons were reported killed and much damage done in the towns of Moyurgo, Tambillo, Machachi, and Latacunga, by an earthquake which shook Ecuador.

August: 3—Curico, Chile, was visited by a heavy tremblor. Succeeding shocks on August 5 shook Santiago, Valparaiso, and other central Chile towns. 12—About 100 chimneys were shaken down in Attica, N. Y., by earth tremors which reached as far east as Springfield, Mass., as far west as Ashtabula, Ohio, as far south as Franklin, Penn., and as far north as Toronto, Can.

September: 17—The ocean bottom off Queen Charlotte Island was the center of an earthquake. Mont Pelee, Martinique, was active. 19—Krakatau erupted violently, the eruption being attended by a series of earthquakes. Earthquakes shook the volcano Hualalai, Hawaii, quiescent since 1801. 20—Anatolia was badly shaken by a severe tremblor centering in the Gumushane district. 21—The western section of Hawaii reported a succession of quakes September 21 and 22. The disturbances continued on September 24. On September 26 seventy shocks were reported.

ENGINEERING.

The Bell Telephone Laboratories announced a new supermagnetic alloy, perminvar. It is a heat-treated combination of cobalt, iron, and nickel. The Laboratories also developed a process for delaying speech on transoceanic radio circuits where certain contact-closing devices must operate ahead of the speech waves.

The General Electric Co. developed a toy engine which responds automatically to such orders as "Go ahead, Casey," "Back up," and "Stop." A special selector determines the polarity of the rails in the track. More than two syllables cause it to provide forward movement. A two-syllable order reverses the polarity and the train, while one syllable breaks the circuit. The device may be used in elevator controls or in making furnace doors open or shut in response to a command spoken from a telephone.

The Bell Telephone Co. announced plans for a transoceanic telephone cable, made possible by the development of permalloy and special station devices which make unnecessary repeater stations such as are used on long land lines.

A new transatlantic Western Union cable was put into operation between the United States, Germany, and Italy.

Dr. Herbert Ives, Bell Laboratories, demonstrated television in color. Added to the mechanism used in ordinary television are a new type of photoelectric

cells at the sending end and neon and argon lamps at the receiving end.

Capt. Richard H. Ranger demonstrated a new photo-radio recording process in which the impression is made on a new heat-sensitive, wax-coated paper by fine jets of hot air controlled by the incoming radio signals. These jets burn away the wax in proportion to the intensity of the signals. An ink roller brushed over the sheet brings out the finished picture instantly and permanently.

Echo-sounding apparatus used for detecting submarines during the World War was successfully employed by trawlers to locate schools of herring.

The Canadian National Railway linked together a running train and the main office by radio. A conversation was continued for two hours.

Telephone engineers have named the unit of efficiency in telephone circuits "bel," just as "ohm" is the unit of resistance. The new unit name is a tribute to Dr. Alexander Graham Bell.

Dr. Georges Claude developed a mechanism for securing power from changes of temperature in ocean water. A vacuum boiler filled with distilled water, by its contact with the surface water, acquires the latter's temperature, at which, in the presence of a vacuum, the distilled water boils, generating steam. Another boiler, filled with cold water, acts as a condenser. Steam from the vacuum tank rushes towards this, driving a generator 6,000 revolutions a minute with a force equal to that of a 300-foot fall of water.

Sir Charles Parsons announced important improvements in reciprocating steam engines, and Alfred Buchi, a Swiss engineer, announced improvements in the Diesel engine which he says will increase its efficiency 50%.

A new 200-horsepower, oil-burning aircraft engine was demonstrated to members of the National Advisory Committee for Aeronautics at Langley Field. The engine consumed only $4.60 worth of fuel flying from Detroit.

Western owners of timber land used airplanes to sow grass seed over burned-over slashes left after lumbering operations.

Beryllium, which weighs only a little more than one-third as much as aluminum, and only a little more than one-tenth as much as steel, the while it is nearly as strong as steel, is being considered as a metal in future aircraft construction.

The National Advisory Committee for Aeronautics announced that rustproof steel is as easily welded by the acetylene-oxygen process as ordinary steel and is even more rustproof after welding than before.

President Thomas S. Baker, Carnegie Institute of Technology, predicted that the coal car is doomed to have its place taken by power and pipe lines, the one transporting electricity and the other liquefied coal to centers of industry.

The United States Navy Department began the building of a new dirigible airship with nearly twice the capacity of the Graf Zeppelin.

The General Electric Co. developed a traveling electrical machine with which it is hoped to discover methods of combating lightning, one of the worst enemies of high-tension transmission. The company also produced artificial lightning of 5,000,000 volts in its laboratories.

Dr. Paul E. Klopstog developed a new thermo-magnet consisting of a copper bar shaped somewhat like a capital "R." One part is placed in ice water and the other against a gas flame. The difference in temperature causes a flow of electricity sufficient to bring about a magnetism capable of supporting the weight of two men

A Russian rubber factory employed small amounts of radium to ionize air and thus prevent the accumulation of large friction-developed charges of static electricity.

U. S. Navy engineers utilized a new underwater, high-explosive tool, which drives a steel stud 3½ inches by ½ inch through a ½-inch steel plate at a single blow. With it emergency patches may be put over rents in the hulls of submarines or holes made in sunken craft for supplying the crew, through tubes, with water, liquid food, and air.

Contracts were let for a diversion dam and siphon spillway on Ware River for the development of Boston's water supply. The siphon spillway will automatically regulate the amount of water taken from the river.

The Great Northern Railway opened its new tunnel in the Cascade Range, which was built at a cost of $14,000,000. This tunnel is the longest in the New World and is exceeded in length in the Old only by the Simplon, St. Gothard, Loetschberg, and Mt. Cenis.

A new car ferry capable of carrying 92 freight cars was built for New Orleans-Havana service. The cars are lifted into position by cranes.

Dr. Herbert Ives demonstrated a new camera which makes photographs in which objects are seen in their three dimensions.

Prof. Arthur C. Hardy, Massachusetts Institute of Technology, demonstrated a new color-measuring instrument which analyzes colors many times more accurately than the human eye.

Dr. Frank M. Strong, Syracuse University, developed a blowpipe employing powdered aluminum instead of hydrogen or acetylene gases.

Dr. Percy W. Bridgman, Harvard University, produced pressures of 600,000 pounds to the square inch, under which paraffin became harder than machine steel and rubber was molded into a die for metal stamping.

GEOGRAPHY.

Asia—Dr. Joseph F. Rock continued his explorations in western China, particularly along the Chinese-Tibetan border, under the auspices of the National Geographic Society. Upon the return of the Roosevelt-Field Museum expedition from its quest of the giant panda, Kermit Roosevelt reported that the friendly contacts made by Dr. Rock with the officials of the region they traversed, during his years of research there, had been of great aid in penetrating the territories their expedition covered. The 317 volumes of Choni printed classics presented to the Library of Congress by Dr. Rock as a result of his previous expedition for the Society, are now among the priceless treasures of the Library, due to the fact that in the warfare in China, the great Buddhist monastery at Choni, which housed the engraved wooden blocks 500 years old from which the classics were printed, was destroyed by the Moslems, who massacred the inhabitants of Dangar. The Goden Gate Park at San Francisco reported that the Central Asian rhododendrons presented to it by the National Geographic Society and Dr. Rock had come into bloom and won wide admiration as an addition to the flowering flora of the West.

The Soviet Government dispatched eighty scientific expeditions during 1929. These included: economic surveys, such as searching for mica and vanadium in Turkestan and the Lake Baikal district, and exploration of the arid regions of Stalingrad and Astrakhan provinces with the possibilities of soil reclamation in view; archaeological studies in the Crimean peninsula and the North Caucasus district; ethnological investigations in the territory of the Ossetes and Ingushetes, in the Caucasus Mountains, of the Buriat Mongols, in the Far East and of the primitive tribes of the Altai Mountains in Siberia.

A Russo-German scientific expedition, exploring a hitherto unknown area of 1,000 square miles in the Pamir region near the frontier of Afghanistan, announced the discovery of 50 mountain peaks, ranging from 18,000 to more than 25,000 feet, and 30 big glaciers, including one more than 46 miles long—longer than Karakoram Glacier, heretofore believed to hold the world's record for length.

The Soviet Government dispatched a large commission to make an economic survey of Kamchatka, Sakhalin and Primorski.

Dr. Louis Ligeti, University of Budapest, began a three-year trip to Central Asia in the hope of tracing the fate of the tribes of Genghis Khan and of investigating the relationship between the Hungarian language and the tongue spoken by those tribes.

Col. Theodore and Kermit Roosevelt returned from an expedition to China and Indo-China, bringing back with them the only complete skeleton of the giant panda. Other rare species brought home included a group of golden monkeys, a blue sheep, a gaur, and a water buffalo.

Capt. John B. L. Noel and Walter Wood headed an expedition of the American Geographical Society to the Himalaya region of Asia to make a photographic and topographic survey of parts of the Kinchinjunga Mountains.

Philip C. Visser, Netherlands Foreign Service, headed an expedition into the Karakoram Mountains and the Central Asian range, to study the meteorology, botany, ornithology, and geology of the region, and also to map the territory.

The Soviet ice breaker, *Litke*, made a long cruise from the Black Sea to Vladivostok and Wrangel Island, carrying six students of oceanography.

Dr. Sven Hedin, Swedish explorer, returned to China to continue his researches in the fields of meteorology, biology, and geology.

A Russian expedition discovered a new mountain range more than six hundred miles long in the province of Kolyma. It covers an area as large as the Caucasus region, and was named "Cherski Range."

Africa—The Field Museum of Natural History's expedition under the leadership of Capt. Harold White, crossed Abyssinia and explored the districts of Arussi, Stefanie and Rudolf. In the Stefanie area, no water has fallen for eight years.

James L. Clark, American Museum of Natural History, and G. Lister Carlisle headed an expedition to Africa to obtain a representative group of lions for the Museum, and a collection of photographs showing African wild animals in their natural state. The

tions are to be mounted for the Akeley African Hall of the Museum and are said to constitute one of the finest groups ever brought to America.

The Frederick H. Rawson-Field Museum Ethnological expedition to West Africa collected much material in the Portuguese colony of Angola. It found great difficulty in making dictaphone records of the native language of the Ovimbundu people, to whom the dictaphone is "black magic."

Captain Owen Tweedy crossed the Sahara Desert in 5½ days in a narrow-tired motor lorry. His expedition left Rejaf on the upper Nile and reached Algiers, 5,500 miles away, in seven weeks. Its purpose was to test the possibility of a trans-African route for the ordinary traveler.

Dr. A. S. Barrett, Milwaukee Museum expedition leader, returned from a 10,000 mile trip through Kenya and Tanganyika, bringing much of museum material.

The Duke of the Abruzzi traced the sources of the Webi Shebeli river in Abyssinia and found the head springs in the region of Sidamo, near Lake Margherita.

North America—Rev. Bernard H Hubbard, S. J. climbed Mt. Katmai Volcano and visited the Valley of Ten Thousand Smokes in Alaska. He found a hidden lake in the crater of Mt. Katmai and reported that activity in the Valley of Ten Thousand Smokes is waning. The 1912 eruption of Mt. Katmai was studied by a series of expeditions of the National Geographic Society between 1912 and 1919, and the Valley of Ten Thousand Smokes was discovered and studied by these expeditions.

Henry B. Collins, Jr., Smithsonian Institution, excavating a mound on St. Lawrence Island, Alaska, found the bodies of six children, carefully dressed in fur and feather garments, frozen and encased in ice. Objects displaying the finest art in carving and design, from the oldest level in the mound, represent the golden age of Eskimo culture. The modern St. Lawrence Indian and the Siberian Eskimo speak the same dialect and both are believed to have their origins in the Stone Age people of northwestern Alaska.

The Canadian Government's aviators mapped 53,000 square miles of territory during the 1929 season.

The U. S. Hydrographic Office made an aerial photographic survey of the entire northern coast of Cuba from Nuevitas Bay to Cape Maisi. Following the completion of that survey the unit which did the work undertook an aerial reconnaisance of the Gulf Coast from New Orleans to Brownsville, Texas.

South America—Gen. Candido Rondon, engaged in marking Brazil's northern boundaries, announced the discovery of a new peak 1,640 feet high, on the frontier between Brazil and Dutch Guiana.

Dr. Herbert S. Dickey announced the discovery of a hitherto unrecorded Indian tribe in a region between the Tomo and the Meta Rivers, Colombian tributaries of the Orinoco. The only food they raise is manioc. They fashion their huts, gourds, and hammocks, and make their liquor, from the moriche palm.

Wilhelm Plichta and Wilhelm Kaap, German explorers, reported the discovery of connecting tributaries of the Amazon and La Plata, in the Brazilian province of Matto Grosso. The similarity of the fish life of the two streams long has been accepted by geographers as evidence of such a connection.

Jose Mario Barone, former Italian aviator, drove an automobile from Rio de Janeiro to New York. It took him two years to make the trip.

Europe—The National Geographic Society issued a new map of Europe, giving all place names in the language of the countries in which they are found. It is printed in six colors, on a scale of 1 to 6,000,000, and contains more than 8,000 place names. The data for the correct spelling of every name appearing on the map was furnished by the embassy and legation officials of every European country accredited to Washington. The work of preparing, editing, and printing this map covered a period of three years. A cross index has been prepared by which the reader can follow all the name changes that have resulted from the changes of sovereignty and language incident to the World War and the Treaty of Versailles.

Oceanographic—Dr. F. A. Vening-Meinesz, Dutch geodesist in charge of an expedition aboard the Navy submarine S-21, making studies of gravity pulls at sea, announced that the studies made in the Gulf of Mexico and the Caribbean Sea practically quash the theory that the earth crust of North America is floating westward on the subcrustal viscous substance which forms the interior of the earth. He had proposed that theory through studies made off the Pacific coast where he had found a distinct pressure against the earth crust beneath the Pacific. In the Atlantic he had found a similar condition. Dr. Vening-Meinesz also stated that it was ascertained that the heavy deposits of silt brought down by the Mississippi River are not creating a heavy gravity load, but that these deposits are being kept in equilibrium through compensating sediments.

Dr. William Beebe continued the work of his Bermuda oceanographic expedition. When he last reported he had collected 3,600 individual fishes, representing 90 species, drawn from depths varying from 400 to 1,400 fathoms.

The Carnegie Institution of Washington announced that the *Carnegie* had discovered two submarine ranges of mountains off the coast of South America. One, off the coast of Ecuador, extends 10,000 feet above the ocean floor; the other lies off the Chilean coast.

The Swedish Geographical and Anthropological Society sent out an expedition to investigate the Gulf Stream and to map the edge of the polar ice at the Bering Sea, Spitsbergen, and the east of Greenland.

A British expedition under Dr. C. M. Yonge, engaged in studying the animal life of the Great Barrier Reef, reported that trochus shells and sea-slugs, the former used in the manufacture of pearl buttons, and the latter as an article of diet in China, offer an excellent opportunity for commercial exploitation.

Capt. J. P. Ault, Carnegie Institution of Washington, announced that on the *Carnegie's* present three-year cruise, evidence has been found that the north magnetic pole is "wabbling" slightly.

Harry L. Shapiro, American Museum of Natural History, headed an expedition to Polynesia to make a racial survey.

A bottle thrown overboard off Lower California, September 27, 1927, was picked up in Philippine waters February 12, 1929, having drifted 8,300 statute miles. The longest drift on record was made by a bottle thrown overboard in the southern Indian Ocean May 31, 1909, and picked up off the tip of Cape Horn, May 19, 1912, having drifted 11,820 statute miles, air line measurement.

Alain Gerbault, former French tennis champion, ended a six-year, single-handed cruise around the world in his twenty-five foot sloop, *Fire Crest*.

Four Cornell University men, Carl L. Weagant, skipper, crossed the Atlantic in a forty-six foot ketch, making the Azores in twelve days.

Edward Miles, Newark, New Jersey, in a two-masted, twelve-ton sailing boat, crossed the Atlantic Ocean from New York single-handed, making the voyage from New York to Gibraltar in 44½ days.

Arctic—Commander Donald B. MacMillan gathered evidence in the Arctic that the present ice-cap of the northern regions is receding rather than advancing. He found that it is a surviving remnant of the great Pleistocene ice-cap which extended as far as Pennsylvania and Ohio, and covered more than 4,000,000 square miles of the earth area to a depth of 5,000 feet. For 35,000 years it has been shrinking until today it consists of two small areas, one of which covers about 400 square miles, and the other about 300 square miles. Photographs were made of the southern border of the remaining ice areas and Commander MacMillan expects from these to be able next year to measure the rate of recession. Other scientists attached to the expedition gathered many specimens of the flora and fauna of the region visited.

A large ice-free area was discovered adjacent to the Northwest Fjord at the bottom of Scoresby Sound, on the eastern shore of Greenland. Foxes, musk oxen, and bears occupied the area in large numbers, and the region contains the ruins of numerous Eskimo habitations.

GEOLOGY.

Several acres of petrified trees of the coal-forming ages, some 10 feet in diameter and more than 100 feet long, were discovered on Indian Coulee, near Savage, Mont. All lie in the same direction, apparently having been uprooted by a violent southeast wind.

The U. S. Department of Agriculture announced that each year more than 513,000,000 tons of soil reach the sea from the farms of the United States, of which the Mississippi River system alone contributes 428,000,000 tons. The phosphorus, potassium, and nitrogen contained therein is worth more than $2,000,000,000 at current market prices.

University of California geologists found near Redding, Calif., ten real pearls dating from the days of the dinosaurs, which conformed in structure to the modern variety, and were produced by molluscs related to the present pearl oyster.

Sir Ernest Rutherford, after a study of the lead content of broggerite, a rare Norwegian mineral, as revealed by Dr. F. W. Aston's analysis, declared that the earth is approximately 3,400,000,000 years old.

MEDICINE.

Dr. William J. Mayo announced that susceptibility is an important factor in cancer. He believes that in chronic irritation the tissues involved try to heal the breach of continuity by normal cells, but that if the irritation is long-continued, cells that are more and more immature are rushed to the rescue, until in susceptible persons the cells continue an unlimited functionless division.

Dr. J. A. Murray, Imperial Cancer Research Fund, announced that experiments with rats indicate that diet is not an important factor in the causation of cancer.

The Graf Zeppelin brought from Germany cultures of cancer cells of a special rat sarcoma type that could not have survived a long steamship voyage across the Atlantic.

It was announced that the declining death rate from tuberculosis since 1900 has resulted in the saving of 140,000 lives annually.

Dr. M. McConkey, New York State Hospital for Incipient Tuberculosis, announced that a chilled beverage of cod liver oil floating on tomato juice, served as an after-meal liqueur to persons suffering from tuberculosis, often completely relieves the intestinal symptoms of the disease.

Dr. Florence R. Sabin, Rockefeller Institute for Medical Research, announced that a germ-free fat obtained from tuberculosis germs and similar in composition to food fats, caused the characteristic tubercles of the disease.

Dr. William C. White, U. S. Public Health Service, announced that a new sugar isolated from tuberculosis germs injected into a tuberculous animal causes death in four or five hours. A well animal similarly treated shivers, runs a temperature, and loses white blood cells.

Dr. Leroy U. Gardner, Saranac Lake Laboratories, reported that silica particles aggravate tuberculosis of the lungs more than any other known dust. Coal dust, on the other hand, fails to produce any such aggravation.

Drs. Cyrus C. Sturgis and Raphael Isaacs, University of Michigan, found that an ounce of extract of dried, ground hog's stomachs is as effective in the treatment of pernicious anemia as a pound of raw liver or three ounces of the most concentrated liver extract.

Dr. P. D. McMaster and Dr. D. R. Drury, Rockefeller Institute for Medical Research, proved that the liver is the chief source of fibrinogen, the main factor in the coagulation of the blood.

In tests of the aqueous extract of liver in pernicious anemia, 84% of the patients were brought back to health, according to Health Commissioner Wynne of New York.

Dr. Wendell H. Griffith, St. Louis, announced that whole dried yeast has a marked effect on the utilization of food, while a watery extract of liver increases the appetite. White rats with yeast added to their diet consumed only 9% more food but increased 47% in weight.

Dr. L. Mirvish, University of Cape Town, announced that experiments with cereals indicated that rickets is not purely a result of too little vitamin D, but is primarily due to a lowering of the amount of lime in the blood.

Dr. Alfred F. Hess and his associates announced that the antirachitic potency of cod liver oils is in inverse ratio to the quantity of oil in livers. Young rats showed that oil from "poor" livers was 200 times more potent than high-grade oil.

Dr. David H. Thompson, Illinois Natural History Survey, announced that "knothead" is a rachitic disease of the carp due apparently to the fact that when its food is produced under polluted water conditions there is a dearth of those plants which contain vitamin D.

The U. S. Public Health Service continued researches for vitamin P-P, the pellagra-preventing substance first discovered by the late Dr. Joseph Goldberger.

Dr. Oscar Riddle, Carnegie Institution of Washington, summarized experiments in feeding salamanders with the anterior pituitary gland of other animals by which they were, at will, maintained as water animals, transformed into land animals, or developed to double normal size. He believes that with the pure hormone of this gland, the stature of human beings may be regulated.

Drs. John J. Abel and H. Jensen, Johns Hopkins University, announced the isolation of the hormone that controls sugar in the human body. It is found in insulin and represents the fourth of the hormones definitely isolated, the other three being those of adrenalin, thyroxin, and pituitrin. A research is now going forward for the identification of the substances constituting the hormone with the hope that it may be synthetically and therefore cheaply produced.

Dr. R. G. Harris, Long Island Biological Laboratory, announced the isolation of a hormone which plays an important role in feminine health, from an internal gland secretion which forms an essential principle of small bodies called *Corpora lutea*.

Prof. Hans Fischer, Munich, Germany, announced the isolation of the ferment of respiration, a hemin compound, the synthesis of which makes possible the artificial production of hemoglobin, the red coloring matter of the blood.

Dr. Ruth Tunnicliff, Chicago, announced a simple new test for detecting carriers of scarlet fever, by which the organism can be identified in one or two days.

A new smallpox immunity test announced by Dr. Sanford B. Hooker, consists of an injection into the skin tissue of heat-killed, diluted virus.

Dr. Wardner D. Ayer treated 129 cases of infantile paralysis with a newly developed serum. Ninety-six made complete recoveries, twenty-five developed paralysis and eight died. Of the twenty-five who developed paralysis, only eleven failed to make complete recoveries. Of the eight who died, three received the serum too late and three did not receive enough.

Scientists at the University of Wisconsin isolated the organism that causes septic sore throat and traced several epidemics to milk from cows that have a condition known as mastitis.

Undulant fever has spread to all of the States excepting West Virginia and Wyoming. The disease is acquired from the milk of infected cows or goats, or from other infected animals.

Dr. R. G. Green and E. M. Wade, University of Minnesota announced that rabbit tularemia also attacks cats, muskrats, grouse, quail, and ring-necked pheasants.

Dr. James A. Doull, Johns Hopkins University, announced preliminary results in the study of the common cold.

Studies in the Philippines by the U. S. Army Medical Department Research Board indicate that leprosy is an insect-transmitted disease. The Board hopes to ascertain whether it can be transmitted by contact.

Dr. David I. Macht, Johns Hopkins University, reported a toxin in the blood of leprous individuals which serves to differentiate leprosy from the blood serum of tuberculosis which it resembles.

Bacteriologists of the Rockefeller Institute of Medical Research isolated the germ of Oroya fever or *Verruga peruviana*, a disease that afflicted the Incas of Peru and has continued down to the present time in some of the clefts of the Andes. It is transmitted by a blood-sucking gnat of the genus *Phlebotomus*.

Dr. Warren K. Stratman-Thomas headed an expedition to Africa to test six new drugs with which he hopes to be able to arrest the ravages of sleeping sickness.

Dr. Paul O'Leary, Mayo Clinic, announced that thirty-eight out of one hundred paresis victims were restored to health by the new malaria treatment.

Dr. Andrew Sellards, Harvard University, succeeded in taking the virus of yellow fever from Senegal to London, carrying it in the frozen liver of an infected monkey. Prof. Edward Hindle, Belt Fellow in Tropical Medicine, developed a yellow fever vaccine therefrom.

Drs. D. M. Hetler and Jacques Bronfenbrenner, Washington University, measured the bacteriophage, which is only one-sixth as large as the germ of typhoid fever.

Dr. N. W. Larkum, Michigan Department of Health, announced that the bacteriophage has proved a better preventive of typhoid fever than typhoid vaccine.

Nine cities with a population of more than 100,000 each reported a year free from deaths of typhoid fever. Forty-five other such cities had typhoid death rates below 2.0 per 100,000.

Drs. Yandell Henderson, H. W. Haggard, and E. M. Radloff, Yale University, announced that in pneumonia the deep breathing of air containing from 5 to 7 per cent carbon dioxide reinvigorates diseased areas of the lungs, and prevents the consolidation of the tissues which so often results fatally.

Dr. Chauncey D. Leake, Pharmacologist, San Francisco, announced the restoration of patients suffering from catatonia dementia praecox, to sanity for several minutes by the inhalation of carbon-dioxide gas.

Dr. J. S. Oldham, Liverpool, combining artificial respiration and adrenalin injections, kept a patient's heart beating for 12½ hours after all other signs of life had passed.

Dr. J. S. Lundy, Mayo Clinic, and Dr. R. M. Isenberger, University of Kansas, announced a new anesthetic, iso-amylethyl barbituric acid. Given by mouth before the administration of local anesthesia, it lessened the apprehension of patients before operations; injected into a vein, it produced all or part of the anesthesia in 273 major operations.

Dr. G. H. W. Lucas, Philadelphia, and Dr. V. E. Henderson, Toronto, announced a new anesthetic gas, cyclopropane. It is taken with little or no sensation by the patient and avoids the bad after effects of most anesthetics.

Nutritionists at the Iowa State College announced that carbonated beverages fed to rats causes them to drink more milk, grow more rapidly, and rear larger litters of young.

A group of Louisville, Kentucky, physiologists demonstrated that the physical and mental misery of morphine addicts, when deprived of their dope, arises from the disturbed water distribution condition. Animals under dosage comparable to that of a human addict have a shortage of water in the liver, kidneys, and brain, while the stomach, skin, intestines, and blood carry an increased water content. In sudden deprivation, the blood, spleen, and surface tissues undergo a loss of water, while the liver kidneys, and brain become gorged therewith.

Prof. E. N. Harvey, Princeton University, announced that dead hearts removed from turtles and frogs had been set to beating rhythmically by high-frequency sound waves, produced by passing an electric current through a quartz crystal.

The Mayo Clinic announced that if 65 per cent of the liver be removed, in eight weeks or less the remaining portions will almost entirely replace the lost parts.

Dr. H. H. Roaf, London, described globules in the retinas of hen's eyes which seem to act as color filters. He suggested that man's color vision may be conditioned by two different kinds of color screens in the eye, with perhaps an additional group of unscreened color receptors.

Harvard University and the Carnegie Institution of Washington, sent a joint expedition of doctors and health experts to Mexico in an effort to determine whether disease, famine or war primarily caused the downfall of the ancient Mayan empire.

Dr. Fred C. Tonney, Chicago Health Department, announced that a large percentage of the ultra-violet rays coming through the atmosphere above Chicago, even at clear points, are lost.

A device for measuring the intensity of ultra-violet rays makes use of uranium, which is sensitive only to the ionic action of the antirachitic ultra-violet rays of the spectrum.

Drs. Joseph Erlanger and H. H. Gasser, St. Louis, developed a device which amplifies current 100,000 times and permits the observation of the flow of nerve impulses. It also permits the photographing of lightning striking wires and measures how far the electrical current travels in a millionth of a second.

Dr. Robert H. Gault, Northwestern University, demonstrated an instrument consisting of a microphone, amplifier, batteries, and a receiver, by which a lip reader can feel vibrations of the voice with his fingers.

Prof. Clair E. Turner, Massachusetts Institute of Technology, exhibited motion pictures showing microscopic digestive glands in the stomach and intestines, the process of swallowing, food churning in the stomach, and the circulation of the blood as revealed in the embryo of a chicken.

Dr. W. Cramer, London, treating adrenal glands with the vapor of osmic acid and thereby darkening the grains of adrenalin, was able to study under the microscope the activity of the outer portions of the glands and to watch the grains of adrenalin entering the blood stream.

PALEONTOLOGY.

C. P. Singleton, Harvard University, announced the discovery of a stone arrow or spear point lying directly beneath the bones of a mastodon at Melbourne, Florida. Dr. J. W. Gidley, Smithsonian Institution, found a large stone tool, known as a turtle-back flaker, in the same site, four feet below the surface and two feet beneath the upper layer of the ancient formation in which the fossil bones lie buried.

Two human skulls were found in the lower slope of Bishop's Cap Peak in southwestern New Mexico, in association with the bones of an almost complete skeleton of an extinct ground sloth.

Two petrified human brains were found in association with the teeth of a woolly mammoth near Moscow, Russia.

E. K. Tratman, University of Bristol, reported the discovery, in the deep earth of the floor of Kilgreany Cave in southern Ireland, of a human skeleton in association with the bones of the wild boar, giant deer, and other animals inhabiting northern Europe at the end of the Ice Age.

The discovery of a human skull with apelike jaw near Peking, China, was reported by Dr. Davidson Black, Peking Union Medical College. It belonged to a man of the Old Stone Age and was found in an old limestone bed, in association with the bones of many prehistoric animals.

A Beloit College expedition discovered a 90% complete skeleton of a man of the late Aurignacian Age, at El Oubira, North Africa. Parts of four other skeletons were found. They appeared to be the remains of humans of a period contemporary with the reign of the Cro-Magnon race in western Europe.

Professor A. N. Burkitt, Sydney University, announced the discovery of human remains in the South Sea island of New Caledonia, in which the jaw bones were massive, resembling in many details the structure of the jaw bone of the ancient Heidelberg Man.

In a tunnel beneath Sugar Loaf mountains, near New Haven, Conn., more than fifty footprints of prehistoric animals were found. They ranged from an inch and a half long to two feet. Most of them were of carnivorous dinosaurs. Fossil ancestors of the sturgeons, gar pikes, and bowfins of today, as well as fossil branches of trees, mostly conifers, were found in the same bed.

Dr. Alexander Wetmore, Smithsonian Institution, discovered many bird bones in association with those of extinct mammals, such as mammoths, tapirs, ancient horses, and glyptodonts, in the vicinity of Vero, Fla. He has identified 48 species, many of which still exist in Florida. Other still existing species including the California condor, have not been seen in the State in modern times.

Dr. Harold Cook announced the discovery of the modern cattle disease of lumpy jaw in the jaw bones of an extinct species of the rhinoceros excavated in the Agate Springs Fossil Quarry, Neb.

A fossil skeleton of a giant prehistoric hog dug up in Sioux, Neb., was mounted at the University of Nebraska. The animal was as high and long as the largest modern passenger automobile and lived in late Oligocene or early Miocene times.

Remains of what may prove to be the missing link between the elephant and the mastodon were unearthed near Arkansas City, Kan., by H. T. Martin, University of Kansas.

Representatives of the Smithsonian Institution and Yale University, investigated deposits of fossil bones of many extinct ground sloths and other beasts found in an extinct volcanic furmarole in Dona Ana County, N. M.

Dr. Charles W. Gilmore, U. S. National Museum, found many skeletons of extinct species of turtles in the San Juan Basin of northwestern New Mexico. In a single plot thirty feet in diameter nine specimens were secured.

Professors C. L. Camp and V. B. Vanderhoof, University of California, discovered a fossil field in northwestern New Mexico. The great uplift that formed the Continental Divide brought to the surface the fossil remains of all of the ages between and including the Permian and Miocene periods. Its Triassic deposits yielded early reptiles; its Cretaceous rock showed crocodiles and dinosaurs; its Palaeocene beds contained primitive mammals; its Miocene strata yielded primitive horses, rhinoceroses, and other more recent species.

The molar teeth and fragments of tusk, ribs, and other bones of a mastodon were found twenty-two feet beneath the ground level, twenty-eight miles southeast of San Francisco.

The Agassiz Museum, Cambridge, Mass., received a collection of fossil fishes of Silurian times from New Brunswick. They are about ten inches in length, wore their skeletons on the outside, and had neither lateral fins, gill arches nor jaws. Fossils of these species hitherto have been known only in Europe.

The skull and tusks of a prehistoric hippopotamus were discovered near Barkly West, South Africa, five feet below the bed of the Vaal River. It is believed that the beast to which they belonged weighed from six to eight tons.

A skeleton of the earliest known rhinoceros, *Indricotherium Astaticum*, was set up in the Geological Institute at Leningrad. It stands nearly 15 feet high.

Through studies of the skeleton of a prehistoric woolly-haired marsupial rhinoceros found in the Mowbray Swamp, northwest Tasmania, its probable appearance in life was described.

Prof. A. N. Kristovitsch, of Russia, announced the discovery of fossil plants that grew while dinosaurs still lived, in the Sutschansk mines, near Vladivostok. They belong to a surviving genus of which the well known Hercules-club and wild-sarsaparilla are members.

PHYSICS.

Dr. Frederick G. Keyes, Massachusetts Institute of Technology, announced the perfection of apparatus for observing and measuring the activities of single molecules of gas. It consists of diaphragms containing small holes, and chambers connected to pumps producing high vacuums. Molecules, passing into the chambers through the diaphragm holes, are successively sorted, and in the final chamber, move

in a beam made to impinge upon a target especially prepared for measuring specific effects.

Dr. Irving Langmuir announced that surface tension of liquids is due to the fact that the films are only one molecule thick and arrange themselves "heads" upward and "tails" downward, which indicates that they have two sides whose properties are different. In some films the molecules attach themselves so firmly as to constitute true solid surfaces, in others they arrange themselves somewhat like sand, and in still others like gases.

Dr. Arthur S. King, Mt. Wilson Observatory, and Dr. Raymond T. Birge, University of California, discovered that carbon exists in two forms. Ordinary carbon is of mass 12 and its isotope of mass 13. Heating carbon in a vacuum in an electric furnace to a temperature of about 5,000° F. and analyzing with a spectroscope the light emitted they found not only the usual bright bands but also another very faint and previously unknown band. The latter proved to be the signature of the isotopic form. Last year physicists at the University of California found that the oxygen atom has three forms.

Dr. K. F. Bonnhoeffer demonstrated the splitting of hydrogen gas, hitherto supposed to be an indivisible element, into two substances. The experiment opens the way to finding an entirely new species of molecule; is the first proof of hitherto mathematically forecasted wave mechanics; may have an important bearing in the future of synthetic chemistry; and is one of the first proofs of the theory that atoms somewhat resemble small solar systems.

Dr. A. S. Eddington, Cambridge University, basing his study on the theory of relativity and the quantum theory of light, announced a formula by which the charge of electricity carried by an electron can be calculated.

Prof. Royal W. Sorenson, California Institute of Technology, announced the development of a cold cathode ray oscillograph through which pictures of electrons and atoms may be made.

Professors Keeson, Leyden, Holland, using helium gas, succeeded in producing a temperature within 1° C. of absolute zero.

DEATHS IN THE UNITED STATES FROM AUTOMOBILE ACCIDENTS.

ROOSEVELT MEDAL WINNERS.

The Roosevelt Memorial Association, in 1929, awarded gold medals to: Owen D. Young, for his work in helping solve the problem of German reparations; Herbert Putnam, Librarian of Congress, for distinguished service in developing that institution into national scope and international renown; Owen Wister, author, for having "recorded for all time" the character and atmosphere of the "Wild West" in the last quarter of the 19th Century.

The Association, in 1928, awarded gold medals to: Former Secretary of the State Charles Evans Hughes for distinguished service in the administration of public office; to Dr. Frank M. Chapman, for the promotion of the study of natural history; and to Colonel Charles A. Lindbergh, for the leadership of youth and the development of American character.

The Association, in 1927, awarded gold medals to: Gen. John J. Pershing, for promotion of national defense; Secretary of Commerce Herbert C. Hoover, for distinguished service in the administration of public office; Prof. John Bassett Moore, for his work on the Permanent Court of Arbitration at The Hague and on the Permanent Court of International Justice of the League of Nations.

The Association's medal winners in 1926 were: Rear Admiral William S. Sims, U. S. N., retired, for service in behalf of national defense; Former U. S. Senator Albert J. Beveridge of Indiana, for an eminent contribution to literature in the field of biography; Daniel Carter Beard of New York, National Boy Scout Commissioner, for leadership of youth and development of American character.

The Association, in 1925, awarded gold medals to: Gov. Gifford Pinchot of Pennsylvania, for services in behalf of conservation of the Nation's natural resources; George Bird Grinnell, author and naturalist, for his work in promoting outdoor life; Miss Martha Berry, director of the Berry School in Georgia, for the promotion of the welfare of women and children.

The Association, in 1924, awarded gold medals to: Elihu Root, Secretary of State in President Roosevelt's Cabinet, for distinguished service in public office; Associate Justice Oliver Wendell Holmes, for his service in the development of public law; Charles W. Eliot, President Emeritus of Harvard, for service in the leadership of youth and development of American character.

The Association, in 1923, awarded gold medals to: Major General Leonard Wood, Governor General of the Philippines, for distinguished service in the promotion of the national defense; Henry Fairfield Osborn, President of the American Museum of Natural History, New York City, for the promotion of the study of natural history; Miss Louisa Lee Schuyler, founder and a leader of the New York State Charities Aid Association, for promotion of the welfare of women and children.

The ten fields in which the medals may be awarded are: Administration of public office; development of public and international law; promotion of industrial peace; conservation of natural resources; promotion of social justice; the study of natural history; the promotion of outdoor life; the promotion of the national defense; the leadership of youth and the development of American character, an eminent contribution to literature in the field of biography, history or the science of government.

NEAR EAST RELIEF, 1915-1929.

(Official Statement Prepared for The World Almanac, by Allen McMahon, in charge of Information Service, Near East Relief.)

On June 30, 1929, Near East Relief, organized in 1915 and chartered by special act of the United States Congress in 1919, terminated fourteen years of public campaigning for funds for emergency relief, on the ground that the era of drives for war relief and post-war reconstruction had reached a logical end. It is estimated that two or three years more will be necessary to complete present responsibilities toward 20,043 children still inadequately provided for. Congress did not restrict the activities of Near East Relief to any period of time by the terms of its charter, but, although a total of $475,000 was lacking to complete the work, the executive committee determined to adhere to the terms laid down at the beginning of the recent campaign for $6,000,000, even though it was estimated that this amount was necessary to complete creditably the vast emergency and child welfare undertaking.

The figures of June 30, 1929, show that in the fourteen years of operation, receipts amounted to $91,173,074, and expenditures of $89,748,044 were made. Full disbursements also include an item of $12,800,000 worth of American Relief Association supplies transferred to Near East Relief for distribution, and another item of $5,000,000 representing property contributed for their use by overseas governments brings the total overseas investment up to $107,548,044, according to audited figures at the end of the fiscal year. The principles of finance and accounting from the beginning were those used by Herbert Hoover in the administration of Belgian relief.

It is estimated that the administration of the funds saved the lives of 1,500,000 people, 132,522 of whom were orphan children; that 12,500,000 persons were fed during famine periods; and that 6,000,000 received medical aid. Thirty hospitals were established and equipped at the chief centers of distress. In the orphanages and schools the children were registered, fed, clothed and given a practical education. More than thirty trades have been taught. Nurses' training schools, the first schools of their kind for women, were established in Greece and Armenia; the first schools for deaf mutes were also established; 263 teachers have been prepared for government schools in the Caucasus. In this work the organization has had the constant cooperation of the officials of each government, without which the results obtained would have been impossible. Service to communities has been included in the post-orphanage program, in the forms of clinics and health wagons and short term courses in agriculture and social welfare work, all available not only to outplaced children, but to all residents of the village communities.

Past areas of operation have included the Soviet Republics of Transcaucasia, Greece, Syria, Turkey, Persia, Mesopotamia, Egypt, Japan, Switzerland and France. The present centers of administration are Athens, controlling Greece and her islands, Constantinople, Bulgaria and Egypt; Leninakan (formerly Alexandropol), directing the work in Russian Armenia and Georgia; Beirut, supervising the areas of Syria, Palestine and Mesopotamia.

The headquarters of Near East Relief are at No. 151 Fifth Avenue, New York. The field administration is concentrated in five regional offices in different parts of the country, this skeleton organization succeeding the former campaign organization which had representatives in every state in the Union and Hawaii with whom 100,000 committeemen and other volunteer workers cooperated.

The officers of Near East Relief are: Chairman, James L. Barton; vice-chairman, John H. Finley; treasurer, Cleveland E. Dodge; general counsel, Frank L. Polk; members of executive council, Barclay Acheson, Laird W. Archer, William E. Doughty, H. C. Jaquith, and E. C. Miller. The executive committee consists of Edwin M. Buckley, chairman; James L. Barton, Cleveland E. Dodge, John H. Finley, Harold A. Hatch, William B. Millar, Henry Morgenthau, George A. Plimpton, Albert Shaw and Charles V. Vickrey.

Governments in several areas of operation have requested a continuation of certain departments of the work with government cooperation; chiefly in agriculture, medicine and social welfare. This will be the task of the future. For this purpose the executive committee of Near East Relief has created a sub-committee called the Conservation Committee, which will assume the responsibility, of seeing all those children who are still in orphanages or outplaced under subsidy and supervision securely rooted into the social structure of the countries in which they live; and it will take under advisement the projects suggested by the requests of the overseas governments.

The Conservation Committee will operate from headquarters in New York, under the chairmanship of Cleveland E. Dodge. Its other members are: James L. Barton, Edwin M. Bulkley, Thomas Jesse, Jones, Paul Monroe, O. S. Morgan, Otis W. Caldwell, Albert W. Staub, Barclay Acheson, secretary.

MODERN FICTION, WHAT IS IT?

(From an Article headed "Blah" in the Princeton University Press Almanac for April, 1929.)

The Princeton University Press does not publish novels, but members of its organization are able to read and sometimes their reading is modern fiction.

And some of them, at least, are coming more and more to the opinion that most modern fiction is scarcely worth reading, not because it is badly written (as some of it is), but because it deals with such uninteresting and unimportant subjects.

Dull people wander through the pages of these books, doing dull things; many of them find life a harsh and bitter experience, but they seldom stir themselves to the point of doing anything about it.

What comes to them they take—as the current phrase puts it—lying down, and when the tale of their harrowing, tragic lives is brought to a close the reader feels that they have deserved all they got.

But have they deserved to have books written about them.

It is much easier to write of sordid than of beautiful things.

Almost anyone can write a pretty good description of the reek of a garbage dump; the only essential qualification is a normal nostril.

Very few can do justice to the perfume of a rose, for that requires not merely a sense of smell but an understanding heart.

We are not, by the way, here pleading for a return to the piping times of sweetness and light; but by the same token we are decidedly against the prevalent fad of dullness and futility.

So many modern writers take the position that because there are more uninteresting than interesting people in the world, they are depicting "life" when they write of the commonplace persons amongst us.

Possibly true, but scarcely important. They think there is more hardship in the world than pleasure, and more ugliness than beauty.

That is as may be.

We, on our part, suspect that most writers are as commonplace as the people and scenes they portray, and that they cannot do justice to the more difficult characters who, though they may be in the minority, exercise a far greater influence on "life" than all the other 99.44% of humanity put together.

Why waste time on something which when all is said and done amounts to nothing, anyway?

The same line of thought can be extended to "scholarly" books.

There are about 25,000 scholarly journals published throughout the world, 2,500 of them in the United States.

RELIGIOUS CENSUS IN NEW YORK STATE.

The Roman Catholic population of New York State is reported by the U. S. Census Bureau as 3,115,424, and the Jewish as 1,889,597.

The census was begun in 1926. It is the third decennial count of religious bodies, previous censuses having been taken in 1916 and 1906.

The Roman Catholic population represents a growth of 369,872 since 1916, when it was reported as 2,745,552. It was 2,689,139 in 1906. The number of churches is 1,783, as compared with 1,496 in 1916.

The Roman Catholic population is 92 per cent. urban. The value of the edifices is $177,022,018 and parsonages, $24,342,114. The total amount raised by the Roman Catholic churches of the state during the year was $40,362,298, of which $36,158,770 was for current expenses and improvements.

The total Jewish population was not reported in 1916 and 1906, only the heads of families having been enumerated. The number of congregations in the state is 1,228, as compared with 798 in 1916 and 378 in 1906. The Jewish population is almost entirely urban, less than one-half of one per cent. being rural. Valuation of synagogues is $41,798,309.

The total amount raised in the year by 381 Jewish congregations was $8,890,824.

The reported membership of the Protestant denominations in New York State is 1,725,000.

The largest Protestant denomination in New York State is the Methodist Episcopal, with 1,930 churches and 345,307 communicant members, of whom 94.6 are more than twelve years old.

The number of Methodist Episcopal churches has dropped from 2,126 in 1916 and 2,193 in 1906. The membership in 1916 was 328,250 and in 1906, 291,919. The membership is 62 per cent. urban. The proportions by sex are 64.3 males to every 100 females.

The value of the edifices is given as $48,590,055, and of the parsonages, $1,117,061. The total amount raised in the census year was $10,532,331, of which $7,898,546 was for current expenses and improvements, and $2,631,813 for benevolences.

The Protestant Episcopal churches in the state number 882. The number in 1916 was 876 and in 1906 it was 829. The membership, on the basis of all baptized persons, including infants, is 354,700, of whom 74.1 per cent. are thirteen or older. The communicant membership in 1916 was 227,685 and in 1906 it was 193,890. The membership is 85 per cent. urban and the proportion of males to females is 76.4 to 100.

The value of the edifices is $102,341,631 and of parsonages, $6,904,465. The total amount raised in the year was $9,778,781, of which $7,912,692 was for current expenses and improvements, and $1,865,770 for missions and other benevolences.

The New York State churches of the Presbyterian Church in U. S. A. number 813, as compared with 858 in 1916 and 850 in 1906. The communicant membership is reported as 243,845, of whom 97.8 per cent. are thirteen or older. The membership in 1916 was 224,843 and in 1906, 188,115. The membership is 76 per cent. urban, and the proportion of males to females is 64.9 to 100.

The value of the edifices is $63,938,684, and of the parsonages, $5,300,100. Total amount raised in the year was $10,426,583, of which $7,563,537 was for current expenses and improvements, and $2,859,312 was for missions and other benevolences.

The Northern Baptist Convention has 857 churches in the state, as compared with 942 in 1916, and 1,028 in 1906. The communicant membership, as reported at the last census, of whom 97.1 per cent. are thirteen or older, is 161,142; in 1916 the membership was 183,330, and in 1906 it was 171,857. The membership is 69 per cent. urban and the proportion of males and females is 63.7 to 100.

The value of the edifices is $35,060,962 and of the parsonages, $3,089,776. The total amount raised in the year was $5'329-896 of which $4,284,849 was for current expenses and improvements, and $1,045,047 for missions and other benevolences.

The United Lutheran Church has 297 churches in the state. The three bodies which merged to form the United Church in 1918 had, in 1916, 279 churches in New York State. The membership of 147,508 reported at the last census includes all baptized persons, children and adults connected with the congregations. Those who are thirteen years of age and older comprise 72.2 per cent. The communicant membership of the original bodies in 1916 was 90,917. The membership is 88 per cent. urban, and the proportion of males to females is 76.5 to 100.

The value of the edifices is $17,057,281, and of that the parsonages is $2,036,500. The total raised in the year was $3,115,347, of which $2,667,071 was for current expense and improvements, and $448,276 was for missions and other benevolences.

The churches in New York State belonging to the Lutheran Synodical Conference number 170, as compared with 131 in 1916, and 130 in 1906. The membership of all baptized persons, adults and children, reported this last census was 61,248, of whom 67.1 per cent. were thirteen years old or over. The communicant membership in 1916 was 36,819, and in 1906 it was 32,723. The membership is 82 per cent urban and the proportion of males to females is 81.7 to 100.

The value of the edifices is $7,011,038, and of the parsonages, $960,650. The total raised in the census year was $1,291,222, of which $1,108,440 was for current expenses and improvements, and $182,618 for missions and other benevolences

There are 230 Congregational churches in the state, as compared with 306 in 1916, and 302 in 1906. The communicant membership is 69,787, of whom 98.3 per cent. are thirteen or older. The membership in 1916 was 65,021, and in 1906 it was 57,351. The membership is 75 per cent. urban, and the proportion of males to females is 60.3 to 100.

The value of the edifices is $26,571,080, and of the parsonages $1,248,965. The total amount raised in the census year was $2,074,395, of which $1,705,483 was for current expenses and improvements, and $358,057 for missions and other benevolences.

The Reformed Church in America has 294 churches in the state, as compared with 300 in 1916, and 297 in 1906. The communicant membership is 62,855, of whom 98.5 per cent. are thirteen or older. The membership in 1916 was 66,773, and in 1906 it was 63,350. The membership is 67 per cent. urban and the proportion of males to females is 69 to 100.

The value of the edifices is $22,729,482, and of the parsonages $2,038,850. The amount raised in the census year was $2,372,394, of which $1,941,060 was for current expenses and improvements, and $423,605 for missions and other benevolences.

Among the other denominations and sects included in the census are:

	Churches.	Members.

MILITARY ORDER OF THE LOYAL LEGION OF THE UNITED STATES.

Commander in Chief—Master Robert M. Thompson, U. S. N., 16 E. 43rd St., N. Y. City; *Senior Vice Commander in Chief*—Brig. Gen. Samuel W. Fountain, U. S. A., Lincoln Court, Overbrook, Philadelphia, Pa., *Junior Vice Commander in Chief*—Brevet Maj. George Mason, U. S. V., 133 W. Washington St., Chicago, Ill.

Recorder in Chief—Brevet Captain John O. Foering, U. S. V., 1805 Pine St., Philadelphia, Pa.; *Registrar in Chief*—Mr. Graname H. Powell, (Hereditary), 1701 H St., N. W. Washington, D. C.; *Treasurer in Chief*—Capt. William P. Wright, U. S. V., 122 East 31st St., Chicago, Ill.

Chancellor in Chief—Brevet Captain John O. Foering, U. S. V., 1805 Pine St., Philadelphia, Pa.; *Chaplain in Chief*—Rev. Alexander Leo (Hereditary), 4581 Torresdale Ave., Philadelphia, Pa.

Council-in-Chief—Brig. Gen. Edward S. Godfrey, U. S. A., Cookstown, N. J.; Act. Asst. Paymaster, Henry M. Rogers, U. S. N., 11 Beacon St., Boston, Mass.; Brevet Lieut. Col. William S. Cogswell, U. S. V., 140 Nassau St., N. Y. City; Capt Harry S. Howard (Hereditary), Van Ness House, Burlington, Vt.; Col. Robert L. Messimer (Hereditary), 32 Lakeview Road, Grosse Pointe Farms, Mich.

The Military Order of the Loyal Legion of the United States was organized by officers and ex-officers of the Army, Navy and Marine Corps of the United States who took part in the war of 1861-65.

There were 3,651 members of the Legion on April 30,1929, of whom 3,243 held heridetary memberships.

On the date named, 408 of the original members survived.

HOLDERS OF INSURANCE POLICIES EXCEEDING $1,000,000.

Policy holders and beneficiaries received $2,057,000,000 from life insurance companies in the United States and Canada, an increase of $311,000,000 over 1927. Payments of the life insurance companies in New York State aggregated $327,500,000, while in New York City payments totaled $68,046,000, according to the *National Underwriter*. Only a small proportion of the total life insurance payments in 1928 was represented by large policies.

The largest payment was on the life of Rodman Wanamaker, whose insurance amounted to $5,823,450. Mr. Wanamaker for many years was noted as the most heavily insured man in the world, although with the adaptation of life insurance to protect business enterprises, a number of individuals are reputed to carry more than was paid on Mr. Wanamaker's death. In addition, Mr. Wanamaker, during his lifetime matured some large endowment policies, his early insurance being on the endowment plan.

Benjamin Dansard of Detroit and Monroe, Mich., left $4,510,000 in life insurance. Next with $1,125,000 was William J. Burke of Portsmouth, Ohio, president of the Vulcan Last Company; Thomas A. DeVilbiss of Toledo, Ohio, left $1,032,000, John M. Coward of New York and Glen Ridge, N. J.

Holders of policies aggregating $1,000,000 and over are listed to the number of 323 by the *Spectator* in its issue of Sept. 19, 1929. The names and the amount of insurance carried by each of the 180 whose individual policies exceed $1,000,000 are given as follows:

$7,000,000—Pierre S. Du Pont, Wilmington, Del.
$6,540,000—John C. Martin. (*a*) Philadelphia, Pa.
$6,500,000—William Fox, (*a*) New York.
$5,250,000—Joseph M. Schenk, (*a*) New York.
$5,000,000—Frank P. Book, (*a*); Herbert V. Book, (*a*); and J. Burgess Book, (*a*) all of Detroit, Mich.; Jesse Lasky, (*a*) New York, James H. Rank, Jr., (*a*) Buffalo, N. Y.; Adolph Zukor, (*a*) New York
$4,500,000—William Ziegler, (*a*) New York
$4,096,500—Charles Stewart Mott Foundation, Detroit, Mich.
$4,000,000—Marshall Field III, (*c*) Chicago, Ill.; C. F. Kettering, (*a*) Dayton, Ohio.
$3,890,000—Ralph Jonas, Brooklyn, N. Y.
$3,850,000—A. H. Landwehr, Holland, Mich.
$3,810,000—F. B. Patterson, (*a*) Dayton, Ohio.
$3,500,000—Snellenburg & Co., Philadelphia, Pa.
$3,250,000—Mrs. Henry E. Yeiser, Cincinnati, O.
$3,175,000—James M. Hoyt, New York City.
$3,050,000—Joseph P. Day, New York City.
$3,000,000—Herbert J. Yates, (*c*) New York; Edward M. Harris, Philadelphia, Pa.; Rogers Caldwell, New York and Nashville, Tenn.; Floyd L. Carlisle, (*c*) New York; Dr. Nicholas C. Partos, New York; Charles Webb's Sons, Philadelphia, Pa.; Julius Fleischmann, Jr., Cincinnati, O.; Percy Rockefeller, New York; Mrs. Mollie Newbury, (*b*) Chicago, Ill.; Mrs. E. G. Burkham, St. Louis, Mo.; Motty Eltingon, (*a*) New York
$2,830,000—James C. Penney, (*a*) New York.
$2,804,000—Joshua Cosden, Baltimore, Md. and New York.
$2,600,000—Duttee Wilcox Flint, (*a*) Providence, R. I.
$2,500,000—Jacob Welkel, (*d*) Atlantic City, N. J.; E. E. Bensinger, (*b*) Chicago, Ill.; O. Y. Schnering, (*a*) Chicago, Ill. Alex M. Scales, Greensboro, No. Car.; Jay C. Hills, (*a*) Chicago, Ill. and Los Angeles, Calif.; Walter W. Head, (*a*) Omaha, Neb.; Harry M. Warner, (*a*) New York; Mrs. Marshall Field III, Chicago, Ill.
$2,485,000—Charles F. Noyes, (*a*) New York.
$2,425,000—Samuel L. Rothafel, (*a*) New York.
$2,303,000—John McE. Bowman, (*a*) New York.
$2,300,000—George K. O'Donnell, (*b*) New York.
$2,250,000—Charles R. Blyth*es*, San Francisco, Calif.; H. L. Gary, Kansas City, Mo.
$2,150,000—John A. Carroll, Chicago, Ill.
$2,100,000—Henry Mandel, (*a*) New York City; C. F. Williams, Cincinnati, Ohio; Donald Woodward, Le Roy, N. Y.
$2,025,000—Fred Fisher, Detroit, Mich.
$2,018,500—George E. Merrick, (*a*) Miami, Fla.
$2,000,000—Seymour Knox, Buffalo, N. Y.; Irving L. Isaacs, (*c*) New York City; A. F. Adams, (*c*) Kansas City, Mo.; Albert M. Greenfield, (*a, c*) Philadelphia, Pa.; Clarence Saunders, (*a*) Memphis, Tenn.; John W. Blodgett, (*a*) Grand Rapids, Mich.; W. Irving Moss, New Orleans, La.; Arthur J. Morris, Albany, N. Y.; David Stern (*a*), Philadelphia, Pa.; Lewis, S. Carpenter, San Francisco, Cal.; Sydney Shoenburg, St. Louis, Mo.; E. W. Marland, Ponca City, Okla.; Morris White, New York; John Barrymore, New York City; Walter Schroeder, (*a*) Milwaukee, Wis.; Walter Strong, (*b*) Chicago, Ill.; R. A. Long, (*b*) Kansas City, Mo.; Clarence H. Mackay, New York; William R. Coe, New York; Julius Rosenwald, Chicago, Ill.; Hanover Shoe Factory, (*b*) Hanover, Pa.
$1,900,000—W. M. Burgess, Omaha, Neb.
$1,840,000—George Brandeis, (*a*) Omaha, Neb.
$1,800,000—Edwin S. Jordan, Cleveland, Ohio; Harry Duñn, New York; Richard H. Webber, Detroit, Mich.; Louis F. Swift, Chicago, Ill.; John N. Willys, (*a*) Toledo, Ohio.
$1,750,000—Cecil B. DeMille, (*a*) Los Angeles, Cal.; C. Wilbur Miller, Baltimore, Md.; T. E. Hambleton, Baltimore, Md.; Arthur Reis, New York City; Victor H. Hanson. (*a*) Birmingham, Ala.
$1,600,000—Edwin F. Greene, Boston, Mass.; Norman A. Perry, Indianapolis, Ind.; Jack Kaplan, New York City.
$1,500,000—Gov. Frank G. Allen, (*c*) Boston, Mass.; J. K. Lilly, Jr., Indianapolis, Ind.; Harold C. Keith, Brockton, Mass.; George E. Nicholson, Kansas City, Mo.; Jay R. Monroe, (*a*) Orange, N. J.; Doherty Silk Mills, (*b*) Paterson, N. J.; Nathan S. Jonas, Brooklyn, N. Y.; Christian R. Lindback, (*a*) Philadelphia, Pa.; Martin M. Pearlman, Philadelphia, Pa.; Morris L. Clothier, (*a*) Philadelphia, Pa.; Alfred Decker & Cohen, (*a*) Chicago, Ill.; Charles E. Mitchell, New York; Collins & Aikman, (*b*) Philadelphia, Pa.; Irvin S. Chanin, (*a*) New York; Henry I. Chanin, New York; Harry Busick, (*b*) Baltimore, Md.; B. B. Sheffield, (*a*) Minneapolis, Minn.; Lit Brothers, (*b*) Philadelphia, Pa.; James C. Colgate, New York; Gimbel Brothers, (*b*) Philadelphia, Pa.; William Wrigley, Jr., Chicago, Ill. and Los Angeles, Cal.; H. H. Rogers, Jr., New York; Edgar L. Marston, New York; Fred F. Brewster, New Haven, Conn.; Chimney Rock Motors, Inc., (*b*) Lake Lune, No. Car.; J. W. Bettendorf, Bettendorf, Iowa; Mortimer Davis, New York; George E. Nicholson, Kansas City, Mo.; Paul Schoelkopf, Buffalo, N. Y.; Albert Warner, (*a*) New York City; Jack L. Warner, (*a*) New York City.
$1,453,500—J. M. West, Houston, Texas.
$1,450,000—Alfred C. Fuller, Hartford, Conn..
$1,400,000—P. E. Bowans, Montreal, Canada; Seth Marshall, (*a*) Duluth, Minn.
$1,385,000—William Candler, Atlanta, Ga.
$1,370,000—Percival E. Foerderer, Philadelphia, Pa.
$1,350,000—C. J. Jones, Dallas, Texas.
$1,336,000—Clarence E. Lintz, Dallas, Texas.
$1,300,000—Roy E Tilles, New York; Edward G. Lewis, Los Angeles, Cal.; Joseph Paterno, (*a*) New York.
$1,265,000—Edward J. Young, (*a*) Madison, Wis.
$1,250,000—John H. Jones, Mobile, Ala.; Axel H. Lonquist, Chicago, Ill.; Otis Skinner, New York; Joseph Keaton, (*a*) Los Angeles, Cal.; Joseph Himes, (*a*) Washington, D. C.
$1,225,000—Harold L. Arnold, (*a*) Los Angeles, Cal.
$1,200,000—Edward Landreth, Breckenridge, Tex.; C. Jackson Booth, Ottawa, Canada; Stuart Gammill, Jackson, Miss.; Chas. E. Virden, (*a*) San Francisco, Cal.; Chas. E. Walsey, New York; Robert Ducas, New York; A. D. Annis, Council Bluffs, Iowa; Dr. Benjamin J. Palmer, (*a*) Davenport, Iowa; S. B. Hatch, (*a*) Toronto, Canada; J. P . Abney, Greenwood, So. Car.; Edmund I. Kaufman, Washington, D. C.; E. Lansing Ray, St. Louis, Mo.; Jose L. Reyes, Havana, Cuba.
$1,152,500—J. Rogers Flannery, (*b*) Pittsburgh, Pa.
$1,148,000—Col. E. O. Thompson, Amarillo, Tex.
$1,141,500—William J. Cox, (*a*) New York.
$1,130,000—F. Harold Johnston, Bradford, Pa.; Frank A. Vanderlip, New York.
$1,250,000—Arthur Stebbins, (*a*) New York.
$1,113,000—Marie S. Smith, Kansas City, Mo.
$1,105,000—Adam Vogt, Louisville, Ky.
$1,100,000—Alba B. Johnson, Philadelphia, Pa.; Eric G. Gunstrom, Chicago, Ill.; R. (Le Roy) W. Wilson, Chicago, Ill.; Nels Shoan, Chicago, Ill.
$1,064,000—Carl Weeks, (*a*) Des Moines, Iowa.
$1,050,000—M. M. Travis, Tulsa, Okla.; Martin L. Davey, (*a*) Kent, Ohio.
$1,036,000—Charles E. Linz, Dallas, Texas.
$1,025,000—Jesse H. Jones, Houston, Texas.
$1,024,000—James Rolph, San Francisco, Cal.
$1,019,000—Harry L. Hussmann, Dallas, Texas.
$1,015,000—J. H. Barringer, Dayton, Ohio.

The list of the 143 carrying an even $1,000,000 life insurance as given by the *Spectator* follows:

(All *a. c.*) Hubbard F. Alexander, Seattle, Wash., Col. Luke Lea, Nashville, Tenn.; Gilbert Roland, New York City; Norbert A. Hoffman, Detroit, Mich.; J. Arthur Hoffman, Detroit, Mich.; Benjamin Titman, New York City; Hugo F. Arnold, Chicago, Ill.; Charles H. Holland, Philadelphia, Pa.; Adolph F. Linden, Seattle, Wash.; A. E. Lefcourt, New York City; and Abe White, New York City.

(*b. c.*) Anheuser-Busch, Inc., St. Louis, Mo.

(All *c*) Jules S. Bache, New York City; Asa G.

BIG HOLDERS OF LIFE POLICIES (Continued.)

Candler, Atlanta, Ga.; A. A Schlesinger, Milwaukee, Wis.; Col. Leroy Springs, Lancaster, So. Car.; Frederick Booth, Ottawa, Canada; and W. R. Bawlf, Winnipeg, Canada.

(All *a*) Will Rogers, Beverly Hills, Cal.; Richard R. Florian, Los Angeles, Cal.; Morris T. Baker, Minneapolis, Minn.; L. O. Crosby, Picayune, Miss.; Joseph R. Tucker, Camden, N. J.; Mary Pickford, Los Angeles, Cal.; Douglas Fairbanks, Los Angeles, Cal.; Constance Talmadge, Los Angeles, Cal.; H. D. Thomas, Los Angeles, Cal.; Richard W. Thomas, Los Angeles, Cal.; Eric Von Stroheim, Los Angeles, Cal.; Irving Fain, Brooklyn, N. Y.; Herbert Beesemeyer, Los Angeles, Cal.; Frederick A. Geier, Cincinnati, Ohio; Lorence Marx, New York City; C. B. Hays, Jackson, Mich.; and Eddie Rickenbacker, Detroit, Mich.

(All *b*) Howard Coonley, Boston, Mass.; Clarence Y. Palitz, New York City; Thomas E. Mitten, Philadelphia, Pa.; Jacques Vinmont, Los Angeles, Cal.; Charles H. McCormick, Los Angeles, Cal.; Michael Schwartz, Meriden, Conn.; Douglas Shoe Company, Boston, Mass.; Fred F. French, New York City; George K. Culp, New York City; William N. Greve, New York City; Watzek Brothers, Portland, Ore.; Louis Horowitz, New York City; Allis S. Fried, New York City; Bernard Bavis, Pittsburgh, Pa.; and Edward Weisel, Sr., San Antonio, Tex.

Others are, Meyer Davis, Washington, D. C.; Solon E. Summerfield, New York City; Harry Wardman, Washington, D. C.; Warren H. Snow, Grand Rapids, Mich.; Burton A. Howe, Grand Rapids, Mich.; Peter E. Martin, Detroit, Mich.; Elmer H. Maytag, Newton, Iowa; Maurice Pollak, Avondale and Cincinnati, Ohio; H. E. Pence, Minneapolis, Minn.; Alfred Schoellkopf, Buffalo, N. Y.; George W. Vanderbilt, New York City; John McCormack, New York City; William M. Armstrong, Los Angeles, Cal.; Edmund I. Kaufman, Washington, D. C.; Morris T. Baker, Minneapolis, Minn.; John J McGuirk, New York City; Ray E. Adams, Indianapolis, Ind.; James A. Buchanan, Texarkana, Ark.; W. W. Watson, Salina, Kan.; Ralph L. Pope, Boston, Mass.; Alfred H. Chapin, Boston, Mass.; Henry J. Simonson, Jr., Boston, Mass.; Robert L. Studley, Boston, Mass.; Sidney J. Weinberg, Brooklyn, N. Y.

Also, William H. Crocker, San Francisco, Cal.; Walter S. Dickey, Kansas City, Mo.; Harvey S. Firestone, Akron, Ohio; Fred Geier, Cincinnati, Ohio; Alfred Krippendorf, Cincinnati, Ohio; Charles F. Williams, Cincinnati, Ohio; Jonathan Warner, Warren, Ohio; Frank D. Fuller, Springfield, Mass.; William A. Morgan, Buffalo, N. Y.; Bernard M. Baruch, New York City; S. M. Vauclain, Philadelphia, Pa.; W. E. Lee, Tampa, Fla.; F. W. Johnstone, Charleston, W. Va.; Waite Phillips, Cimarron, New Mex.; L. H. Meeker, New York City; J. Ballantine, New York City; Fred O. Bezner, Detroit, Mich.; Nicholas F. Brady, New York City; Frank E. Campbell, Jr., New York City; Chas. E. Havener, New York City; Ery Kehaya, New York City; R. E. Hilles, New York City; H. P. Hollins, New York City; Herbert Kaufman, New York City; Lamont Du Pont, Wilmington, Del.; Fred P. Morrill, New Orleans, La.; A. G. Geohegan, New Orleans, La.; Sigmund Sonneborn, Baltimore, Md.; John W. Gilliland, Tulsa, Okla.; Sidney J. Bauman, New York City; Frank E. Gannett, Rochester, N. Y.; Thomas A. Gillespie, Pittsburgh, Pa.; E. R. Perry, Tulsa, Okla.; Harry H. Rogers, San Antonio, Tex.; Mrs. Ida Pabst, Milwaukee, Wis.; Frederick Pabst, Milwaukee, Wis.; Isadore J. Kressel, New York City; Randall Morgan, Philadelphia, Pa.; Hergert T. Gossard, Chicago, Ill.

Also, Samuel Insull, Chicago, Ill.; Eddy Weisl, New York City; Jack L. Warner, New York City,; Ben Sculberg, New York City; Walter S. Wanger, New York City; A. J. Drexel, Philadelphia, Pa.; A. J. Drexel-Biddle, Philadelphia, Pa.; Mrs. J. McCune, Pittsburgh, Pa.; Irenee Du Pont, Wilmington, Del.; T. E. Wilsn, Chicago, Ill.; Arthur S. Ford, Chicago, Ill.; T. F. H. Peavey, Minneapolis, Minn.; H. C. Kahl, Davenport, Iowa; James E. Davidson, Bay City, Mich.; John H. Castle, Detroit, Mich.; Louise Lathrop, Detroit, Mich.; Allen F. Moore, Monticello, Ill.; G. G. G. Peckham, Cleveand Ohio; Johnfritz Achelis, New York City; Raymond Bill, New York City; F. Donaldson Brown, New York City; Clifford Hemphill, New York City; Irving E. Raymond, New York City; Thomas S. Vietor, New York City; F. W. Leistikow, Winnipeg, Canada; Robert C. Winmill, New York City; X. M. Audebert, New York City; Herman Gardner, Milwaukee, Wis.; Eugene W. Fry, Philadelphia, Pa.; Norma Talmadge, Los Angeles, Cal.

Note—(*a*) includes business insurance; (*b*) business insurance; (*c*) amount of insurance exceeds sum given.

THE CARNEGIE FOUNDATION.

The Report of the Carnegie Foundation for the Advancement of Teaching shows that on June 30, 1928, the resources of the Foundation were $31,594,000, an increase of some $656,000 over the previous fiscal year.

Of this total, $16,301,800 are held as general endowment, $1,301,000 as resources of the Division of Educational Enquiry, $12,538,900 as a reserve for liquidating pension liabilities accruing after 19281 $854,000 to assist colleges and universities to adopt the contributory plan of retiring allowances, and $598,000 as an emergency reserve. All of the investments are in bonds.

During the year 1927-28 the Foundation began the payment of 82 new allowances and pensions of an annual value of $146,500 50 to former teachers and 32 widows.

The fifty professors retired at an average age of 67.46 years after an average service of 36 years. To them an annual total of $111,990 will be paid in allowances.

The average retiring allowance has risen from $2,126 in 1920 to $2,287 at present, and the annual expenditure of the Foundation for teachers and their widows in associated institutions alone to $1,314,000. Estimates indicate that this sum will increase to approximately $2,241,000 in about 1944, and then begin to decrease until about 1985, when all of the approximately 3,700 teachers who have expectations from the original free pension plan of the Foundation, and their widows, will have received their allowances and pensions.

To take care of such increases the Foundation has accumulated a reserve fund which now contains over $12,000,000 to be spent, principal and interest, leaving the original endowment intact.

The Carnegie Foundation during the 23 years has paid out in retiring allowances to professors and pensions to their widows over $17,371,900.

Up to June 30, 1928, former teachers at Harvard had received from the Foundation allowances totaling $1,411,000, at Yale $1,207,000, at Columbia $1,130,000, at Cornell $822,000, and at the University of California $491,000, at Tulane University of Louisiana $371,000, and the University of Toronto $350,000.

The total expenditure, which in 1906-07 was only $158,890 among 35 institutions, had risen to $17,371,900 among 90 institutions in 1928.

More of the recipients of retiring allowances have lived in New York State than in any other, a total of 229. Massachusetts is second with 188, and Connecticut third with 116.

All told, 1,485 allowances and pensions have been granted to teachers in forty different states, five Canadian provinces, and Newfoundland.

FARM MORTGAGE DEBT—$9,468,526,000.

The United States Department of Agriculture estimates the total farm-mortgage in this country, on Jan. 1, 1928, at $9,468,526,000, as compared with $9,360,000,000 on Jan. 1, 1925.

Cullen Yates, 1919.

Sculptors—Herbert Adams, 1899; Robert I. Aitken, 1914; Chester Beach, 1924; A. Stirling Calder, 1913; Rudolph Evans, 1929; John Flanagan, 1928; James Earle Fraser, 1917; Daniel Chester French, 1901; Harriet Frishmuth, 1929; Anna Vaughan Hyatt, 1922; Isador Konti; 1909; Evelyn Beatrice Longman, 1919.

Frederick W. MacMonnies, 1906; Hermon A. MacNeil, 1906; Paul H. Manship, 1916; Edward McCartan, Charles H. Niehaus, 1906; A. Phimister Proctor, 1904; Frederick G. R. Roth, 1906; Lorado Taft, 1911, Bessie Potter Vonnoh, 1921, Adolph A. Weinman, 1911, Mahonri Young, 1923.

Architects—Welles Bosworth, 1928; Cass Gilbert, 1908, Thomas Hastings, 1909, Frederick Law Olmstead, 1929; Charles A. Platt, 1911; Charles Russell Pope.

Engravers and Etchers—Timothy Cole, 1908, Ernest D. Roth, 1928.

ASSOCIATES.

Painters—Ernest Albert William Auerbach-Levy, William J. Baer, Hugo Ballin, Reynolds Beal, Hilda Belcher, E. A. Bell, Oscar E. Berninghaus, Frank A. Bicknell, Charles Bittinger, Mary Green Blumenschein, George H. Bogert, Adolphe Borie, Joseph H. Boston, Hugh H. Breckenridge, R. Sloan Bredin, Belmore Browne, George M. Bruestle, K. A. Buehr, Bryson Burroughs.

Dines Carlsen, Adelaide Cole Chase, Eliot Clark Ralph Clarkson, C. C. Coleman, William Cotton, Arthur S. Covey, Louise Cox, Arthur Crisp.

Francis Day, W. R. Derrick, W. H. Drake, John Ward Dunsmore.

Walter Farndon, Barry Faulkner, William B. Faxon, Anna Fisher, Gertrude Fiske, Will Howe Foote, Will Foster, Kenneth Frazier, Maurice Fromkes' Henry Brown Fuller.

I. M. Gaugengigl, Robert David Gauley, Lillian M. Genth, William J. Glackens, Mary Gray, Abbott Graves, Edmund Greacen, Frank Russell Green, Oliver Dennett Grover, Jules Guerin.

Ben Ali Haggin, Lillian W. Hale, Phillip L. Hale, Armin Hansen, William J. Hays, Albert Herter, Aldro T. Hibbard, Victor Higgins, Howard L. Hildebrandt, Laura C. Hills, James R. Hopkins, Felicie Waldo Howell, Henry S. Hubbell, Eric Hudson, Frederick W. Hutchinson, William H. Hyde, Frank Tenney Johnson, Alphonse Jongers.

Wilson Irvine.

Dora Wheeler Keith, Paul King, William Fair Kline, Hayley Lever, Harry Leith-Ross.

Mary Fairchild Low, Marie D. Page.

Fred Dana Marsh, Paul Moschcowitz, Fred'k J. Mulhaupt, Raymond P. R. Neilson, George Laurence Nelson.

Walter Nettleton, G. Glenn Newell, Spencer Nichols, John H. Niemeyer, Dorothy Ochtman.

Lawton Parker, Douglass Parshall, William M. Paxton, Joseph T. Pearson, jr., Ernest Peixotto, Van Dearing Perrine, Henry R. Poore, W. Merritt Post, Arthur J. E. Powell, Edith Mitchell Prellwitz.

Ellen E. Rand, Jullus Rolshoven.

Rosina Emmet Sherwood, William H. Singer, Howard E. Smith, Arthur P. Spear, Albert Sterner.

Leslie P. Thompson, Harry A. Vincent, Edward C. Volkert.

H. M. Walcott, Harry F. Waltman, Everett L. Warner, J. Louis Webb, William Wendt, E. K. K. Wetherill, William J. Whittemore, Guy Wiggins, Charles Morris Young, Ezra Winter, Arthur W. Woelfle.

Sculptors—Cyrus E. Dallin, Abastenia St. L. Eberle, Laura Gardin Fraser, John Gregory Sherry, E. Fry, Henry Hering, Charles Louis Hinton, Malvina Hoffman, C. Paul Jennewein, Charles Keck, H. Augustus Lukeman, Albert Laessle, Lee Lawrie, Arthur Lee, Leo Lentelli.

Philip Martiny, Allen G. Newman, Andrew O'Connor, Willard D. Paddock, Attilio Piccirilli, Furio Piccirilli, Allen Polasek, Janet Scudder.

Architects—Chester Aldrich, Grosvenor Atterbury, William A. Boring, Glenn Brown, Harvey W. Corbett, J. H. Freedlander, J. Monroe Hewlett, John Galen Howard, James L. Greenleaf, H. Van Buren Magonigle, Benjamin W. Morris.

C. Grant La Farge, C. Howard Walker, Egerton, Swartmout.

Engravers and Etchers—Frank French, Charles Dana Gibson, Allen Lewis, Howard McCormick.

The National Academy of Design has created a new **international award**, a medal for "distinguished service to the fine arts," and presented it, in 1929, to Elihu Root in recognition of his long patronage of the arts and especially for his part in the planning of the parks and memorial buildings of Washington in 1902.

THE HASKELL ORIENTAL MUSEUM OF THE UNIVERSITY OF CHICAGO.

The Haskell Oriental Museum was erected through the generosity of Mrs. Caroline E. Haskell. Its collections, now exceeding 20,000 original objects, are intended to exhibit as systematically as possible the early civilizations of the Near East. Egypt is most largely represented. Both the Egyptian and the Assyro-Babylonian sections have been augmented in part by expeditions of the university's Oriental Exploration Fund in 1903-7 and by its Oriental Institute since 1919.

AMERICAN ACADEMY OF ARTS AND LETTERS.

The first seven members of the American Academy of Arts and Letters were selected by the National Institute of Arts and Letters from its own body in 1904 by ballot. The seven were William Dean Howells, Augustus Saint-Gaudens, Edmund Clarence Stedman, John La Farge, Samuel L. Clemens, John Hay and Edward MacDowell. In order to become eligible to the American Academy one must first be a member of the National Institute of Arts and Letters. This society was organized at a meeting of the American Social Science Association in 1898. The qualification for membership is stated in the constitution, "It shall be notable achievement in art, music or literature." The number in the institute is limited to 250, and the election is by ballot.

The American Academy of Arts and Letters numbers fifty members and among the officers are: Nicholas Murray Butler, Chancellor; Robert Underwood Johnson, Secretary.

The following are the living members of the academy, as of Oct. 28, 1929:

Herbert Adams, N. Y.
Edwin A. Alderman, Univ. of Va.
George Pierce Baker, New Haven.
Edwin Howland Blashfield, N. Y.
Geo. deForest Brush, Dublin, N. H.
Nicholas Murray Butler, N. Y.
George W. Chadwick, Boston.
Edw. Channing, Cambridge, Mass.
Timothy Cole, Poughkeepsie, N. Y.
Royal Cortissoz, N. Y.
Wilbur L. Cross, New Haven, Conn.
John H. Finley, N. Y.
James E. Fraser, N. Y.
Daniel Chester French, N. Y.
Hamlin Garland, N. Y.
Charles Dana Gibson, N. Y.
Cass Gilbert, N. Y.
William Gillette, Hadlyme, Conn.
Robert Grant, Boston.
Arthur T. Hadley, New Haven.
Henry Hadley, N. Y.
Childe Hassam, N. Y.
Charles Downer Hazen, N. Y.
David Jayne H'll, Washington, D. C.
Archer Milton Huntington, N. Y.
Robert Underwood Johnson, N. Y.
William Mitchell Kendall, N. Y.
Abbott L. Lowell, Cambridge.
Edwin Markham, Staten Is., N.Y.
Frederick MacMonnies, N. Y.
Hermon A. MacNeil, N. Y.
Garl Melchers, N. Y.
Paul Elmer More, Princeton, N. J.
Bliss Perry, Cambridge, Mass.
Charles Adams Platt, N. Y.
John R. Pope, N. Y.
Edwin A. Robinson, N. Y.
Elihu Root, N. Y.
Paul Shorey, Chicago.
Lorado Taft, Chicago.
Booth Tarkington, Indianapolis.
Augustus Thomas, N. Y.
Henry van Dyke, Princeton, N. J.
John C. van Dyke, New Brunswick.
Brand Whitlock, Toledo, Ohio.
Owen Wister, Philadelphia.
Geo. E. Woodberry, Beverly, Mass

The directors of the academy are: N. M. Butler, Hamlin Garland, Cass Gilbert, A. M. Huntington, R. U. Johnson, W. L. Cross, Herbert Adams, and Augustus Thomas.

THE NATIONAL INSTITUTE OF ARTS AND LETTERS.

(Headquarters, 633 West 155th Street, New York City.)

President—Prof. William L. Phelps, New Haven, Conn.; *Vice-Presidents*—John H. Finley, William J. Henderson, William Mitchell Kendall, John Erskine, Sidney C. Howard, Ashley H. Thorndike; *Secretary*—Burton J. Hendrick, N. Y.; *Treasurer*—Harrison S. Morris, Oak Lane, Philadelphia.

MEMBERS. (AS OF NOV. 15, 1929.)

DEPARTMENT OF LITERATURE.

Jas. T. Adams, Bridgehampton, N. Y.
George Ade, Brook, Ind.
Edwin A. Alderman, Charlottesville, Va.
Richard Aldrich, N. Y.
Irving Babbitt, Cambridge, Mass.
Irving Bacheller, Winter Park, Fla.
G. P. Baker, New Haven, Conn.
Ray S. Baker, Amherst, Mass.
Stephan V. Benet, N. Y.
Bernard Berenson, Florence, Italy.
Gamaliel Bradford, Wellesley Hills.
Robert Bridges, N. Y.
Louis Bromfield.
Van Wyck Brooks, Westport, Conn.
Maxwell S. Burt, N. J.
Richard Burton, N. J.
Nicholas Murray Butler, N. Y.
Willa Cather, N. Y.
Robert W. Chambers, N. Y.
E. Channing, Cambridge, Mass.
H. C. Chatfield-Taylor, Chicago.
J. B. Connolly, Dorchester, Mass.
Royal Cortissoz, N. Y.
Herbert Croly, N. Y.
Wilbur L. Cross, New Haven, Conn.
Owen Davis, N. Y.
Charles de Kay, N. Y.
Margaretta W. Deland, Cambridge.
Finley Peter Dunne, N. Y.
W. P. Eaton, Sheffield, Mass.
Harry Stillwell Edwards, Macon, Ga.
John Erskine, N. Y.
Chester B. Fernald, London, Eng.
John H. Finley, N. Y.
O. W. Firkins, Minneapolis, Minn.
Jefferson Butler Fletcher, N. Y.
James Forbes, N. Y.
Worthington C. Ford, Boston.
Mary E. Wilkins Freeman, Metuchen, N. J.
Robert Frost, South Shaftsbury, Vt.
H. H. Furness Jr., Philadelphia.
Hamlin Garland, N. Y.
F. H. Giddings, Scarsdale, N. Y.
William Gillette, Hadlyme, Conn.
Lawrence Gilman, N. Y.
Arthur Gordrich, N. Y.
Robert Grant, Boston, Mass.
Ferris Greenslet, Boston, Mass.
A. T. Hadley, New Haven, Conn.
Herman Hagedorn, N. Y.
Clayton Hamilton, N. Y.
A. S. Hardy, Woodstock, Conn.
G. McL. Harper, Princeton, N. J.
Henry Sydnor Harrison, N. Y.
Charles Downer Hazen, N. Y.
William J. Henderson, N. Y.
Burton J. Hendrick, N. Y. City.
Oliver Herford, N. Y.
Jos. Hergesheimer, West Chester, Pa.
John Grier Hibben, Princeton, N. J.
David Jayne Hill, Washington, D. C.
Brian Hooker, N. Y.
Sidney C. Howard, N. Y.
M. A. DeWolfe Howe, Boston.
Hatcher Hughes, N. Y. City.
Archer M. Huntington, N. Y.
Owen Johnson, Stockbridge, Mass.
Robert Underwood Johnson, N. Y.
Edwin Lefevre, Vt.
William E. Leonard, Madison, Wis.
Vachel Lindsay, Springfield, Ill.
Nelson Lloyd.
Robert Morss Lovett, Chicago, Ill.
A. Lawrence Lowell, Cambridge.
John L. Lowes, Cambridge, Mass.
Percy MacKaye, Cornish, N. H.
Edwin Markham, Staten Is., N. Y.
Don Marquis, N. Y.
Edward S. Martin, N. Y.
Edgar Lee Masters, Chicago, Ill.
F. J. Mather, Jr., Princeton, N. J.
John Bach McMaster, Philadelphia.
Edna St. V. Millay, N. Y.
Langdon E. Mitchell, N. Y.
Charles Moore, Washington, D. C.
Paul Elmer More, Princeton, N. J.
Harrison S. Morris, Philadelphia.
Meredith Nicholson, Indianapolis Ind.
Rollo Ogden, N. Y. City.
E. G. O'Neill, Paris.
Albert Bigelow Paine, Bronxville.
Will Payne, Mt. Vernon, N. Y.
Bliss Perry, Cambridge, Mass.
William Lyon Phelps, New Haven.
Arthur S. Pier, Hyde Park, Mass.
Ernest Poole, N. Y.
Herbert Putnam, Washington, D.C.
Agnes Repplier, Philadelphia.
C. G. D. Roberts, Toronto.
Edwin A. Robinson, N. Y.
Elihu Root, N. Y.
Felix E. Schelling, Philadelphia.
Clinton Scollard, Kent, Conn.
Ellery Sedgwick, Boston, Mass.
H. D. Sedgwick, Cambridge, Mass.
E. Thompson Seton, Greenwich, Conn.
Edward Brewster Sheldon, N. Y.
Paul Shorey, Chicago, Ill.
Burton E. Stevenson.
F. J. Stimson, Dedham, Mass.
Julian Street, New York.
Austin Strong, New York.
Booth Tarkington, Indianapolis, Ind.
Henry Osborn Taylor, N. Y.
Augustus Thomas, N. Y.
A. E. Thomas, N. Y. City.
Ashley H. Thorndike, N. Y.
Ridgely Torrence, N. Y.
E. W. Townsend, Montclair, N. J.
Arthur Train, N. Y. City.
William P. Trent, N. Y.
Henry van Dyke, Princeton, N. J.
John C. Van Dyke, New Brunswick, N. J.
Paul van Dyke, Princeton, N. J.
Stewart E. White, Burlingame, Cal.
Charles Warren, Washington, D.C.
Edith Wharton, Paris.
William Allen White, Emporia, Kan.
Brand Whitlock, Toledo, Ohio.
Thornton Wilder, N. J.
Jesse Lynch Williams, Cal.
Harry Leon Wilson, Monterey, Cal.
Owen Wister, Philadelphia.
G. E. Woodberry, Beverly, Mass

DEPARTMENT OF ART.

Herbert Adams, N. Y.
Wayman Adams, N. Y.
Robert I. Aitken, N. Y.
Hugo Ballin, Hollywood, Calif.
George Grey Barnard, N. Y.
Frederic Clay Bartlett, Chicago.
Chester Beach, N. Y.
Gifford Beal, N. Y.
Frank Weston Benson, Salem, Mass.
Louis Betts, N. Y.
Edwin Howland Blashfield, N. Y.
Glenn Brown, Washington, D. C.
George E. Browne, N. Y.
George de F. Brush, Dublin, N. H.
H. R. Butler, Princeton, N. J.
Alexander Stirling Calder, N. Y.
Emil Carlsen, N. Y.
Ralph Clarkson, Chicago, Ill.
Timothy Cole, Poughkeepsie, N. Y.
Ralph Adams Cram, Boston.
C. E. Dallin, Arlington H'ghts, Mass.
Charles Melville Dewey, N. Y.
Frederick Dielman, N. Y.
John M. Donaldson, Detroit, Mich.
Paul Dougherty, N. Y.
Frank Vincent Du Mond, N. Y.
G. W. Edwards, Greenwich, Conn.
Rudulph Evans, N. Y.
Barry Faulkner, N. Y.
John Flanagan, N. Y.
James Earle Fraser, N. Y.
Daniel Chester French, N. Y.
Walter Gay, Paris, France.
Charles Dana Gibson, N. Y.
Cass Gilbert, N. Y.
Walter Griffin, Portland, Me.
Jules Guerin, N. Y.
Alexander Harrison, N. Y.
Childe Hassam, N. Y.
Charles Webster Hawthorne, N. Y.
John Galen Howard, San Francisco.
John Mead Howells, N. Y.
Anna H. Huntington, N. Y.
Francis C. Jones, N. Y.
W. Mitchell Kendall, N. Y.
W. S. Kendall, Hot Springs, Va.
Bancel La Farge, Mt. Carmel, Conn.
Ernest Lawson, N. Y.
Jonas Lie, New York.
Will H. Low, Bronxville, N. Y.
Frederick MacMonnies, N. Y.
H. A. MacNeil, College Point, N. Y.
Paul Manship, N. Y.
Carl Marr, Munich, Germany.
Walter MacEwen, Paris, France.
Edward McCartan, N. Y.
Gari Melchers, N. Y.
C. H. Niehaus, Grantwood, N. J.
Leonard Ochtman, Cos Cob, Conn.
Frederick L. Olmstead, Brookline.
Haig Patigian, San Francisco.
Charles A. Platt, N. Y.
Irving Kane Pond, Chicago, Ill.
John Russell Pope, N. Y.
A. Phimister Proctor, N. Y.
E. W. Redfield, Center Bridge, Pa.
Robert Reid, Brooklyn, N. Y.
F. G. R. Roth, Englewood, N. J.
F. W. Ruckstull, N. Y. City.
W. E. Schofield, Mt. Airy, Pa.
John Sloan, New York.
Albert Sterner, N. Y.
Gardner Symons, N. Y.
Lorado Taft, Chicago, Ill.
E. C. Tarbell, New Castle, N. H.
Douglas Volk, N. Y.
Lionel Walden, Honolulu, Hawaii
Charles Howard Walker.
Horatio Walker, N. Y.
Whitney Warren, N. Y.
Adolph Alexander Weinman, N. Y.
Irving R. Wiles, N. Y.

DEPARTMENT OF MUSIC.

Howard Brockway, N. Y.
John Alden Carpenter, Chicago, Ill.
G. W. Chadwick, Boston, Mass.
Frederick S. Converse, Boston.
Walter Damrosch, N. Y.
Arthur Foote, Brookline, Mass.
Henry Hadley, N. Y.
E. B. Hill, Cambridge, Mass.
Edgar Stillman Kelley, Oxford, O.
Ernest R. Kroeger, St. Louis, Mo.
C. M. Loeffler, Medfield, Mass.
Arne Oldberg, Evanston, Ill.
John Powell, Va.
Ernest Schelling, N. Y.
Harry Rowe Shelley, N. Y.
David S. Smith, New Haven, Conn.
Albert Spalding, N. Y.
Frederick A. Stock, Chicago, Ill.
Deems Taylor, N. Y. C.
Arthur Whiting, N. Y.

GOLD MEDAL OF THE INSTITUTE.

The Gold Medal of the Institute is annually awarded to any citizen of the United States for distinguished services to arts or letters in the creation of original work.

1st—for sculpture—to Augustus Saint-Gaudens. The medal was presented to Mrs. Saint-Gaudens at the meeting held in memory of her husband, Nov. 20, 1909.

2d—for history—to James Ford Rhodes, 1910.

3d—for poetry—to James Whitcomb Riley, 1911.

4th—for architecture—to William Rutherford Mead, 1912.

5th—for drama—to Augustus Thomas, 1913.

6th—for painting—to John Singer Sargent, 1914.

7th—for fiction—to William Dean Howells, 1915.

8th—for essays and belles-lettres—to John Burroughs, 1916.

9th—for sculpture—to Daniel Chester French, 1917.

10th—for history or biography—to William Roscoe Thayer, 1918.

11th—for music—to Charles Martin Loeffler, 1919.

No award of the medal—for poetry—was made in 1920.

12th—for architecture—to Cass Gilbert, 1921.

13th—for drama—to Eugene Gladstone O'Neill, 1922.

14th—for painting—to Edwin Howland Blashfield, 1923.

15th—for fiction—to Mrs. Edith Wharton, 1924

16th—for essays and belles-lettres, to William Crary Brownell, 1925.

17th—for sculpture—to Herbert Adams, 1926.

18th—for history and biography—to William Milligan Sloane, 1927.

19th—for music—to George Whitefield Chadwick, 1928.

20th—for poetry—to Edwin A. Robinson, 1929.

AMERICAN INSTITUTE OF ARCHITECTS' MEDALS.

Gold Medal—Established in 1906; conferred on Sir Aston Webb, Charles Follen McKim, George B. Post, Jean Louis Pascal, Victor Laloux, Henry Bacon, Sir Edwin L. Lutyens, Bertram G. Goodhue, Howard Van Doren Shaw, and Milton B. Medary.

Craftsmanship Medal—Established in 1915; conferred on Henry Mercer in ceramics, on Samuel Yellin in iron work, on Frederick W. Goudy in typography, on Charles J. Connick in design and production of stained glass; on V. F. Von Lossberg in metal work; on Frank Holmes in ceramics; on William D. Gates in terra cotta, and on the Cheney Brothers in textiles.

* Local estimate.

EGGS 100 YEARS OLD—TASTE EM!

Fresh eggs are pickled by immersion for three months or longer in a thick mixture of lime, salt, lye and tea-leaves. Then they are drained and coated with a mixture of clay and rice husks.

While the egg is still comparatively fresh, say a year or so old, the yolk is a brownish green and of a soft, almost pasty consistency. The white is a stiff jelly of a deep, translucent amber. Both have a fishy, ammoniacal odor.

The Chinese eat these eggs raw, accompanying each mouthful with a piece of pickled ginger. As a rule the eggs are eaten when two or three years old.

At ten years or more the entire content of the shell is a deep brown, and these eggs, the best of all, are costly, and reserved for great occasions by the fortunate person who happens to own them.

Such eggs will keep up to a hundred years, and there are legends of eggs which have been eaten after two hundred.

FINANCIAL STATISTICS OF 250 CITY GOVERNMENTS IN 1927.

The United States Department of Commerce announced, Feb. 18, 1929, a summary of the financial transactions of the 250 cities having a population of over 30,000 for the fiscal year 1927.

The total payments for operation, maintenance, interest, and outlays for permanent improvements for these cities were 92.5% greater than similar payments of the government of the 48 states, and 0.1% greater than those of the Federal government for the fiscal year 1927.

EXPENDITURES.

The payments for operation and maintenance of the general departments of these city governments amounted to $1,750,707,093 or $40.98 per capita. In 1926, the comparative per capita was $39.18, and in 1917, $19.07. Payments for the operation of public service enterprises, as water works, electric light plants, and similar enterprises, amounted to $162,470,940; interest on debt, $319,248,702; and outlays for permanent improvements, including those for public service enterprises, $1,091,959,616. The total payments in 1927, therefore, were $3,324,386,351; in 1926, $3,052,645,496; and in 1917, $1,103,021,565.

The per capita net government-cost payments for operation, maintenance, and interest for 146 cities covered by census reports since 1903 were $52.64 in 1927, $50.30 in 1926, $24.58 in 1917, and $16.41 in 1903.

The totals include all payments for the year, whether made from current revenues or from the proceeds of bond issues. Proceeds from the issuance of debt obligations are not considered revenue receipts.

Of the 250 cities only two were lacking in revenues sufficient to meet all operating expenses and interest, while 70 realized enough revenues to meet all their payments for expenses, interest, and outlays and to have a balance available for paying debt.

Of the total municipal payments in 1927, 52.7% was for operation and maintenance of general departments; 4.9%, operation and maintenance of public service enterprises; 9.6%, interest on debt; and 32.8% outlays for permanent improvements.

Of the payments for operation and maintenance of general departments, 38.2% was for education; 20%, protection to person and property; 8.9%, highways; 8.5%, general government; 7.7%, sanitation or promotion of cleanliness; 6.1%, charities, hospitals, and corrections; 4.7%, miscellaneous; 3.4%, recreation; and 2.4%, conservation of health.

The percentages for 1927 show but little change from those for 1926.

Of the total payments for outlays for permanent improvements, the principal items were $394,963,016, or 36.1%, for highways; $198,560,613, or 18.2%, for education; and $196,317,702, or 17.9%, for public service enterprises.

REVENUES.

The total revenue receipts of the 250 cities for 1927 were, $2,945,511,729, or $68.96 per capita. This was $713,084,994 more than the total payments of the year exclusive of the payments for permanent improvements, but $378,874,622 less than the total payments including those for permanent improvements. The revenue receipts included $1,888,704,574 from general property taxes; $64,457,627 from special taxes; $88,941,226 from licenses; $233,292,693 from special assessments; $144,292,408 from subventions, donations, and pension assessments; $136,454,248 from interest, rents, and highway privileges; $290,941,918 from earnings of public service enterprises; and $98,427,035, the remainder, from poll taxes, fines, forfeits, and escheats, and earnings of general departments.

The per capita net revenue receipts of 146 cities covered by census reports since 1903 were $69.77 in 1927, $66.14 in 1926, $31.97 in 1917, and $21.14 in 1903.

INDEBTEDNESS.

The net indebtedness (funded or fixed debt less sinking fund assets) of the 250 cities amounted to $5,479,284,872, or $128.27 per capita, in 1927, this being an increase of 7% over that for 1926. The per capita net debt of 146 cities covered by reports since 1903 was $134.27 in 1927, $128.13 in 1926, $80.75 in 1917, and $44.71 in 1903.

While in 1927 as compared with 1926 there was an increase of $361,112,478 in net debt for the 250 cities as a whole, there were 84 individual cities which showed a decrease in their net indebtedness.

Of the permanent improvements for 1927, 33.1% was financed from proceeds of bond issues.

ASSESSED VALUATIONS AND TAX LEVIES.

For 1927, the assessed valuation of property subject to ad valoram taxation for city purposes was $74,731,205,845 for the 250 cities and the amount of taxes levied for the city government was $2,009,515,436, or $47.04 per capita.

These statistics cover the government of the city corporation proper, and also independent school districts, sanitary districts, park districts, and other independent districts practically coextensive with the cities. They also include a percentage of the financial transactions, debt, and tax levies of the county governments for cities having over 300,000 population, in order that the statistics for such cities may be comparable with those for other cities in this class in which the ordinary county functions are performed by the city government.

ZONED MUNICIPALITIES IN THE UNITED STATES.

More than 37,000,000 people, residing in 754 cities, towns, and villages, comprising three-fifths of the urban population of the United States in all parts of the country, now have the protection afforded by zoning regulations, according to the results of a survey just completed by the Division of Building and Housing of the Department of Commerce as compiled by Normal L. Knauss.

From the standpoint of ordinances adopted, the eight zoned cities by the end of 1916 were augmented to 38 in 1920 and to 76 in 1921. In 1922 New Jersey, New York, Illinois and Massachusetts showed considerable activity, the additions amounting to 101, which increased the total number to 177. During 1923, cities in California and Illinois were more active and many other states adopted zoning for the first time, so the year netted 106 and brought the total to 283 in 1924.

In grouping the zoned municipalities according to population it was found that 56 of the 68 cities having over 100,000 population (1920 census) were zoned; 79 cities with between 40,000 and 100,000; 86 cities with between 20,000 and 40,000; 96 municipalities with between 10,000 and 20,000; and 437 municipalities, towns and villages having less than 10,000.

New York leads the list of states at the end of 1928 with 131 zoned municipalities. New Jersey is second with 84; California, third, with 73; Illinois fourth, with 71; Massachusetts fifth, with 62; Pennsylvania sixth, with 43; Ohio seventh, with 41; Michigan eighth, with 31; Wisconsin ninth, with 30; and Kansas tenth, with 23. Then follow Connecticut and Indiana, 17 each. The other 131 are in 31 states and include also the City of Washington, D. C.

An examination of the zoning ordinances of the 754 municipalities shows that 475 were comprehensive in scope, regulating the use, height and area of buildings. Of the 279 other zoning ordinances most controlled the use to which buildings and premises could be put, although 45 of the number also controlled the area of buildings; and 10 others controlled the use and height of buildings.

Most municipalities reported that their early zoning ordinances were still in effect. A few cities stated that minor changes had been made in zoning ordinances, chiefly in extending boundaries wherein the use of buildings and grounds were controlled and in further regulating the use, height and area of buildings.

The Division of Building and Housing of the Department of Commerce has prepared for those interested a "Zoning Primer," "A Standard State Zoning Enabling Act," "A City Planning Primer," and "A Standard City Planning Enabling Act."

UNITED STATES VOLUNTEER LIFE SAVINGS CORPS.

The United States Volunteer Life Saving Corps, formed in 1870, instructs in rescue work from drowning, resuscitation and first aid, places life saving equipment, surf boats, life buoys, etc., at the most dangerous places throughout the United States, and grants medals and certificates.

Its work has been adopted by the Boy Scouts, Girl Scouts, Y. M. C. A., Y. W. C. A., Red Cross, and practically all municipal life guards in the country, as well as Army, Navy, and other branches of the Government, each organization modifying the work.

The Corps has over 100,000 rescues to its credit and countless first aid cases since its inception. Its membership approximates 75,000 and is active in many states throughout the Union. The headquarters are at 91 Sabin St., Providence, R. I.

President, Dr. Mancel W. Talcott, Providence, R. I.; *Vice President*, William F. Schultz, Hoboken, N. J.; *Second Vice President*, William J. Davids, Seattle, Wash.; *Treasurer*, Henry M. Beling, New York City.; *Secretary*, Benjamin H. Schlomberg, Springfield, L. I., New York.

Labor Review for 1929.

By John J. Leary, Jr.

There were two outstanding developments in labor's world during 1929—the uprising in the cotton textile centers of the south and the substantial spread of the five-day work week now enjoyed by more than 500,000 organized workers.

Less spectacular, but in the long range view possibly as important, was the setting up of machinery to stabilize the cloak and suit industry of New York by the substitution of cooperation for the law of the jungle, and the knitting of the small, highly prosperous business and professional Negro group with the mass of the race in a movement calculated to secure economic equality for the 97% of the race who must live by manual labor.

During the year wages were fairly steady with a slight upward trend, with employment in most industries above normal until the closing months of the year when building, influenced by the high rates for money, slackened and high production in the earlier months led to slowing down of the automobile industry. The two exceptions to the general rule were the coal and textile trades. In the former conditions were slightly worse than in 1928. In the latter, thanks to a change in style trends, there was substantial improvement.

During the year there was, save in the textile mills of the South, no strike of more than local importance, last minute efforts heading off a lockout of all the building trades in New York over a dispute between employing electricians and the local electrical workers union.

The abandonment of generation old policies by employers and employed in the cloak trade came as an aftermath of the collapse of Communist control of the local unions that had brought disaster to both sides. Taking advantage of the chastened spirit of employers and employees, Gov. Franklin D. Roosevelt, working through Lieut. Gov. Herbert H. Lehman and Raymond V. Ingersoll set up a commission with broad powers to govern the industry.

Under the system set up, Mr. Ingersoll as chairman of the commission, has more power than any of the so-called czars in business and sports. The system has been in operation too short a period—something less than six months—to warrant any hard and fast opinion as to its ultimate success. Suffice it to say, therefore, that it has thus far worked well; that the experiment is being closely watched by sociologists, economist and industrialists, and that the consensus of opinions of those best qualified to judge is that at least it insures a reasonable degree of peace and stability to a long troubled industry for a period of years.

The spread of the five-day week, thus far in the main confined to the building and graphic trades, comes after years of agitation and discussion, the determining factor being the increasing use of power-driven machinery and the developments of new processes through the application of discoveries in the laboratories to practical manufacturing, mining and building.

The largest gains were made in New York City, where in one move 140,000 building tradesmen secured the two-day rest period without loss of wages and in Chicago where the compositors secured a contract making five days the rule in the union book and job shops of that center.

Prophecy is always dangerous, but judging the future by the experiences of the past, the best opinion is that the five-day week is here to stay and that in the not far distant future it will be as general as the eight hour day now is, for the trend is toward shorter hours. In this connection it is worthy of note that the railroad brotherhoods are now working for a six hour day.

The southern textile situation burst in the early spring with a series of unrelated strikes in Tennessee and the Carolinas. Chief of these was the general strike of rayon workers in German owned mills in Elizabethton, Tenn., where unorganized workers struck against wages and working conditions. The strike was taken over by the American Federation of Labor which with the aid of the United States Department of Labor worked out a settlement.

The peace was of short duration, being followed by another strike in which union organizers were kidnapped, and troops used as in the earlier strike. The strikers after a brief period returned to work on promises of reforms, leaving the situation still tense. It may work out without further serious disturbance, but the best that can be said of the existing agreement is that it is a truce rather than a settlement.

About the same time organizers of the National Textile Workers Union, one of several "paper" organizations of Communist origin and under Communist control, who had been working in the south for more than two years, called a strike in the Loray Mills, of the Manville-Jenckes Co. in Gastonia, N. C. Clearly a political rather than an economic movement, the strike was soon broken.

The leaders, however, persisted in the pretence that a strike was still on and in various ways tried to revive it. On June 7 a march on the mills which was broken up by police under Chief O. F. Aderholt, was followed by a fracas on grounds maintained by the Communists as strike headquarters in which Aderholt was shot and killed. For the killing 16 were indicted for murder in the first degree.

Judge Maurice V. Barnhill, assigned to try the indictments, granted a change of venue to Mecklenburgh County. The first trial, which attracted world-wide attention, ended abruptly when one of the jurors became a raving maniac. On a second trial seven of the defendants, chief of whom was Fred Erwin Beal, of Lawrence, Mass., were convicted of murder in the second degree and given sentences ranging from 5 to 7 years in State Prison to from 17 to 20 years. As this is written (Dec. 17), the case is on appeal on questions of law.

Gastonia again blazed forth on Sept. 14 when, following an attempt to hold a meeting, Mrs. Ella May Wiggin was shot and killed in a clash between a mob largely made up of mill employes and members of the union. After several inquiries, several members of the mob were held for the grand jury on murder charges.

Five weeks later there was additional bloodshed in Marion, some 70 miles from Gastonia, where earlier in the year the employees of two mills struck under American Federation of Labor leadership. Several union men lost their lives in a battle between pickets and a sheriff's force. In this case, as in the Wiggin case, several members of the posse were held for the grand jury.

Previously, Alfred Hoffman, leader of the strike, and 50 others were arrested on charges of rioting and inciting to rebellion against the state growing out of the refusal of strikers to permit Sheriff Adkins to place the furniture of a strike breaker in a cottage from which a striker had been evicted.

On the trial, the court dismissed the charge of rebellion, but permitted the case to go to the jury on charges of rioting. Alfred Hoffman, organizer of the United Textile Workers of America, was convicted and fined $1,000, and sentenced to one month in jail; and three strikers were sentenced to six months each in the chain gang. Judge Cowper said the sentence was "in no conflict with the right of labor to organize."

Discussion of the southern situation featured the annual convention of the American Federation of Labor in Toronto, which body instructed the executive officers of the federation to initiate a general organizing campaign in the south, with emphasis laid on work in the textile centers.

In the closing month of the year the International Ladies' Garment Workers Union, meeting in Cleveland, celebrated the elimination of the Communist element from the organization and its rebirth, through the culmination of a brief strike, which ended with the formation of the governing commission above referred to and approved plans for a general strike of 50,000 dress and waist makers in January.

Unemployment at the close of the year was on the increase, though it was clear that the abnormal volume of enforced idleness it was feared would follow the debacle in Wall Street had in large measure been headed off through the efforts of President Hoover to restore confidence in basic conditions.

It is worthy of note that for the first time in the history of American industry, a threat of depression was not followed by attempts at wage cutting, perhaps the most tangible evidence yet adduced that organized labor had finally convinced the employing group that the road to prosperity is not paved with low wage scales.

AMERICAN FEDERATION OF LABOR.

The American Federation of Labor has its headquarters in the A. F. of L. Building, Washington, D. C. The national officers, re-elected, Oct. 17, 1929. at Toronto, Can., are:

Executive Council—President William Green, A. F. of L. Bldg., Washington, D.C., Secretary, Frank Morrison, A. F. of L. Bldg., Washington, D. C., Treasurer, Martin F. Ryan, Carmen's Bldg., Kansas City, Mo.; First Vice-President, Frank Duffy, Carpenters' Building, Indianapolis, Ind.; Second Vice-President, T. A. Rickert, Room 506, 175 W. Washington St., Chicago, Ill.; Third Vice-President, Matthew Woll,

Room 701, 166 W. Washington St., Chicago, Ill.; Fourth Vice-President, James Wilson, Second Nat. Bk. Bldg., Cincinnati, Ohio; Fifth Vice-President, ——— I. A. of M. Bldg., Washington, D. C.; Sixth Vice-President, John Cofield, 1138 North Dearborn St., Chicago, Ill.; Seventh Vice-President, Arthur O. Wharton, Machinist Bldg., Washington, D. C.; Eighth Vice-President, Joseph N. Weber, 1440 Broadway, New York, N. Y.

In the Federation there are 105 national and international unions representing 28,865 local unions, 4 departments, 49 State branches, 803 city centrals with a total of 2,933,545 members.

The receipts for the last fiscal year were $609,633.01; expenditures, $575,181.87. The balance on hand was $334,560.57.

Departments—Building Trades, Wm. J. Spencer, Sec.-Treas., Rms. 500-505 A. F. of L. Bldg., Wash., D. C.; Metal Trades, John P. Frey, Sec.-Treas. Rms. 400-403 A. F. of L. Bldg.; Railroad Employees, J. M. Burns, Sec.-Treas., Rm. 402, 844 Rush St., Chicago, Ill.; Union Label Trades, John J. Manning, Sec.-Treas., Rm. 202, A. F. of L. Bldg., Wash., D. C.

The national and international unions affiliated with the American Federation of Labor, with the names of the several Presidents, (or Secretary-Treasurers) and the addresses of the headquarters as of Sept. 1, 1923, are as follows:

Actors and Artists. Paul D. Dullzell, 45 W. 47th St., N. Y. C.

Asbestos Workers. Thomas J. McNamara, Sec.-Treas., 918 Holland Bldg., St. Louis, Mo.

Bakery and Confectionery Workers. Charles F. Hohmann, 2719 Best Ave., Chicago, Ill.

Barbers' International. J. C. Shanessy, Sec.-Treas., 222 E. Michigan St., Indianapolis, Ind.

Bill Posters. William McCarthy, Rm. 821, Longacre Bldg., 42d St. and Broadway, New York.

Blacksmiths. William F. Kramer, Sec.-Treas., 2922 Washington Blvd., Chicago, Ill.

Boilermakers. Charles F. Scott, Sec.-Treas., Suite 504, Brotherhood Block, Kansas City, Kan.

Bookbinders. Felix J. Belair, Sec.-Treas., Rm. 308, A. F. of L. Bldg., Washington, D. C.

Boot and Shoe Workers. L. C. Baine, Sec.-Treas., 246 Summer St., Boston, Mass.

Brewery. Joseph Obergfell, 2347-51 Vine St., Cincinnati, Ohio.

Bricklayers, Masons and Plasterers. John J. Gleeson, 1417 K St., N.W., Washington, D. C.

Brick and Clay Workers. William Tracy, Sec.-Treas., Rm. 440, 323-331 So. La Salle St., Chicago, Ill.

Bridge and Structural Iron Workers. W. J. McCain, 1615-20 Syndicate Trust Bldg., St. Louis, Mo.

Broom and Whisk Makers. Will R. Boyer, Sec.-Treas., 853 King Place, Chicago, Ill.

Building Service Employees. Paul David, Sec.-Treas., 130 N. Wells St., Chicago, Ill.

Carmen. J. M. Ellis, Sec.-Treas., 408 Carmen's Bldg., W. Linwood Blvd., Kansas City, Mo.

Carpenters and Joiners. Frank Duffy, Carpenters' Bldg., Indianapolis, Ind.

Carvers. Frank Detlef, 8605 85th St., Woodhaven, L. I., N. Y.

Cigarmakers. I. M. Ornburn, Rm. 604, Carpenters' Building, 10th and K Sts., Washington, D. C.

Clerks, Post Office. Thomas F. Flaherty, 300 A. F. of L. Bldg., Washington, D. C.

Clerks, Railway. George S. Levi, Sec.-Treas., Seventh Floor, Brotherhood of Railway Clerks Bldg., Court and Vine Sts., Cincinnati, Ohio.

Clerks, Retail. C. C. Coulter, Sec.-Treas., Lock Drawer 248, Lafayette, Ind.

Cloth Hat Workers. Jacobs Roberts, Sec.-Treas., 621 Broadway, New York, N. Y.

Conductors, Sleeping Car. W. O. Murphy, Sec.-Treas., 107 W. Linwood Blvd., Kansas City, Mo.

Coopers. Forrest M. Krepps, Sec.-Treas., Meriweather Bldg., Kansas City, Kan.

Diamond Workers. Andries Meyer, 132 Joralemon St., Brooklyn, N. Y.

Draftsmen. C. L. Rosemund, 200 A. F. of L. Bldg., Washington, D. C.

Electrical Workers. G. M. Bugniazet, 1200 Fifteenth St. N W., Washington, D. C.

Elevator Constructor7. Joseph F. Murphy, Sec.-Treas., 1210 Central Bldg., 191 Joralemon St., Brooklyn, N. Y.

Engineers. Dave Evans, Sec.-Treas., 1003 K St. N. W., Washington, D. C.

Engravers, Metal. John Joos, Sec.-Treas., 118 Middlesex Road, Rochester, N. Y.

Engravers, Photo. Henry F. Schmal, Sec.-Treas., 3136 So. Grand Blvd., St. Louis, Mo.

Federal Employees. Gertrude McNally, Sec.-Treas., 10 B St., S.W., Washington D. C.

Fire Fighters. George J. Richardson, Sec.-Treas., 105 A. F. of L. Bldg., Washington, D. C.

Firemen and Oilers. Joseph W. Morton, 2929 W. Washington Blvd., Chicago, Ill.

Foundry Employees. Leonard Holtschult, Sec.-Treas., 218½, North Tremont St., Kewanee, Ill.

Fur Workers. Harry Begoon, Sec.-Treas., 9 Jackson Ave., Long Island City, N. Y.

Garment Workers, United. J. L. Wines, Sec.-Treas., 619 Bible House, New York, N. Y.

Garment Workers, Ladies. Abe Baroff, Sec.-Treas., 3 W. 16th St., N. Y. C.

Glass Bottle Blowers. Harry Jenkins, Rm. 1007, Colonial Trust Bldg., 13th and Market Sts., Philadelphia, Pa.

Glass Cutters and Flatteners. Joseph L. Fortune, Sec.-Treas., 215 House Bldg., Smithfield and Water Sts., Pittsburgh, Pa.

Glass Cutters, Window. Harry D. Nixon, 414 Clinton Bldg., 8 E. Chestnut St., Columbus, O.

Glass Workers, Flint. Charles J. Shipman, Sec.-Treas., Rms. 200-10 Amer. Bank Bldg., Huron St. and Jefferson Ave., Toledo, Ohio.

Glove Workers. Elizabeth Christman, Sec.-Treas., 311 So. Ashland Blvd., Chicago, Ill.

Granite Cutters. Sam Squibb, 25 School St., Quincy, 69, Mass.

Hatters, United. Martin Lawlor, Sec.-Treas., Rm. 418, Bible House, New York City.

Hod Carriers. A. Persion, Sec.-Treas., 25 School St., Quincy, 69, Mass.

Horse Shoers. Hubert S. Marshall, Sec.-Treas., Rm. 605, Second National Bank Bldg., Cincinnati, Ohio.

Hotel and Restaurant Employees. Robert B. Hesketh, Sec.-Treas., 530 Walnut St., Cincinnati, Ohio.

Hotel and Restaurant Employees. Jere L. Sullivan, Sec.-Treas., 530 Walnut St., Cincinnati, Ohio.

Iron, Steel and Tin Workers. David J. Davis, 500 S. Main St., W.E., Pittsburgh, Pa.

Jewelry Workers. Saml. E. Beardsley, Sec.-Treas., Room 607, 112-18 W. 44th St., New York City.

Lathers. A. D. Yoder, Sec.-Treas., Lathers' Bldg. Detroit Ave. and West 26th St., Cleveland, Ohio.

Laundry Workers. Harry L. Morrison, Sec.-Treas., 799 2d Ave., Troy, N. Y.

Leather Workers. J. J. Pfeiffer, Sec.-Treas., Rms. 608-610 Walsix Bldg., 6th and Walnut Sts., Kansas City, Mo.

Letter Carriers. M. T. Finnan, 405 A. F. of L. Bldg., Washington, D. C.

Letter Carriers, Rural. George F. Klinker, Lafayette, Ind.

Lithographers. James M. O'Connor, Sec.-Treas., 205 W. 14th St., New York City.

Longshoremen. John J. Joyce, Sec.-Treas., 1020 Gerrans Bldg., Buffalo, N. Y.

Machinists. E. C. Davison, Sec.-Treas., I. A. of M. Bldg., 9th and Mt. Vernon Place, Wash., D. C.*

Maintenance of Way Employees. E. E. Milliman, Sec.-Treas., 61 Putnam Ave., Detroit, Mich.*

Marble Polishers, Sawyers, Tile and Marble Setters' Helpers. Stephen C. Hogan, 406 E. 149th St., New York City.

Masters, Mates and Pilots. J. J. Scully, 24 Moore St., New York, N. Y.

Meat Cutters and Butcher Workmen. Dennis Lane, Sec.-Treas., Rm. 604, 160 No. La Salle St., Chicago, Ill.

Metal Workers. W. M. O'Brien, Sec.-Treas., Rms. 635-642 Transportation Bldg., Wash., D. C.*

Mine, Mill and Smelter Workers. Edward E. Sweeney, Rm. 531, Judge Bldg., Salt Lake, Utah.

Mine Workers of America, United. Thomas Kennedy, Sec.-Treas, 1101 Merchants Bank Bldg., Indianapolis, Ind.

Moulders. N. D. Smith, Edwards Bldg., 530 Walnut St., Cincinnati, Ohio.

Musicians. William Kerngood, 37-39 William St., Newark, N. J.

Oil Field and Refinery Workers. J. L. Coulter, Sec.-Treas., Box 1779, Ft. Worth, Tex.

Painters, Decorators and Paperhangers. Clarence E. Swick, Painters and Decorators' Bldg., Lafayette, Ind.

Paper Makers. Arthur Huggins, 25 So. Hawk St., Albany, N. Y.

Pattern Makers. James Wilson, Rms. 1008-9 Second National Bank Bldg., 9th and Main Sts., Cincinnati, Ohio.

Pavers. Edward I. Hannah. 819 Third Ave., New Moore St., New York, N. Y.

Paving Cutters. Albert M. Anderson, Box 130, Rockport, Mass.

Piano and Organ Workers. Jacob Fischer, 260 E. 138th St., New York, N. Y.

Plasterers. T. A. Scully, Sec.-Treas., 301 Castell Bldg., Middletown, Ohio.

Plumbers and Steamfitters. Thomas E. Burke, Sec.-Treas., Machinist Bldg., Ninth and Mt. Vernon Pl., N. W., Washington, D. C.

Polishers, Metal. W. W. Britton, 601 Second Natl. Bank Bldg., Cincinnati, Ohio.

Potters. John McGillivray, Sec.-Treas., Box 6, East Liverpool, Ohio.

Powder and High Explosive Workers. Geo. W. Hawkins, Sec.-Treas., Columbus, Kan.
Printers and Die Stampers. James E. Goodyear, 3974 Amundson Ave., New York, N. Y.
Printing Pressmen and Assistants. Joseph C. Orr, Sec.-Treas., Pressmen's Home, Tennessee.
Pulp and Paper Mill Workers. John P. Burke, Drawer V, Fort Edward, N. Y.
Quarry Workers. Fred W. Suitor, Sec.-Treas., Scampini Bldg., Barre, Vt.
Railway Employees. W. D. Mahon, 260 Vernor Highway E, Detroit, Mich.
Railway Mail. H. W. Strickland, Rms. 506-8 A. F. of L. Bldg., Washington, D. C.
Roofers. Joseph M. Gavlak, Sec.-Treas., 3091 Coleridge Rd., Cleveland, Ohio.
Seamen's. Victor A. Olander, Sec.-Treas., 623 South Wabash Ave., Chicago, Ill.
Siderographers. Daniel W. McCallum, 513 Crittenden St., N. W., Washington, D. C.
Stage Employees. Richard J. Green, Sec.-Treas., Suite 1352, 1440 Broadway, New York, N. Y.
Stereotypers and Electrotypers. Charles A. Sumner, Sec.-Treas., 3110 Olive St., Kansas City, Mo.
Stonecutters. Joseph Blasey, Sec.-Treas., Box 767, Indianapolis, Ind.
Stove Mounters. Frank Grimshaw, Sec.-Treas., 6466 Jefferson Ave. East, Detroit, Mich.
Switchmen. Wm. J. Trost, Acting Sec.-Treas., 3 Linwood Ave., Buffalo, N. Y.
Tailors. Gust Soderberg, 6753 Stony Island Ave., Chicago, Ill.
Teachers. Florence C. Hanson, Sec.-Treas., Rm. 526, 506 South Wabash Ave, Chicago, Ill.
Teamsters. Thomas L. Hughes, Sec.-Treas., 222 East Michigan St., Indianapolis, Ind.
Telegraphers, Commercial. W. L. Allen, Sec.-Treas., 113 So. Ashland Blvd., Chicago, Ill.
Telegraphers, Railroad, Leonard Jackson Ross, Sec.-Treas.; 3673 West Pine St., St. Louis, Mo.
Textile Workers. James Starr, Sec.-Treas; Rms 603-609 Bible House, New York, N. Y.
Tobacco Workers. E. Lewis Evans, Rms. 50-53, Our Home Life Insurance Bldg., Louisville, Ky.
Typographical. Woodruff Randolph, Sec.-Treas., Meridian and 28th Sts., Indianapolis, Ind.
Upholsterers. William Kohn, 230 E. 58th St., N. Y. C.
Wall Paper Crafts. Edwin Gentzler, 935 West King St., York, Pa.
Weavers' Protective. Charles C. Bradley, Sec.-Treas., 9122 89th St., Woodhaven, New York.

*Railway shop craft unions, which with "Big Four" brotherhoods make up so-called "standard railroad unions."

UNAFFILIATED LABOR ORGANIZATIONS.

The Railway Brotherhoods.

Brotherhood of Locomotive Engineers, President, A. Johnston, B. of L. E. Building, Cleveland, Ohio. 80,000 members.

Brotherhood of Locomotive Firemen and Enginemen. President, D. B. Robertson. 901 Guardian Building, Cleveland, Ohio. 120,000 members.

Brotherhood of Railroad Trainmen, President A. W. Whitney, Trainmens Bldg., American Trust Building, Cleveland, Ohio. 150,000 members.

Order of Railway Conductors of America, President, L. E. Sheppard, O. R. C. Building, Cedar Rapids, Iowa. 60,000 members.

Amalgamated Clothing Workers.

Amalgamated Clothing Workers, 15 Union Square, New York, N. Y. Sidney Hillman, Pres.; Joseph Schlossberg, Sec.-Treas.; about 125,000 members.

Industrial Workers of the World.

The Industrial Workers of the World (1915) with headquarters at 555 West Lake St., Chicago, Ill., have a membership of about 20,000. Ch. Gen. Exec. Bd., W. H. Westman; Gen. Sec.-Treas., L. Tulin.

POSITION OF LABOR BANKS IN 1929.

Labor banking continued to mark time during 1929, due to the check given the movement by the troubles of the Brotherhood of Locomotive Engineers, the pioneer in the movement that came to a head in 1926. No new banks, entitled to the descriptive term "labor" were set up in the year.

The Federation Bank & Trust Co., of New York, continued to lead in this group of financial institutions, with the Engineers Bank, of Cleveland, in second place.

A summary follows of the statements of conditions of the labor banks as of June 29, 1929, compiled from reports to the Industrial Relations Section of Princeton University, of which Prof. J. Douglas Brown is director, and printed in The Almanac by his courtesy:

Location and Name of Bank.	Capital.	Surplus and Undivided Profits.	Deposits.	Resources	An. Div.
Boston, Mass.—Engineers Nat'l. Bank of Boston	$500,000	$77,362	$2,736,393	$3,787,714	..
Chicago, Ill.—Amalgamated Trust and Savings Bank	200,000	160,844	3,329,833	3,756,301	6
Cincinnati, O.—Brotherhood of Rwy. Clerks Nat. Bank	400,000	150,333	4,307,998	5,445,275	4
Cleveland, O.—Engineers Nat'l. Bank of Cleveland	1,000,000	357,810	16,923,800	20,081,540	5
Gary, Ind.—Gary Labor Bank	50,000	13,233	663,174	817,778	6
Great Falls, Mont.—Labor Nat'l. Bank of Great Falls	100,000	24,131	696,154	823,255	8
Hammond, Ind.—Peoples Co-operative State Bank	100,000	42,577	1,837,379	2,157,494	4
Indianapolis, Ind.—United Labor Bank and Trust Co.	112,500	27,822	966,615	1,118,764	..
Jackson, Mich.—Farmers' and Workingmen's Sav. Bank	100,000	13,295	939,193	1,069,329	..
Jersey City, N. J.—Labor Nat'l. Bank of Jersey City	400,000	231,186	2,032,177	2,965,130	..
Minneapolis, Minn.—Transport. Brotherh'ds Nat. Bank	200,000	66,246	2,284,296	2,632,974	..
Newark, N. J.—Labor National Bank of Newark	250,000	160,208	3,565,601	4,017,884	5
New York, N. Y.—Amalgamated Bank of New York	650,000	487,172	11,673,794	13,315,804	10
Federation Bank and Trust Company	750,000	1,131,586	16,958,881	19,356,249	12
Paterson, N. J.—Labor National Bank of Paterson	300,000	203,467	5,670,323	6,349,836	6
Portland, Ore.—Brotherh'd Nat'l. Bank of Portland	200,000	64,078	2,240,458	2,705,865	..
Rogersville, Tenn.—Hawkins County Bank	50,000	53,065	593,813	721,878	20
St. Louis, Mo.—Telegraphers National Bank	500,000	238,439	6,341,251	7,563,956	6
Tacoma, Wash.—Brotherh'd Co-operative Nat. Bank	200,000	48,770	2,629,372	3,075,199	..
Three Forks, Mont.—Labor Nat'l. Bank of Montana	25,000	10,168	220,167	255,336	5
Toledo, Ohio—American Bank	200,000	70,466	1,604,600	2,087,707	..
Washington, D. C.—Mt. Vernon Savings Bank	400,000	175,323	3,861,826	4,434,596	6

EFFECT OF MONOTONY IN WORK.

The British Industrial Fatigue Research Board has found, by experiments involving simple muscular activities, such as repeatedly raising and lowering a weight by the flexion and extension of the finger, that continuance of the movements until further movement becomes impossible does not result from muscle exhaustion but that the inhibitory impulse arises in the central nervous system.

From this fact the inhibitory theory of boredom has been evolved and this view of the condition is considered to be particularly applicable to repetitive processes in industry which hold little inherent interest for the worker, for in these processes, unless perfect mechanization of an operation is achieved, any wandering of attention may be harmful either to the worker or to the machine.

Therefore the natural tendency on the part of the worker to allow his attention to stray is constantly being restrained in order that production may be continued, with the result that a state of boredom is induced.

The data secured as a result of the study show that boredom is frequently present among the workers in continuous manual operations of a repetitive type and that it may be the result of the weakening of the stimulus to work produced by the repeated performance of the same task; by the repression of intruding thoughts and desires; by the enforced effort involved in the performance of the work and in the maintenance of the work attitude; or by an active dislike for the task.

It has been shown that boredom is more likely to arise in such processes than in automatic processes.

THE INTERNATIONAL LABOR ORGANIZATION.

(Prepared for The World Almanac by Leifur Magnusson, Director of The Washington Branch.)

As a result of pleas from organized labor in the various billigerent nations there was included in the treaty of peace with Germany, signed at Versailles, June 28, 1919, a separate section, quite apart from the Covenant of the League of Nations, establishing the International Labor Organization. The purpose of the organization is to improve and harmonize labor legislation so far as differences of race and climate make that possible. Equally important are its endeavors to maintain good industrial relations, prevent strikes and promote efficient management. Stated negatively its aim is to abolish bad working conditions, holding that these are illegitimate costs of production.

At the peace conference of Versailles in 1919 a commission composed of representatives of employers, of workers and of the public of the belligerent countries met and drew up the constitution of the organization. Similar constitutional articles were included in the treaties with Austria, Bulgaria and Hungary.

According to the treaty, all members of the League of Nations automatically became members of the International Labor Organization. A special clause was included giving Germany and Austria full membership in the organization until they could become members of the League. The annual labor conference itself admitted Finland to temporary and limited membership prior to its becoming a member of the League. Brazil has continued membership after resigning as League member.

Fifty-five nations now constitute the membership; among the non-members are the United States, Russia, Ecuador, Egypt and Mexico. The population of member countries is 1,490,320,988; that of the others is 315,405,444.

The permanent organization consists of an annual conference of representatives of the member nations and an international labor office controlled by a governing body.

The organization is financed by contributions from the member states, made through the Assembly of the League of Nations. The budget for the organization for 1930 amounts to 8,456,828 gold francs.

The annual conferences are composed of four representatives of each member state, one representing employers, one the workers, and two the government. These conferences discuss an agenda prepared by the governing body, and draw up draft conventions and recommendations affecting industrial conditions, which are presented to the competent authorities in each member nation for ratification or adoption.

The conference is the legislative body of the organization and represents what may be termed the legislative method as against the diplomatic procedure of formulating treaties.

Part XIII. of the treaty imposes no obligation on the members to adopt legislation in accordance with draft conventions or recommendations, but merely the obligation to present them for consideration by the appropriate and competent authority.

When a convention has been ratified by two or more members it becomes an international treaty between the members so ratifying and remains in force for ten years.

The following conventions have been adopted at the thirteen sessions of the conference held annually since 1919; two sessions having been held in 1926 and 1929.

Conventions Concerning: Limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week; unemployment; maternity leave; employment of women and children at night; the minimum age for admission to industrial and agricultural employment and at sea; unemployment indemnity in case of loss or foundering of the ship; seaman's exchanges; the rights of association and combination of agricultural workers; workmen's compensation in agriculture; the use of white lead in painting; the application of the weekly rest in industrial undertakings; the compulsory medical examination of children and young persons employed at sea; equality of treatment for national and foreign workers as regards workmen's compensation for accidents; night work in bakeries; workmen's compensation for accidents; compensation for occupational diseases; simplification of inspection of emigrants on board ship; seamen's articles of agreement; rights of repatriation of seamen; creation of minimum wage-fixing machinery; prevention of accidents to dockworkers; weight of packages transported at sea.

The recommendations frequently supplement by detail the draft conventions, as in the case of workmen's compensation and social insurance conventions. Among other more important recommendations are those relating to emigrants, factory inspection, white phosphorus, codification of seamen's laws, conditions of work in agriculture, communication of statistics of migration, workers' spare time; and accident prevention.

An examination of the list of conventions and recommendations shows how extremely broad is the competence of the International Labor Organization, dealing as it does with questions affecting practically all classes of workers, industrial, agricultural, maritime, professional, and emigrants. The competency has, of course, been questioned but has been upheld both by the conference and, in some instances, by reference to the Permanent Court of International Justice. A decision of the Court handed down in June, 1926, established the competency of the organization to include self-employers (home work, etc.), in the restrictions and limitations established by the draft conventions.

The governing body consists of twenty-four persons, twelve of whom represent the governments, six the workers, and six the employers. Of the twelve government representatives, eight are nominated by the members of chief industrial importance, namely, Belgium, Canada, France, Germany, Great Britain, India, Italy and Japan. The other four elected by the conference in 1928 are Argentina, Poland, Spain and Sweden.

Employers' representatives were elected from Great Britain, France, Italy, Germany, Czecho-Slovakia and South Africa; workers' representatives from France, Great Britain, Belgium, Canada, Germany and Sweden.

The members of the governing body are elected for three years. The governing body meets at least four times each year. It directs the work of the International Labor Office and prepares for the annual conferences.

The International Labor Office is established at Geneva and is independent of the League Secretariat as respects policy and administration.

The office acts as a secretariat for the annual conference, preparing material for the use of the conference and following up the work of the conference, endeavoring to secure the early consideration by member states of the conventions and recommendations adopted at the conferences.

The office reported on Oct. 5, 1929, that there had been 362 ratifications of draft conventions registered; 29 instances of approval by proper authorities but ratification not yet registered; and 127 cases of ratification having been recommended.

The office acts as a center for the collection and dissemination of information bearing on the problems of labor and industry. It edits and publishes several periodicals and numerous reports and studies dealing with problems of industry and employment of international interest.

Among the chief inquiries which the I. L. O. now has under way are studies of the cost of living in 17 European centers in 12 countries requested by representatives of Mr. Ford's foreign interests; a survey of the textile and coal industries; working conditions in the Orient; and old-age pensions. Important recently completed studies dealt with forced labor, migration and employment conditions in the coal industry and in seafaring.

The International Labor Office has branches in London, Paris, Rome, Berlin, Tokio, Delhi, and Washington. The Washington branch is directed by Leifur Magnusson, with offices at 701 Lenox Building, Washington, D. C., from whom information and the publications of the Office may be secured. The World Peace Foundation, 40 Mount Vernon Street, Boston 9, Mass., is an agent in the United States for the distribution of publications of the office.

EDISON GOLD MEDAL WINNERS.

(Awarded by a committee of the American Institute of Electrical Engineers.)

(1909) Elihu Thomson; (1910) Frank J. Sprague; (1911) George Westinghouse; (1912) William Stamey; (1913) Charles F. Brush; (1914) Alexander Graham Bell; (1916) Nikola Tesla; (1917) John J. Carty; (1918) Benjamin G. Lamme; (1919) W. L. R. Emmet; (1920) Michael I. Pupin (1921) Cummings C. Chesney; (1922) Robert A. Millikan; (1923) John W. Lieb; (1924) John W. Howell; (1925) Harris J. Ryan; (1927) William D. Coolidge; (1928) Frank B. Jewett.

WORKMEN'S COMPENSATION AS OF JAN. 1, 1929.

The adoption of workmen's compensation for industrial injuries in lieu of the rule of the employer's liability for injuries due to his negligence stands out in its effect on the status of the worker as one of the most important legal-economic developments of modern times. A right to relief based on the fact of employment, practically automatic and certain, replaces the doubtful contest for a recovery based on proof of the employer's negligence and of the absence of the common-law defenses.
